1886.

REPORT
ON
THE POLITICAL ADMINISTRATION
OF
THE RAJPUTANA STATES
FOR
1885-86.

No. 30-P., dated Mount Abu, 28th August 1886.

*From—*COLONEL SIR EDWARD BRADFORD, K.C.S.I., *Agent to the Governor-General, Rajputana,*
*To—*The Secretary to the Government of India, FOREIGN DEPARTMENT.

I have the honor to submit the Annual Report on the Political Administration of the Native States of Rajputana for the year 1885-86.

2. No deaths or changes have occurred during the year among the principal reigning Chiefs, but in December last, the Raja of the small principality of Nimrana, a youth who was receiving his education at the Mayo College, fell a victim to typhoid fever. He was succeeded, with the consent of the Raja's family, and under the sanction of the Government of India, by a cousin named Janak Singh.

3. The Chiefs of Rajputana have almost without exception continued to maintain an attitude of friendliness and good feeling towards the British Government. In the visit of His Excellency the Viceroy to this province, many of them had an opportunity, of which they were not slow to avail themselves, of demonstrating in a practical manner the sincerity of their loyalty.

4. His Excellency the Viceroy, accompanied by Her Excellency Lady Dufferin and a numerous staff, arrived in Rajputana on the 3rd of November and commenced a tour, which extended over some three weeks, including visits to the capitals of Ulwar, Meywar, Marwar, Jaipur, Bhurtpur, and Dholepur. In every case His Excellency was received in a spirit of cordial welcome and hospitality, which was not only worthy of the character and traditions of the Rajput Chiefs, but which also clearly evidenced the feeling of gratification which each Chief individually entertained at the honor of a Viceregal visit. At Ajmere, where the Viceregal party halted for three days, His Excellency accorded interviews to the Chiefs of Kishengarh, Shahpura, and Jhallawar, while the Istimrardars of the district were received in Public Durbar. Among other notable events which occurred during the period of the Viceregal visit may be mentioned the formal opening on the 7th of November of the Mayo College at Ajmere by His Excellency, and the laying of the foundation stone of the Walter Hospital at Udaipur by Her Excellency Lady Dufferin. A great

impetus was also given by Her Excellency's presence in Rajputana to the encouragement by Native Chiefs of the scheme for the amelioration of the condition of women in India.

5. Another instance of the increasing interest taken by the Native Chiefs of this Agency in questions of scientific and economic progress has been afforded during the year by the alacrity with which they have responded to the invitation to co-operate in the objects of the London Indo-Colonial Exhibition. In matters of this nature, the Jaipur Durbar naturally takes the lead, and it has vindicated its reputation by assisting the Exhibition Committee to make an excellent collection of exhibits, and by presenting a fine wood-work screen and Nakarkhana, which at present forms, I believe, the principal entrance to the Exhibition. The action of the Maharao Raja of Ulwar has been equally generous. At his own request, he undertook to supply, at his personal expense all the exhibits sent from his territory, as well as a marble screen of much beauty for the decoration of the Rajputana Court. Great assistance has also been received from the Chiefs of Jodhpur, Bikanir, Kotah and Bhurtpur, all of whom subscribed towards the screen which has formed so notable a feature on this occasion, while exhibits of interest were also sent from Meywar, Shahpura, Tonk and Jhallawar. All the Chiefs named have received, since the close of the year, a gracious expression of acknowledgment from Her Majesty the Queen Empress for the prompt measures of co-operation which they respectively undertook to secure the success of the Exhibition.

6. The exigencies of leave and appointment have necessitated frequent changes during the year in the ranks of the Political Officers in Rajputana, and it will be seen that out of 12 reports submitted from subordinate Agencies, six only are written by officers who have been in continuous charge throughout the year, of the duties whose progress they describe.

7. Fortunately, however, there has been no instance where the condition of the State rendered such changes politically undesirable, or anything more than temporarily inconvenient. In most cases, the administration of the States has been conducted satisfactorily enough by the Durbar authorities; and the general impression which is left on the mind after a perusal of the reports submitted, is one of quiet but unassuming progress, checked only by occasional petty family dissensions, by disputes between lord and vassal, or by the re-appearance of some still unextirpated crime.

* * * * *

12. In the remaining 16 States of Rajputana there is no circumstance connected with the administration which calls for special remark at this stage, but any changes or improvements of importance are noticed in reviewing the Agency reports.

13. The measures which I reported last year to have been taken by some of the leading States for the instruction of the youth of Rajputana in civil and revenue administration have been continued and extended, and I have every hope that the scheme will be brought to a successful issue.

14. The subject of forest conservancy has received special attention during the year from some of the larger States, the Jaipur Durbar having obtained for a period of five months the services of an officer of the Forest Department of the Government of India to inspect and report upon the forests in its territory.

TOUR.

15. Shortly after the departure of His Excellency the Viceroy from Rajputana, I proceeded on my annual cold-weather tour. Marching with a light camp from Ajmere, I passed through a narrow strip of Kishengarh terri-

tory, where I was met by His Highness the Maharaja of Kishengarh and thence entered the Malpura district of Jaipur. Here I had the opportunity of inspecting the Tori Bund, an irrigation project commenced during the time of the late Maharaja Ram Singh of Jaipur and completed last year. This work is in point of utility one of the most successful in Rajputana, the waters of the new lake irrigating the lands of 17 villages, comprising an area of about 37 square miles. On the 22nd December I arrived at Jaipur and met Mr. Henvey, who had just taken up his duties as Resident of the Eastern Rajputana States. After a stay of a few days I marched towards Sewai Madhopur of Jaipur, along the line of route which was surveyed last year, when proposals were first under consideration for running a light railway to connect Jaipur with the grain-growing districts of Harowti.

En route to Madhopur I left my camp at a convenient point, and paid a short visit to Tonk for the purpose of discussing with His Highness the Nawab and Colonel Muir the financial condition of the State; and the information which has since been before the Government was in some measure the result of that interview.

Rejoining my camp after three days I continued the march to Sewai Madhopur, whence I took the opportunity of visiting the strong fortresses of Rinthumbor and Kandhar of Jaipur, situated in the range of hills which separates the country of the Hara Rajputs from Northern Rajputana. Passing through these hills by a winding cart-tract my route lay across the Chumbal river, through the fertile districts of Kotah and Jhalrapatan. During this march I renewed my acquaintance with many leading Thakurs of the Kotah State, and from Palaitha on the banks of the Kali Sind river, I was able to visit both the Kotah and Bundi Chiefs at their capitals.

I arrived at Jhalrapatan on the 30th January and remained there five days, which were fully occupied in interviews with His Highness the Maharaj Rana and Major Wylie, the Political Agent. From Jhallawar it had been my intention to march through Pertabgurh and Banswara to Kherwara and Udaipur, but owing to the appointment of Assistant Political Agent at Banswara being vacant, and threatened scarcity in the hilly-tracts, I had to abandon this intention.

I accordingly proceeded to Udaipur *viâ* Nimbahera of Tonk, and thence, after two days' halt, *viâ* Kankrowli and Desuri into Marwar. At Desuri I was met by His Highness the Maharaja of Jodhpur and Colonel Powlett. I was able to impress on this Chief, as I had already done on the Maharana of Udaipur, the necessity of affording every help to Major McRae, who was then in the Desuri pass, endeavouring to settle the long-standing boundary dispute between the two States of Meywar and Marwar.

On the 9th of March I broke up the camp and returned to Head-quarters.

GENERAL CONDITIONS.

16. The rainfall of the year, though generally sufficient, and in some parts above the average, was irregular and uneven, and therefore on the whole unsatisfactory.

Accordingly the crops, as might have been expected, were generally indifferent; for, although in Bhurtpur, Kerowli, and Dholepur the harvests are said to have been excellent, and in Jaipur and Kishengarh the agricultural year was a fair one, yet in Bundi, Tonk, Shahpura, and Meywar, both kharif and rabi crops were decidedly below the average, while in parts of the Western Raj-

putana States and of Bikanir, and in the hilly-tracts of Meywar, there were at one time fears of scarcity.

Indeed, had it not been for the bumper harvests of the preceding year, there would have been serious distress in many parts of Rajputana.

The threatening outlook of the agricultural prospects in portions of Marwar and Bikanir formed the subject of a special report to Government towards the end of the year under review. In Southern Marwar and Mullani the autumn crops had almost entirely failed, there was a great scarcity of fodder for the cattle, and it was anticipated that the Rebarries of this part of the country would have been compelled to emigrate, with their camels and sheep and goats, to lands farther south, where forage was more plentiful. In the Nohor tahsil of Bikanir, indeed, an emigration *en masse* had already taken place, many villages having been altogether deserted, none of the inhabitants remaining behind save a few care-takers to protect the property of the fugitives during their absence, while the Suratgarh and Hanuniangarh Parganas were similarly distressed by the want of grass.

Fortunately there was some timely rain in December and January which removed any cause for serious anxiety; the grain supply held out; some judicious remissions of duty and revenue did the rest, and the distress that had threatened passed away.

There is no doubt that the inhabitants of Rajputana generally are better prepared now to meet a famine or a local scarcity like this than they have been hitherto. The surplus grain of a good year is carefully husbanded now to meet such a contingency.

The Famine Code for the use of Native States, received from the Government of India in August last, was circulated among the Political Officers of the Agency and others for an expression of their opinion, and copies have since been forwarded with *khari* to the various Chiefs of Rajputana. The matter formed the subject of a special report to Government only a few months ago: so I need only say here that I feel sure that the intentions of Government will be warmly appreciated by the Chiefs, and that the Code will be a useful guide to their endeavours, should they be called upon to encounter the difficulties and distress of a famine.

The general health during the year under notice was indifferent, for cholera prevailed during the hot weather in almost every State. As usual, it was disseminated from the large concourse of people at fairs, the Singhas Fair at Ujjein, in May, being the cause of most of the cholera in Kotah, Bundi, and Tonk; while the Ramdeora Fair, near Pokharan, in September, carried the disease into Bikanir and spread it through Marwar. Where the season was dry and the soil sandy it was shorter lived and perhaps less virulent than in localities that did not possess these advantages.

In addition to cholera, small-pox in the early part of 1886 was largely prevalent in Jodhpur city, throughout the Harowti Agency and in Shahpura. Only in Bhurtpur, Kerowli, and Dholepur is the general health reported to have been good, and in these three States it was exceptionally good.

Survey operations have been carried on steadily during the year, and in the season of 1885, 1,808 square miles, mostly in Jodhpur territory, had been mapped on a scale of 1 inch to the mile. A detailed survey of Jaipur city and its environs was also made on a 6-inch scale.

The Malwa Survey party completed the work that had been detailed for it to do, and has since been transferred to the Central Provinces. It surveyed,

in detail, on 1-inch scale, 1,157 square miles, mostly in Dungarpur, Banswara, and the Bhil country of Udaipur, the city of Dungarpur; and on 12-inch scale the cantonment of Kherwara. The value of these surveys can hardly be over-estimated.

The revenue settlement of Jhallawar was completed in 1885 and reflects great credit on Major Abbott, under whose personal supervision and direction the work was conducted.

From the printed report recently submitted to Government it appears that the settlement is expected to effect an increase of R75,000 to the total land-revenue of the State. Although the new settlement is distasteful to some who have imaginary or preposterous claims and privileges, and to others as a new thing, there has been nothing as yet to show that it is really unpopular with the mass of the people, and I have good reason to hope that as time goes on, the trivial opposition which its introduction has at present encountered will gradually die away. In Meywar Mr. Wingate has concluded the settlement of the 5-Jat Parganas, and the collections of revenue for the present year are being made in accordance with its terms in the zillas of Rasmi and Sarra.

No serious objections have been made to the rates imposed, and the first instalment of revenue has been collected without difficulty, thus showing that the ryots appreciate the value of the term of 20 years for which His Highness the Maharana has sanctioned the settlement. Mr. Wingate deserves, I consider, very high praise for the care, energy, and tact with which he has conducted this arduous and delicate task.

In Jodhpur, the Land Revenue Survey, which has been in the charge of Major W. Loch, is now almost completed, and his summary settlement and administration of the land revenue have been at once profitable to the Durbar and advantageous to the people. In spite of an unfavorable season the land revenue has been for the most part collected, and notwithstanding the increased income from the land very few complaints have been made.

In Jeysulmere, Mr. Oldham, of the Geological Survey of India, has discovered certain rocks which, he thinks, indicate the existence of coal in those parts. The surmises he has made are being followed up, and should his conjectures prove to be well-founded, the discovery will certainly be of the greatest value to the railway lines in North-West India which are at present put to great expense in providing fuel.

A statement marked A, showing the meteorological observations taken in Rajputana during 1885 is appended (see pp. 53-58.)

JUDICIAL AND POLICE.

17. The following statement gives the number and nature of the cases decided by the International Courts of Vakils in Rajputana during the year 1885:—

| | Meywar. | Jalpur. | Marwar. | Harrowli. | Total. |
|-------------------------------------|---------|---------|---------|-----------|--------|
| <i>OFFENCES AGAINST THE PERSON.</i> | | | | | |
| Murder | ... | 1 | 1 | 1 | 3 |
| Poisoning | ... | 6 | ... | ... | 6 |
| TOTAL | ... | 7 | 1 | 1 | 9 |

| | Meywar. | Jaipur. | Marwar. | Harowti. | Total. |
|---|-----------|------------|------------|-----------|------------|
| OFFENCES AGAINST PROPERTY. | | | | | |
| Highway robbery, with aggravating circumstances | ... | ... | 2 | 2 | 4 |
| Highway robbery without aggravating circumstances | 4 | 6 | 14 | ... | 24 |
| Gang robbery | ... | ... | ... | ... | ... |
| Theft with aggravated circumstances | ... | 2 | ... | 1 | 3 |
| Theft without aggravated circumstances | 1 | 17 | 10 | 7 | 35 |
| Cattle-lifting | 2 | 25 | 21 | 15 | 63 |
| Dakaity | 3 | 47 | 45 | 11 | 106 |
| Burglary | ... | ... | 3 | 2 | 5 |
| Criminal Abduction | ... | 1 | ... | ... | 1 |
| Kidnapping | ... | 1 | ... | ... | 1 |
| Extortion | ... | ... | 1 | ... | 1 |
| Miscellaneous | 3 | 15 | 15 | 8 | 41 |
| TOTAL | 13 | 114 | 111 | 46 | 284 |
| GRAND TOTAL | 18 | 121 | 112 | 47 | 293 |

There is a slight improvement, as compared with last year, in the number of offences against the person, the figures being 9 against 12. As regards the number of offences against property, the Meywar Court has had 13 cases this year against 18 last year; Jaipur 114 against 96; Marwar 111 against 105; Harowti 46 against 58. The total number of cases in the four Courts is therefore 284 this year, as compared with 277 last year.

The subjoined statement indicates the number of appeals instituted and disposed of by the Upper, or Appellate Court, during the year. Of the 66 cases appealed, the decisions in 26 were confirmed, in 7 revised and in 5 reversed, leaving 28 undisposed of at the close of the year.

| AGENCY. | Pending at the beginning of the year. | Instituted during the year. | TOTAL. | Confirmed. | Revised. | Reversed. | Remaining at the close of the year. |
|------------------------|---------------------------------------|-----------------------------|-----------|------------|----------|-----------|-------------------------------------|
| Meywar | 3 | 1 | 4 | 1 | ... | 1 | 2 |
| Jaipur | 5 | 25 | 30 | 13 | 1 | 4 | 12 |
| Marwar | 5 | 10 | 15 | 6 | 3 | ... | 6 |
| Harowti | 4 | 13 | 17 | 6 | 3 | ... | 8 |
| TOTAL | 17 | 49 | 66 | 26 | 7 | 5 | 28 |

The annual report on the working of the Rajputana-Malwa Railway Police will shortly be submitted to Government. The office of the Superintendent was held throughout the year by Mr. R. E. Acklom. Friendly relations appear to have been maintained between the Police and the Railway Staff. A school-master has been entertained, and a beginning made in educating the children of the families in the reserve lines.

There were no collisions attended with loss of life, while the accidents in connection with the working and running of trains were generally of a simple nature. The Superintendent disposed of 166 criminal cases, but he has been relieved of his Civil powers since April 1885.

On the 30th of April 1885, by Foreign Department Notification No. 1329 I, the following Acts of the Supreme Legislature were extended to the portions of the Rajputana-Malwa Railway running through the Native States of Rajputana:—

Act XXVII of 1860 (For facilitating the collection of debts on succession, and for the security of parties paying debts to the representatives of deceased persons).

Act X of 1865 (The Indian Succession Act).

Act XI of 1865 (To consolidate and amend the Law relating to Courts of Small Causes beyond the local limits of the ordinary original civil jurisdiction of the High Courts of Judicature).

Act VII of 1870 (The Court Fees Act).

Act I of 1872 (The Indian Evidence Act).

Act IX of 1872 (The Indian Contract Act).

Act XII of 1877 (The Indian Registration Act).

Act XV of 1877 (The Indian Limitation Act).

Act I of 1879 (The Indian Stamp Act).

Act V of 1881 (The Probate and Administration Act).

Act XIV of 1882 (The Code of Civil Procedure).

The administration of civil justice within the same lands was at the same time re-organized as follows:—

| Railway. | State. | Court of Small Causes. | District Court. | High Court. |
|----------------------------------|-----------------------------------|---|--|---|
| Neemuch-Nasirabad State Railway. | Meywar Tonk . . . | The Cantonment Magistrate of Nasirabad. | The Cantonment Magistrate of Nasirabad. | The Agent to the Governor-General in Rajputana. |
| Rajputana State Railway. | Ulwar . . . | | | |
| Rajputana State Railway. | Bhurtpur . . . | The Judicial Assistant of Ajmere. | The Political Agent, Ulwar. The Political Agent, Bhurtpur and Kerowli. The Resident, Eastern Rajputana States. | |
| Rajputana State Railway. | Jaipur . . . | | | |
| Rajputana State Railway. | Kishengarh . . . | | | |
| Western Rajputana State Railway. | Jodhpur (to the north of Ajmere.) | | | |
| Western Rajputana State Railway. | Jodhpur (to the south of Ajmere.) | The Assistant Commissioner of Merwara. | The Assistant Commissioner of Merwara. | |
| Western Rajputana State Railway. | Sirohi . . . | | | |

By Foreign Department Notification No. 1502 I., dated the 14th of May 1885, the Assistant Commissioner of Merwara was, in virtue of his office, appointed a Justice of the Peace within the portions of the Rajputana-Malwa Railway passing through the States of Marwar and Sirohi.

CRIME.

18. The reports received from Political Officers show, on the whole, satisfactory results as regards the suppression of dakaity. No cases are reported from Bhurtpur, Kerowli, Bundi, and Ulwar, and only 2 occurred in Jaipur; while in Kotah and Meywar the numbers have decreased from 9 to 6, and from 13 to 8 respectively. In Marwar there has been a slight increase, 43 cases against 41 (corrected figure) in the previous year. Thirty-six of these are supposed to be the work of two noted Mina dakait leaders, Padia and Timla, whom the Durbar have not yet succeeded in hunting down. But a special officer has been put on their track, and, considering that such a redoubtable freebooter as Rana Salji was reduced to extremities, something decisive may fairly be anticipated from the present measures.

Enquiries into a dakaity committed at Arandkhera, in Kotah territory, on the 27th of December 1885, having established the fact that the affair was planned and executed by dakaites from the Bhainsrorgurh district in Meywar, where the country is wild and hilly, the Udaipur Durbar have, at the instance of the General Superintendent, Thagi and Dakaiti Department, been addressed with a view to securing better police arrangements in that portion of their territory, and the matter is receiving attention.

In Jaipur, where professional poisoning was not long ago very rife, no case is reported during the year under review. But an instance of Thagi by the administration of deleterious drugs was detected in Ulwar territory, the accused in which was a Jaipur subject, who was convicted and sentenced to imprisonment for life. The apprehenders were suitably rewarded by the Ulwar Durbar.

Although travellers in Bundi have escaped molestation at the hands of dakaites, they have been harassed by thefts committed at halting-places owing to the want of proper accommodation at the encampments. With a view to afford the desired security additional sarais are to be erected.

Cattle-theft appears to be the prevailing crime in Mullani, and is also of frequent occurrence in Bikanir.

Special precautions have had to be taken in Bikanir to prevent suicides by jumping into wells, a practice much resorted to in that city. With this object wooden gratings have been put round the wells, and this contrivance has led to a considerable diminution in the number of deaths.

There was no instance of sati, but two cases of infanticide have to be mentioned, one in Jaipur and the other in Banswara. In the former instance further enquiries showed that the report was not founded on fact. In the other case the accused, a widow of the Mahajan caste, was convicted, but the nature of the punishment inflicted has not been communicated, nor whether the sentence was mitigated on appeal.

Again, this year two witch-murders in Banswara have to be recorded. In one the supposed witch was killed with an axe by a Bhil. The murderer and his accomplices, if any, are still at large, though vigorous measures are being taken to secure their capture. In the other case, in which the woman is said to have been swung for seven days, nearly all the offenders are in custody, and

it is to be hoped that they will be very severely dealt with, as apparently sterner measures than have yet been tried are needed to stamp out this cruel crime.

The occurrence of three serious affrays have to be chronicled. One took place in Jaipur between some sepoy, sent from the capital to assist in the collection of the revenue, and the villagers of Nandpura, in which one man was killed and others were wounded. The account furnished by the Durbar attributes blame, in the first instance, to the villagers for resisting lawful demands, but the enquiry had not then been completed. The second affair occurred on the Bhurtpur-Jaipur border, five men of the latter State being killed. The matter was adjudicated upon by the Jaipur Court of Vakils, which awarded suitable punishments to the guilty parties. The third case was a fight between Bhils on the Meywar-Edur frontier, and was speedily disposed of by a Border Court.

A case of mail-robbery occurred in Meywar territory. The letter-mail from Udaipur was plundered at the village of Bana, distant 27 miles from the capital, on the 28th of January 1886. The bag contained ordinary letters, three registered covers and 12 money-orders, but no cash, a circumstance which renders it difficult to understand the motive for the attack. Prompt measures were taken by the Durbar on intimation of the offence reaching them, and recent reports show that there is some hope of the perpetrators being brought to justice.

On the whole, life and property may be said to be fairly secure in the present day in the Native States. Some evidence of the change that has occurred may be gathered from the report of the Resident, Western Rajputana States, where a vivid picture is drawn of the contrast between the State of Marwar some years ago, and its condition at the present day.

Another sign of this improvement is the immigration which is taking place, notably into the States of Ulwar, Jeysulmore, and Bikanir.

CRIMINAL TRIBES.

19. The conduct of the Bhils has generally been good; and no serious crime is reported to have taken place during the year except at Banswara, where one case of infanticide is known to have occurred, and two cases of alleged witch-swinging are at present under enquiry.

The investigation made by the Second Assistant to the Resident in Meywar into the circumstances of the affray at the Pal of Kodurmal led to the discovery of an old case of witch-swinging, which had occurred some three years before, and subsequently to the conviction of one of the perpetrators of the crime.

An affray of somewhat serious character, in which the Bhils of Jura and of Edur were concerned, was disposed of by a Border Court held at Kharari in January 1886. This Court, which was composed of the Resident, Western Rajputana States, the Acting Political Agent, Mahikantha, and the Second Assistant to the Resident in Meywar, succeeded in settling no less than 56 disputes between the Bhils of the three States represented by the members of the Court.

The whole of the Meywar-Bhil country was threatened during the year with scarcity owing to a wide-spread failure of the crops, but His Highness the Maharana of Udaipur evinced the good-will with which he had accepted the suggestions on this subject made to him on the occasion of his installation, by undertaking relief works, and by constructing tanks in the more distressed parts of the country.

These measures, together with a plentiful crop of mhowa fruit, resulted in securing the Bhils against any apprehension on the score of famine, and it is hoped that the action of His Highness the Maharana may have the still more beneficial effect of cementing the relations between the Bhils and the Durbar.

Colonel Powlett, the Resident for the Western Rajputana States, is able to report that the Bhil population of the districts under his political charge has behaved well. In this quarter of the world far more trouble appears to have been given by the Minas, who are shown to be responsible for most of the dakaiti that has occurred. The Mina dakait leaders, Timla and Padia, are still at large, but special measures have been adopted for their pursuit, and Colonel Powlett has recorded an opinion that the capture of these two notorious robbers would have the effect of reducing dakait cases in the Western Rajputana States to one-third of their present number.

20. Major N. C. Martelli held charge of the appointment of Superintendent of Operations for the Control of Moghias in Rajputana and Central India up to the 30th of June in the year under review, when Captain M. J. Meade took over the duties.

The reports on the working of his office, together with my remarks, have already been submitted to Government under cover of this office letters No. 3935 G., dated the 31st of December 1885, and No. 1613 G., dated the 1st of July 1886, and the year's work has on the whole been satisfactory.

The State of Kishengarh has now been included in the general system of the Superintendent's Operations, and the District Officers in Ajmere are about to submit proposals which will, I trust, shortly result in bringing the Baories of Ajmere under better control.

The Native States of Rajputana generally have evinced good-will towards the Superintendent's work, and have in many cases rendered him very valuable assistance. Captain Meade has worked largely through State officials, and has thus avoided any cause of friction or any feeling of interference which might otherwise have arisen to the detriment of his endeavours.

It is satisfactory to find an apparent decrease in crime among the Moghias. I attribute this to the increased efficiency of the administration in most of the States, by which crime is more easily traced and more effectually punished than has been the case hitherto, and to the feeling of security and reliance on our sincerity gradually growing up amongst the Moghias. They are no longer apprehensive lest the registration of their names should be merely a prelude to their arrest and imprisonment; but have now so far overcome the suspicious promptings of their consciences as to come forward and ask to be enrolled that they may share in the advantages of the arrangements which are being made for their future.

This feeling may be expected to grow as the recollection of their past crimes fade from their memories, and a few years more will, I hope, see this predatory tribe absorbed in the mass of the population around them. But this will require increasing vigilance and careful supervision by the officer in charge of their interests. The Moghias who have already been settled down extend over a very large area, and though Captain Meade has shown great energy and activity in his wanderings among the tribe this year, he cannot afford to allow himself any relaxation of his efforts in the year before him, or they will consider themselves neglected and quickly lapse into their old ways of living.

A good step has been taken this year in the registration, by the Superintendent, of those Moghias who may happen to be confined in the prisons of

Native States. Hitherto such men, when released from prison, thrown upon the world without any means of subsistence, often at a considerable distance from the place they used to call their home, have been very little to blame if they have adopted the easy, and too-often secure, life of the foot-pad or the burglar. In future they will have less excuse, for the Superintendent of Moghia Operations is now supplied with returns from the prisons, which show the domicile of the prisoner before his imprisonment, and enable arrangements for the grant of land to be made with the States concerned prior to the Moghia's release.

The places Captain Meade visited, the number of Moghias registered, the amount of land they possess, the States in which the Moghia rules are in force, and the States to which they have this year been extended, are all recorded in the half-yearly reports referred to above, and do not therefore need to be repeated here.

On the question of the enlistment of Moghias in the Local Corps of Rajputana, I have but little to add to my remarks on Captain Meade's last report. I doubt very much if their enlistment would benefit either the corps or themselves. There are but 16 of them now in the Meywar-Bhil Corps, and the Commanding Officer does not view with favor any considerable increase to their numbers. I am disposed to think that agriculture or trade is at once more suitable and preferable to these men, and would deprecate their enlistment contrary to the wishes of the Commanding Officer, at least for the next few years, by which time the necessity for their enlistment, as a means of reducing them to order, will, I hope, have disappeared.

THAGI AND DAKAITI.

21. The reports of the three sub-agencies of the Thagi and Dakaiti Department in Rajputana have doubtless been placed before the Government of India by the General Superintendent of that Department, and it seems superfluous to add anything to what I have already recorded on this subject under the headings of Crime and Criminal Tribes, beyond the remark that no change has occurred during the year in the departmental distribution of the thagi and dakaiti work.

BOUNDARY SETTLEMENT.

22 The past year has been a busy one for the settlement of boundaries. The most important border in dispute is that between Moywar and Marwar, and Major A. R. T. McRae of the Erinpura Irregular Force, who was appointed in the cold weather to demarcate the line between these States, continued operations until the middle of May, when the excessive heat and the prolonged absence of the Meywar Motamids necessitated a postponement of the work. It is matter for regret that in so long a time but little was accomplished; but the boundary is one on which there are many bitterly disputed points and progress is necessarily slow. Major McRae strove hard to overcome the jealousy of either side, and succeeded in marking a considerable portion at the south end of the line. He then found it necessary to move to a more central portion of the border, but here he met with the same difficulties in inducing the representatives of either State to co-operate with him, and in spite of his efforts but little further demarcation was effected before the close of the operations. This result is to be attributed partly to the long-standing jealousy of the two States in regard to this border, and partly to the impracticable character of the country, but in no sort of way can the responsibility be laid upon the Boundary Officer, whose energy and patience were unflagging. I hope arrangements may be made for the continuation of this year's work in the ensuing cold weather. Major McRae, or some Officer of the Political Department of sufficient standing to secure his commanding the necessary influence

for so important a duty, should, if possible, again be sent with instructions to commence at Dewair, the trijunction between Marwar, Meywar, and Merwara, and to carry the line uninterruptedly through from that point. The advantage of marking a continuous line, over settling central and detached portions, is obvious, and the object of starting from Dewair is, that this is a definitely settled point, from which it should be possible to demarcate a line acceptable to both Durbars.

Colonel J. Biddulph, on being relieved by Mr. T. J. C. Plowden of the charge of the Meywar Agency in December, was deputed to settle three boundary disputes which had been going on for some little time on the Meywar-Merwara border. All these he disposed of in the course of two months, although in one important case, that of Birjal (Merwara) *versus* Sawadri (Meywar) an appeal has been presented by the former. The configuration of the country along this border was found to have led to one or two somewhat peculiar customs, among which may be mentioned the right, often held by villages on one side of the boundary, of pasturing cattle in lands belonging to a neighbouring village of the other side. Colonel Biddulph then proceeded to settle a number of easements on the Ajmere border, where it marches with Kishengarh, Jaipur, Meywar, and Shalipura, and his decisions in all cases were accepted by the representatives of the State concerned and of the Ajmere administration.

Major F. A. Wilson was employed during the cold weather in the settlement of the disputes which have for many years caused trouble on the Meywar-Tonk border, and Captain A. M. Muir was deputed to the Jaipur boundary to decide cases which had arisen between that State and Tonk, Kotah and Kerowli. It is probable that in two of these appeals will be presented.

The demarcation of internal boundaries in Marwar has been vigorously carried on by Major W. Loch, who is reported to have settled or directed the settlement of no less than 300 cases. In Mullani, also, great progress has been made in this respect. Of 493 villages, 396 have been demarcated, and it is understood that the remainder have since been completed.

Some disputes of a serious nature having occurred in Serohi, the Durbar asked for the assistance of a British Officer, and Captain C. Herbert, Magistrate of Abu, was deputed to undertake the work in addition to his ordinary duties. With the help of Colonel Powlett, he disposed, before the close of the year, of about half the cases which had been handed over to him.

EDUCATION.

23. A copy of the Annual Report on the Mayo College at Ajmere is appended. The number of boys on the College roll at the close of the year was 80, the highest figure that has yet been attained. Of this number, only three come from beyond the limits of Rajputana, while among the rest the States of Jaipur and Jodhpur are the most strongly represented, contributing 13 and 14 pupils respectively.

The College was formally opened by His Excellency the Viceroy in November last, His Excellency's visit to Ajmere at that time affording an excellent opportunity of carrying out in a fitting manner this long-deferred ceremony.

The total receipts during the year, including an opening balance of Rs. 3,591-1-10 amounted to Rs. 33,428-13-1, and the total expenditure to Rs. 24,761-15-9, the balance thus remaining in the Ajmere Treasury at the close of the year being Rs. 8,666-13-4.

With the support of several of the Chiefs of Rajputana, a scheme has been inaugurated for the formation of a College Prize Fund.

Major W. Loch has carried out a variety of building operations and other works, which have since last year been left entirely in his hands, and his energy and zeal, both in this and in all his other duties in connection with the College are unabated.

The cause of education in Rajputana generally is progressing, although there is still room in many States for improvement. The standard is highest still in Jaipur and Ulwar, but Meywar has followed suit, and her example may shortly, I trust, be followed in other States. Last year I was able to report that the States of Bhurtpur and Kerowli had awakened to the need for educational reform, and now it is encouraging to see that even in the remote territories of Bikanir and Jeysulmere a new era in educational history has opened.

LOCAL CORPS.

24. In discipline, physique, and drill the four Local Corps of Rajputana may be said to have attained a high standard. The Erinpura Irregular Force, and the Meywar-Bhil Corps, were inspected during the cold weather by Major General A. Carnegie, Commanding the Northern Division of the Bombay Army, and the Deoli Irregular Force and the Merwara Battalion by Brigadier-General T. R. Nimmo, A.D.C., Commanding the Nasirabad Brigade, and both officers have been able to speak in high terms of the general efficiency of the regiments which they have inspected. The reports on the musketry of the Corps are also favorable, although there is still room for improvement in the practice of the Meywar-Bhil Corps. The Merwara Battalion has maintained a high figure of merit, but the greatest improvement is noticeable in the Deoli Irregular Force, to whose officers, both British and Native, great credit is due on this account. This regiment carried off the Challenge Cup, as well as a very large proportion of prizes at the annual Rajputana and Central India Rifle Meeting, which was held this year at their head-quarters.

It is to be observed that in each one of the Inspection Reports, attention is directed by the Inspecting General Officer to the inadequacy of the number of European Officers attached to the Corps under inspection. This is a subject, however, regarding which I have more than once addressed the Government of India, and the importance of which I feel might justify me in making yet another representation during the course of the present year, but unfortunately the Government of India have not been in a position to entertain the proposals submitted, and for the present the constitution of the European Staff of these regiments will of necessity remain unchanged.

Permission for the supply of a new and superior kind of Snider rifle to the Deoli Irregular Force was granted in February last.

Small parties were sent by the Erinpura and Deoli Irregular Forces, and by the Meywar-Bhil Corps, to the Mhow Arsenal for instruction in the manufacture of blank ammunition. In the Merwara Battalion, however, the Commanding Officer hopes to be able to instruct the men regimentally.

Proposals for a reserve scheme for the Merwara Battalion were submitted by Major O'M. Creagh, V.O., the Commandant of the Corps during the year, but no further action is anticipated in this respect, until the Government of India are able to take up the question of reserve for the regular army.

RAJPUTANA-MALWA VOLUNTEER RIFLE CORPS.

25. There has been a further increase in the strength of the corps. In April 1885 the strength was 636, and now, on the 1st of April 1886, the strength is 686 of all ranks.

G. Company, started last year at Sirsa, has turned out a success. Its numbers 76 of all ranks, and is this year the best shooting company of the Corps in the annual course. C. Company at Ajmere, consisting of employes in the Carriage and Wagon Department, though small in numbers, by its existence as a separate company relieves B. Company of about 40 members and thus prevents the latter company, which numbers 96, from being too large. The new Company (K.) started in December 1885 at Indore is also a success. The members of F. Company, which was becoming too large, residing at Indore, Rutlam, Nimuch, and Udaipur were drafted into K. Company to form a nucleus, several new members joined, and the company is getting on very well. The Sergeant Instructor sent to this company proved very inefficient and has been replaced by another man.

The distribution of the Companies now is as follows:—

| | Strength. |
|--|-----------|
| A, B, and C at Ajmere | 201 |
| D at Bandikui | 80 |
| E at Abu Road, Mount Abu and Deesa | 126 |
| F at Mhow and Khundwa | 72 |
| G at Sirsa | 76 |
| H at Jaipur and Phalera | 50 |
| K at Indore, Nimuch, Rutlam, and Udaipur | 81 |
| TOTAL | 686 |

CAPITATION.

The amount of capitation earned in 1884-85, and received in September 1885 for the current year, was ₹13,938-8, and the estimated capitation earned this year is ₹17,750.

DRILL.

The average attendance at drill last year throughout the Corps was 29.43. This year it is 24.84. B. Company is far ahead of any other in constant attendance, the average of this company alone being 61.50.

MUSKETRY.

As the annual course of musketry for volunteers has been entirely altered this year, the figure of merit cannot compare with former years, as the distances, conditions, and number of rounds fired are altered.

The figure of merit of the Corps is 150.36 (170 points representing marksman's qualifications). Shooting has been constantly encouraged in every way; 268,350 rounds of ammunition have been bought in addition to the free allowance granted annually by Government, and the following prizes have been competed for during the year, in addition to the allowance of 2 per efficient granted by Government to Railway Corps, which has been shot for and distributed in company matches during the Adjutant's visits and in his presence:—

| | R | | R | Added from Regimental Funds. |
|--|-----|-----|----|------------------------------|
| 1. Adjutant's Prize | 50 | and | 20 | |
| 2. Agent to the Governor-General's Prize | 100 | ,, | 40 | |
| 3. Commandant's Prize | 100 | ,, | 40 | |
| 4. Maharaja of Jaipur's Prize | 200 | ,, | 48 | |
| 5. Maharao Raja of Ulwar's Prize | 50 | ,, | 20 | |
| 6. Nawab of Jagra's Prize | 50 | ,, | 20 | |
| 7. Dewan of Palanpur's Prize | 50 | ,, | 20 | |

| | R | R | Added from Regimental Funds. |
|---|-------------|------------------|------------------------------|
| 8. Maharaja of Jodhpur's Prize . . . | 100 | and | 40 |
| 9. Raja of Rutlam's Prize . . . | 50 | ,, | 20 |
| 10. Railway Company's Prize . . . | 100. | | |
| 11. Maharana of Udaipur's Challenge Cup | Value R 200 | and R 80 | from Regimental Funds. |
| 12. The Hutchinson Challenge Cup. | | | |
| 13. Skirmishing Prize . . . | R 100 | presented by the | Rajputana-Malwa Railway. |
| 14. Attack Practice Prize . . . | ,, 100 | ,, | ,, |
| 15. Aggregate Scores Prize . . . | ,, 100. | | |
| 16. Raja of Khetie's Prize . . . | ,, 30 | and R 13 | from Regimental Funds. |

UNIFORM.

In accordance with Army Circular of 6th June 1885, ordering scarlet uniform for Volunteers, the companies at Sirsa and Bandikui (G. and D.) were dressed in scarlet. Since then, however, there has been some correspondence on the subject, and the final uniform fixed on for the Corps and sanctioned by Government is as follows:—

Khaki serge full-dress coat and trousers.

Khaki drill working-dress coat and trousers.

White helmet (with Khaki cover), with silvered spike and chain.

The whole Corps has now been provided with new helmets of a much superior quality to the former ones, and with the Khaki drill working-dress. The serge for the full-dress has not been quite settled on yet.

RIFLES, &c.

There are now 686 rifles in charge in the Corps, of which about 530 are being sent this year to be browned at Mhow Arsenal, the Civil Chief Master Armourer on his last visit having reported that they require re-browning badly.

RIFLE RANGES.

The ranges lately built at Abu Road, Rutlam, and Sirsa have been inspected by duly qualified officers and reported fit for use.

There are now 14 ranges in working order, and a site has just been granted by Sir Lepel Griffin for a Volunteer range at Indore.

INSPECTIONS.

The Annual Inspection took place at various stations on the line and the Inspecting Officers seemed generally pleased. There were 423 present in all this year, as against 358 last year.

DELHI CAMP.

A representative company from this Corps, 80 strong, took part in the final manœuvres and in the march past at Delhi last January, and acquitted themselves most creditably, under the command of Captain J. J. Jones.

CLASSIFICATION:

The classification at close of season this year is as follows:—

Extra efficient . . . 439 Efficient . . . 201

(of which 140 were marksmen).

Non-efficient . . . 45.

These figures will not compare with former years, as the musketry qualifications for becoming efficient and extra-efficient have been entirely altered and are generally considered harder.

Captain Wheatley's services to the Corps during the year have been very valuable, and its present flourishing condition is largely due to the zeal and interest with which he performs his duties.

SANITATION, VACCINATION, DISPENSARIES, AND JAILS.

SANITATION.

26. In Native States, as has been observed in previous years, the importance of vital statistics is not as yet fully recognized. Returns have, however, been received for 1885 from five Cities and from two States which had not previously furnished them, while in the returns from those States which have been in the habit of rendering these statistics, a considerable improvement is observed in the amount of information afforded, and we must hope that from year to year additional accuracy may be secured. The statistics from Ulwar are fuller and apparently more correct than those received from the other States, which is accounted for by His Highness the Maharao Raja taking an enlightened interest in this and kindred subjects.

It was stated in the Report for 1884, that a general advance in sanitation had been made by the Native States, and it is satisfactory to be able to mention here that this advance has been continued. It is shown in the cleansing of cities, the improvement in jails and the opening of dispensaries, as well as in the additional interest taken in the laws of health generally. Considerable activity in this direction was displayed in Ulwar, Jodhpur, Jaipur, Bikanir, Udaipur, and Kotah, and the steps previously taken in other States to promote sanitation have been maintained.

VACCINATION.

27. The number of successful (primary) vaccinations increased by 17 per cent. This increase, which occurred in 11 out of 15 States, is most conspicuous in Marwar. In Dholepur, Kerowli, Tonk, and Shahpura less work was done than in 1884. The percentage of success, 95, is higher by 3 per cent. than in the previous year, while the average number of persons vaccinated by each vaccinator (1,391) was less by 28 per cent. than in 1884. The reason of this diminution is that many of the Jodhpur Thakurs were induced to send servants of their own to be trained in the art of vaccination; the amount of work performed by several of them, however, was scanty, owing to the small number of villages owned by their masters. Thirty-five men received instruction, and the large measure of success attending this new departure reflects credit on the Durbar and on Dr. Adams, the Agency Surgeon, for the necessary negotiations must have required patient, judicious, and delicate handling. The establishment, which previously numbered 74, was increased during the year to 118 members. The expenditure was higher by 39 per cent. than in 1884, the enhancement being almost entirely shown under the head of establishment, and due to the larger staff employed during the year under report. The average cost of each successful case was 19 pies against 16 pies in 1884.

DISPENSARIES.

28. Six new dispensaries were opened during the year, *viz.*, three in Bikanir, two in Jaipur (one of which is of a temporary character); and one in Udaipur. In addition to these, the returns of four dispensaries situated in the State of Marwar and belonging to the Northern India Salt Revenue Department, which have previously been omitted, have been included in the report for

1885. The number of institutions, therefore, has risen from 69 to 79. The returns from Sambhur (in Jaipur), which is also under the Salt Department, have been shown in this report for several years past.

The number of in-door patients was more numerous by 17 per cent., and of out-door cases by 3 per cent., the increase being mainly due to the larger number of dispensaries from which returns were received. Excluding those institutions which did not furnish returns in 1884, we find that an enhancement equal to 3 per cent. took place in the number treated, and that while in 37 dispensaries more patients attended, in 32 the amount of sickness was less than in the previous year.

Malarial fever and spleen occasioned the same percentage of sickness (18 per cent.), and of mortality (12 per cent.) as in 1884. Bowel complaints contributed 5 per cent. of the admissions, as in the previous year, and 21 per cent. of the deaths against 17 per cent. in 1884. One thousand four hundred and twenty-six cases of cholera were treated at the dispensaries, and 10 per cent. of the fatal cases in hospital were due to this cause.

The number of cholera cases, however, recorded in the 12 States visited by the disease was 3,166, of which 2,065 proved fatal. In Kotah, and for the most part of Jodhpur, deaths only were registered; but, taking the other States from which returns were received showing the number who recovered, as well as the number who died the mortality was at the rate of 50 per cent. The epidemic was extensive and prolonged, ranging over Bhurtpur, Kerowli, Ulwar, Jaipur, Pertabgarh, Tonk, Shahpura, Jhallawar, Kotah, Dholepur, Jydhpur, and Bikanir, and appearing in the cantonment of Deoli. It continued from the 21st of March till the 15th of October.

Five hundred and thirty-seven major operations were performed at the different dispensaries, and of these 25 proved fatal, compared with 515 operations and 12 deaths in 1884. Operations for the relief of cataract increased from 17 to 43, 33 of which were done by Dr. Handley in the Jaipur State. Minor operations were more numerous by 29 per cent., the numbers being for 1885, 24,529, and for 1884, 18,876.

The expenditure was greater by nearly 16 per cent. The increase which is chiefly shown under the heads of Establishments and medicines is due to 10 additional dispensaries being entered in the returns for 1885. The average cost of each case treated was 48 pies, or 4 pies more than in 1884, while the average expenditure on each diet, 14 pies, was 2 pies less than in the previous year.

JAILS.

20. In the 13 jails from which returns are received, the daily average number of prisoners was 3,271 against 3,020 in 1884. The total number of cases treated in hospital and the average daily sick were higher by 6 per cent. and 9 per cent. respectively, while the mortality, which was heaviest during the last quarter of the year, fell from 45 to 29 per mille, which is the lowest death-rate yet recorded for the jails of Rajputana. Excluding cholera, however, the ratio was only 27 per thousand.

Taking first the nine jails in which the daily average number of prisoners exceeded 100, we find that in five of them the mortality was higher, and in four it was lower than in 1884, the most marked fall being at Dholepur and Jaipur, where the death-rate dropped from 117 to 38, and from 75 to 27 per thousand respectively.

There are four small jails in which the average daily number of prisoners aggregated 264. In two of these (Seroli and Shahpura) there were again no deaths during the year; but at Kerowli the mortality was 51 per mille, which is

the highest ratio returned in any of the Rajputana prisons for the year under review. Five prisoners died in this jail in 1885, the death-rate showing a large reduction on that for 1884, when it was 88 per thousand.

Three prisoners were attacked by cholera in the Jaipur jail, all of whom died, and four seizures, with two deaths, occurred in the Kotah prison.

Some improvements have been effected during the past year in the ventilation and in the latrines of the Jaipur jail, which is in a very much better sanitary condition than it was a few years ago; but, as stated in the report for 1884, so long as the present overcrowding continues, the prisoners are unlikely to remain healthy. It is hoped, therefore, that the works for the enlargement of the building which are now under consideration may be commenced during the current year. New jails are being erected at Bikanir and Udaipur, and it is expected that the one in the latter city, which is calculated to accommodate 400 prisoners, will be ready for occupation in about three months. Improvements mentioned in former reports as having been effected in other prisons have been maintained, but in several of them the great evil of crowding, though it is less than it used to be, still exists. The conditions under which the prisoners live have, however, been greatly ameliorated within the last decade, and every year sees an advance made in the right direction.

30. The movement for improving the medical education of women, recently initiated by the Countess of Dufferin, has made itself felt in Rajputana, and many of the Chiefs have subscribed liberally to the Fund bearing Her Excellency's name. Here, as in other parts of India, a wide field for employment is being opened to capable female practitioners, and there seems little reason to doubt that it will be occupied by them before very long. Thanks to Lady Dufferin, the supply of a superior class of trained women will probably be equal to the demand, which, though only now being created in this Province, is certain year by year to extend and to increase.

POST OFFICE.

31. The operations of the Imperial Post Office in Rajputana are being largely extended, as will be seen from the statements (B and C) which are attached (see p. p. 59 & 60).

During the year 41 new post offices have been opened and 657 miles of new runners' mail lines have been arranged. A third statement (D) shows the correspondence delivered in Rajputana during the past two years. There is a net increase of 870,134 articles delivered in 1885-86 over the returns of the previous year, or 18.89 per cent.

The amount realized during the year by the sale of postage labels at the Treasuries of Ajmere, Sambhar, and Didwana, amounted to Rs. 1,59,582-10-3, an increase of Rs. 66,338-4-9 over the sales of 1884-85.

The Imperial postal system has been introduced during the year into Marwar and Bikanir.

The Meywar Durbar have permitted British post offices and mail lines to be established at various places in their territory, but not in supersession of their own post.

The Nawab of Tonk has also applied for Imperial post offices and mail lines in that State.

Ordinary letters addressed to persons residing in the interior of Ulwar, Bhurtpur, Kotah, and Jhallawar are made over to the Raj Post Office for delivery. This Raj Post Office realizes 3 pies over and above the Imperial postage as its own perquisite.

PUBLIC WORKS.

32. The total expenditure on public works in the province, exclusive of the outlay on irrigation in Ajmere-Merwara, was Rs33,51,884, as follows:—

| <i>R</i> | |
|--------------------------------------|------------------|
| Imperial | 3,20,992 |
| Incorporated Local Funds | 21,930 |
| Contributíonal | 52,663 |
| Native States of Rajputana | 29,56,299 |
| TOTAL | 33,51,884 |

In the following tabular statement the expenditure on public works in the States of Rajputana during the last six years is compared:—

| STATE WORKS. | 1879-80. | 1880-81. | 1881-82. | 1882-83. | 1883-84. | 1884-85. | |
|------------------------------------|-----------------|-----------------|------------------|------------------|------------------|------------------|---|
| | <i>R</i> | <i>R</i> | <i>R</i> | <i>R</i> | <i>R</i> | <i>R</i> | |
| Jodhpur Railway | ... | ... | 3,11,215 | 12,493 | ... | ... | c Working of open line. |
| First section to Pali | ... | ... | ... | ... | 3,507 | 39,609c | |
| Second section to Luni | ... | ... | ... | ... | 3,55,000 | 1,26,131 | |
| Third section to Jodhpur | ... | ... | ... | ... | ... | 2,00,596 | d For 12 months ending 31st December 1884. a For 9 months ending 31st December 1883. b For 16 months ending 31st December 1883. |
| Meywar | 45,000 | 63,879 | 4,01,816 | 3,48,684 | 2,96,000 | 2,09,336 | |
| Marwar | ... | ... | ... | ... | 2,50,000 | 1,52,635 | |
| Jaipur | 2,96,442 | 3,36,234 | 6,14,698 | a7,95,330 | 6,01,346 | d9,23,249 | |
| Ulwar | 74,990 | 55,553 | 1,29,070 | 1,99,118 | 1,68,967b | 2,03,845 | |
| Kotah | 2,06,085 | 2,07,128 | 2,60,635 | 3,22,553 | 3,07,906 | 3,08,265 | b For 16 months ending 31st December 1883. |
| Jhallawar | 1,61,358 | 1,16,999 | 1,47,883 | 2,44,828 | 2,05,628 | 1,55,379 | |
| Dholepur | 3,300 | ... | 29,864 | 46,690 | 58,209 | 46,343 | |
| Kerowli | ... | ... | ... | 12,738 | 16,831 | 7,407 | |
| Bundi | R 1,500 | ... | ... | ... | ... | ... | |
| Tonk | 5,000 | ... | ... | ... | ... | ... | } |
| Shahpura | 12,000 | ... | ... | ... | ... | ... | |
| TOTAL | 8,05,675 | 7,79,793 | 18,95,181 | 19,82,434 | 22,63,394 | 23,72,795 | |

This comparison is both interesting and encouraging. The reports submitted by the officers whose services have been lent to the different States show that where efficient officers are lent much useful work can be done. The expenditure of the year under review, amounting to Rs29,56,299, has been carried out in the following proportions:—

| <i>R</i> | |
|---|------------------|
| Meywar | 3,55,000 |
| Marwar, including Jodhpur Railway | 7,72,227 |
| Jaipur for year ending 31st December 1885 | 11,05,005 |
| Ulwar | 2,26,191 |
| Kotah | 2,20,773 |
| Jhallawar | 1,19,888 |
| Dholepur | 43,837 |
| Kerowli | 1,08,378 |
| TOTAL | 29,56,299 |

Nearly the whole of this sum has been expended under the supervision of officers of the Public Works Establishment lent by Government.

MILITARY.

33. The Government of India having placed a restriction on Public Works expenditure, this year's report is devoid of any special interest, many works sanctioned and approved having had to be deferred during the year. The outlay on repairs was also limited, and only a few minor works were carried out.

Owing to the death at Nasirabad of seven men, caused by lightning, on the 23rd August 1884, lightning conductors of an inexpensive character were provided to barracks and hospital buildings occupied by European troops at Nasirabad and Taragarh at a total cost of ₹2,928. For the same reason cotton ropes for hanging punkhas in the European barracks at Nasirabad were substituted for the iron rods there in use at a cost of ₹1,087. At Mount Abu, five additional servants' quarters to the station hospital were erected at a cost of ₹1,169. At Deesa special repairs, costing ₹23,069, have been executed during the year to the European Infantry Barracks, to make them ready for the reception of the troops.

CIVIL BUILDINGS.

34. For the same reason as given under the head Military, the expenditure was restricted under this head also. No new large works were therefore undertaken during the year, the only major works carried out being for providing a lightning conductor to the Mayo College building, with a view to protect it from damage by lightning, to which it is exposed by reason of the mass of iron work at the top of the tower, and the number of copper finials fixed at prominent places on the building. The conductor was fixed at a cost of ₹2,942, on an estimate sanctioned by the Government of India for ₹3,000.

The progress of the work on the new Telegraph Office at Ajmere was very slow during the year, owing to the retrenchment of expenditure ordered by the Government of India. This building was commenced in November 1884 and completed at end of the year under report, at a total cost of about ₹ 25,300, against the sanctioned estimate for ₹26,447. The Treasury building at Didwana estimated to cost ₹4,708 was finished in July 1885 at a cost of ₹4,644. An expenditure of ₹2,456 was incurred during the year on the additions and alterations to the Salt Commissioner's House and the new Treasury and Guard Rooms, estimated to cost ₹4,121.

COMMUNICATIONS.

35. The same remarks as to limit of funds under the heads Military and Civil Buildings, apply to this head also, and, in consequence of this limit, little progress was made during the year towards the construction of the Abu cart road. A third revised estimate for this work, amounting to ₹1,42,087, was sanctioned by the Government of India in January 1886. It provides for completing the road, making it 12 feet wide throughout, improving the gradient in parts, raising the retaining walls wherever necessary, filling in earth-work as required, and building parapets at dangerous places, &c.

LOCAL AND CANTONMENT FUNDS WORKS.

36. The new school-house for the Bazar at Nasirabad, mentioned in last year's report was completed during the year, and the total outlay up to date was ₹11,322 against the sanctioned estimate of ₹10,906. A revised estimate, including floor in yard, which has not been done, has been prepared for sanction. The building was made over for occupation on 1st January 1886.

FUNDS SUPPLIED BY THE MILITARY DEPARTMENT.

37. The construction of an open low-sided truck and one covered goods-wagon for the use of the Artillery and Cavalry at Deesa in training for railway embarkation, was sanctioned by the Government of Bombay in the Military Department for R2,223, and executed in accordance with the standard plans at a cost of R2,177.

MEYWAR.

38. The Budget allotment for expenditure during the year stood, after some modifications, at R 3,55,000, thus divided into different heads:—

| <i>A.—New works—</i> | <i>R</i> |
|--------------------------------------|------------------------|
| 1. Buildings | 1,59,000 |
| 2. Roads | 43,000 |
| 3. Irrigation works | 45,000 |
| 4. Udaipur Gardens | 30,000 |
| 5. Miscellaneous | 15,000 |
| TOTAL | <u>2,92,000</u> |
| | |
| <i>B.—Repairs of existing works—</i> | <i>R</i> |
| 1. Buildings | 20,000 |
| 2. Roads | 20,000 |
| 3. Irrigation works | 23,000 |
| TOTAL | <u>63,000</u> |
| GRAND TOTAL | <u><u>3,55,000</u></u> |

NEW BUILDINGS.

The principal items under this head were—

A new Central Jail.

Completion of Palaces of Sujangarh, Jagniwas, and Shimbluniwas.

The Walter Hospital, Udaipur.

DISTRICT SCHOOLS.

Dispensaries.

Minor works at Chitor and elsewhere.

The new Central Jail will accommodate 450 male prisoners. It includes a Jail Hospital Darogah's dwelling, and lines for guard. The buildings were well advanced and are expected to be ready in July next.

On the Palaces good progress was made, but they are not expected to be ready before the end of the next financial year.

The district schools and dispensaries undertaken comprise one school for 150 boys, which was completed; four schools for 75 boys each, all well advanced, and three dispensaries, of which two were completed, and one well advanced.

The Walter Hospital was commenced only lately, and is likely to be completed next cold weather.

NEW ROADS.

About R35,000 were being spent on the new road from Chitor to Mangarwar, 30 miles long. The approaches to the bridges were completed, and metalling is expected to be completed throughout during the rains. Two new dak bungalows were undertaken, of which one was completed and the other

well advanced. Stabling for horses at distances of 10 miles apart was almost completed. The work on the road from Udaipur to Eklingji over the Chirwa Ghat was continued.

NEW IRRIGATION WORKS.

Under this head, the following chief works are comprised:—

A number of small tanks in the hilly tracts south of Udaipur.

A tank in the Sairan district.

An irrigation canal from the Raisamand lake.

Supplying iron sluices for irrigation from the Raisamand and Jaisamand (or Dhebar) lakes.

The tanks in the hilly tracts and that in the Sairan district are not properly new works, but the repair and enlargement of old tanks. These were, however, in so damaged a state and are in some cases being so enlarged and improved that the works, when complete, will form practically new tanks.

None of these works being of any magnitude, no special notice is called for, the only feature of importance being, that all are being provided with suitable waste weirs and sluices, which are extremely deficient in the old works. The canals from the Raisamand lake at Kankrowli will be capable of bringing about R2,500 bighas of new land under irrigation.

At present there is no suitable means of controlling the drawing-off of water from the lake, and the outlet channel does not command a sufficient depth of water in the lake. This channel is, therefore, being lowered 10 feet, and an iron sluice fixed; when complete, the water can be drawn off to a depth of 17 feet below the crest of the waste weirs. A similar sluice is also being fixed in the Jaisamand (or Dhebar) lake, from which at present comparatively little water can be obtained for irrigation.

GARDENS AT UDAIPUR.

On these gardens, the amount of R30,000 include roads, buildings, drainage, &c., considerable progress has been made, and the laying out should be completed during 1886-87. The water-supply from the Pichola lake was complete.

MISCELLANEOUS.

This head chiefly includes works of sanitation which were carried out as far as possible and as far as funds permitted. There is yet much to be done in this way, which will be undertaken gradually.

REPAIRS.

The existing buildings were maintained in good repair. R 6,000 were allotted for repairs to the city walls, which in places is in a very dilapidated state. The road repairs include R10,500 for Udaipur and Mangarwar road, and R9,000 for roads near Udaipur. The irrigation repairs were mostly to the large dam at Kankroli, and the filling-up of the space between the two walls of the dam at Jaisamand,—the latter work being done chiefly to afford work to the Bhils during the present scarcity in the hill tracts south of Udaipur.

MARWAR OR JODHPUR.

39. The Jodhpur Railway from Marwar Junction on the main Rajputana-Malwa Railway to Jodhpur city. Total length 64 miles, the last section from the Luni river to Jodhpur city 20 miles, was opened to traffic in March 1885.

The following is an abstract of the results of the working of the Railway during 1885-86 :—

| RECEIPTS. | | Expenditure. | |
|-----------------|----------|---------------------------------------|----------|
| | R | | R |
| Coaching . . . | 1,10,000 | Maintenance of line | 20,200 |
| Goods | 73,000 | Locomotive expenses | 23,514 |
| | | Carriage and Wagon expenses | 1,200 |
| | | Traffic and Wagon expenses | 10,900 |
| | | General charges | 3,000 |
| | | Special and Miscellaneous | 3,650 |
| | | TOTAL | 62,464 |
| | | Net Profit | 1,20,536 |
| TOTAL | 1,83,000 | GRAND TOTAL | 1,83,000 |

The figures in this statement differ somewhat from those in the report submitted to the Railway Department, the latter being shown for the calendar year.

From the above it will be seen that the receipts during 1885-86 amounted to R1,83,000, against which the working expenditure was R62,464, leaving R1,20,536 as net profits, which gives a percentage of 10.92 on the capital for the year R11,03,612.

The opening of the line to the city of Jodhpur gave a great impetus to passenger traffic, the receipts per train mile rose to 2.10 from 1.04 in the previous year. The goods traffic per train mile, however, only rose from 1.02 to 1.40 per train mile.

The high price of coal keeps up the locomotive expenses, but English coal at about R30 per ton is being used instead of Bengal coal, at about R28 per ton, and has reduced the consumption about 4lb per train mile.

At the beginning of the year A class Engines, hired from the Rajputana-Malwa Railway, were in use, but, being found unsuitable for the line, E class have been adopted.

Mr. Home, the Manager, states that nothing has been placed in a sinking fund for renewals or repairs, and that the large profits for the year are chiefly due to the line; rolling-stock and engines being new and requiring little or no repairs, so that it is not to be expected that the high percentage of profits to capital can be maintained. Still credit is due to him for good work and management.

The estimate for the branch of this railway to Pachhadra, amounting to R11,49,200, was sanctioned in August last, and R4,75,245 was spent upon it.

The earth-work has been completed all but the last 2 miles. The ballast is more than half done, and the stations of Balotra and Sumduri, with staff-quarters at both places, are ready for roofing.

The total amount laid out by the Marwar Durhar on Public Works during the year was R7,72,227, of which R62,464 were spent as the working

expenses of the open Railway line, ₹5,65,695 as the capital outlay on the line, and ₹1,44,068 on Public Works generally. Rupees 37,000 were spent on the aqueduct designed to carry the water of the Balsamand lake and intervening hills into the Futeh Sagar and Gulab Sagar tanks at Jodhpur. The rainfall was only about 12 inches, but both the tanks were filled to overflowing, only 2 feet in depth was taken from Balsamand, and so this was left nearly full at the end of the rains.

The total cost has been ₹1,34,654, and the work appears to answer its purpose admirably—

| | | |
|---|--------|-----------------------------------|
| ₹ | 7,700 | were spent on roads. |
| „ | 8,620 | „ on Captain Loch's bungalow. |
| „ | 10,895 | „ on Pawta bungalow. |
| „ | 16,323 | „ on piping in Laika Bagh. |
| „ | 8,038 | „ on ghopra tank and other items. |

JAIPUR.

40. The Executive Engineer, Lieutenant-Colonel Jacob, submits, as usual, a printed report on the Public Works Department of the Jaipur State.

The report is for the 12 months ending 31st December 1885. The expenditure was ₹11,05,005, distributed thus—

| <i>Original works—</i> | <i>₹</i> |
|---|-------------|
| Civil Buildings | 95,374 |
| Communications | 26,812 |
| Repairs | 1,30,123 |
| Irrigation | 4,28,511 |
| Miscellaneous public improvements | 2,94,946 |
| Imarut Department | 94,272 |
| Establishment | 31,971 |
| Other items | 2,996 |
| | <hr/> |
| TOTAL | 11,05,005 |
| | <hr/> <hr/> |

This is exclusive of an expenditure of ₹13,566 on works carried out for private individuals. The expenditure shown above is the largest which has yet occurred on Public Works in Jaipur or in any other State in Rajputana in one year. It is satisfactory to find a State willing to spend so freely on Public Works, and speaks well for all concerned.

The charges for supervision amount to 5.6 on the outlay, which is satisfactory.

Of the civil buildings, the chief works are the construction of the Albert Hall, on which alone ₹72,630 were spent, and the erection of a large Hydraulic Steam Cotton Press, on which ₹60,037 have been spent during the year, making the total on this work ₹1,63,854 up to date.

Of communications, the chief new work is the completion of the metalled road towards Kerowli from Hindon to the Kerowli border, $7\frac{1}{2}$ miles in length, the Kerowli Durbar have made the portion, and the capital of the Kerowli State is now connected with the Rajputana-Malwa Railway by a good metalled road, 43 miles being in the Jaipur State. In the previous report mention was made of a proposal for a metre-gauge railway to connect Jaipur with Kotah, the granary of Rajputana. No notice, however, is made of this in the present report, and it is understood that the Durbar are not prepared to take up the project at present. This perhaps is to be regretted as any railway lines made by Native States as feeders to existing State Railways cannot but be an advantage if properly carried out.

As regards the water-works for the supply of the city of Jaipur, the large sand bund made in the Amanisha nala, 71 feet high and 400 feet thick at the base, appears to have succeeded well. The whole of the rains of 1885 were impounded, the water rising to a height of 24 feet only, and there is now no fear of the supply ever running short in the city. If the percolation from the bund is not sufficient to keep the pumps supplied, as much water can be drawn by pipes from it as may be required. The top of the bund is 30 feet wide and forms a solid bridge across the nalla and proves a great convenience to the public.

The increase in the consumption of water was 42,896 gallons a day over the previous year.

| | |
|--------------------------------|---------|
| | Gals. |
| It was in 1883 daily | 497,834 |
| Ditto 1884 „ | 518,002 |
| Ditto 1885 „ | 560,890 |

The total cost of maintenance for the year under review, 1885, was ₹36,495; of this sum ₹26,596 was paid for fuel only and comes to 2.83 annas per 1,000 gallons. It appears from the total daily consumption that the amount per head of the population is somewhat less than 5 gallons per diem.

As regards irrigation, the expenditure for 1885 amounted to ₹4,28,511—this perhaps is one of the most satisfactory items of expenditure by the State—as it is State money spent in the State and on remunerative works, and tends to prove that the Durbar realize the advantages of a liberal policy.

One large work, Tori Sagur, was completed and filled for the first time 37 feet deep, and formed a reservoir about 5 square miles in area, from which one canal is 26 miles long 20 feet wide, and another at present 9 miles long 15 feet wide, with about 40 miles of distributaries commanding first class soil; other good projects are being carried out, and are alluded to in Lieutenant-Colonel Jacob's report.

The revenue realized from irrigation for 1885 amounts to ₹1,35,117.

The area irrigated was as follows:—

| | |
|-------------------|-------------|
| By flow | 61,290 |
| „ lift | 1,940 |
| | <hr/> |
| TOTAL | 63,248 |
| | <hr/> <hr/> |

From the printed report under review it appears that the Jaipur State has spent on irrigation since 1868 no less than ₹23,87,952 and has realized ₹8,62,911 up to date. This does not include the revenue since August last. The expenditure, however, includes works in progress, some of considerable importance, which cannot be expected to yield any return just yet, and also items which are not in their nature remunerative, such as surveys, &c.; if these are deducted from the total outlay the amount realized, it is stated, would bear a proportion of about 51 per cent. on the total outlay, which may be considered very satisfactory. The average cost for supervision and guarding the tanks, pay of the establishment, &c., comes to 2.72 annas per bigha.

The expenditure on the maintenance of the public gardens, called the Ram-Newas was ₹17,889. The gardens appear to have been well kept up and to be appreciated by the public.

Lieutenant-Colonel Jacob submits, with his report, reports, also printed, of his two Native Assistant Engineers and of the Darogha of the Imarut, which, though not calling for any particular notice, show that all under him appear to have plenty to do and do it well.

The report by Mr. Tellery, the Superintendent of the Gas Works, is also printed and attached, and is satisfactory. The total expenditure on the Gas Works during 1885 was *₹*46,798, the revenue realized from all sources *₹*2,828. The actual cost of production appears to have been reduced from *₹*9-13-11 in 1884 to *₹*8-11-8 per 1,000 cubic feet in 1885, and shows that Mr. Tellery has worked well.

KOTAH.

41. The total expenditure under all heads during the year was as follows:—

| | <i>₹</i> |
|---|-----------------|
| Civil buildings | 33,648 |
| Communications | 63,226 |
| Miscellaneous public improvements | 27,313 |
| Repairs | 45,199 |
| Irrigation | 34,361 |
| Establishment | 17,026 |
| TOTAL | <u>2,20,773</u> |

The prevalence of low prices for agricultural produce of all kinds caused the fall of the State revenue below its normal conditions, and funds for public works had to be curtailed. No new works of importance were therefore undertaken, but most of the last year's works were practically completed. The total outlay during the preceding year was *₹*3,08,265.

CIVIL BUILDINGS.

The following principal works were completed:—

| | <i>₹</i> |
|--|----------|
| 1. Etawa Nizamut Kachari, at a cost of | 7,732 |
| 2. Gun-shed in Artillery lines, at a cost of | 10,322 |
| 3. Verandah to new stable, at a cost of | 11,286 |

The following principal works were in progress at close of the year:—

1. Late Mahrao's chattri.
2. Kotah sarai.
3. Stud stable, 2nd Line.
4. Etawa dispensary.
5. Nizamut kucheri for Tarnj.
6. Thanas at Untah and Bara.
7. The unfinished portions of the city ramparts.
8. Cut-stone gateway in palace.
9. Entrance to new stable.

COMMUNICATIONS.

The following principal works were completed:—

1. Parbatti crossing on Kishenganj road, at a cost of *₹*22,291. This causeway is 1,550 feet long and 24 feet wide, and paved throughout with stone on edge.
2. Mandawar Ghât Road, at a cost of *₹*29,252.
3. Bapur and Khanpur fair-weather road, at a cost of *₹*7,033. Earthwork only included in the estimate. The road is 16 miles in length.

The chief works that were in progress at close of the year are as follows:—

1. Khanpur and Bagair road.
2. Mandawar and Kalisind road.
3. Kalisind causeway, near Jhalrapatam.
4. Bhawneghur and Kailwara road.
5. Rungbari road.
6. The roads in the public gardens now called "Chattrā Bilas."

The mileage of metalled roads is the same as last year. The unmetalled roads have been increased by 34 miles.

IRRIGATION WORKS.

The hope expressed in the last year's report of Parbatti Canal returning good results has not yet been fulfilled. The cold-weather rains fell heavier than usual, so that but little water was taken for cereals, and of opium cultivation the returns show nothing fresh. An unfortunate feature in the canal is that it traverses, in nearly all its length, a tract of black cotton soil which is unfavorable for irrigation. An extension of the canal on a small scale in the direction of Mangrol is now being made with a view to reaching yellow clay which yields better crops than black soil, when irrigated, and if the people take to the water the channel will be widened.

The large Belera Tank in the Kishanganj Nizamats commenced last year was closed before the rains, and the tank filled but not up to the highest contour, as the waste-weirs were not built, but it formed a splendid sheet of water, about one square mile in area. A portion of the main irrigation duct and about 15 miles of branches have been constructed. Water was given free and some 1,000 bighas were irrigated.

Three other tanks were sanctioned during the year as follows:—

Ayani tank.—Estimate, R19,724, work in progress. This will contain, when full, 99 millions of cubic feet.

Bagair tank.—Estimate, R6,478. This is more to supply the village wells which run dry than for direct irrigation. The work is in progress.

Polai khurd.—Estimate, R5,382. Not yet commenced owing to want of funds.

Some smaller village tanks were also sanctioned during the year.

In the Shergarh District, an old and neglected system of irrigation ducts from which in former times some thousands of bighas of rice were grown, was taken in hand, and a project for re-lining and re-making the ducts, sanctioned. The present estimate is for R9,000 and the work is in progress. A portion of the scheme will, it is hoped, be ready by the rains and irrigation be possible.

JHALLAWAR.

42. This State expended R1,19,888 on public works during the year, classified under the following heads:—

| | |
|--------------------------|-------------|
| | R |
| Original works | 66,038 |
| Repairs | 25,772 |
| Irrigation | 8,039 |
| Miscellaneous | 5,538 |
| Establishment | 14,501 |
| | <hr/> |
| TOTAL . | 1,19,888 |
| | <hr/> <hr/> |

CIVIL BUILDINGS.

The principal new buildings put in hand during the year were—

Garden-house at Patan Bund.

Chattri to late Maharaj Rana Muddan Singh.

Inside works of jail.

Cook-house for the Maharaj Rana.

Garri-klana.

Very little work was done on the garden-house, as sanction was received too late to do much when the tank was low to get in the foundation before the last rains set in. The late Maharaj Rana's Chattri was completed with the exception of the sacred stone of Makrana marble in the centre.

The inside works in jail consist of new sleeping-wards for the female prisoners, an additional line for the males, and the removal of some walls which crowd up the interiors of the jail grounds, and of all the workshops from their present positions inside to the new additions completed last year. These works will be completed next rains.

The cook-house for the Maharaj Rana was completed.

The work on the garri-khana was only just started.

COMMUNICATIONS.

The new works of importance under this head sanctioned for execution during the year were—

Kala Sind causeway at Menderi Ghat; estimate ₹21,320.

Sarthul Ghat Road; estimate ₹11,102.

Branch roads to join Menderi Ghat causeway with pucca road; estimate under preparation.

The Kalasind causeway will connect the Kotah and Jhallawar States, and give through traffic from Haroti to Patan. This causeway is 795 feet long, and is provided with 18 arches of 10 feet span, it is 28 feet wide, its cost is borne half by each State; the work is well in hand, and, it is hoped, will be finished by the rains.

The Sarthul Ghat Road is a fair-weather one with a ruling grade of 1 in 20 and a minimum width of 20 feet. It will connect the Eastern Pargana of Chipa Barode, which has hitherto been cut off from the main portion of the State by a range of hills about 6 miles wide. It is in rapid progress and is expected to be open by the next rains.

The branch roads, to join the Menderi Ghat causeway with Patan and Chuni Roads, about 2 miles in length, are to be only fair-weather roads for the present.

All buildings and roads were kept in fair repair.

IRRIGATION.

In the last year's report mention was made of the intention to take up projects for the extension of village tank irrigation. At that time, it was expected that the Baria Sagur Tank project would cost some ₹80,000.

Further surveys showed that ₹1,03,000, instead of ₹80,000, would enable about double the quantity of water, as calculated for the first project, to be impounded. Included in the scheme is a smaller project by which the cold weather flow of the river, it is proposed to dam, can be utilized; this is estimated to cost ₹30,253, and it has been sanctioned and the work is in progress.

The design of the scheme is briefly described below—

- (a) A masonry dam, to be built across the gorge where the stream enters the hills from the south, which would form a lake about 2 square miles in area, containing 445,000,000 cubic feet of water. Dam and outlet to cost ₹54,610.
- (b) Where the stream leaves the hills at the north, an anicut will divert the stream into irrigation ducts running east and west. Cost of anicut ₹16,176.
- (c) Irrigation ducts of sizes, with a length of 32 miles, to cost ₹22,660.

Out of this, the present sanction is to build the anicut (*b*) and a portion of the ducts (*c*), but the scheme will be incomplete without the big lake (*a*).

The Political Agent speaks of "the excellent work which Mr. Miles, Executive Engineer, continues to do in Jhallawar."

DHOLEPUR.

43. The expenditure of this State during the year has been, as detailed below, ₹48,837—

| | ₹ |
|--|--------|
| Original works | 11,532 |
| Repairs | 4,484 |
| Other items | 1,694 |
| Establishment | 2,288 |
| Works carried out for His Highness the Maharaj Rana . . | 21,787 |
| | <hr/> |
| | 41,780 |
| <i>Add</i> for materials purchased, but bills unpaid . . . | 7,057 |
| | <hr/> |
| TOTAL | 48,837 |

The works carried out for His Highness the Maharaj Rana consist of the construction of a new palace with surrounding garden, &c., at the Kaiser Bagh, and a road leading thereto. ₹14,269 were spent on the palace, ₹4,234 on the road, and ₹1,267 on the garden. The building is approaching completion.

The stone quarries have repaid to the State, up to January 1886, ₹81,800, leaving a balance of ₹55,381 still due on the original debt, or the purchase-money of ₹1,37,181. Taking, together, with the earnings, the accounts of the assets and liabilities, as correctly stated, and of the money, *viz.*, ₹23,500, borrowed from the State Treasury to commence work and paid back, the net earnings of the quarries for the 30 months during which they have been worked amount to ₹1,51,104, or about ₹5,000 per month.

The same calculation leaves a balance of only about ₹9,500 against the original purchase-money of ₹1,37,181, thus—

| | ₹ |
|--|----------|
| Net earnings mentioned above | 1,51,104 |
| <i>Deduct—</i> | |
| Borrowed from State Treasury and re-paid | 93,500 |
| | <hr/> |
| | 1,27,604 |
| Original debt on account of purchase of the quarries . . | 1,37,181 |
| | <hr/> |
| Balance required to clear the debt | 9,577 |

As the machinery and plant for working the quarries have grown old and worn out, it will be necessary, at no distant date, to renew a portion of it and to purchase a new engine, &c., and this will require fresh money to start with, and so tend to reduce the earnings for a time. It is, therefore, not expected that the net earnings will remain at ₹5,000 per month for much longer. The result of the operations has, however, proved that so long as the demand for stone continues, the stone quarries are a remunerative investment to the State and are capable of further development.

Mr. Gahan, the Executive Engineer, is going home and is being relieved by Mr. C. E. Housden, who will take charge of the Public Works of the Dholepur State in addition to his present work as Executive Engineer for the Kerowli State.

KEROWLI.

44. As a result of the surveys and the examination of the country, on which Mr. C. E. Housden, Executive Engineer, was principally employed last

year or during 1884-85, it has been ascertained that the Kerowli State affords scope for the opening of productive public works and works of public utility.

During the year under report several detailed projects were prepared, of which those for the Gotra and Nindar tanks are the principal.

The total expenditure during the year amounted to ₹1,08,378, classified thus :—

| | ₹ |
|---|-----------------|
| Original productive State works | 13,298 |
| Do. Thakur of Amergarh's works | 15,133 |
| Communications | 48,979 |
| Miscellaneous | 5,322 |
| Repairs | 6,674 |
| Establishment | 14,193* |
| Other items | 4,773 |
| TOTAL . | <u>1,08,378</u> |

This shows an appreciable increase over the expenditure of the previous years and is satisfactory.

In addition to the estimates for 76 tanks previously noted, 44 estimates were prepared and submitted during the year. Eighty-eight plans for new or existing tanks and other works were made out.

A tank at Nanea Goari was completed at a cost of ₹19,938, but just before the rains a portion of the face wall failed and measures were at once taken to prevent further damage, which were effective during the whole of the monsoon. It is now proposed to strengthen the dam and considerably increase the waste weir. The probable cost of the tank will be about ₹25,000, and an ultimate revenue of ₹1,200 is anticipated.

The Kerowli portion of the Kerowli-Hindon road, 8 miles 3,650 feet, was completed at a cost of ₹37,000, and one-half of the Bandwa nala crossing was made for Jaipur, bringing the total cost to ₹39,800, and the distance to 8 miles 4,630 feet. The rough and ravinous nature of the country entailed heavy earth-work, and numerous culverts and road dams on this road, but the completion of this important piece of intercommunication has thrown open a hitherto secluded country and will be a great benefit. Several irrigation works are in hand, and prove that the State is alive to the importance of tank irrigation. Mr. Housden was employed also during September, October, and November in superintending surveys and preparing a report on the Ajan Bund in the Bhurtpur State.

The report he has submitted of the works in his charge prove him to be a hard-working and efficient officer.

ULWAR.

45. The total expenditure incurred by this State on public works was ₹2,26,191, distributed as follows under the main heads—

| | ₹ |
|----------------------------|-----------------|
| Buildings | 1,11,923 |
| Roads | 44,761 |
| Irrigation works | 27,282 |
| Workshops | 32,943 |
| Establishment | 7,676 |
| Miscellaneous | 1,606 |
| TOTAL . | <u>2,26,191</u> |

* Includes ₹2,632, payable by His Highness the Maharaja of Bhurtpur.

BUILDINGS.

The private station commenced by the Railway Engineers in 1874 was completed and handed over.

A Baradari in the Moti Dungri Gardens was completed. Improvements to breeding stables are in progress.

The large tank in front of the Bani Bilas Palace was commenced. The Fernery is almost completed. At Ghosrana, one of the new railway stations, a police station has been built.

Various other buildings were in progress.

ROADS.

The Ramgurh-Ferozepur Road was completed to the Ulwar border, and it is hoped the British portion of the road will soon be completed.

The Umran-Thanaighazi Road is being pushed on and is expected to be a most useful work.

All the roads were kept in good repair and tree-planting along them received much attention.

IRRIGATION.

The principal pucca bunds constructed and repaired during the year were:—

- | | |
|--|---------------------|
| I.—Khaizarpur | } both near Tijara; |
| II.—Guntoli | |
| III.—Behraj in the Ulwar State; | |
| IV.—Parasla in Kishengarh; | |
| V.—Strengthening of the Siliserh Bund; | |
| VI.—Sahori; and | |
| VII.—Macheri, in Rajgarh. | |

Repairs to existing kutchra and pucca bunds were also undertaken.

REVIEW OF THE REPORTS OF THE POLITICAL AGENCIES.

MEYWAR AGENCY.
UDAIPUR.

46. Colonel C. K. M. Walter held charge of the Agency up to the 22nd of August 1885, when he was relieved by Lieutenant-Colonel J. Biddulph, who was in his turn relieved by Mr. Chichele Plowden on the 27th of November 1885.

Mr. A. Wingate, who submits this report, relieved Mr. Plowden on the 15th of April 1886, *i.e.*, after the close of the year under notice.

Maharana Futteh Singh was invested with full powers by the Resident in a public Durbar, held on the 22nd of August 1885, and has, during the year, fully justified the expectations formed of his capacity for the important duties he is called upon to discharge.

In the course of a visit to Udaipur in November, His Excellency the Viceroy reviewed the Meywar-Bhil Corps and saw the famous hill fortress of Chitorgur, in comparison with which, according to the village rhyme, all other forts dwindle into insignificance. Her Excellency Lady Dufferin graciously laid the foundation stone of the new Walter Hospital for women, which will supply a great and long-felt want. It is expected that the building will be completed by the next cold weather.

The rains did not set in this year till very late and ended very early. The heaviest fall was at Rasmi, in Central Meywar, where 29 inches fell, and the highest at Serara, the head-quarters of the Bhil country, which only had 16 inches.

The season was an unfavorable one in every respect. The kharif and rabi harvests were below the average everywhere, but especially so in the Bhil country, where the rabi crop almost entirely failed.

Fortunately the last year's harvests were so exceptionally abundant that much of the distress, which would otherwise have been inevitable, will, it is hoped, be averted. The prices of cereals have, however, already risen considerably and are still rising.

Although the sanitation of the city is reported to be well managed, the health of Udaipur was not so good as in the previous year.

Vaccination, I am glad to say, shows marked progress and the percentage of successful cases was as high as 96.

The city dispensary was well attended. Four new dispensaries have been opened during the year, and another will shortly be completed at Serara. The dispensary for women at Udaipur was very largely attended during the year—indeed, its requirements have now quite exceeded its accommodation, and the Walter Hospital will afford it a timely relief.

The daily attendance at the Mission Hospital and Dispensary increased by 34 per cent. this year. A valuable addition to the city will be made in the new Mission Hospital shortly to be opened in Udaipur, under the charge of the Reverend Dr. J. Shepherd, who deserves the greatest praise for the good work he has done and continues to do.

The new jail, which has been so long wanted, is now nearly completed. It is situated inside a fortalice, bounded by a high and strong wall and will provide accommodation for 450 prisoners in 9 wards, with one additional ward to serve as a hospital.

The income of the Udaipur State for the past year was R25,96,239 and the expenditure R27,59,052, but of this excess of expenditure over income 4 lakhs can be accounted for under the head of Expenses consequent on the death of the late Maharana, 1 lakh on account of an old debt due from the Rao of Salumber which the State has generously remitted, and half a lakh on account of a debt similarly remitted to the Rao of Amcit. The rest can be explained by a falling-off of R65,000 in the land revenue, owing to the low prices that have lately prevailed, and by the decrease of nearly a lakh in the customs.

The export of opium to China was somewhat less, and that to British India somewhat greater, than last year; but there was a decrease of about a lakh in the amount of duty realized. This calls for no notice, however, when it is remembered that the trade on opium last year was unusually brisk.

During the year under review the new settlement has been introduced in the zila of Rasmi and Sarra, comprising seven parganas, and the collections of revenue for the present year are being made in accordance with it. A few complaints have been made, but mostly by Mahajans, Brahmins, Byragis, &c., who base their claims on privilege. The regular cultivating classes evidently appreciate the value of the term of 20 years for which the settlement has been sanctioned, and in spite of an unfavorable agricultural year and the low prices of all produce, the first instalment of revenue has been collected without difficulty. The expenditure on the settlement, excluding the salary of the Settlement Officer, has up to the 31st of March 1886, amounted to R2,38,415.

It will be remembered from last year's report that Mr. Wingate, while Settlement Officer, had, with a view to extending education in Meywar, arranged to levy a cess of half an anna in the rupee of land revenue for the first seven years of the settlement, of three-fourths of an anna for the second seven years, and of one anna for the remaining six years, from the proceeds of which it was hoped that a sufficient sum might be obtained to give Meywar a complete system of schools and dispensaries in the various parganas and zilas. I am glad to note that this scheme has already begun to bear fruit, and that a dispensary has been opened in each settled zila, and that a school is building in each pargana. The bright prospects that such a good beginning affords for Meywar and its people can hardly be over-estimated.

The business of the State under its present administration is carried on with promptitude and despatch, and most of the arrears referred to in last year's report have now been cleared off.

The judicial statistics show a decided decrease in heinous crime, but a slight increase in less serious offences. There is nothing, however, that calls for special remark.

There has been a decided increase in civil litigation, but it has on the whole been successfully encountered. Statement D of the Resident's report gives the Civil and Criminal Appeals made to the Mahendraj Sabha, or High Court of Meywar, and it will be seen there that, though this Court had more appeals than usual to hear during the year, the result shows more work done.

The Court of Vakils has done good work this year, and it is satisfactory to note from the detail given in Statement F that the more serious offences, such as murder, dakaiti, and the like, are conspicuous only by their absence from the record.

There was one case of mail robbery in January 1886 on the Udaipur-Chitor postal line, about 27 miles from the capital, but I regret to note that, in

spite of the efforts made, the offenders have not yet been secured, though the Durbar is sanguine of being able to ultimately arrest them.

The Durbar Jail Returns show a very considerable and satisfactory decrease in the number of under-trial prisoners, which was last year far in excess of what it should have been.

The work done in the Maharana's School shows most satisfactory results. The number of girls attending has nearly doubled during the year, and a system of school-fees for boys has been introduced. This was a very necessary reform, seeing that the land-owning classes in the districts have so willingly subscribed by the new revenue cess to the education of their children. The average number of pupils on the rolls was 612, of whom 463 learn Hindi and 129 English. There has been an increase in the average daily attendance and an addition to the staff of teachers, but the average cost of education has fallen from ₹15-6-8 to ₹14-12-0 per pupil per annum.

Arrangements are being made to alter the course of instruction in such a way as to enable boys to enter for the public examinations, and already three boys have presented themselves for the middle-class examination.

A normal school has been instituted with a view to supplying teachers for the new schools opening in the districts. Six boys from Udaipur attended the Mayo College at Ajmere during the year, but this is only a small fraction of those who might attend were education more highly considered among the better classes in Udaipur.

The construction of the proposed railway from Chitor to Nathdwara has, I regret to say, been postponed for the present, and the chief of the public works executed this year are the road from Udaipur to Chitor, which has now been bridged throughout, and some important tanks and irrigation works which have been completed by Mr. C. Thomson, the Executive Engineer. A number of small tanks were started in the Bhil country in order to give relief where the failure of the crops had been most severe, and the Durbar made advances of ₹18,000 to the Bhumut Chiefs to assist them in providing work. These are both wise measures, and will have the result of attaching the Bhils to the Durbar officials.

The boundary settlement work this year was done by Major F. A. Wilson, on the Meywar-Tonk border, by Lieutenant-Colonel J. Biddulph on the Meywar-Merwara border, and by Major A. R. T. McRae on the Meywar-Marwar border.

Education, with its civilizing influences, is beginning to take root in the Bhil country. There are now 4 Durbar schools for Bhils, attended by 90 boys, and the Church Missionary Society at Kherwara has announced its intention of starting a school for Bhil girls.

HILLY TRACTS.

47. Colonel A. Conolly resumed charge from Lieutenant-Colonel E. Temple on the 7th of November 1885, and held charge during the rest of the year under review.

The kharif was very scanty everywhere, and the rabi almost a total failure owing to the scanty rainfall; but there has been an abundant mhowa crop, and the Political Officers believe there will be no serious distress.

There were no cases of witch-swinging or mail robbery, and only one border fray.

The rough track at present connecting Kherwara and Kotra is being converted into a fair-weather road, and a new road is being made through the densely-wooded ravine separating Jhalapun and Kankun-Sugwara in Jawas.

Owing to the late increase in regimental work, and the unusual paucity of British officers last cold weather, the tour of the Superintendent was very much restricted.

The Meywar-Bhil Corps was inspected by Major-General A. Carnegie Commanding the Northern (Deesa) Division, with satisfactory results.

During the year the new valise equipment mentioned in last year's report has been served out to the regiment.

In compliance with the wishes of Government, an impetus has been given to the enlistment of Moghias in this corps, but the Commanding Officer reserves his opinion on the success of the experiment.

The export of opium from Dungarpur to Ahmedabad by the Kherwara route, to which the sanction of Government has recently been accorded, began under the new rules on the 10th of April 1886. The system now instituted has every prospect of working smoothly and proving a benefit to the Durbar, while entailing no loss or inconvenience on the British Government.

The liquidation of the Jawas Chief's debts has been delayed by the present scarcity and the consequent decrease in his revenue, but I hope that in two years more the whole debt will have been cleared off.

KOTRA.

48. The charge of this district was held by Lieutenant G. A. Collins up till June, and by Major A. R. T. McRae from June to November, when Lieutenant-Colonel E. Temple resumed charge.

Colonel P. W. Powlett, Resident of the Western Rajputana States, Lieutenant-Colonel W. Scott, Acting Political Agent, Mahikantha; and Lieutenant-Colonel E. Temple met at Karari in Serohi on the 24th of January 1886, when they held a Border-court and disposed of several cases between the States in their respective charges.

The debt of the Rao of Jura to the Meywar Durbar has, I am glad to say, been virtually paid, and the Rao will, I hope, shortly be entrusted with the entire management of his estate.

A son and heir was born to the Oghna Chief in February 1886, and his little State continues in a flourishing condition.

Matters in Umria are, I regret, far from satisfactory. The estate is burdened with debt, and the young Thakur has not yet obtained sufficient influence or authority over his Bhils. The murderers of his uncle, the late Thakur, have not yet been traced, though heavy fines have been imposed on the Pals chiefly implicated.

The respective claims of Oghna and Panurwa to nominate a successor to the Umria Thakurate about a year and a half ago have, I am sorry to say, led to a breach of the friendly relations that formerly subsisted between these two Chiefs.

BANSWARA AND PERTABGARH.

49. Lieutenant W. Evans-Gordon gave over charge to the Resident in Meywar on the 26th of October 1885, and it remained in his hands until the appointment of Lieutenant A. F. Pinhey on the 23rd of February 1886.

Both the kharif and rabi harvests are reported to have been 12-anna crops, considerable damage having been done by the excessive rainfall in the early, and the frost in the later, part of the year. But, as in Meywar, the surplus of the past has compensated for the deficiencies of the present season.

There was a little cholera in Pertabgarh about the end of April, which caused the deaths of some 250 people in about three weeks, but with this exception the general health is said to have been good.

One case of infanticide is reported from Banswara and two of witch-swinging.

PERTABGARH.

50. The Maharawut of Pertabgarh having been very seriously ill, and not having sufficient confidence in his Kamdar, Muhammad Beg, sent for Mr. Framji Bhickaji, some time Assistant Political Agent of Banswara and Pertabgarh, and now in the enjoyment of a pension, to assist him in the administration, and I have no doubt that Mr. Framji's experience will be of great value to the Maharawut.

Education in Pertabgarh is, as might be expected, still a thing of the future.

The Jail and Dispensary are well reported on, however, and the Post Office is said to be paying its way and working well.

Two students from Pertabgarh went to the Forest School at Dehra-Dun this year, and I hope this is only the beginning of an awakening interest on the part of the Chief in a matter which will repay, by an increase to his revenue, the attention he may bestow on it.

The revenue of Pertabgarh was Salum Sahi ₹2,71,408, and the expenditure ₹2,81,835. The deficit of ₹10,427, which was due to the expenses consequent on the Maharawut's marriage with the daughter of the Sailana Chief, and the death of the Maharawut's mother, has been temporarily met by a loan.

BANSWARA.

51. Under the management of the Kamdar, Rai Bahadur Jowala Pershad, a marked improvement is noticeable in the judicial administration of this State, and in the matter of internal boundary settlement.

The contract for the State Abkari has been given to a Parsi firm from Guzarat.

The Bhils of this part are said to have been generally quiet during the year, and the extradition rules are said to have a good effect on them.

The revenue of Banswara was ₹2,05,717, and the expenditure ₹2,06,033; some debts appear to have been paid off, and others increased.

Most of the Banswara Sardars appear to be fairly contented and give little or no trouble. The Rao of Gurhi, however, was found to have harboured a criminal, and for this one of his villages was confiscated by the Durbar.

KUSHALGARH.

52. This little Chiefship is in a fairly satisfactory condition, and calls for no special notice.

The Assistant Political Agent held a Border-court at Khandu, and by means of Panchait disposed of 22 cases between Kushalgarh and Banswara.

WESTERN RAJPUTANA STATES AGENCY.

53. Colonel P. W. Powlett was in uninterrupted charge of this Agency during the past year.

Through want of rain (only 13½ inches having fallen at Jodhpur) the crops were far below the average; but owing to the good harvest of the preceding year, no great distress was felt.

Although cholera broke out at the Ram Deora Fair in September, it was short-lived. There was a good deal of small-pox in the city of Jodhpur during the year.

Vaccination is, however, so well supported by the chief jagirdars that there is not much reason to fear any serious epidemic of this disease.

The Municipal Committee, with Dr. Adams as President, has been maintained and continues to do good work.

MARWAR.

54. There has been no change in the personnel of the Administration. A State treasury was established in Marwar on the 1st of April 1885. Besides the enormous advantage of having a cash balance in the treasury available in time of famine or other distress, it is estimated that nearly $1\frac{1}{2}$ lakhs of rupees will be annually saved, this being approximately the amount formerly paid to bankers in discount and interest for moneys they advanced to the State. The treasury at present contains a cash balance of 3 lakhs of rupees.

The new Post Offices have proved most useful, and have been pecuniarily a success.

I am glad to be able to report that several improvements have been made in the judicial system. Rules for the Civil Courts, the Dakaiti Suppression Department, the Jail and the Jagirdars' Courts have been printed, and the officials concerned have to undergo examination in them.

The Jagirdars' Courts established last year have done good work, having decided 1,552 civil suits and 317 criminal cases during the year. Appeals from these courts lie to the Court of Sardars, which continues to work well under Lala Hurdyal Singh. Under his directions it has dealt with numerous cases of bankruptcy among the jagirdars, more than 100 of whose estates are now in course of relief from overwhelming debt. The efficiency of the Hakims has been much increased, but still leaves much to be desired.

The criminal tribes, with the exception of the Minas, have behaved well during the past year; the Kaim Khanis have been brought under former control; and the Moghias and Baoris show more inclination to become cultivators of the soil. Of the Minas the two famous dakaitis, Padia and Timla, still remain at large, although a special officer has been appointed to apprehend them.

Out of the 43 dakaiti cases reported within the year, 36 occurred in or near the district inhabited by the Minas. The total of dakaitis convicted during the year was 54, but of these only 19 were punished, while 35 were released on security under the strict condition that their liberty should depend on the good behaviour of their respective tribes.

The financial condition of the State has, I am glad to note, greatly improved, the receipts were ₹39,28,848, or more than 2 lakhs in excess of last year, and the expenditure was ₹30,03,021, or 9 lakhs less than last year.

The State debt has been reduced by ₹8,73,000, and 4 lakhs have been borrowed for the Pachbhudra Railway extension.

The Jodhpur Branch Railway paid 10·9 per cent. on its capital of ₹11,03,000, but this rate of interest can hardly be expected in the future, as fresh expenses will have to be incurred in connection with repairs and the new extension.

The Balsamand Canal has been completed at a cost of ₹1,34,654, and ₹2,73,000 have been expended in other works of public utility, exclusive of railways.

The Marwar Durbar have notified their intention of abolishing, from the 1st of April 1886, transit duty at Erinpura Road and stations south at a cost of ₹5,000.

The survey of the khalsa villages has been nearly completed, and the jagir villages of parganas have been demarcated.

The Customs revenue was below the estimate owing to the decrease in the exportation of til, and the importation of opium.

The land revenue, however, shows an increase, and under the direction of Major Loch has been almost all collected. This officer has settled nearly 300 boundary cases. The work of surveying has lately been in a great measure performed by Marwaris, and there is every reason to hope that in the near future Marwaris will be exclusively employed in mapping village boundaries.

In recognition of his services to the State, Maharaj Sir Pertap Singh was created a K C.S.I.

Major Loch, who has for two years been in charge of the Customs, Land-Revenue and Land Revenue Survey, has proceeded on furlough, and his loss will, I am sure, be much felt in Jodhpur.

MULLANI.

55. In this district much has been done towards the final settlement and demarcation of boundaries of 493 villages, 396 have been demarcated and 848 boundary disputes have been settled, leaving only 61 disputes pending.

The statement of crime shows an improvement on last year, 40 less cases having been reported.

Education progresses. A school has been established at Sindri, and at the Jessole School the number of Rajput boys rose from 4 to 24 in a few months, owing to a system of capitation fees lately introduced there. The Resident reports, however, that the schools require inspection and organization.

SEROHI.

56. The change reported by the Resident in the bearing of the Serohi Durbar is a cause of sincere congratulation. The general condition of the State is most satisfactory.

The receipts of the revenue are more than 25 per cent. in excess of the average of the last three years. Reforms in the Customs and Courts have been instituted, and the work of boundary settlement has commenced.

Jowan Singh, son of the late Sadul Singh of Rewara, died at Jodhpur during the year.

It is very satisfactory to note that Serohi has now abolished its last transit duty. Though the immediate loss to the State will be some ₹2,000, there is no doubt that trade will largely benefit by the removal of such restrictions.

The privilege of using service stamps has been extended to the Serohi Durbar.

JEYSULMERE.

57. There is no doubt that Jeysulmere has entered upon a period of prosperity, for no less than 1,500 immigrants are said to have entered the country in 1884 from Sind, Bikanir, and Hissar.

The receipts of the revenue for this year show an increase of 40 per cent. on the average of the last three years, a result which is to be attributed to reforms in the Customs, and the greater energy shown in the collection of the revenue. This satisfactory state of affairs is in a great measure due to Nath Mal, who has now held the office of Dewan for 18 months.

The Maharawal has expressed a wish that a Political Officer might reside at Jeysulmere for some months to assist him in making improvements in the administration of the State.

The present condition of the Western Rajputana Agency shows such a marked improvement on the state of affairs that prevailed there but a few years ago that I think it well to bring to notice the contrast.

In 1882 the country was over-run by outlaws, who were in two cases headed by Thakurs, several villages were at open war with one another, outrages were of constant occurrence along the line of railway, an Ajmere village was plundered in broad daylight, and the Raj force was openly defied.

The Courts were wanting in intelligent guidance and in authority, thousands of cases remained untried, and civil suits were struck off the file for the recorded reason that the defendant refused to appear. The administration of the Customs and Revenue was no more satisfactory, wholesale smuggling was carried on with impunity, and oppression of the villagers was more the rule than the exception. How much all this has changed, the present report will show, and great credit is due to Colonel Powlett, whose influence and advice have been mainly instrumental in effecting the numerous improvements that have taken place during his tenure of office.

EASTERN RAJPUTANA STATES AGENCY.

JAIPUR.

58. The charge of this Agency was held during the greater part of the year under notice by Dr. J. P. Stratton, Mr. F. Henvey, who submits the report for the year, having only entered on his duties in December 1885.

The rainfall was somewhat above the average, and the agricultural year is said to have been a fair one.

His Excellency the Governor of Madras visited Jaipur in October, and His Excellency the Viceroy in November 1885.

His Highness the Maharaja paid a visit to Calcutta in March 1886, accompanied by the Resident, and, as usual, visits were paid during the year to Bindrabun.

The constitution of the Council has remained unchanged.

Thakur Simbhu Singh of the Revenue Department died after a long illness, and his place has been filled by Pandit Moti Lal, one of the two Revenue Dewans.

The three departments into which the Council is divided for the discussion of business have been granted no separate or final authority, but are compelled to refer all questions to the general meeting of the Council, whose decisions invariably follow the opinion and direction of the most influential member, not perhaps a very satisfactory result.

In the Court of Appeal Thakur Raghonath Singh of Achrol has been replaced by Thakur Bukhtawar Singh of Mundawa, a Shaikhawati noble.

The relations of the State with its feudatories are amicable and the absence of any disputes is, I consider, very creditable to all concerned.

Pandit Maharaj Kishen, the trained Judicial Officer obtained from the Punjab, has at last been able to devote himself to the judicial machinery and administration of the State, and has succeeded in carrying out some of the many reforms he has projected. He has issued a large number of circulars on Criminal and Civil Procedure, Police, Registration, Stamps and administrative arrangements; he has dealt with the inveterate abuse of the irregular and prolonged detention of prisoners, he has commenced an improvement in the machinery of the Courts, has re-distributed judicial powers among the various tribunals, and re-arranged the City Police.

It now becomes an important duty for the superior officers of the State to ensure by personal supervision and occasional inspections that the orders which have been issued are not only carried out, but that those who neglect or disobey them are duly punished.

The land revenue, however, shows an increase, and under the direction of Major Loch has been almost all collected. This officer has settled nearly 300 boundary cases. The work of surveying has lately been in a great measure performed by Marwaris, and there is every reason to hope that in the near future Marwaris will be exclusively employed in mapping village boundaries.

In recognition of his services to the State, Maharaj Sir Pertap Singh was created a K.C.S.I.

Major Loch, who has for two years been in charge of the Customs, Land-Revenue and Land Revenue Survey, has proceeded on furlough, and his loss will, I am sure, be much felt in Jodhpur.

MULLANI.

55. In this district much has been done towards the final settlement and demarcation of boundaries of 493 villages, 396 have been demarcated and 848 boundary disputes have been settled, leaving only 61 disputes pending.

How much all this has changed, the present report will show, and great credit is due to Colonel Powlett, whose influence and advice have been mainly instrumental in effecting the numerous improvements that have taken place during his tenure of office.

EASTERN RAJPUTANA STATES AGENCY.

JAIPUR.

58. The charge of this Agency was held during the greater part of the year under notice by Dr. J. P. Stratton, Mr. F. Henvey, who submits the report for the year, having only entered on his duties in December 1885.

The rainfall was somewhat above the average, and the agricultural year is said to have been a fair one.

His Excellency the Governor of Madras visited Jaipur in October, and His Excellency the Viceroy in November 1885.

His Highness the Maharaja paid a visit to Calcutta in March 1886, accompanied by the Resident, and, as usual, visits were paid during the year to Bindrabau.

The constitution of the Council has remained unchanged.

Thakur Simbhu Singh of the Revenue Department died after a long illness, and his place has been filled by Pandit Moti Lal, one of the two Revenue Dewans.

The three departments into which the Council is divided for the discussion of business have been granted no separate or final authority, but are compelled to refer all questions to the general meeting of the Council, whose decisions invariably follow the opinion and direction of the most influential member, not perhaps a very satisfactory result.

In the Court of Appeal Thakur Raghonath Singh of Achrol has been replaced by Thakur Bnkhtawar Singh of Mundawa, a Shaikhawati noble.

The relations of the State with its feudatories are amicable and the absence of any disputes is, I consider, very creditable to all concerned.

Pandit Maharaj Kishen, the trained Judicial Officer obtained from the Punjab, has at last been able to devote himself to the judicial-machinery and administration of the State, and has succeeded in carrying out some of the many reforms he has projected. He has issued a large number of circulars on Criminal and Civil Procedure, Police, Registration, Stamps and administrative arrangements; he has dealt with the inveterate abuse of the irregular and prolonged detention of prisoners, he has commenced an improvement in the machinery of the Courts, has re-distributed judicial powers among the various tribunals, and re-arranged the City Police.

It now becomes an important duty for the superior officers of the State to ensure by personal supervision and occasional inspections that the orders, which have been issued are not only carried out, but that those who neglect or disobey them are duly punished.

There are 22 Courts in Jaipur, and they have now to submit monthly returns of work done. This necessity for reporting progress has cleared off many outstanding cases in the Nazim's Courts.

By a judicious distribution of judicial powers the work has been more evenly divided among the law officers, both civil and criminal. The details of the measures by which this has been effected are given in paragraph 7 of the Resident's report.

Many other important reforms are enumerated in the Resident's report, paragraph 7, as under consideration, but as they are not yet completed, they need no mention here.

The submission of returns by the various Courts has very much facilitated the collection of statistics which the Resident is now able to submit in a far more complete form than heretofore.

In the Foujdar's Court of Jaipur, the most important tribunal of original criminal jurisdiction, 2,542 cases were disposed of during the year, and 157 remained pending at its close. Of civil cases, 5,632 were disposed of in the year by the Munsiff's Court which is the Court of Small Causes for Jaipur, and 231 remained pending.

In the districts there are only 5 Tahsildars with judicial powers: consequently, the work of the District Courts falls almost entirely on the Nazims, of whom there are 10. These Nazims combine the functions of District Magistrate, Civil Judge and Collector of Revenue. The Resident suggests that, with a little mere decentralization and the creation of a few more judicial officers, the Nazims might be readily relieved of the pressure of work under which they at present labor.

There were no cases of Sati, and no mail robberies during the year: no cases of poisoning, and only two which came under the technical definition of dakaiti.

One bad case of murder is reported. One Alexander Smith, said to be of French extraction, murdered his wife and her mother in a fit of jealousy or passion, but the Council found extenuating circumstances, and only sentenced him to imprisonment for life.

One serious affray took place at Nandpura in the Hindon pargana between the villagers and some revenue officials, in which one man was killed and others were wounded. This case is still under inquiry.

On the whole the Jaipur State seems to be remarkably free from offences of a sanguinary or turbulent character: life and property are respected, and trade at the capital is carried on with security and confidence.

The Central Jail appears to be still over-crowded, but this does not seem this season to have affected the mortality among the prisoners. Proposals for an increase of prison accommodation, which will cost about ₹1,36,000 are still under consideration.

The Police administration of Jaipur city appears to be fairly efficient. The district and border police are under Narain Singh, the Superintendent of the local Thagi and Dakaiti Department, and the arrangements made some years ago for the protection of the Jaipur-Punjab border seem to be working well on the whole. In accordance with Dr. Stratton's advice the Durbar have given Narain Singh an assistant, have confined Thanadars and Dakaiti officials to the exercise of police functions only, have redistributed the thanas, and have withdrawn from Chirawa a thana which was side by side with a thana of the Raja of Khetri, and whose situation might at any time have been the cause of friction between Khetri and Jaipur.

The Minas are still a source of anxiety in Jaipur, and although a system of roll-calls in their villages has been established, it is not sufficient to effectually suppress crime. The subordinate police officials are said to be careless in many cases. Every effort is made to induce the Minas to take to agriculture, and the question of their disposal is occupying the attention of the Durbar.

Moghias are not numerous in Jaipur, and the Durbar shows no unwillingness to treat them liberally and give them the opportunity of settling down as cultivators.

As District Magistrate on the railway the Resident tried 11 cases, among the criminals were 3 European British subjects, who were sentenced to fines. No civil suits were heard by the Civil Judge, but the extension of the Indian Succession and Probate Acts to the railway has enabled the Judge to take up long-pending cases connected with the administration of the estates of persons deceased within the railway jurisdiction.

The Court of Vakils disposed of 121 cases during the year, and of these no less than 84 were crimes of a serious character against property, such as dakaiti, cattle-lifting, &c.

Claims for compensation amounted to R18,833, and the total awarded was R3,273.

All the awards were, as a rule, promptly paid by the States concerned, but Kishengarh still owes R7,476 on this account, and Dholepur R270. The money has meanwhile been advanced by the Residency Treasurer and the claims satisfied.

A brief account of the 'Chakbundi' system which the Durbar is attempting to introduce into its revenue administration, will be found in paragraph 16 of the Resident's report. The success of the experiment will largely depend on the care and moderation with which the assessment is made, for the people are, I know, very suspicious of any change.

The State accounts for the year ending August 1885 show an increase in the receipts of 4 lakhs, and in the expenditure of 7 lakhs. This reduces the surplus to 1½ lakhs, which is a narrow enough margin for an expenditure aggregating 55 lakhs. The receipts under Customs amounted to R7,13,000, being R25,000 less than in the preceding year. The decrease is due to a fall in the value of imported and exported goods.

The garnet mines under the management of Mr. Tellery are progressing well. The supply of stones is said to be inexhaustible, and as the demand for them is considerable, an expansion of trade is confidently expected. Besides being a source of profit to the State, these mines give employment to a large number of lapidaries and others, some of whom are able to earn as much as R15 per month.

A cotton-press was established at Jaipur in December 1885, and in order to secure its success, the export tax on unpressed cotton was raised from R1-4-0 to R1-12-0 per maund. I very much doubt the expediency of creating what is virtually a State monopoly, but it would be premature to condemn the cotton-press on this account.

The expenditure on public works for the year 1885 was 11 lakhs, of which more than 4 lakhs was devoted to irrigation.

The maintenance of the water-supply cost R36,000 and the same amount was spent on public gardens.

The demand for water in Jaipur city is steadily increasing, but as the dam across the Amani Shah has been completed, there is no fear now of any deficiency in the supply.

The progress of the irrigation works has justified the expenditure incurred on them. The dam of the Tori-Sagar tank, about $1\frac{1}{2}$ miles long, was completed in time to store the whole of last year's rainfall, and a fine sheet of water was formed some 5 square miles in area. This tank has 2 canals, with 58 miles of distributaries, and irrigation from it began in October 1885.

The dam of the Bucharra tank across the Sota stream was expected to attain its full height of 75 feet before the rains of 1886. The canals connected with this tank are in course of construction, and it is hoped that by the end of another year irrigation will be possible from this reservoir, which will be about $1\frac{3}{4}$ square miles in area. These irrigation works reflect great credit on the enlightened liberality of the Jaipur Durbar, and the energy of Colonel Jacob, who has directed and superintended their construction.

The forests of Jaipur, more especially those near Rinthumbor and Kandarhar, are very valuable. Mr. E. McA. Moir, Deputy Conservator of Forests in the North-Western Provinces, submitted a report on them in March 1886, which is engaging the attention of the Durbar. The chief difficulty to be anticipated in the preservation of forests is the interference which it will necessarily entail with the prescriptive rights of villages lying on their out-skirts. The Resident recommends strict enclosure, and doubtless this plan will have to be adopted in the end. The Jaipur forests are at present under the charge of Sadhu Singh, an officer of the Punjab Forest Department. Four boys were sent in this year to the Forest School at Dehra for instruction.

Five men were sent this year by the Jaipur Durbar to Kurnaul to learn settlement work.

As far as the city of Jaipur was concerned 1885 was a healthy year.

The population of the city is 125,000 and the deaths amounted to 4,557 in the year. There were very few deaths from cholera, and small-pox is less prevalent than formerly.

There were 50,920 registered cases of vaccination, which is a slight decrease if the previous returns were correct, but the percentage of successful operations has risen from 86 to 91.

There was a little cholera in the eastern and southern districts during the year: 372 cases in all were reported, with 258 deaths.

The Mayo Hospital and Dispensaries of Jaipur were under the superintendence of Surgeon-Major T. H. Hendley. New dispensaries are to be opened at Bandikui and Sambhur, and Seth Ram Mull of Basao has offered to build one at Junjhu at his own expense.

Meteorological observations are being extended in Jaipur: each dispensary in the Nizamats being a meteorological, as well as a medical centre.

Education in Jaipur progresses, but progresses slowly. In paragraph 32 of his report the Resident gives a very interesting account of educational statistics in Jaipur city and State.

There is no regular system of grants-in-aid, nor is there any adequate machinery of supervision; but the Durbar regularly maintains 44 schools, with 1,042 pupils, and these schools are linked to the Maharaja's College by examinations and scholarships. The percentage of boys in Jaipur receiving some sort of education is about 3, of girls it is of course less. There seems to be great necessity for a proper system of inspection which shall test the character of the teaching and the qualifications of the teachers.

The collection of exhibits sent by Jaipur to the London Exhibition is probably the finest that has ever issued from this State, and great credit is due

to Surgeon-Major Hendley, who was entrusted with its organization. The total expenditure incurred was ₹33,000, exclusive of freight and insurance charges, and the total insured value of the exhibits was about ₹57,000.

The late Rawul Bijey Singh, of Samod, has been succeeded by a young boy, named Futtch Singh, of Ranwal, whom Bijey Singh himself had nominated.

The Rao Raja of Umara is, I am sorry to note, again seriously in debt.

KISHENGARH.

59. His Highness the Maharaja met His Excellency the Viceroy in November 1885.

The receipts and expenditure of this little State almost exactly balanced this year, the surplus being only about ₹3,000.

The one State school in Kishengarh cost the Durbar ₹1,241 in the year. Only a very elementary education is given in this school after the Native manner, and there appears to be no provision for education in the districts.

All the tanks that were mentioned in last year's report as having been breached by the heavy flood in September 1884 have been now repaired at a cost of ₹30,000.

It is satisfactory to note that Kishengarh has now joined the other States of Rajputana in the measures for controlling and settling the Moghias. The Moghias of Kishengarh are said to be in easy circumstances, and some are men of property in land.

Thakur Futtch Singh, the uncle of the Maharaja and his associate, Mot Singh, have been expelled the State for exciting the people and stirring up complaints against the State officials.

The State is to be congratulated on having obtained the services of Babu Syam Sunder Lal, who had been until recently employed in Jhallawar. I anticipate the best results from this appointment, but any improvements that are to be effected will have to be made gradually.

LAWA.

60. This small State is, I am glad to say, in a flourishing condition. Besides the ₹10,000 invested in Government papers, Lawa has a cash balance of ₹4,250. The yearly income, moreover, is always more than sufficient to meet the expenditure.

The case of adoption referred to in last year's report has been settled by the adoption of the relative chosen by Ram Singh.

BHURTPUR, KEROWLI, AND DHOLEPUR.

61. Colonel C. B. Euan-Smith, C.S.I., held charge of the Bhurtpur and Kerowli Agency throughout the year, and on the retirement of Colonel T. Dennehy at the beginning of June, the Dholepur Agency was added to his charge.

The rainfall was abundant throughout the district, and the crops are reported to have been excellent. The general health was also very good, although there were slight outbreaks of cholera in the spring and in the summer in Kerowli and Dholepur respectively.

BHURTPUR.

62. A very heavy fall of rain in August resulted in the bursting of the Ajan Bund, and the consequent inundations which are estimated to have submerged 400 square miles of Bhurtpur and the adjoining British territory, caused great damage. An enquiry into the causes of the flood was instituted by the Government of the North-Western Provinces, and in consequence of the decision of the Committee appointed for this purpose, Mr. Housden, on be-

half of the Darbar and Major Corbett on behalf of the North-Western Provinces Government, were deputed to examine the bund and the country in its vicinity. The matter has been fully reported on to Government.

There has been no change in the administrative personnel of the State, His Highness the Maharaja still conducting all the business of the State without the assistance of a Kamdar.

The receipts for the year show a surplus of about ₹2,28,500 over the expenditure. This is a considerable advance upon that shown in last year's return.

The judicial business of the State is carried on satisfactorily, and calls for no special remark.

Although the number of schools has diminished by five, the number of pupils is said to have largely increased, and the standard of education appears to be maintained.

Notwithstanding the abolition of transit duties reported last year, the trade returns show a largely increased revenue from export, import, and internal customs.

The dispute between Ulwar and Bhurtpur regarding the waters of the Ruparel, of which some account was given in paragraph 13 of the report from this Agency for 1883-84, has been satisfactorily settled by an exchange of territory, effected through the negotiation of the Government of India.

Besides having the honor of entertaining His Excellency the Viceroy at his own capital in November, His Highness the Maharaja proceeded in December to Lucknow on the occasion of His Excellency's visit to that place, and was also present at the Imperial manœuvres held at Delhi in January.

KEROWLI.

63. The administration of this State has been conducted, as before, by the State Council under the general control of the Political Agent, who is able to report very favorably of the work done by that body, and of the individual exertions of the members.

The annual instalment of ₹30,000 was paid to the State banker, and it appears from the statement of accounts, which has been received from the Political Agent since the submission of his report, that there was a balance of slightly over ₹4,000 to the credit of the State in the finances of the year. It appears, however, that in order to meet current expenses and a disbursement in public works considerably beyond the estimate, the State had to incur a larger temporary loan than usual. This will be rectified next year.

The settlement of the revenue has proved a success under the able superintendence of Deputy Collector, Sheik Amanat Husein, and the collections have been levied regularly and without difficulty.

The working of the Courts was satisfactory, but the very small proportion of criminal appeals may be noted.

I am glad to be able to report that the sanitary reforms referred to in my last report have been maintained, and that the condition of the Municipality is much improved, while the Committee are still able to show a satisfactory balance sheet.

The dispensaries are very popular and have been resorted to by a larger number of people than ever.

In educational matters the stimulus gained last year has apparently lost some of its strength, and I cannot but feel that there is room for more rapid advance.

The balance of the debt due by the Amergarh estate at the close of last year has been paid off. A debt of ₹11,000, bearing interest at the rate of 9 per cent. has been incurred on account of the new bund, whose construction was commenced last year.

I have already, in an earlier portion of the report, remarked on Mr. Housden's account of the public works which are at present under his superintendence in the State.

Three boundary disputes with Jaipur have been settled during the year.

DHOLEPUR.

64. The financial condition of this State has been the subject of a special report to the Government of India, and it is unnecessary for me to enlarge here on the remarks which I have made upon this matter in an earlier portion of this letter.

I may, however, point out that the sum of ₹14,15,271, which is stated by the Political Agent to represent the total indebtedness of the State, includes some items which further enquiry has enabled him to expunge; and that the amount mentioned in this office letter, No. 15-P., dated the 13th of May 1886, *viz.* ₹12,65,000, is probably a more correct estimate.

The Budget for the ensuing year, which is enclosed with the Political Agent's Report, appears to be drawn up without much regard to the financial needs of the State, and it will no doubt require careful revision.

The yearly instalment of ₹1,20,000 on account of the Government loan was paid as usual.

The Courts, both Civil and Criminal, appear to have worked well during the year; no change having been made in the judicial system.

There are seven schools in the State, with a total attendance of 362 pupils.

The four dispensaries in the State appear to be thoroughly appreciated by the people, relief having been administered to no less than 25,796 people during the year.

I regret that the Political Agent has had to notice with such unfavorable criticism the management of the jail, but I have reason to hope that his recommendations on this subject may receive more attention from the Durbar in future.

HAROWTI AND TONK AGENCY.

65. Lieutenant-Colonel W. J. W. Muir held charge of this Agency throughout the year, residing almost entirely at Tonk.

The health of the district is not favorably reported on. Cholera appeared in Tonk, Bundi, Shabpura, and at Deoli in May; but the epidemic was not serious, except at Tonk, where it re-appeared in July. Five fatal cases occurred in the Deoli Agency lines in May. At Tonk cholera was followed by fever, which lasted for some two months, and at the close of the year small-pox was prevalent everywhere.

The rainfall was a good one, but, owing to untimely distribution, its effect on the crops was unsatisfactory; the kharif and rabi being both below the average. Prices at the close of the year were consequently higher than in the corresponding months of 1885.

The Harowti International Court of Vakils disposed of 47 cases, of which 1 was a charge of murder.

BUNDI.

66. No change is reported in the administration of this State. The Political Agent's report is silent on the subject of finance, but, as there is no doubt

that the policy of both the Maharao Raja and his Kamdar is actuated by principles of economy, I have little apprehension on this score.

There have been a few changes in the Customs tariff, among which two cases of remission of transit duties deserve favorable notice.

Five boundary disputes were settled during the year, and operations have commenced for the demarcation of the Boondi-Meywar border.

The dispensary established last year appears to have been well supported, but the proportion of jail and kotwali patients to other patients is unreasonably large.

Among the noteworthy events of the year may be mentioned the betrothal of the heir-apparent, Maharaj Kunwar Raghobir Singh, to the niece of the Maharaja of Kishengarh—the death of the Maharaja of Kapran, the settlement of whose dispute with the Durbar was reported last year—and the accession of the late Maharaja's brother, Bir Singh, to the 'gadi' of Kapran.

TONK.

67. The gloomy anticipations which I recorded in my report last year, in regard to the financial prospects of this State, have proved to be well founded. The Durbar is embarrassed by transactions with bankers, which have more than swallowed up the surplus of ordinary annual expenditure over ordinary income; and in spite of an estimate which provided a total surplus of ₹86,000, a deficit of 1½ lakhs is considered inevitable. The Nawab has had several measures under his consideration for the alleviation of his difficulties, chief among which may be mentioned a revision of the grants of jagirs and cash allowances which were given away with too lavish a hand at the beginning of His Highness' administration.

His Highness has further applied to the Government of India for a loan of 12½ lakhs at a low rate of interest, in order to rid himself of the unfortunate pressure of the bankers; but I have reason to fear that the whole financial system at present in force in the State requires revision, and it is probable that the present year will witness the initiation under the authority of the Government of India, of more stringent measures of reform.

The judicial system which also stood in need of re-organization has been overhauled by Mahomed Najjaf Khan, whose appointment was reported last year, and who has proved a useful officer. He has suggested many improvements, noticeably the establishment of Munsiff's Courts in outlying districts, and the introduction of fixed rules of procedure. With the latter object, a draft Code has been prepared, and it is hoped that this work, as well as his proposed improvements in other directions, will shortly receive the sanction of the Durbar.

Forty-three boundary disputes were settled during the year, of which 30 were on the Meywar-Nimbahera border.

Education appears to be progressing satisfactorily.

The severity of the two epidemics of cholera which visited Tonk may be inferred from the fact that only 1 in 4 of those who were attacked, recovered. It is pleasant to note, in contrast to this, that the present year has also seen the commencement of measures for the sanitation of the capital. This step, though opposed at first through ignorance, is bound in the end to be both popular and beneficial.

Vaccination is gaining ground, and the dispensary has worked well throughout the year.

In referring to paragraph 32 of the report under notice regarding the exchange of a village in Sironj with a village in Maksudangarh, I may mention

that the wishes recently expressed by the Government of India, regarding the manner in which an exchange of territory between Native States should be effected have been communicated to all Political Officers in Rajputana.

SHAHPURA.

68. The Raja Dhiraj visited Kishengarh and Umaria in Jaipur during the year, and in November came to Ajmere, where he was received in private Durbar by His Excellency the Viceroy.

The affairs of the State have been carried on satisfactorily. The balance in the treasury at the close of the year was ₹61,408, although the expenditure included several unusual but praiseworthy items, such as ₹16,817 on tanks, and ₹2,000 on a Famine Insurance Fund. The expenditure on tanks was anticipated last year, and it was required for a very heavy fall of rain in July, which resulted in the bursting of 15 tanks. Besides repairs, 8 new tanks were commenced.

The conduct of judicial business has been brisk and regular.

The only administrative changes reported is the formation of a new tahsil out of Dhanope and Kanichan, with its attached villages, the Tahsil of Sangaria having proved inconveniently large.

A quarry of good grey marble, recently discovered at Jharole, is now being worked for State purposes.

ULWAR AGENCY.

69. Lieutenant-Colonel H. P. Peacock held charge of the Agency throughout the year.

His Highness the Maharao Raja continued to evince an active interest in the administration of the State, and in January obtained a well-merited honor in being appointed a Knight Grand Commander of the Most Exalted Order of the Star of India.

There was no change in the Council during the year, and the transaction of business, both by this body and by the Civil and Criminal Courts, appears to have been regular and satisfactory. The relations of the State, both internal and external, are all that could be wished, except that arrangements are still incomplete for putting the subject of extradition to the States of Bhurtpur and Jaipur on a sound and amicable footing.

The dispute between Ulwar and Bhurtpur regarding the irrigation of four Ulwar villages near the mutual boundary, has been settled by the friendly intervention of the British Government, who have negotiated satisfactory exchange of territory between the two States.

Crime shows a slight decrease, but attention may be called to the occurrence of a case of thagi which was detected and promptly dealt with by the Durbar.

A fair standard of education is still maintained. Improved supervision probably affords a safer channel for advance than the opening of new schools, and a new Director of Education has accordingly been appointed, who will be able to devote his time and energies exclusively to this subject.

The Political Agent's report shows that His Highness the Maharao Raja continues to show zeal in the cause, both at home by issuing instructions for the erection of good buildings for all the higher schools, and abroad by additional donations to the Mayo College.

The income of the year exceeded, and the expenditure fell short of, the estimate by ₹1,33,920 and ₹24,117 respectively, the result being a surplus of over 6 lakhs. The excess of income was due to the prosperity of the year,

which enabled the Durbar to recover arrears and tukavi advances to a larger extent than was anticipated. The actual annual revenue amounted to ₹25,61,000 and the cash balance of the State has now reached ₹26,45,290, which is for the most part invested in Government securities.

The Political Agent was on tour for 105 days, during which he visited all parts of the State, and his report on the condition of the people is very satisfactory.

The success of the Steam Hydraulic Cotton Press, recently established in Ulwar, may be expected to attract the attention of other States, and possibly to mark an era in the history of Rajputana trade.

The report shows throughout that His Highness the Maharao Raja has not abated in the least his hospitality to visitors, his care for his people, or his loyalty to the British Crown. In the administration of his State he is ably seconded by his excellent Diwan, Lala Sri Ram, M.A.

NIMRANA.

70. It was my melancholy duty in December last to report to the Government of India the death, at the Mayo College, of the late Chief Raja Mokund Singh. He has been succeeded, with the sanction of the Government of India, by his first cousin Janak Singh, who is also a minor. The estate is now being satisfactorily administered by Kamdar Gulab Singh, under the superintendence of the Political Agent.

The rabi crop in Nimrana was good, and the kharif cotton crop exceptional, so that the finances for the year showed a surplus of income over expenditure amounting to ₹10,487. The estate is now so far free from debt that it was able, on the succession of Raja Janak Singh, to pay a nazarana of ₹26,000 and yet retain at the close of the year a cash balance of ₹8,519.

KOTAH AGENCY.

71. Captain W. H. C. Wyllie, C.I.E., remained in charge of this Agency throughout the year.

Early in February, Pandit Ram Dyal, who has served the State conscientiously and ably for ten years, was compelled by ill-health to relinquish his position in the Council. He has been succeeded by Pandit Sheo Shunker, who previously held the appointment of Superintendent of Revenue, while matters connected with the army and the Kotris are entrusted to Apji Amar Singh of Palaita, and Pundit Moti Lal of Sarola, respectively.

The revenues of the State fell short of the estimate by over 3 lakhs—a result which is attributed, as it was last year, to the continued depression of the opium trade, and the low price of grain, to which is added the difficulty of communication with the world outside. Expenditure, however, was well within the estimate and the condition of the finances is satisfactory. The estimate for the current year includes an item of 2½ lakhs for expenditure on public works, and provides for a surplus of nearly 3 lakhs, which, however, the Political Agent has reason to believe too sanguine.

Munshi Durga Prasad has been appointed to succeed Pandit Sheo Shunker, as head of the Revenue Department. The land settlement, which has so long been under his superintendence, has now been very generally accepted, but the Council has resolved to grant what appears to be a wise concession of 2 per cent. on the actual rent collections to certain discontented patels, who were considered to have fair grounds of complaint. The cost of the settlement up to date has slightly exceeded 4 lakhs.

Except in the Nizamats, the judicial business of the State is well reported on. In these, it is said to be perfunctory, but orders have been issued which are expected to ensure its more careful execution.

A severe epidemic of cholera, lasting through June and a portion of July, carried off 660 people in Kotah city, and although figures are not available from the districts, it is thought to have caused a large mortality there also. Dr Crofts, who was in medical charge of the Agency throughout the year, showed much energy in attempting to check the disease. The last case occurred on July 11th. Four of the prisoners in the jail were attacked and two succumbed, but precautions were successfully taken to prevent the spread of the epidemic inside prison precincts.

Apart from cholera, the general health cannot be said to have been good. The death-rate in Kotah city is very high in spite of the sanitary improvements which have been made. Vaccination is making its way: both the number of operations and the number of successful cases have increased.

A spasmodic rainfall in the monsoon season occasioned a kharif crop below the average, but timely rain in December led to an abundant rabi. Opium on the whole was a success.

The water-supply provided by the Parbutti canal has scarcely yet been appreciated by the people, but water was plentiful, and there was no pressing need for using the canal for irrigational purposes. The Eklera tank was completed and partially filled during the rains. Three other tanks are now in course of construction, of which the largest is at Ayani.

The subject of forest conservancy has engaged the attention of the Durbar, and the services of Babu Sahib Roy, who was previously employed in the Forest Department at Ajmere, have been obtained for the superintendence of the work.

The Political Agent was on tour during 82 days of the year, and visited nearly every part of the State.

THE KOTRIS.

72. The control over the Kotris and Punarth remains in the hands of His Highness the Maharao.

The Political Agent reports satisfactory progress in these departments, but I regret to observe his remarks with regard to the inefficiency of the administration of the Bulwan Kotri. The estates of Indargarh and Pipalda are under management. Those of Gainta, Kurwar, Phnsod, and Antarda, which are under the direction of their respective Chiefs, appear to be in a prosperous condition.

JHALLAWAR AGENCY.

73. For the first seven days of the year, the post of Political Agent was held, as before, by Major H. B. Abbott, who then proceeded on furlough. He was succeeded by Major H. Wylie, C.S.I., who arrived on the 25th of April, the current duties being carried on during the interval by Mr. T. H. Miles, C.E., Executive Engineer of Jhallawar and Kotah. Major Wylie remained in charge during the remainder of the year.

There is little in the present report that calls for remark. The letters which it has recently been my duty to address to the Government of India, regarding the state of affairs in Jhallawar and the settlement concluded by Major Abbott, will go far to explain the meagre character of the report, and the absence therefrom of certain items regarding the administration, on which the Government of India would ordinarily expect detailed information.

It will be observed that there are at present two vacancies in the State Council, and I may add that Babu Syam Sunder Lal, formerly Private Secretary to His Highness the Maharaj Rana, has been transferred during the year to Kishengarh, to assist the Maharaja in the administration of that State.

The rainfall in Jhallawar was a heavy one, but not sufficiently heavy to injure the crops, which were up to the average.

Except for an outbreak of cholera at Jhalrapatan in April, and another on the Chowmehla district in October, the general health was good.

The number of vaccine operations increases steadily year by year, and the five dispensaries in the State continue to do good work.

There are still four Jhallawar boys at the Mayo College. The Maharaj Rana, who was himself a student at this College, was present when it was formally opened by His Excellency the Viceroy in December.

BICKANIR AGENCY.

74. Captain A. C. Talbot, C.I.E., continued to hold charge of this Agency throughout the year.

The relations between the Chief and the Sardars, who caused disturbances in 1883, are now satisfactory; the negotiations on the subject of 'Rckh' have been practically completed, and the 'Fouj Kharch,' or war indemnity claimed by the Darbar from the disaffected Thakurs, has been paid up without demur.

The four Nizamats established last year have proved a success, and an arrangement has been concluded with the Jaipur Durbar by which petty cases of border crime on the Bikanir-Jaipur frontier are to be adjudicated on by those Courts.

The new custom system has been further elaborated by the division of the State into 10 Customs circles, and the appointment of Commission Agents at Bhiwani and Sirsa to facilitate trade to the capital. Reductions of taxes on goods have been granted to a net value of ₹25,000, and the remission of 'Khoont,' or a tax on the sale of animals within the State, is expected to be productive of great benefit to the people. At the same time increased activity of trade is anticipated. Some difficulty has been experienced in settling claims for compensation on account of trade privileges which the new system has abolished, especially those preferred by Charans, but the reliance which this class placed in the impartiality of the Dewan Amin Mahomed enabled him to give a decision which they cheerfully accepted, and which opened the way to a speedy satisfaction of the claims of all other untaxed classes in the State. The total annual charge on this account will, it is believed, amount to about ₹55,000.

The success of the system is apparent from a surplus in the actual income over the estimate amounting to $1\frac{1}{2}$ lakhs—a result which is due in great measure to the energy and sagacity of Seth Nemichand, who has held sole charge of the department during the year.

The rough measurement of the khalsa lands referred to in the last Annual Report has been nearly completed, and the information necessary for a revision of the settlement has been collected. The cultivated area proves to be much larger than the headmen admitted, and consequently it will be possible with a lower rate per bigah than before, to effect an increase in the revenue of ₹18,000 per annum. Vast tracts of good uncultivated soil have been found in the Hanumangarh and Suratgarh parganas, and these are shortly to be allotted to intending settlers from British territory, from whom 300 applications have already been received. It is expected that both these measures will excite opposition among the Chowdries, or headmen, but they are undoubtedly beneficial, and should be carried out by the Durbar.

The rainfall during the year was very partial, being deficient in the west of the State, and above the average in the more easterly districts. In the Hanumangarh, Suratgarh and Anupgarh parganas scarcity of fodder compelled the inhabitants to migrate with their flocks and herds to more favored

places. The Durbar assisted them on their return by a small distribution of grain, but no further relief was required, and apprehensions of famine were soon dismissed.

It is satisfactory to note that the cash balance at the close of the year, after defrayal of all expenditure, amounted to ₹2,61,463, and the Maharaja is to be congratulated on having carried out during the year a measure, devised for him chiefly by Captain Talbot, which has resulted in freeing the State of all its liabilities, at a cost of 5½ lakhs only. The idea of consolidating the debt, and offering all proved creditors the present worth of their claims was referred to me by Captain Talbot, and at once commended itself to my judgment. I am confident that no other method of extinguishing the debt could have had more satisfactory results.

The working of the various Courts calls for no special remarks. It will be seen that a large share of revenue, criminal, and miscellaneous work has been transacted by the Nizamats, and these Courts are also to take cognizance in future of the class of cases which has for the last two years been filed in the Thakur's Court.

The Special Committee for the investigation of the claims preferred by certain Thakurs to villages resumed by the Durbar, whose appointment was mentioned in my report for last year, have inquired into 144 cases. These have been forwarded, with Captain Talbot's remarks, for the consideration of the Maharaja, and will form the subject of future report to the Government of India.

The arrears in the Thakurs' Court, which are due, the Political Agent explains, to the heavy work of the Special Committee, will be worked off in the course of the next six months, when the Court itself will cease to exist.

Medical and sanitary matters have received a decided impetus from the presence of Surgeon P. D. Pank, of whose tact and energy Captain Talbot speaks very highly. Improvements have been effected in the Bikanir city dispensary; the number of patients who have received treatment during the year has greatly increased; three new branch dispensaries have been opened, and arrangements are in train for the opening of others.

Vaccination has been very successful so far as it has gone, and its unpopularity appears to be diminishing. Measures have also been initiated for improved sanitation.

There has been no serious epidemic during the year.

Additions are being made to the jail buildings, the diet of the prisoners is being more carefully managed, and changes, which are expected to be beneficial, have been made in the establishment.

The border-police system recently introduced continues to work satisfactorily. The Political Agent was able to meet the Rao Raja of Sikar at Tathaola, and discussed with him the procedure to be followed in regard to border cases referred to the Nizamats.

The boundary dispute between Saronda and Bhajawas, mentioned in paragraph 26 of Captain Talbot's Report for 1884-85, continued to give trouble, but was eventually settled by the Political Agent, in conjunction with Captain Loch, Assistant Resident, Western Rajputana States, in what I think may be regarded as a very satisfactory manner.

Imperial Post Offices were to be opened experimentally as soon as possible at seven new places in the State, and the Durbar propose to protect the various lines by the establishment of 14 Thanas.

I am glad to report that the Political Agent has found time which pressure of other work has hitherto prohibited him from sparing, to urge upon the Durbar the importance of education. A new school-house is in course of erection for the school at Bickanir, and an English master has been appointed. Two other schools have been opened in the district and are well attended; and it is satisfactory to observe that the subject is gaining a popularity which the Maharaja personally encourages.

The Maharaja has further been liberal enough to sanction an expenditure of R7,787 on the Bickanir Boarding-house at the Mayo College. Two more boys, the Thakur of Maharajan and Kunwar of Rawatsar, have joined this institution.

The Political Agent was on tour for 75 days, during which he visited all parts of the State, except the southern border adjoining Marwar and the western districts towards Pugal and Anupgarh, having postponed his visit to the latter, owing to the scarcity of grass and water which prevailed there.

The history of the past year in Bickanir will, I believe, be always creditable to the Durbar, and will always bear the stamp of Captain Talbot's energy. While endorsing that officer's remarks with regard to Dewan Amin Mahomed, Munshi Sohun Lal, and the other members of the Council, I must also express my sense of the high value of his own services, which no doubt largely contributed to the numerous improvements and reforms mentioned in this report.

E. R. C. BRADFORD, *Colonel,*
Agent to the Governor-General in Rajputana.

STATEMENT A.
Statement showing such Meteorological Observations as have been obtained from Stations in Rajputana during the year 1885-86.

ABU; }
The 2nd July 1886.

Deputy Postmaster General,
Rajputana.

APPENDICES.

REPORTS BY THE POLITICAL AND OTHER OFFICERS.

Appendix I.

REPORT ON THE MAYO COLLEGE, AJMERE, FOR 1885-86.

No. 142, dated Ajmere, the 20th April 1886.

From—MAJOR WILLIAM LOCH, A.D.C., *Principal of the Mayo College, Ajmere,*
 To—The First Assistant Agent, Governor General, Rajputana, Abu.

I have the honor to submit, for the information of the Agent, Governor-General and Chief Commissioner, a report on the Mayo College for the year 1885-86.

2. The number of boys on the College roll at the end of the year 1884-85 was 74.

Number of pupils at last report. The new admissions during the year were 18, making a total of 92.
 Admissions during the year.

3. The withdrawals during the year from all causes, including one casualty, were 12, thereby leaving 80 boys on the College roll, showing an increase of 6 boys on our last year's total, and which is the highest number that the College have ever attained.
 Withdrawals.
 Number of boys remaining on College roll.

4. Being led to hope that new boys may join from the Meywar, Jaipur, Kotah, and Bikaner States, the above number will, I trust, be even further added to during the coming year.

5. The names of the boys admitted during the year are as follows:—
 Names of new admissions.

1. Fatch Singh, son of Thakur Sheo Singh of Dangri, Jaipur. Joined 1st July 1885.
2. Muhammad Abdul Wahid Khan, son of Sahibzada Abdul Wahab Khan, and nephew of His Highness the Nawab of Tonk. Joined 4th July 1885.
3. Muhammad Abdul Majid Khan, son of Sahibzada Abdul Hamid Khan of Tonk. Joined 4th July 1885.
4. Kesri Singh, Thakur of Lacant, Meywar. Joined 6th July 1885.
5. Hukam Singh, son of the Thakur of Rawatsur, Bikaner. Joined 6th July 1885.
6. Rupal Singh, son of the Thakur of Rupnagar, Meywar. Joined 11th July 1885.
7. Harl Singh, Thakur of Mahajan, Bikaner. Joined 25th July 1885.
8. Baghanath Singh, half-brother of His Highness the Maharaja of Jodhpur. Joined 3rd September 1885.
9. Muhammad Inam ulah Khan, son of Sahibzada Ahmed Khan of Tonk. Joined 3rd September 1885.
10. Pratap Singh, second and eldest surviving son of the Thakur of Bagru, Jalpur. Joined 26th October 1885.
11. Kallan Singh, eldest son of the Thakur of Ajeyrappura, Jaipur. Joined 26th October 1885.
12. Debi Singh, second son of the Thakur of Ajeyrappura, Jalpur. Joined 26th October 1885.
13. Amir Singh, son of Lalla Sri Ram, Prince Minister of Ulwar. Joined 1st November 1885.
14. Jivan Singh, Thakur of Baru, Marwar. Joined 6th March 1886.
15. Fatch Singh, first cousin of the Thakur of Baru, Marwar. Joined 6th March 1886.
16. Hamir Singh, eldest son of the Maharana of Danta, Malikanta. Joined 22nd March 1886.
17. Madhav Singh, Thakur of Khejarla, Marwar. Joined 24th March 1886.
18. Kicher Singh, son of the Thakur of Sathin, Marwar. Joined 24th March 1886.

6. The following list specifies the reductions on the College roll during the year under report:—
 Names of withdrawals.

1. Kanwar Bhikendra Singh of Uwarer.
2. Phul Singh, Thakur of Para, Ulwar.
3. Sawai Singh, Thakur of Chamrawali, Ulwar.
4. Sangram Singh, Thakur of Para, Ajmere.
5. Clandra Singh, uncle to the Rao of Junda, Ajmere.
6. Mokand Singh, third son of the Thakur of Parli, Jalpur.
7. Dhenkul Singh, Thakur of Nitari, Meywar.
8. Madhav Singh, Chief of Gainta, Kotah, left owing to ill-health.
9. Muhammad Muntaz Hussein Khan, Nawab of Pataudi, withdrawn by the Commissioner of Delhi to enable him to join the Punjab Chiefs' School.
10. Pirthi Singh, son of His Highness the Maharawat of Pertabgarh, withdrawn by his father.
11. Baghanath Singh, half-brother of His Highness the Maharaja of Jodhpur, left at the desire of the Durbar.
12. Mokand Singh, the Raja of Nimrana, died on the 12th of December 1885.

All left on attaining their majority.

Distribution of the College roll.

7. The College roll remains thus divided:—

| | | | |
|---------------|----------|------------|----------|
| Ajmere | 10 boys. | Mahikhanra | 1 boy. |
| Bikaner | 6 " | Meywar | 6 boys. |
| Central India | 1 boy. | Punjab | 1 boy. |
| Jaipur | 13 boys. | Serahi | 1 " |
| Jhalwar | 4 " | Tonk | 14 boys. |
| Kerawali | 1 boy. | Ulwar | 4 " |
| Kishungarh | 1 " | | |
| Kotah | 6 boys. | | |
| Marwar | 14 " | | |
| | | TOTAL | 80 boys. |

States remaining unrepresented. 8. The States which are now unrepresented at the College are as follows:—

Banswara, Bhurtpur, Baudi, Dholepur, Dungarpur, Jeysalmere and Pertabgarh.

9. The punctuality in the return from the last summer vacation was not so satisfactory as I should like to report, but the heavy rain which fell at that time was in a great measure the cause of the delay in rejoining; 22 boys were present at the opening roll-call; 39 joined by the following day, and within three weeks the absentees were reduced to 13.

Return from vacation.

Conduct.

10. The conduct of the boys both in and out of College has been, with two or three exceptions, most satisfactory.

Kanwar Gaj Singh of Bandanwara stands first as the boys' own selection for Good-conduct Prize, and I have much pleasure in confirming their choice.

The following names were also submitted by the boys as worthy of special mention for their good behaviour, and I cordially endorse their views:—

Maharaj Mul Singh of Dattigaon.
Maharaj Zalim Singh of Jodhpur.
Sahibzada Muhammad Inayat-ul-lah Khan of Tonk.
Lalla Amir Singh of Ulwar.
Thakur Mangal Singh of Pokurn.
Thakur Karan Singh of Jobuir.
Rao Sheo Nath Singh of Ahmet.
Thakur Lachman Singh of Bagsuri.

Tika Balbir Singh of Faridkot.
Thakur Man Singh of Karouj.
Kanwar Jai Singh of Kotara.
Kanwar Bhawani Singh of Fattehpur.
Thakur Debi Singh of Palwa.
Thakur Bijaya Bahadur Singh of Piplaj.
Kanwar Onkar Singh of Palaita, and Sahibzada Muhammad Abdul Hafiz Khan of Tonk.

11. As already mentioned the Raja of Nimrana succumbed after six weeks of almost un-interrupted fever, much regretted by all, but the daily average number of sick during the year still shows the good figure of 1·17, bearing testimony, as heretofore, to the general excellent health which the boys enjoy.

Health.

Two cases of measles which occurred towards the close of the term were isolated immediately, and the spread of the illness satisfactorily checked.

12. The following comparative statement shows the daily average number on the College roll, as also the number present at College during the past six years. The steady improvement in both columns will, I hope, be considered most satisfactory:—

| Years. | Daily average number on the College Roll. | Daily average number present at College. |
|-------------------|---|--|
| 1880—81 | 37·19 | 32·34 |
| 1881—82 | 57·64 | 49·36 |
| 1882—83 | 64·12 | 54·58 |
| 1883—84 | 68·13 | 58·37 |
| 1884—85 | 70·64 | 59·30 |
| 1885—86 | 75·65 | 64·11 |

Curriculum.

13. There has been no change in the College curriculum.

14. I beg to attach a Progress Report (Annexure F.) for the terms commencing 5th January 1885 and ending 25th March 1886, and the following boys deserve special commendation:—

Progress.

Kanwar Gaj Singh of Bandanwara.
Kanwar Dip Singh of Garhsisar.
Thakur Maugal Singh of Pokurn.
Kanwar Dalpat Singh of Manadar.
Thakur Sham Singh of Raghunathgarh.
Bhanwar Sultan Singh of Nimera.
Thakur Bijaya Bahadur Singh of Piplaj.
Rana Zorawar Singh of Lobiana.
Kanwar Onkar Singh of Palaita.
Sahibzada Muhammad Karamat-ul-la Khan of Tonk.
Sahibzada Muhammad Abdul-latif Khan.
Maharaj Mul Singh of Dattigaon.
Thakur Jai Singh of Salpur.
Sahibzada Muhammad Abdul-hafiz Khan of Tonk.
Sahibzada Muhammad Inam-ul-la Khan of Tonk.

Chief events during the year.

15. It gives me great pleasure to report that the Mayo College main building, the completion of which I had the

honor of reporting last year, was formally opened by His Excellency the Viceroy on the 7th of November 1885.

Annexure G. embraces :—

- 1.—The address by the Secretary to the Mayo College Council.
- 2.—His Excellency the Viceroy's speech.
- 3.—The address by the Principal of the Mayo College which took place on the occasion.

The distribution of the Prizes was performed by Her Excellency the Countess of Dufferin, and was immensely appreciated.

The ceremony concluded by the presentation to Her Ladyship, by the boys of the College of a photographic album to which His Lordship graciously replied (Appendix G).

On quitting the building His Excellency spoke a few kind words to each of the boys.

The following members of the Mayo College Council were present :—

- H. H. the Maharajah of Kisliengarh.
- H. H. the Maharaja Rajah of Ulwar.
- H. H. the Maharaj Rana of Jhallawar.
- Mr. Trevor Plowden, Commissioner of Ajmere-Merwara.
- Colonel Powlett, Resident, Western Rajputana States.
- Lieutenant-Colonel W. J. W. Muir, Political Agent, Harauti and Tonk.
- Lieutenant-Colonel H. P. Peacock, Political Agent, Ulwar.
- Major H. Wylic, C.S.I., Political Agent, Jhallawar.
- Captain Talbot, C.I.E., Political Agent, Bikanir.
- Capt. W. H. C. Wyllie, C.I.E., Political Agent, Kotah,

and amongst the guests were His Honor the Lieut.-Governor of the Punjab, Sir Charles Aitchison, and Colonel Sir Oliver St. John, the first Principal of the College.

In the evening the boarding-houses were, by the kindness of the several Durbars illuminated, and a display of fire-works brought this eventful day in the history of the College to a close.

Expenditure on Imperial Works.

16. I beg to attach a statement (Appendix L.) showing the expenditure on Imperial Works for the year 1885-86, amounting to ₹7,491-7-7.

17. A system of lightning conductors has been provided for the protection of the Mayo College main building, and some minor works were also carried out towards the general improvement of the College, *viz.*—

- i.—The provision of perforated zinc sheets below the several domes throughout the building.
- ii.—The provision of a teak-wood door for the east vestibule door-way, and the fixing of teak-wood frames, with stretched gauze inside the perforated marble scroll-work of the arch-heads above the doors at the west end of the Lecture Hall.

Lavatory attached to the College.

18. Owing to the lavatory being found insufficient for the number of boys now on the College roll, an addition of eight more latrines was made.

Quarters for College Officials.

19. The quarters for the College Officials have, as yet, not been completed, but I hope funds will be available for the purpose during the current financial year.

Statue of the late Lord Mayo.

20. The statue of the late Lord Mayo, which was formerly placed in the Lecture Hall of the Mayo College, has been removed to the outside of the building on its western front.

This necessitated certain alterations to the surrounding plateau and the main approach road. Both of these alterations have been a great improvement to the general aspect of the College.

Park Roads.

21. The park roads have been repaired and are in fair order.

The portion of the new road crossing the Mayo College Park from north to south, has been metalled up to the place where it meets the main approach road, and the remaining part will be proceeded with during the ensuing year.

College buildings ; swimming-bath.

22. The swimming-bath has been improved by the construction of a stone flooring encircling it.

23. Red sand-stone parapets for three culverts close to the Mayo College main building have been provided, and a water-course constructed near the Principal's residence.

Culverts.

24. (Appendix M.) contains the receipts and disbursements on account of contributational works for the year under report, from which it will be observed that transactions reaching the sum of R25,982 have taken place.

Transactions on account of contributational works.

If to this we add the outlay of R7,491-7-7 on Imperial Works, the total reaches R33,473-7-7 which I trust I may be permitted to say has given considerable extra work, and not free from responsibility and anxiety.

I would here prominently mention the excellent services of Sub-Overseer Fuzl Muhammad.

25. The Ulwar gateway was completed a few days before the arrival of His Excellency the Viceroy, but owing to the eight stone beams which were introduced for the support of the roof having one and all become fractured, the entire upper portion of the work has had to be removed.

Ulwar gateway.

A separate report on the subject will be made by the Executive Engineer, Military Works and Roads Division.

Durbar buildings.

26. In addition to the usual annual repairs, the following additions and alterations have been made to the several boarding-houses.

27. At the Ajmere residence, a latrine for servants, a screen wall in rear of the boys' privy, and a garden cistern have been constructed, and the servants' quarters have also been improved by the addition of slab-flooring in front of their houses ; eight syces' houses are also in course of construction.

Ajmere house.

28. At the Udaipur boarding-house, the works of substitution of red sand-stone slabs for the terrace flooring in the upper and lower verandahs, and replacement of stucco jalis by stone ones sanctioned by the Meywar Durbar last year have been finished. Slab-floorings have also been provided in front of the out-houses, and two more syces' houses have been constructed.

Udaipur residence.

29. At the Jodhpur residence a screen wall behind the privy and division walls for three stables have been constructed ; cisterns both for the garden and servants' quarters have also been made, and a red sand-stone parapet provided for the culvert entering the boarding-house precincts.

Jodhpur residence.

A house for the tutor of the Thakur of Ghanerao is in course of construction.

30. The Durbar having kindly sanctioned the addition of four more dwelling-rooms for boys, a large bath-room, five godowns, five extra servants' houses, and a new privy, all the above works are in course of construction, and will, I hope, be completed within the next three months.

Bikanir residence.

Kotah residence.

31. The Kotah hoarding-house is quite complete.

The stone finials on the domes have been replaced by copper-gilded ones, much improving the look of the house.

The Durbar has also kindly sanctioned the construction of the following works :—

- 1.—Iron gates at the four entrances to the court-yard.
- 2.—A privy suitable for eight boys.
- 3.—A new latrine for the servants, with sweeper's house attached.

Tonk residence.

32. Six syces' houses kindly sanctioned by His Highness the Nawab of Tonk are in course of construction.

Dholepur residence.

33. The Dholepur residence, I fear, may not be built for some time.

34. Extra land to the extent of one bigha and 18 biswas has been purchased at a cost of R280 ; of this one bigha was for the construction of syces' houses.

College grounds.

The Temple.

35. The erection of the temple I regret to say has not yet been commenced.

36. I have very great pleasure in reporting the very liberal support which the Chiefs of Rajputana have given to a scheme for the formation of a College Prize Fund.

The interest on sums of money amounting to ₹10,650 have been promised as detailed below:—

His Highness the Maharana of Udaipur, ₹100 per annum.

H. H. the Maharajah of Jodhpur, ₹100 per annum.

H. H. the Maharaj Rana of Jhallawar, ₹2,000, or ₹80 per annum.

H. H. the Maharao Rajah of Kotah, ₹1,000, or ₹40 per annum.

H. H. the Maharajah of Bikanir, ₹600, or ₹24 per annum.

H. H. the Maharao Raja of Ulwar, books to the value of ₹50 per annum.

H. H. the Rao of Serohi, ₹300, or ₹12 per annum.

The Raja Dhiraj of Shahpura ₹500, or ₹20 per annum.

Finance.

37. I have the honor to append a statement showing the financial condition of the Mayo College for the year 1885-86.

Total receipts.

38. The actual receipts during the year under report amounted to ₹29,837-11-3 against ₹35,097-12-1 of the previous year, as detailed below:—

(a).—The interest on the Endowment Fund amounted to ₹24,917-8-10 against ₹25,121-0-8 of the last year; the small decrease of ₹203-7-10 being due to the sale of Promissory Notes as mentioned in para. 33 (a) in my last year's report.

(b).—The contributions from Native States and private persons amounted to ₹3,709-15-6 against ₹3,726-1-8 in 1884-85.

Conservancy and garden receipts.

The conservancy and garden receipts amounted to ₹1,210-2-11 against ₹1,200 in the last year.

39. The cash balance on 31st March 1885 was ₹3,591-1-10; and the total receipts during the year under report amounted to ₹29,837-11-3, making a total of ₹33,428-13-1.

Total assets of past year.

40. The expenditure during the year amounted to ₹24,761-15-9, leaving a balance in the Ajmere Treasury of ₹8,666-13-4, as per Treasury Officer's certificate (Appendix J).

Actual expenditure.

Estimated receipts for the ensuing year.

41. The estimated receipts for the year 1886-87 amount to ₹29,880 against ₹29,690 of the year 1885-86, showing an increase of ₹190, as explained below—

(a).—There is a decrease of ₹10 under the head "Interest."

(b).—There is an increase of ₹200 under head "Contributions from Native States and private persons," due to an increase in the number of boys.

Estimated expenditure for the ensuing year.

42. The estimated expenditure amounts to ₹28,440 against ₹27,775 for the year under report, showing an increase of ₹665, as detailed below—

The establishment charges remain unchanged, with the exception of a small increase of ₹5, which does not call for any special remark.

The following are the alterations in the contingent charges when compared with the budget for the year 1885-86:—

1.—An increase of ₹1,000 under head "Conservancy of Garden and Grounds," due to the extension of the Mayo College Park and other improvements necessary.

2.—Increase of ₹690 under head, Book "Play and Medical Stores," in consequence of an increase in the number of boys.

3.—A decrease of ₹1,030 under head "Pension and Absentee charges."

43. The appointment of Head Master, which was vacated by Mr. Johnstone on his promotion to Principalship of the Residency College at Indore, has been filled by Mr. G. W. Blathwayt, who joined the College

Services of the Staff.

on the 15th of June 1885; to him and all the members of the educational staff I would tender my sincere thanks for their services during the year under report.

Jemadar Sheikh Muhammad Azim, who resigned the post of Riding Master on the 31st December 1885, was succeeded by Khizar Khan, late a Duffadar in the 19th Bengal Lancers.

List of annexures.

44. I beg to attach the following annexures:—

- A.—List of Pupils in the Mayo College on the 25th of March 1886.
- B.—Examination Marks from January 1885 to March 1886.
- C.—English-Speaking Examination Marks from February 1885 to March 1886.
- D.—Class Marks from January 1885 to March 1886.
- E.—Holiday Task Marks for vacation 1885.
- F.—Progress Report from 5th January 1885 to 25th March 1886.
- G.—Ceremony of the opening of the Mayo College by His Excellency the Viceroy, and the distribution of Prizes by Her Excellency the Countess of Dufferin.
- H.—Comparative Statement of income and expenditure during 1885-86 & 1886-87.
- J.—Treasury Officer's Certificate of balance in the Mayo College Fund on 31st March 1886.
- K.—Budget Estimate of ordinary income and expenditure for 1886-87.
- L.—Statement showing expenditure on Mayo College Imperial Works during 1885-86.

MAYO COLLEGE, AJMERE; }
The 20th April 1886.

ANNEXURE G.

Ceremony of the opening of the Mayo College by His Excellency the Viceroy and the Distribution of Prizes by Her Excellency the Countess of Dufferin on November 7th, 1885.

- (i.)—Address by the Secretary to the Mayo College Council.
- (ii.)—His Excellency the Viceroy's Speech.
- (iii.)—Address by the Principal, Mayo College.
- (iv.)—Mayo College Prize List.

(I.)

The address by the Secretary to the Mayo College Council.

YOUR EXCELLENCY,—The main object of our assemblage here this afternoon is to celebrate the completion of the Mayo College, and I would therefore, with Your Lordship's sanction, describe in a few words the origin and growth, not only of the building in which we are gathered together, but of the institution itself.

It was in October 1870 that His Excellency Lord Mayo at the Durbar held within a few yards of this house, mentioned to the few Chiefs then assembled to meet him, "*the project which he had much at heart of establishing a school or College, which should be devoted exclusively to the education of the sons of the Chiefs, Princes, and leading Thakurs of Rajputana.*"

His Lordship's views, describing more definitely the details of the proposed scheme, were subsequently received and communicated to the several Chiefs of the Province, and contributions, reaching the large sum of over seven lakhs of rupees, were most liberally tendered; and although the remission of a small portion of these offers was deemed expedient, the actual receipts reached the extremely handsome and entirely unanticipated total of 6,23,750 rupees; this sum, though liable to occasional fluctuations, may be said to represent the Endowment Fund of the Institution.

The yearly revenue accruing from this amount meets the entire working expenses of the College, excluding the pay of the Principal, and such annual repairs as may be necessary for works imperial.

The details above referred to were received during the incumbency of Sir Charles Aitchison, in the post of Foreign Secretary to the Government of India, and Your Lordship will, I venture, participate in our pleasure of enjoying the honour of his presence here to-day.

In July 1877, orders were received to commence the construction of the College building, according to a design prepared by the late Major Mant of the Royal Engineers, and on the 5th of January of the following year the foundation stone was laid by Mr.—(now Sir Alfred) Lyall, then Agent to the Governor-General for Rajputana.

The executive charge of the work was entrusted to Mr. J. W. Brassington, who continued to superintend the building till its practical completion in June 1883.

The Hindu Saracenic style of architecture was selected by Lord Northbrook, as being the most suitable one to adopt in a country whose palaces and finest edifices bear general witness to its popularity. This fusion of Hindu and Mahomedan architecture, so common, and so excellently developed in Rajputana, is at once well suited to the requirements of modern life in India, and in perfect harmony with the traditions of the people, while the effect of the whole is, I trust, sufficiently pleasing to the eye of the severest critic.

Upon the plan of the building, the arrangement of the rooms, and the exterior and interior decorations, I need not now enlarge, but it may be observed that the number of boys now borne on the College roll has already almost out-grown the class-room accommodation, and there is every probability, that not only the large library in the north wing, but also the remaining portion of the south wing will have soon to be devoted to the use of the newly-formed and newly-forming classes.

With regard to the decoration of the College, there is one point only to which I would direct at once the special attention of Your Excellency, a point which the liberality of a Native Chief has rendered worthy of mention. It is the coloring of this central Section Hall (in which we are collected). This coloring has been executed as will be seen, entirely in oils and represents a valuable gift from His Highness the Maharaja of Jaipur.

The entire cost of the College building, with out-offices, amounts to Rs. 81,696.

Grouped round the central building of the College lie a number of residences, built by the different Chiefs of Rajputana, besides the Ajmere Boarding-house, and the Principal's and Head Master's residences, built by the Imperial Government.

Of the interest which the Chiefs evince in their great public school, one proof is afforded

by the fact that numerous additions and improvements have been made in these buildings from time to time, through the generosity of the several Darbars.

I would also bring to Your Lordship's notice the many munificent gifts that we have received from :—

H. H. the Maharao Raja of Ulwar,
 H. H. the late Maharaja of Jaipur,
 H. H. the present Maharaja of Jaipur,
 The late Nawab Ali Mardau Khan of Jodhpur,
 The Rao of Junia,
 The Rao of Masauda,

and the British and Native subjects in Rajputana; gifts amounting in value to nearly Rs55,000.

I would now review in the fewest possible words the increase which has occurred from year to year in the numbers on our College roll.

The total admissions have been 146; of these 67 boys have left, thus leaving 79 at the present date.

It may be interesting to observe the almost uninterrupted steady growth with which this number has been reached.

At the conclusion of the first term in April 1876, the number of pupils were 23; in the following year there was an increase of 8; in April 1878 the number stood at 39; in 1879 at 37; twelve months later it was 32; at the end of the next official year 45; in 1882, 62; the following year, 66; last year, 68; on the first of April of the present year, 74, and on this date, as just mentioned above, the number is 79.

This number I trust may be deemed satisfactory, and indicative of the growing prosperity and popularity of the College.

So long as the figure which has now been reached does not materially fall, we may rest, I venture to hope, in the assurance that in no little measure the object and desire of our illustrious founder has been secured.

I feel that I cannot acknowledge in any adequate terms the honor which Your Excellency has conferred on us this day, nor can I hope that any expression of mine will do justice to the real pleasure and gratitude your presence has given, not only to those specially interested or associated with the Mayo College, but I would venture to say to all assembled here.

In now asking Your Lordship to declare this building open, I would ask permission to urge upon these young Chiefs and Sardars with whom it is my privilege to be so intimately acquainted, and for whose special benefit this building has been erected, to remember and act up to the precepts and the example of that great statesman and administrator whose name this College bears, and the memory of whose noble life is being brought to us very closely to-day, *viz.*, "to advance in the right way, and secure to themselves the favoring protection of that Power who only seeks their good."

(II.)

His Excellency the Viceroy's Speech.

Ladies, Princes, Chiefs, and Gentlemen,—It is almost superfluous for me to tell you that I experience exceptional satisfaction in taking part in this day's celebration. The late Lord Mayo was a personal friend of my own, and I am naturally glad to have an opportunity of showing my interest in the prosperity of an institution which bears his name, and to join with you in paying a well-merited tribute to his memory. But, however grateful such an act might be to my private feelings, it is in my public capacity, and as the representative of Her Majesty and the British Government, that I desire more especially to mark my admiration of the intention and ideas with which Lord Mayo was inspired when he founded this College to emphasize my approval of the special objects for which it was designed, and to assure you of my earnest desire to extend the sphere of its usefulness. And in doing this, I feel that it is not to the statesmanlike views of Lord Mayo alone that I am according the acknowledgments which are their due, but that I am also conveying, in as marked a way as circumstances permit, my appreciation of the public-spirited manner in which the Princes and leading Chiefs and inhabitants of Rajputana have associated themselves with his noble work. Though the idea of such a foundation originated with Lord Mayo, it is to the generosity and wise liberality of the Rajput Rajas and aristocracy that the realization of the project is due, and most heartily do I congratulate them on the effective manner in which they have been able to give effect to the intentions of their late lamented Viceroy. (*Cheers.*)

And now, turning for a moment to those for whose benefit so many have laboured and so much has been done, I would wish to address to them a few words of earnest and friendly advice. In the first place, I would remind them that, whether as the seions of ancient houses, as the heads of historical families, as destined to fill public positions of importance in Rajputana, or as the futuro Chiefs of independent States, there has already fallen upon their young lives the shadow of heavier responsibilities and stricter duties, as well as the sunshine of loftier aspirations and wider possibilities, than any which encompass the existence of the bulk of their countrymen. The happiness of thousands, the tranquillity of vast territories, and the general prosperity of the Empire at large, may be advanced or retarded in a sensible manner, in proportion to the degree to which they may take advantage of the opportunities of self-improvement afforded them within these walls. For this reason it is exceptionally incumbent upon you, my young friends, to cultivate certain special qualities, and to avoid certain special dangers. Inasmuch as Providence has placed you in a position of considerable social dignity, has relieved you from the pressure of sordid cares, and the anxieties incident to straitened circumstances, it should become a matter of pride and conscience with you to clothe yourselves with those manly virtues and characteristics, which in all ages have been recognised as the proper adornment of the well-born, such as self-restraint, fortitude, patience, the love of truth and of justice, modesty, purity, consideration for others, a ready sympathy for the weak, the suffering, and the oppressed, and, above all, with that noble courtesy which does not merely consist in grace of manner, and a veneer of conventional politeness, but which is the outcome of an innate simplicity and generosity of spirit which instinctively shrinks with scorn and disgust from anything approaching to egotistical vanity and vulgar self-assertion. On the other hand, you should be equally watchful against those temptations to which wealth, with its opportunities of self-indulgence, in all ages and all countries, has been peculiarly exposed, such as sloth, idleness, sensuality, effeminacy of mind and body, and all those baser influences which render a man a burden to himself, a disgrace to his family, and a curse to his country. And in saying this I would warn you that we are living in a shifting world,—in a world in which those very privileges and advantages upon which you have been led—I do not at all say illegitimately—to pride yourselves, are being continually exposed to the criticisms of public opinion, and the ordeal of intellectual competition. If, then, Rajputana is to maintain her historical position as one of the leading provinces of Hindustan, and the ancient home of all that was high-bred, chivalrous, and heroic, it is absolutely necessary that the sons and representatives of its famous houses should endeavour to retain as leaders of the people in the arts of peace, and as their exemplars in the van of civilisation, that pre-eminence and renown which their forefathers won, fighting sword in hand at the head of their clans on many a field of battle. (*Cheers.*) And, believe me, such peaceful triumphs, promoting, as they do, the well-being of multitudes of our fellow-creatures, are far more worthy of your ambition than any which were gained in those miserable days, when scarcely a twelve month passed without the fair fields of India being watered with the blood of thousands of her children.

But, passing from these general topics, I would have wished to have made a few specific recommendations in regard to matters of detail. Having, however, already detained you longer than I intended, I will confine myself to a single point which has been already frequently referred to on similar occasions, namely, the great desirability of your becoming thorough masters of the English language. In doing so, I will not particularly insist upon the obvious advantage of your acquaintance with a tongue so rich and varied in its literature, and through which you can make yourselves acquainted at first hand with the ideas of some of the greatest men that have ever lived, as well as with the latest results of modern philosophic thought and scientific research. I would rather remind you of the practical benefits which the due prosecution of your studies in this direction will confer upon you. English is the official language of the Supremo Government under which you live, and of the books which deal with the public affairs, the domestic administration, and the general interests of your country, and it will be of continual use—indeed, I may say of absolute necessity—to you in the positions which you may be called upon to fill. The keen-witted inhabitants of many other parts of India have fully appreciated this fact, and all their energies have consequently been devoted to the acquisition of English. As a consequence, many of them both speak and write it with an eloquence and fluence beyond all praise. Now, I trust that those I am addressing have sufficient self-respect, and take a sufficient pride in their province not to wish it to fall behind the other component parts of the Empire in this particular; and therefore, again I say, let it be one of the principal objects of your ambition while within these walls to acquire the English language. (*Cheers.*) Already in the Councils of Providence the edict has gone forth that English should be the language chiefly prevalent upon God's earth. Within another hundred years it has been calculated that the English-speaking races of the world will number upwards of a thousand

millions. Under such circumstances, it would indeed be a disgrace if any of Her Majesty's subjects in India, with any pretensions to belong to the educated classes should remain ignorant of it. (*Cheers.*)

And now, Ladies, Princes, Chiefs, and Gentlemen, it only remains for me to congratulate those present—and specially those who, like my honored friend Sir Charles Aitchison, and your first Principle (Sir Oliver St. John), who is also here upon this occasion, were the first promoters of this great and noble institution—on the practical success it has attained, and on the favorable future extending before it. Already it has turned out pupils possessed of those characteristics which we in England most highly value; nor need I go further in illustration of this fact than to point to the first, and as yet the only Rajput Prince whose State I have yet visited, and with whom I have had the pleasure of a few days' personal intercourse, the Raja of Ulwar—(*Cheers*) an honored pupil of the Mayo College, who has more than kept the promise of his youth by the intelligence of his government, and by the personal industry which he brings to the management of his affairs. He is administering his State in a way to conduce to the prosperity and contentment of his people, his own reputation, and the honor and welfare of the Supreme Government. (*Cheers.*) If only the Mayo College will continue to turn out such rulers, we may well envy that illustrious Viceroy to whose wisdom we are indebted for its establishment, and whose honored memory it is destined, I trust, to preserve in the land for many and many a generation. (*Loud and continued applause.*)

[His Excellency having formally declared the Mayo College open, a Royal salute was fired, after which Major Loch rose, and addressed Lady Dufferin, as follows]:—

(III.)

The address by the Principal, Mayo College.

YOUR EXCELLENCIES,—To inaugurate the proceedings which have just been completed, I venture to submit that there could be no more perfect or pleasing sequel than the utilization of this building in a first ceremonial at which Your Ladyship has been graciously pleased to preside, and one which cannot but afford immediate and complete gratification to those who have contributed so generously to the Building Fund, and also to those who are now students at the College. It is on behalf of these students that I would more especially claim Your Excellencies' attention and interest.

Formal acknowledgment of good work done cannot fail to give satisfaction to those whose performances are deemed worthy of the distinction; and Your Excellencies' presence here today, supported as you are by the Vice-President and Members of the College Council, and by so distinguished a party of guests, will assure the Mayo College boys that their labours have met with an approval which will serve as a powerful stimulus to sustained exertions in the future.

The prizes which I have now the honor to solicit Your Ladyship to distribute, have been won during the past year of 1884.

Our curriculum embraces throughout the entire College, English and Mathematics, with Hindi and Urdu, and subsequent tuition in Sanskrit or Persian, for which the preliminary education is a preparation. History and Geography are taught in all but the two junior classes, and prizes are given for these two subjects, as also for English and for Mathematics.

According to previous custom, which, I trust, will meet with Your Excellencies' approval, prizes have also been awarded for efficiency in sports. The competitions embrace exercises both on horseback and on foot, and are always entered into with the greatest keenness and interest.

Prizes are also awarded for holiday tasks, and it may be considered a subject of congratulation that no less than 51 boys out of the 66 who were on our College Roll during the vacation devoted a material portion of the holidays to purely voluntary study; thus exhibiting an interest in the education which is here being imparted to them, and a desire to retain knowledge previously gained.

I have especially to commend the following boys who have carried off these prizes:—

Kanwar Bijaya Singh of Delwara, Meywar,
 Maharaj Zalim Singh of Jodhpur, Marwar,
 Thakur Ratan Singh of Bansia, Marwar,
 Kanwar Dalpat Singh of Manadar, Serohi,
 Kanwar Dip Singh of Garhsisar, Bikanir,
 Thakur Sham Singh of Raghunathgarh, Ajmere,
 Kanwar Abhaya Singh of Mangal, Jhallawar, and Kanwar Rir Mal Singh of
 Riyan, Marwar.

The other prizes on our list are—

His Excellency the Viceroy's gold medal,

The prizes for good conduct,

The punctuality prize,

and the prizes for the highest aggregate class marks.

To treat of these in inverse order, the rewards for the highest aggregate class marks are competed for by the entire College, and refer purely to the marks obtained in class, bearing no reference to those awarded in examinations.

To obtain these prizes unremitting attendance is absolutely essential, and I would beg to bring forward the names of Maharaj Zalim Singh of Jodhpur and Kanwar Bijaya Singh of Delwara, the winners of these prizes in the Entrance Class and in the remainder of the College, respectively, as deserving of high commendation.

The prize for punctuality has been gained by Sahibzada Mahomed Inayat-ullah Khan of Tonk.

As regards the good-conduct prize, I left the decision in the hands of the boys themselves, and I cannot too strongly endorse their selection of Maharaj Zalim Singh of Jodhpur.

He is a boy of excellent character, and his exemplary behaviour, coupled with his marked progress in study, has induced me to select him for the only remaining prize which I have to mention,—this is our first and most coveted one, His Excellency the Viceroy's gold medal.

In nominating Maharaj Zalim Singh of Jodhpur, I feel that I have chosen a boy who will be a credit to the great Rathore family to which he belongs, and to the College where he has been a pupil for the past 10 years, and of which he is now the head boy.

Before concluding, Your Excellencies, I would add, that the College has now 79 boys on its rolls, a greater number than has ever been previously reported, and that there is every reason to hope that it is steadily gaining in popularity.

There could be no more fitting opportunity for me to refer to the very liberal support which the Chiefs in this Province have given, to a scheme for the formation of a College Prize Fund, and which I had the honor of submitting to them.

The interest on sums of money amounting to ₹10,150 have been promised annually, and the generosity so substantially evidenced, is thoroughly appreciated and valued by the boys, on whose behalf, as well as on my own, I wish to tender the most sincere acknowledgment.

I cannot conclude without a grateful reference to the cordial assistance I have received from the members of the College educational staff; and in doing so, I wish especially to mention the name of Mr. Johnstone, who was the Head Master throughout 1884, and left us on the 1st of February last to take up the Principalship of the Residency College at Indore.

I have also to acknowledge with thanks the work performed by the Boarding-house Mohtamids.

May I now solicit Your Ladyship to distribute the prizes to the successful students.

[Lady Dufferin having distributed the prizes amid much cheering, Major Loch on behalf of the students, presented Her Excellency with a very handsome Album as a souvenir of the part she had taken in the day's proceedings. In thanking Major Loch, on behalf of Lady Dufferin, His Excellency spoke as follows :—

Major Loch,—Lady Dufferin has requested me to thank you warmly in her name for the beautiful present you have made her, and bids me add, that she has read in a Greek author of a certain person who was boasting of the strength of the walls of his city. The individual to whom he made the observation replied that the best walls of a city were the men who dwelt within them. You have alluded in becoming terms to this beautiful hall and its lovely decorations, which are worthy of the praise you have bestowed on them, but to her mind its chief ornaments are the bright, industrious, and intelligent youths who stand around us. In conclusion, Lady Dufferin proposes, with permission, as long as she remains in the country, to present annually a gold medal to the Mayo College, to be competed for on terms which we will settle hereafter. (*Loud and prolonged applause.*)]

IV.

Mayo College Prize List.

For terms commencing 4th January and ending 24th December 1884.

| NAME OF PRIZE. | | TO WHOM AWARDED. | | REMARKS. |

MAYO COLLEGE, AJMERE; }
 The 20th April 1886. }
 WILLIAM LOCH, Major,
 Principal, Mayo College.

Appendix II.

MEYWAR RESIDENCY ANNUAL REPORT FOR 1885-86.

No. 133-G., dated Udaipur, 5th June 1886.

From—A. WINGATE, Esq., C.I.E., C.S., *Offg. Resident, Meywar,*

To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honor to submit the Administration Report of the Meywar Residency for the year 1885-86, together with the reports of officers in local political charge of States.

OFFICERS IN CHARGE.

Colonel C. K. M. Walter held the appointment of Resident up to 22nd August 1885, when he was relieved by Lieutenant-Colonel J. Biddulph, who, in turn was relieved on 27th November 1885 by Mr. T. Chichele Plowden.

I took over charge from Mr. Plowden on 15th April 1886, *i.e.*, after the close of the year under report.

INVESTITURE OF MAHARANA FUTTEH SINGH WITH FULL POWERS.

2. It was mentioned in last year's report that Maharana Futteh Singh was formally placed on the "*Gadi*" by the Agent to the Governor-General on the 4th March 1885. On the 22nd August following His Highness was, under the orders of the Government of India, invested in public Durbar with full governing powers, by Colonel C. K. M. Walter, Resident. In reporting the investiture, Colonel Walter stated that it was a great pleasure to him to have been directed to perform this act before leaving Udaipur, and that he felt assured that the trust and confidence reposed in His Highness by His Excellency the Viceroy and the Agent to the Governor-General were not misplaced. During the interval that has since elapsed, His Highness has fully justified the expectations which Colonel Walter formed of him. He has been diligent in the discharge of his duties and, though a keen sportsman, has not allowed pleasure to interfere with work.

VISIT OF HIS EXCELLENCY THE VICEROY TO UDAIPUR.

3. Their Excellencies Lord and Lady Dufferin and party, accompanied by Sir Edward Bradford, K.C.S.I., and Staff, visited Udaipur in November, arriving on the evening of the 8th and leaving on the morning of the 11th. The 9th was spent in interchanging visits, and on the 10th His Excellency inspected the Meywar-Bhil Corps, and in the afternoon Her Excellency Lady Dufferin graciously laid the foundation stone of the new "*Walter*" Hospital for women. In the evening there was a State dinner at the palace, the party proceeding in boats in order to witness the illuminations. The lake of Udaipur is always beautiful; but on this occasion when, from the steps along the water's edge to the topmost pinnacle of the palace crowning the ridge, every architectural feature of the town was brought into relief against the dark back-ground by innumerable tiny lights, while the Island palaces, similarly lit up, rose from the lake in fairy outline, the effect was beautiful beyond description. Before leaving Chitor, on the return journey, His Excellency the Viceroy visited the famous hill-fort. His Highness the Maharana was much gratified that it had been his good fortune so early in his administration to be thus highly honored; and he and his Sardars welcomed Their Excellencies with that loyalty and affectionate gratitude which have characterized Meywar since the intervention of the British Government, and saved its long annals from a dishonored end.

SEASON OF 1885-86.

4. The rains set in very weakly. There had been two or three showers in May, but with the exception of 35 cents. on the 11th June, no useful rain fell till the 27th of that month, and from the 29th there was a break till the 12th of July. During the latter half of July and up to the 26th of August, the fall was continuous and heavy, but after that date

| | | |
|--------------------------------------|--------------------------------|---|
| there was practically no rain except | 1.50 inches on September 17th. | By the gauge kept at |
| | | the Residency, the total fall for the year was |
| | | 28.16 inches, of which 1.21 fell in five days of |
| | | May, 2.44 in eight days of June, 11.41 in nine |
| | | days of July, 11.39 in eighteen days of August, |
| | | 1.53 in two days of September, and 0.18 in three |
| | | days of October. In the margin is given a return |
| | | of the rainfall at 12 stations in Meywar. As was |
| | | the case last year, the lowest fall was recorded at |
| | | Serara, the head-quarters of the Bhil country. |
| | | The heaviest fall was at Rasmi in Central Mey- |
| | | war. The season was unfavorable in every re- |
| | | spect. The rains did not set in properly till very |
| | | late and they ceased very early. |

* Returns for October 1885, not received.

CROPS.

5. In consequence, both the kharif and rabi harvests were injured, and the outturn was below the average everywhere. The spring crops further suffered owing to the frost. In the Bhil country, the kharif was a very poor crop and the rabi almost a total failure.

PRICE CURRENT.

6. Appendix A to this report gives the price current of food-grains during the year. Last year produced harvests of exceptional abundance, and the prices of cereals never before fell so low, and it was not till the bad season of 1885 had fully declared itself that they began to rise. The average for the year under review is consequently but little dearer than for 1884-85, but by the close of the year they had risen considerably and are still rising.

PUBLIC HEALTH.

7. The Residency Surgeon, Dr. F. French Mullen, supplies the following note:—

“The health of the City was not so good as on the previous year. The mortality was 47 per thousand.

“The number of births was respectively—

| | |
|----------------------|-------|
| Mussulmans | 233 |
| Hindus | 671 |
| | 904 |
| | TOTAL |

“The sanitation of the city has been well looked after.

VACCINATION.

8. “There were 4,047 cases of vaccination as against 3,301 in the previous year; the percentage of success was 96.

JAILS.

9. “Average daily strength 364; death-rate per thousand 35, as against 45 per thousand in the previous year.

“The new jail, to contain 450 prisoners, is approaching completion.”

DISPENSARIES.

10. “The City Dispensary was very well attended during the year. The number of new cases (out-patients) treated was 17,965 as against 13,716 in the previous year.

“There was an increase of 318 in the number of in-patients.

“The total daily average attendance of in and out-patients was 264; 19 major operations were performed and 1,250 minor operations. Four new dispensaries have been opened during the official year, and a dispensary will shortly be completed at Serara the head-quarters of the Mugra Hakim.”

UDAIPUR JAIL.

11. Allusion was made last year to the necessity of erecting a new jail. Under Mr. Thomson's superintendence the buildings are now approaching completion. They consist of four double-storied blocks, with one single-story one, giving nine wards with accommodation for 50 prisoners in each. They are situated inside a fortalice, the wall of which is strong and high, and some of the old buildings are being converted into dwelling-houses for the officials,

guard-rooms, and store-rooms, and a hospital ward is to be added. When completed, Udaipur will be in possession of a strong, commodious, and, it is hoped, healthy jail.

HOSPITAL FOR WOMEN.

12. The present dispensary for women is under the management of Mrs. Lonorgan. The number of in and out-patients treated was 2,645, being an increase of 761 over last year. The premises being very confined, while the attendance was steadily increasing and the need for accommodation for in-patients was becoming more felt, the building of a suitable hospital was decided upon. The foundation-stone, as already stated, was laid by Her Excellency Lady Dufferin, a favor much appreciated and which has impressed the city generally with the importance of an institution which has hitherto had to contend with many prejudices. The memory of Her Excellency's kindness will make His Highness and the Sardars and influential people generally desirous that the new hospital should prove a success by being well-attended. The foundations have been put in and the building ought to be ready by next cold weather.

MISSION HOSPITAL.

13. Another addition to the city which will shortly be opened is the new Mission Hospital, a handsome building with plenty of accommodation, and conveniently situated in a populous quarter remote from the Maharana's Ho-pital and from the new "Walter" Hospital. The Reverend Dr. Shepherd is looking forward to getting out of his present inconvenient and dilapidated quarters, and on the occasion of his entry upon what may be termed the second stage of his work here, he will carry with him the good wishes and regard of every one from the highest to the lowest. He is also assisting the recent efforts to extend education, not only by his schools for boys and girls in the town, but by opening small branch schools in the neighborhood of Udaipur. The following table kindly supplied by the Reverend Dr. Shepherd gives the statistics of attendance at the Mission Hospital during the years 1884-85 and 1885-86.

| | 1884-85. | 1885-86. | Increase. | Decrease. |
|---|----------|----------|-----------|-----------|
| Total attendance at Dispensary and Hospital | 22,393 | 31,929 | 12,536 | ... |
| Daily average attendance at ditto ditto | 61.3 | 95.6 | 34.3 | ... |
| Number of In-patients treated | 134 | 183 | 49 | ... |
| Major operations | 23 | 18 | ... | 5 |
| Minor operations | 557 | 711 | 154 | ... |

FINANCES OF THE STATE.

14. The income of the state for the Sambat year 1911, was Udaipuri R33,10,205-15-7, equivalent to Imperial R25,96,239-13-0, and the expenditure amounted to Udaipuri R35,17,792-10-4, equivalent to Imperial R27,59,052-13-0.

The excess of expenditure over income was due mainly to the expenses consequent on the death of the late Maharana, which aggregated R1,35,095-15-9. There was another exceptional item of R1,63,142-7-6 owing to the liberality of the present Darbar, who, under Colonel Walter's advice, remitted some long outstanding claims against some of the chief Sardars, the principal being a lakh of rupees remitted to the Rao of Sahumber and half a lakh to the Rao of Amrit. The land revenue, owing to the low prices, fell off a little, being Udaipuri R17,95,294-6-3, instead of R17,70,948, as returned last year, while customs (including the amount received, *viz.*, Udaipuri R2,58,610-7-0 from the British Government on account of salt) fell from Udaipuri R10,25,295-3-6 to R9,60,695-0-0. The Public Works Budget is given separately by Mr. Thompson, Executive Engineer.

OPIUM.

15. During the year under review 7,000½ chests of opium passed the scales at Chitor for export to China, paying a duty of R15,50,325, as against 7,199 chests with duty amounting to R16,70,350 during 1884-85. This shows a decrease of 198½ in the number of chests, and of R1,29,025 in the amount of duty realized. There has been a slight increase, however, in

the number of chests exported to British India for consumption, as will be seen from the figures given below :—

| 1884-85. | | 1885-86. | | Increase. | |
|----------|-----------|----------|-----------|-----------|-----------|
| Chests. | Duty. | Chests. | Duty. | Chests. | Duty. |
| 24½ | duty-free | 61½ | duty-free | } 65½ | } R19,000 |
| 99 | R69,300 | 127 | R88,900 | | |

The question of the export of opium from Dungarpur, mention of which was made in paragraph 37 of last year's Administration Report, has now been definitely settled, Government having been pleased to accede to the request of His Highness the Maharawal to be permitted to export special consignments to Ahmedabad by the Kherwara-Ahmedabad route under certain conditions.

SALT.

16. There is little to record under this head. There has been no infringement of the Salt agreement and the sums assigned to the Durbar under it have been duly disbursed. The following figures show the average price of salt in all the districts under this Residency during the year under report :—

| DISTRICT. | Rate per Government rupee. | |
|----------------------------------|----------------------------|-----------|
| | Secrs. | Chittaks. |
| Udaipur | 11 | 15½ |
| Country round Kherwara | 11 | 5½ |
| Ditto Kotra | 10 | 10½ |
| Dungarpur | 11 | 1 |
| Banswara | 11 | 14 |
| Pertabgarh | 18 | 4½ |

REVENUE SETTLEMENT.

17. The report of the Settlement Officer of the work carried out by his department during the year will be found below :—

“During the year the new settlement has been introduced in the zillas of Rasmi and Sarra, comprising seven parganas, and the collections of revenue for the present year are being made in accordance with the settlement. In four of the parganas the work is finished and the copies of their accounts have been distributed to the “asamis.” In the remaining three parganas each “asami” has been told what he has to pay, but the work of hearing complaints is not yet complete. The lands of any “asami” whose payment in comparison with previous years is considerably increased are visited by my Assistant, and his reports, together with the notes I made at my own inspection, enable me to ascertain the cause of the increase. In many cases the cause is simply that the owner has been hitherto paying less than his neighbours. All complaints are decided by me in the presence of the zilla Hakim and of my Assistant, the latter stating the results of his inspection of the lands, and the former the amount of previous payments and the reason for their being less than other people's. It would be a great saving of time were it possible to anticipate these complaints, but the Hakim's accounts do not distinguish between lands belonging to the man himself, and those he holds in mortgage or happens to be cultivating as tenant, and the several members of a family are often not distinguished. In our accounts, a Mahajan, for example may be down for a considerable amount and his name not appear in the Hakim's account, at all, owing to all his lands being worked by tenants. Until, therefore, a man complains, and his account has been split up and put together again in the village, it is impossible for the Hakim to ascertain what his previous payments have really been. Most of the complaints are made by Mahajans, Brahmins, Rajputs, village servants, officials and Byragis, Gosains,

&c., and these are all based upon privilege. The regular cultivating classes seldom complain, except in the case of a man holding more land than he can cultivate, or where a widow or orphan is temporarily at a disadvantage. I find it takes me ten days to a fortnight, sitting allday, to dispose of the complaints of a large pargana, but the compensating advantage is that the asperities of the settlement are smoothed, that every complaint gets a careful hearing, and that finally very few are left discontented. To the rates imposed no objection has been raised except in one trifling instance. There has been a keen competition for the appointment of patel, but, as I took the precaution beforehand of registering the names of patels in each village at the time of my inspection, this has not given so much trouble as it otherwise would have done. A good deal of land has been newly taken up and cultivated in the assessed zillas, which has necessitated a few Amins being entertained to measure it. This sudden taking up of land has thrown a great deal of extra work on the Hakims, and I have been obliged to assist them as they could not meet the demand. The Hakim of Rasmi and his establishment have adopted the new Revenue Accounts and Forms, but the Sarra Hakim will not be able to do so till next year, owing to our office having been unable to furnish him with the faired village papers in time. Meanwhile the assessment of the Chitor zilla is in progress.

The expenditure, excluding the salary of the Settlement Officer, up to 31st March 1886 has amounted to Rs. 2,38,415-4-8.

18. At the request of His Highness the Maharaja, and with the concurrence of the Resident, I agreed to arbitrate in a boundary dispute between the villages of Bagore and Alsipura, belonging respectively to the father of the late Maharana and the adoptive father of the present Maharana. When I had finished announcing the settlement in the Rasmi Pargana, I accordingly visited Bagore between the 27th May and 1st June last, and having made myself acquainted with the disputed ground, returned to Udaipur, where I heard the arguments of either side and finally gave my decision. Pillars have been set up along the line I laid down, and I believe both sides are fairly satisfied, which puts an end to a dispute that has been very bitterly fought over for more than forty years past.

19. I may add that, in spite of an unfavorable agricultural year, and the low price of opium, as well as of all other produce, the first instalment has been collected without difficulty, showing that the raiyats appreciate the value of the term of twenty years for which the settlement has been sanctioned. A dispensary has been opened in each settled zilla. I regret no school is yet working, though one in each pargana is building.

ADMINISTRATION.

20. The hope expressed in last year's report by Colonel Walter that the arrears would soon be cleared off has been to a great extent realized, and the business of the State is now carried on with promptitude and despatch.

JUDICIAL STATISTICS.

(1) Criminal cases.

21. The Durbar has furnished the usual return of criminal cases, a translation of which is appended marked B. The statistics given in this table indicate that crime has somewhat increased during the year, as compared with last year, the figures being 1,383 for 1884-85 and 1,445 for 1885-86. The increase however is chiefly among the less serious offences, heinous crime showing a palpable decrease; for instance, dakaiti, highway robbery, and theft number 8, 54 and 249 respectively as against 13, 74 and 254 last year; while the number of murder cases is the same. The loss to property also shows a decrease, e.g., Rs. 9,993-3-3 and 126 head of cattle, as against Rs. 13,218-5-3 and 373 head of cattle, in 1884-85. Including the balance from the previous year, the Court had to deal with 2,289 cases, of which 1,301 were disposed of, leaving a balance of 988 still to be heard.

(2) Civil Litigation.

22. The annual statement of civil suits forms Appendix C. to this report. Five hundred and thirty-six cases for claims amounting to Rs. 1,95,830-9-9 were pending disposal at the close of last year, and 782 new cases with claims for Rs. 1,29,562-11-9 were admitted, making a total of 1,318 cases involving claims to the extent of Rs. 3,25,393-4-6 to be disposed of during the year under review. Of these 592 suits for Rs. 1,65,153-11-9 were decided, leaving 726 with claims amounting to Rs. 1,63,239-8-9 pending when the year expired. There was an increase all round in the number of cases admitted as compared with last year, the total being 782 and

518 respectively ; and, considering the very large balance of 536 pending settlement at the close of 1884-85, the Court may be said to have got through a fair amount of work.

(3) Appeals.

23. A list of civil and criminal appeals to the "Mahendraj Sobha," or Chief Court of Meywar, will be found as Appendix D. There were 872 civil and 603 criminal appeals. These include 357 and 233 appeals, civil and criminal respectively, pending from the year 1884-85. The total number of the former decided was 492 and of the latter 407, leaving a balance of 380 civil and 196 criminal still to be heard. During the foregoing year there were in all 741 civil and 525 criminal appeals, of which 384 and 292 were disposed of. The Court had thus more appeals to attend to this year than last, and the result shows more work done.

(4) Court of Vakils.

24. At the close of the year 1884-85 16 cases were pending, and 13 new ones have been instituted, making a total of 29, of which 22 have been disposed of, leaving a balance of 7 on 31st March 1886. The amount awarded as compensation was Udaipuri Rs.103-9-4 and Imperial Rs.662-2-0. Fines aggregating Rs.750 (Imperial) were also imposed. There were five appeals to the Upper Court, including three from last year, of which two have been decided, the finding of the Lower Court being confirmed in one and reversed in the other. This information will be found tabulated in Appendix E. Compared with last year's statistics there has been an increase in the number of cases disposed of, *viz.*, 22 against 14, and the balance of pending suits has fallen from 16 to 7. Particulars of the cases adjudicated by the Court are detailed in Appendix F, and it is satisfactory to note that the more heinous offences such as murder, dakaiti with wounding, highway robbery with wounding, and theft with wounding, are conspicuous for their absence.

SAFETY OF THE GOVERNMENT MAILS.

25. It is a subject for regret that one case occurred of robbery of the Government Mail. This happened on the night of the 28th January 1886 at the village of Bano in Meywar, about 27 miles from the capital, on the Udaipur-Chitor Postal Line. The Darbar reported the occurrence to this office on the following morning, and intimated that a jemadar and ten sowars from Udaipur, and the Raj Inspector at Batewar, had been at once despatched to make enquiries and endeavour to apprehend the persons implicated. Nothing however has as yet come to light, although the Darbar is still sanguine of being able to track the criminals, and to this end notices of rewards to informers have been promulgated.

JAIL.

26. Appendix G. is a translation of the jail return furnished by the Darbar. From this it appears that the number of under-trial prisoners has fallen from 101 last year to 25 this year, so that the hope expressed in paragraph 92 of last year's report has been fully realized. Convicts show an almost corresponding increase.

THE MAHARANA'S SCHOOL.

27. Hazari Lal still continues in charge of the four Darbar schools in Udaipur. The total number of pupils on the rolls at the close of the year as compared with the previous year was—

| YEAR. | Boys. | Girls. | TOTAL. |
|-------------------|-------|--------|--------|
| 1885-86 | 929 | 151 | 580 |
| 1884-85 | 498 | 95 | 593 |

This increase in the number of girls attending is very satisfactory. The decrease in the boys is said to be due to the introduction, at the end of February 1886, of school fees—a reform the School Committee insisted on, seeing that the land-owning classes in the districts had evinced a willingness to subscribe towards the education of their children. The average number of pupils on the rolls was 612.23 against 541.38 for 1884-85, and the daily average shows a great improvement, having risen from 342.45 to 443.25. The average percentage of attendance has

also increased, being 73.0, compared with 63.25 in the previous year. The number of pupils studying languages is given below—

| LANGUAGE. | 1884-85. | 1885-86. |
|--------------------|----------|----------|
| Hindi | 479 | 463 |
| English | 144 | 129 |
| Urdu | 64 | 72 |
| Sanskrit | 32 | 26 |
| Persian | 18 | 13 |

The expenditure increased considerably and amounted to ₹10,174-8-8, due to an increase in the staff of teachers. In 1884-85 the expenditure was ₹7,927-3-0. The average cost per pupil was ₹15-6-8 against ₹14-12-0 last year. The Head Master has, under the supervision of the School Committee, improved the course of instruction with a view to enabling boys to present themselves for the public examinations. This year, for the first time, three boys were sent to Ajmere, and appeared at the middle-class examination. His Highness the Maharana distributed the prizes to boys and girls on the 2nd March 1886, and granted a sum of ₹200 as a fund for supplying poor children with books and school necessaries. A normal class has been started with a view to furnishing teachers for the new schools opening in the districts. Scholarships amounting to ₹34 per mensem were competed for by the boys at their annual examination.

DISTRICT SCHOOLS AND DISPENSARIES.

28. It was stated in last year's report that a fund amounting to two lakhs had been set apart for the erection of schools and dispensaries in the districts, which were to be supported by a small cess on the land revenue. The zillas of Sarra and Rasmi having been settled, operations were commenced there, and a dispensary has been built and is now working in each zilla; while of the seven schools sanctioned (one for each pargana) one for 150 boys is about to be opened; four for 75 boys each are well advanced, and two are not yet commenced. Funds being too limited to admit of more schools, a sum has been set apart from the cess for each school, from which a small monthly grant-in-aid will be made by the Hakims to parents sending a boy from a distance to attend the school. In this way it is hoped that every village of any size in each pargana will be represented by one or two boys at the school, and so the benefit of the cess will be distributed as widely as circumstances permit.

MAYO COLLEGE.

29. Six boys,* the Darbar state, have been attending the Mayo College during the year.

* The Rao of Amet.
Bijoy Singh, second son of the Delwara Raj.
The Rao of Thakur.
The Kuur of the Thakur of Rupnagar.
The Thakur of Pandit.
The Chief of the Girls Babajee.

Of these, I am personally acquainted with two, the Rao of Amet, and Bijoy Singh of Delwara, and with a third, the Kuar of Bedla, who left not long ago, and these are superior in every way to the sons of Sardars who are so misguided as to keep

their boys at home. The folly of this course is bearing fruit in a form that must soon bring the subject prominently to notice, the very unsatisfactory relations which subsist between several of the more important Sardars and their Kuars.

PUBLIC WORKS.

30. The report submitted by Mr. Campbell Thomson, Executive Engineer, has been sent to the Secretary to the Agent to the Governor General in the Public Works Department, and the Darbar is fortunate in having so energetic and able an Engineer at their disposal. The road from Udaipur to Chitor is now bridged throughout, and an additional dak bungalow has been built between Chitor and Muggurwar, as well as a new one at Udaipur, the old one having been converted into a bungalow for the Executive Engineer. In July next, it is hoped, a tonga-dak will be running on this road, which will also carry mails and parcels, and be of much public convenience. The Darbar have granted a subsidy of ₹200 per mensem. A very useful irrigation work to utilize the water stored in the Rajnagar lake, begun by Mr. Monckton, has been completed by Mr. Thompson, and will next season, it is hoped, add materially to the State revenue, thus encouraging the Darbar to pursue the policy of which Mr. Monckton's deputation to inspect the tanks of Meywar was the beginning. The repair of an important tank at Kangni in Central Meywar is in progress, and next year doubtless others on Mr.

Monekton's list will be taken in hand. Latterly, Mr. Thompson's attention was rather diverted to the Bhil country, where the Darbar have started a number of small but useful works, chiefly tanks, to give relief to the Bhils in parts where failure of the crops had been most severe. These measures have helped to tide over the threatened scarcity, assisted by a plentiful crop of mhowa fruit. The Durbar have further made advances for the construction of tanks to the amount of ₹18,000 to the Bhumut Chiefs to assist them in providing work. This is a policy that must bear fruit in attaching the Bhils to the Darbar officials. The Maharana's gardens in Udaipur, under Mr. Storey's immediate superintendence, are rapidly becoming a sight of which His Highness may well be proud, and which are very popular with the towns-people. The proposed railway is for the present in abeyance; Mr. Thompson undertook the collection of the exhibits for the Indian and Colonial Exhibition. A Bhil and his wife were sent to Calcutta to be modelled, and these are perhaps the most interesting contribution Meywar could make.

BOUNDARY SETTLEMENTS.

31. In the month of October 1885, Major F. A. Wilson was deputed to continue the demarcation of the Meywar-Tonk border. He was about 5½ months engaged on the work, *viz.*, from 7th October 1885 to 1st April 1886, and during this time he disposed of 23 cases, particulars of which are given below—

| | |
|--|-----------|
| By mutual agreement | 17 |
| By the Boundary Officer himself | 5 |
| Partly by Panchayat, partly by men walking the line under oath, and partly by the Boundary Officer | 1 |
| TOTAL | 23 |

Lieutenant-Colonel J. Biddulph and Major A. R. T. MacRae were also for some months employed on boundary work, the former on the Meywar-Merwara border, and the latter on the Meywar-Marwar border.

FOREST OPERATIONS.

32. There is nothing worth reporting under this head.

BHIL MATTERS.

33. Towards the close of the year, Mr. Plowden made a short excursion to the Debur district to see the Mugra Hakim, and form an opinion as to the necessity for further relief works. The Mugra Hakim is a very good officer and appears to have his troublesome charge well in hand. An interesting feature of the work of the Church Missionary Society at Kherwara is the intention to erect a school there for Bhil girls, which will be the first of its kind in the country. The Durbar Bhil schools are four in number, *viz.*, 1 at Jawar, 1 at Bara Pal, 1 at Paduna and 1 at Rakabdeo. The number of boys attending them during the year was 90, distributed as under—

| | | |
|--------------------|-----------|-------|
| Jawar | 30 | Boys. |
| Bara Pal | 20 | " |
| Paduna | 12 | " |
| Rakabdeo | 28 | " |
| TOTAL | 90 | |

TOUR OF RESIDENT.

34. Mr. T. C. Plowden, who was officiating as Resident during the cold weather, spent 66 days on tour. The more important among the places visited by him were Chitor, Debur, Mandel, Bhilwara, Rajnagar, Nathdwara, Eklinji, Delwara, and Gogunda.

HILLY TRACTS.

35. Colonel Conolly resumed charge from Lieutenant-Colonel Temple on the 7th November 1885, and held charge during the rest of the year under review. His report, and that of Lieutenant-Colonel Temple, the Second Assistant Resident, are annexed.

HEALTH, CROPS, AND PRICES.

36. The health of the year was not so good, owing to the number of chest affections, during the cold weather. The rainfall was under 23 inches at Kherwara, and 27.16 inches at Kotra-

The kharif crop was very short everywhere and the rabi almost a total failure. The outturn of the preceding year had fortunately been very good, and there has been an abundant mhowa crop, and the Political Officers believe that there will be no severe distress. Prices have risen but not to a serious extent.

CRIME.

37. No case of witch-swinging or of mail robbery occurred during the year. The only serious affray was a fight which took place in October 1885 between some Bhils of Jura and Edur. The case was disposed of at a Border Court.

DUNGARPUR.

38. The management of Dungarpur calls for no remark. The removal of the opium difficulty has already been described. With the assistance of the Topographical Survey Officers considerable progress has been made with the definition of the Dungarpur-Mahikhanta border.

JAWAS AND MADRI.

39. The liberal loans made by the Meywar Darbar to the Raos of Jawas and Madri for construction of tanks have been noticed elsewhere.

JURA.

40. The debt due from Jura to the Meywar Darbar has been paid off, and the question of restoring the Financial control of the State is under consideration.

OGHNA.

41. The administration of the Rao of Oghna is still favorably commented upon. A son and heir was born in February 1886.

PANURWA.

42. The question of jurisdiction over the Umria Thakurati, decided to a partial extent in favor of Panurwa, has, it is said by the Second Assistant Resident, rather strained the friendly feeling hitherto subsisting between the Chiefs of Oghna and Panurwa. It is still a subject of regret that the murderers of the late Thakur of Umria have not yet been brought to justice, but measures are being taken which it is hoped will be decisive.

BANSWARA AND PERTABGARH.

43. Lieutenant Evans-Gordon, Assistant Political Agent for Banswara and Pertabgarh, gave over charge to the Resident, Meywar, on the 26th October 1885, by whom the current work of the office was discharged till the appointment of Lieutenant A. F. Pinhey on 23rd February 1886.

RAINFALL, CROPS, PRICES, AND HEALTH.

44. The rainfall at Banswara was 35.58 inches, and at Pertabgarh 29.61 inches. Excessive rain in the beginning of the season and frost in the cold weather damaged the crops, but the outturn of both harvests is stated to have been 12 annas in the rupee. Following upon a good year, prices were very cheap. With the exception of an outbreak of cholera in Pertabgarh, which occasioned about 250 deaths, the public health was good.

CRIME.

45. No serious crime is reported from Pertabgarh, but in Banswara a widow was convicted of causing the death of her illegitimate child, and a woman suspected of being a witch is reported to have been murdered by a Bhil; another case in which a witch is alleged to have been swung is under trial.

PERTABGARH.

46. The school mentioned in last year's report as having been started is not very efficient yet. Dispensary is well-attended, the jail well-managed, and the Post Office recently established is now self-supporting. Two students have been sent to Dehra Dun to learn Forestry. The revenue of the State amounted to Salum Shai Rs2,71,408 and the expenditure to Rs2,81,835. The excess in expenditure was chiefly due to the Maharawat's marriage.

BANSWARA.

47. The management of the Banswara State under the new Kamdar is again more favor-

ably reported upon, and the questions of improved judicial administration and the settlement of internal boundary disputes are being taken up more energetically.

The school, as in Pertabgarh is backward. The jail is improving, and the dispensary very successful. Receipts of the State amounted to Salum Shai R2,05,717 and the expenditure to R2,06,033.

KUSALGARH.

48. The Assistant Political Agent gives a very good account of the administration of the small State of Kusalgarh.

ASSISTANT POLITICAL AGENT.

49. Lieutenant Pinhey has shown energy and good sense during the short time he has been in charge, and the good results commented upon last year as having been due to the great interest shown in his work by Lieutenant Evans-Gordon, may be expected to develop under Lieutenant Pinhey

50. The Assistant Political Agent's Report is attached.

UDAIPUR;
5th June 1886.

A. WINGATE, C. S.,
Officiating Resident, Meywar.

ANNEXURE I.

No. 59 G., dated Kherwara, 14th April 1886.

From—COLONEL A. CONOLLY, *Political Superintendent, Hilly Tracts, Meywar,*
To—*The Resident in Meywar.*

I have the honor to submit for the year 1885-86, the Administration Report of this Superintendency, of which I resumed Political charge from Lieutenant-Colonel E. Temple on my return from sick leave to Europe on the 7th of November 1885—

HEALTH.

2. A statement by Surgeon W. W. Wehh, Officiating in Medical Charge of the Meywar-Bhil Corps, and Superintendent of the Charitable Dispensary at Kherwara, containing dispensary returns and statistics of the health of the regiment and station, is appended and marked A. The season has not been marked by any epidemic, though an unusual amount of sickness in the shape of chest complaints has visited the district during the cold weather and been productive of some mortality; there has been no outbreak of cattle disease, though the cattle show signs of being affected by the scanty pasturage consequent on a short rainfall last year.

CROPS.

3. The spring crop is considerably below the average, under 23 inches of rain having fallen in the past monsoon season; the outturn in Dungarpur is said to have been 11 annas, while that of the Bhumir States, under this Superintendency, may be put at 9 annas in the rupee. A list of Prices Current in the Kherwara and Dungarpur Bazar is given below—

| | Seers. | Ch. | Seers. | Ch. | |
|-----------------------|--------|-----|--------|-----|------------|
| Wheat | 22 | 8 | 25 | ... | per Rupee. |
| Barley | 36 | ... | 28 | ... | " |
| Rice | 12 | 8 | 15 | ... | " |
| Indian-corn | 27 | 8 | 25 | 8 | " |
| Gram | 27 | 8 | 23 | ... | " |
| Ghi | 1 | 6½ | 1 | 6 | " |
| Salt | 11 | 4 | 11 | ... | " |

The mhowa crop of the season, especially in Dungarpur, is proving an abundant one, a fortunate circumstance, since the Bhils depend largely on this for sustenance both of themselves and their cattle. So plentiful in fact has the outturn been that it has affected the usual migration into Mahi Kanta territory to which the Bhils of this part of Meywar, men, women, and children, resort annually in large numbers to gather the berry, receiving as the price of their labor a certain percentage of the mhowa picked up. The partial failure of the "rabi" crop will not, it is anticipated, lead to any general distress, or necessitate, except in special cases, an outlay on relief works beyond the capacity of the Dungarpur Durbar or the petty States comprised in this Superintendency.

CRIME.

4. There have been no cases of mail-robbery, witch-swinging, infanticide or such heinous crimes; in the list of minor offences brought to notice there is nothing worthy of remark.

BORDER COURTS.

5. It has not been found practicable to fix a date for the assembly of these Courts either with Rewa Kanta or Mahi Kanta, the difficulty having been enhanced during the past cold weather by the paucity of British Officers with the Meywar-Bhil Corps, of which the Political Superintendent, Hilly Tracts, Meywar, is Commandant.

ROADS.

6. Steps are being taken, as will be seen by reference to paragraph 5 of the report by the Second Assistant Resident, Meywar, towards the conversion into a fair-weather road of the track now connecting Kherwara with Kotra. In addition to this, the proceeds of a fine, levied on the villages mentioned in paragraph 5 of this office Administration Report of last year, have been utilised to open out a road through the densely wooded ravine separating Jhalapun and Kankun-Sugwara in Jawas, and advantage taken of the opportunity thus afforded to restore an old tank at the head of the 'nala' in question.

COLD WEATHER TOUR.

7. A sketch of the tours undertaken during the year is appended marked C. The great increase of regimental work, chiefly owing to musketry in late years, and the special paucity of British Officers during the last cold weather, prevented my leaving Head-quarters for more

than very restricted periods; it is hoped that more may be accomplished in this respect next year.

COLONIAL AND INDIAN EXHIBITION.

8. In September 1885, specimens of the Bhil race, a man and woman, with the costume, arms and ornaments peculiar thereto, were sent to be modelled for this Exhibition under the direction of the Revenue and Agricultural Department in Calcutta, in charge of a Havildar of the Meywar-Bhil Corps; the group and their surroundings are said to have been most interesting and attractive.

ENSILAGE.

9. Experiments in this direction have not led to the adoption of the system in this locality. Silos constructed in the station of Kherwara proved to be failures, and the people of the district show no anxiety to persevere in the matter, the fact being that the comparatively small number of cattle can in years of ordinary rainfall find sufficient pasturage without resort to artificial means of preserving fodder. The value, however, of ensilage in years of drought is overlooked.

MEYWAR-BHIL CORPS.

10. The regiment was present at Udaipur in November last on the occasion of the visit to that place of His Excellency the Viceroy and Governor-General of India, by whom it had the honor of being reviewed.

11. The Annual Inspection of the corps was held by Major-General Carnegy in February 1886 with satisfactory results; the valise equipment spoken of in the previous year's report has been received.

12. In compliance with the wishes of Government an impetus has been given to the enlistment of Mogias, and it remains to be seen how far the experiment will prove a successful one.

13. A fresh map of the Cantonment Kherwara has been made under the the superintendence of W. H. Patterson, Esq. of the Survey Department.

DUNGARPUR.

14. There is nothing in the finances of this State or the administration of justice as set forth in the return received, which calls for remark.

15. No Public Works of any importance have been undertaken during the past year; the Gaib Sagur water-palace alluded to in last year's report is approaching completion, and gives employment to a considerable number of workmen.

16. The difficulty regarding the export of Dungarpur opium which has been the subject of remark in previous reports is happily removed, Government having been pleased to consent, greatly to the relief of the Dungarpur Durbar, to the restoration under certain well-defined restrictions, of export by the old route to Ahmedabad. The first consignment despatched under the new rules left Kherwara on the 10th instant, and the system now instituted has every prospect of working smoothly and proving a benefit to Dungarpur while entailing no loss or inconvenience to Government.

17. The Baneswar Fair of the year under review was a great success, the value of goods sold considerably exceeding that of average years.

18. The Topographical Survey work which had been in progress for two seasons in this State has been concluded, and boundary work on the Dungarpur Mahi Kanta border so far advanced that the surveyors have been able, in the course of their operations, to define portions of the border as pointed out by the representatives of the States concerned.

19. A return of cases heard in the Dungarpur Courts for the year 1st of July 1884 to 30th June 1885 is appended and marked B.

BHUMIA CHIEFS, JAWAS.

20. Two years at most should see this State freed from its debts, the liquidation of which has been delayed by the present scarcity and consequent falling off of revenue. This scarcity having made itself felt more in Jawas than the neighbouring States, certain relief works will, with the assistance which is confidently expected from the Meywar Durbar, be instituted shortly; they take the form of rebuilding tanks long out of repair on sites pointed out to me during a late tour in the district.

PARA, MADRI, CHANI AND THANA.

21. Nothing has occurred in these States, nor is there anything in the statistics they have submitted worthy of notice; the Chiefs are alive to their responsibilities in the matter of meeting, by providing work on a small scale in various localities, the partial distress which exists owing to failure of crops.

KOTRA.

22. Colonel Temple's Report on the above district is attached: the principal matters of importance or interest therein are as follows:—

4. Failure of Rabi crop.
5. Kotra-Kberwara Road.
10. Jura Administration.
13. Birth of a son to the Chief of Oghna.
15. Affairs in the Umrta Thakurate.
16. Estrangement between Panurwa and Oghna.

STATEMENT A.

Kherwara Dispensary.

| | |
|----------------------------------|-------|
| Total attendance during the year | 3,423 |
| Out-door patients | 3,376 |
| In-door patients | 47 |

Principal causes of sickness were as follows:—

| YEAR. | Fever. | Ophthalmia. | Chest affections. | Diarrhœa. | Ulcers. | Skin diseases. |
|-------------|--------|-------------|-------------------|-----------|---------|----------------|
| 1885 & 1886 | 685 | 779 | 344 | 88 | 167 | 433 |

KHERWARA ;
13th April 1886.

A. CONOLLY, Colonel,
Pol. Supt., Hilly Tracts, Meywar.

ANNEXURE II.

No. 27 G., dated Kotra Meywar, 3rd April 1886.

From—LIEUTENANT-COLONEL E. TEMPLE, 2nd Assistant Resident, Meywar,
To—COLONEL A. COLLY, Political Superintendent, Hilly Tracts, Meywar.

I have the honor to submit the Annual Administration Report for the year 1885-86 of the Kotra district, of which I took over charge in November last, from Major. A. R. T. McRae, who had succeeded Lieutenant G. A. Collins in June.

2. The Meteorological observations for the year were as follows :—

| Mean temperature of the year. | Hottest month and its mean temperature. | Coldest month and its mean temperature. | Mean daily range. | Extreme daily range. | Number of days in which rain fell. | Total rainfall. |
|-------------------------------|---|---|-------------------|----------------------|------------------------------------|-----------------|
| 77.48 | June 90.37 | January. 65.76 | 10.53 | 39 | Forty-six | 27.16 |

3. The general health of the station and district has been good, although pneumonia has been rather prevalent, but fortunately attended by a smaller percentage of mortality than is ordinarily caused by this disease. There were 168 men of the Meywar-Bhil Corps detachment treated in the Military Hospital during the year, of which number one died.

4. The rainfall during the year was small and ceased too early in the season, resulting, as regards the kharif, in only an eight-anna crop in the Oghna and Panurwa districts, and in little more than half of that in the Jura district, and it is the Indian-corn grown at the kharif which forms the staple food of the Bhils. The rabi crop has been almost a complete failure throughout the district; indeed, except in a few places where water was procurable from streams or wells, there was no attempt made even to sow any seed, and in the few cases where wells existed many of them failed. Fortunately the crops of the preceding year were excellent, and I am in hopes that the Bhils will be able to tide over the present scarcity without needing assistance in the shape of relief works.

5. Mr. Manners Smith, Officiating Executive Engineer of the Abu Road division, came into the district in January and proceeded to Kherwara, for the purpose of ascertaining the feasibility of constructing a fair-weather road to unite the military stations of Kotra and Kherwara, the want of which has been much felt for nearly half a century, and which it is hoped is now in a fair way to receive the attention it deserves. A subordinate of the Public Works Department is now employed in surveying the proposed route, and in working out the necessary details.

6. Several minor alterations and additions have been made during the year to the various public buildings in the station, and the drainage works referred to in last year's report have also been executed. Further a stop-butt and musketry range have been constructed locally with a view to encourage the men of the Meywar-Bhil Corps stationed here, to improve their rifle shooting by voluntary practice, as soon as two condemned targets (others not being procurable by Regulation) can be conveyed from Kherwara along the present difficult track to this station.

7. On the 24th January, Colonel P. W. Powlett, First Resident, Western Rajputana States, Colonel W. Scott, Acting Political Agent, Mahi Kanta, and myself met at Karari in Serohi, and held Border Courts for the settlement of cases between the States in our respective charges. The cases with the Kotra district of Meywar were disposed of as follows:—

| DETAILS. | Meywar versus Serohi. | Serohi versus Meywar. | Meywar versus Mahi Kanta. | Mahi Kanta versus Meywar. |
|--------------------------------|-----------------------|-----------------------|---------------------------|---------------------------|
| Awards | 1 | 3 | 9 | 6 |
| Settled out of Court | ... | ... | 2 | 2 |
| Transferred | 3 | 5 | 1 | 2 |
| Withdrawn | 2 | 2 | ... | 5 |
| Dismissed | 3 | 3 | 22 | 5 |
| Postponed | ... | ... | ... | 2 |
| TOTAL | 9 | 13 | 34 | 22 |
| GRAND TOTAL | 22 | | 56 | |

8. An abstract of Criminal Cases brought before the Second Assistant during the year will be found in Appendix A, and the tours made by the same officer in Statement B.

9. Colonel A. Conolly, the Political Superintendent, Hilly Tracts, Meywar, and Commandant of the Meywar Bhil Corps, visited Kotra in the last month of the year, and inspected the station and various public buildings.

JURA.

10. The last instalment of the debt due from this State to the Meywar Darbar has been paid during the year, and, as soon as a small debt incurred by my predecessor on behalf of the State in settlement of last year's Border Court awards has been adjusted, the question of the continuance or the abandonment of the financial management of the State by the Secone Assistant, with a due regard to other creditors, and the fitness of the Rao to undertake the entire management, will have to be considered. The Rao is as indolent and apathetic as ever, and it is unfortunate that he cannot be induced to allow his eldest son, now about 19 years of age, to reside at Udaipur for a year or two for the purpose of education which he much needs.

11. The serious affray which took place at the Pal of Rodurmali in March 1885, and mention of which was made in last year's report, had, as its principal result, the bringing to light of a witch-swinging case in that Pal, which took place some three years previously. The chief offender is still at large, but one accomplice, the Gomethi of the Pal, is now undergoing three years' imprisonment in the Udaipur Jail, and a fine of ₹1,500 has been imposed on the other residents of the Pal; the collection of the fine has, however, been postponed for another year owing to this season's scarcity.

12. A serious fracas occurred in October between the Bhils of Nowabas, a hamlet of the large Jura Pal of Serakhera and Semlia of Edar, in which some 40 persons are said to have been wounded; the case was satisfactorily settled and disposed of at the Karari Border Court in January.

OGHNA.

13. There is little to report of this flourishing little State, which I was unfortunately unable to visit during the touring season as I intended, with the exception of the gratifying circumstance of the birth, on the 17th of February, of a son and heir to its energetic Chief.

PANURWA.

14. Affairs in this State appear to be going on satisfactorily with the exception of the Umria Putta, but the Kamdar, Nunneh Khan, was unfortunately attacked with pneumonia at the Karari Border Court, and died at Kotra on his way back last February; it is to be hoped that the Runna will find a suitable successor.

15. Matters in Umria are far from satisfactory, as the estate is burdened with debt, and the young Thakur has not as yet obtained that influence and authority over his Bhils which is to be desired. The principals concerned in the murder of the late Thakur (uncle to the present youth) in September 1884, have not yet been apprehended; but a fine of ₹2,000, together with a further sum of ₹3,000, towards the funeral expenses of the murdered Thakur, has been imposed on the Bhils of the Pals of Surra and Chikla: this resulted in the semi-desertion of Surra, and total desertion of Chikla by their inhabitants, who have

taken refuge across the border in Guzerat; some have since returned, but regarding this and the realization of the fine, a special report has already been submitted.

16. A regrettable incident connected with Umria affairs is a breach in the friendly relations between the Chiefs of Oghna and Panurwa, consequent on the claims they respectively advanced to the right to nominate a successor to the Thakur-ship of Umria a year and a half

STATEMENT A.

The following is an abstract of the cases brought before the Second Assistant during the year 1885-86:—

| DESCRIPTION. | MEYWAR. | | SEROHI-MEYWAR. | | | | MAHI KANTA-MEYWAR. | | | |

KOTRA (MEYWAR);
3rd April 1886. }

E. TEMPLE, *Lieutenant-Colonel,*
Second Assistant Resident, Meywar.

ANNEXURE III.

No. 138, dated Camp, *viâ* Banswara, 12th April 1886.

From—LIEUT. A. F. PINHEY, *Assistant Political Agent, Banswara and Pertabgarh,*
To—The Resident, Meywar.

I have the honor to submit the Annual Administration Report for the year 1885-86, of the States of Benswara and Pertabgarh, together with a short notice of the small principality of Kusalgarh.

CHANGE OF OFFICERS.

2. Lieutenant Evans-Gordon delivered over charge of this office to the Resident, Meywar, on the 26th October, in whose hands it remained until my nomination to the vacant appointment of Assistant Political Agent on the 23rd February this year.

CROPS.

3. Both the kharif and rabi outturns are reported to be twelve-annas in the rupee crops, much damage having been done by the excessive fall of rain in the beginning, and by frost later on. The prices on the whole have, however, been considerably lower than in many preceding years, owing to a large surplus stock of grain remaining from the previous year.

The following table shows the average price of principal food-grains during the year:—

| Months. | BANSWARA. | | | PERTABGARH. | | |
|--------------|-----------|--------|-------|-------------|--------|-------|
| | Wheat. | Makki. | Gram. | Wheat. | Makki. | Gram. |
| | S. C. | S. C. | S. C. | S. C. | S. C. | S. C. |
| April 1885 | 34 6 | 51 4 | 52 8 | 29 10 | 44 8 | 44 6 |
| May " | 33 7 | 42 8 | 45 0 | 27 10 | 41 9 | 42 3 |
| June " | 30 10 | 41 4 | 42 8 | 25 7 | 35 12 | 39 3 |
| July " | 30 0 | 40 0 | 42 8 | 25 2 | 36 0 | 40 10 |
| August " | 31 4 | 41 4 | 42 8 | 25 5 | 38 2 | 43 12 |
| September " | 32 8 | 47 8 | 44 6 | 23 0 | 33 7 | 33 12 |
| October " | 26 4 | 41 4 | 39 6 | 21 4 | 27 8 | 28 12 |

| March " | 26 14 | 37 8 | 43 0 | 21 4 | 31 4 | 37 8 |

RAINFALL.

4. The rainfall during the year was 35.58 inches in Banswara, and 29.61 inches in Pertabgarh as noted below:—

| Months. | Banswara. | | Pertabgarh. | |
|-------------|-----------|------|-------------|------|
| | Ins. | cts. | Ins. | cts. |
| May 1885 | ... | ... | ... | ... |
| June " | 10 | 99 | 6 | 8 |
| July " | 6 | 36 | 5 | 69 |
| August " | 10 | 68 | 15 | 88 |
| September " | 2 | 68 | ... | 16 |
| October " | 4 | 87 | 1 | 65 |
| November " | ... | ... | ... | ... |
| December " | ... | ... | ... | 15 |
| TOTAL | 35 | 58 | 29 | 61 |

GENERAL HEALTH.

5. The health has been generally good throughout the year at Banswara and Kusalgarh. But in Pertabgarh cholera broke out in an epidemic form about the end of April, and during the three weeks or so that it raged, carried off about 250 people.

INFANTICIDE.

6. No case of infanticide has occurred either in Pertabgarh or Kusalgarh; but one case has been reported from Banswara. One Jhabbu, widow of a Mahajan, was charged with having murdered her illegitimate infant. The charge was proved against the accused and she was sentenced to a severe punishment by the Banswara Durbar.

WITCH-SWINGING.

7. Notwithstanding the rigorous punishments awarded by the Banswara Durbar in previous cases, two more cases of witch-swinging have been reported during the last few months in Banswara. One unfortunate woman, being suspected of being a witch, is reported to have been killed by a Bhil with an axe. Another Bhil woman is said to have been swung for seven days. The criminals in the latter case have all but one been just arrested and are being tried, while active steps are being taken by the Darbar towards the apprehension of those concerned in the other case.

PERTABGARH.

8. The Assistant Political Agent arrived at Pertabgarh on the 6th March, and spent four days there. The Maha Rawat had lately been very seriously ill, and finding that he was unable to look so closely after his affairs as formerly, and knowing that his Kamdar, Mahomed

Beg was not equal to the occasion, he had sent for Mr. Framji Bhikaji, formerly Assistant Political Agent of Banswara and Pertahgarh, and now pensioned, to assist him in carrying on the Government. This was, no doubt, a most discreet action on the part of the Maha Rawat, and I have great hopes that the administration of affairs will be materially improved within a very short space of time.

EDUCATION.

9. There is a school at Pertahgarh, but I found it poorly attended, and the teaching of a very elementary character. In a report received from Pertahgarh, it is stated that the total number of regular attendants is 62.

JAIL.

10. The jail was exceptionally clean and well-ventilated, and the prisoners, 42 in number, seemed well-cared for.

DISPENSARY.

11. The dispensary is much appreciated and managed by a Native Doctor and his two assistants.

POST OFFICE.

12. The post office has now been established more than a year. I found that it had become an institution of the place, paying its own way and working well.

FORESTS.

13. I notice in last year's report that the Assistant Political Agent had been in correspondence with the Dehra Dun Forest School for the purpose of getting information and if possible the services of a Forest Officer. I am now able to say, that as a result of that correspondence two students, Natives of Pertahgarh, have been sent to Dehra Dun at the cost of the State, for the purpose of going through a course in forestry. On their return from the school, I hope that some definite steps will be taken in the matter of forest conservation.

THE REVENUE AND EXPENDITURE.

14. The total income from all sources during the Sambat year ending 30th June 1884, amounted to Salum Sahi Rs2,71,408, and the expenditure to Rs2,81,835. The deficit of Rs10,427, which occurred consequent on the Maha Rawat's marriage with the daughter, of the Sailana house, and the demise of his mother, was made good by borrowing.

15. His Highness the Maha Rawat visited the Poshker Fair in November last.

BANSWARA.

16. The Assistant Political Agent arrived at Banswara on 15th March. The administration seems to be gradually improving under the management of the Kamdar, Rai Bahadur Jowala Pershad. This is especially noticeable in the judicial administration, and in the firm determination at last to grapple with the difficult question of internal boundary settlement. For this latter purpose a suitable man, in the person of Baboo Chandi Charn Mitra, has been engaged on a fixed salary from the State, and it is to be hoped that by this time next year most of the more serious boundary disputes between the several Thakurs and the Darhar may be finally settled.

The administration of justice is still somewhat interfered with by the want of cordial co-operation on the part of some of the Thakurs in delivering up criminals and the necessary witnesses for a fair trial, but I am assured that a gradual improvement is taking place in this matter.

With regard to the collection of the Revenue and system of Abkari, which were noticed last year as being in an unsatisfactory condition, I am glad to be able to report that the Abkari contract has just been handed over to a well-known respectable and experienced Parsi firm from Guzerat, whose connection with the State will, I am sure, be entirely to the latter's advantage.

JAIL.

17. The jail is fairly well kept, and contains several more prisoners than it did last year, which points to the fact that in most cases now a suitable punishment is meted out for crime, instead of the old system of exacting a fine and letting the offender go.

DISPENSARY.

18. The dispensary is in all respects a most praiseworthy institution, and is still in the charge of its popular Native Doctor, Polo Ram.

SCHOOL.

19. The school at Banswara is a great deal better attended than the one at Pertabgarh, but on the other hand the teaching, if anything, is even more elementary, and there seems to be an absolute want of discipline or system of any sort. The Kamdar assures me that he intends very shortly to place this most-necessary institution on some really firm basis.

POST OFFICE.

20. The Post Office has been in existence now so long at Banswara, that it hardly requires any special notice.

TRANSIT OF GOVERNMENT MAILS.

21. No case of mail-robbery has occurred.

IRRIGATION.

22. Judging from the hasty tour which I have been enabled to make through Banswara during the last month of the official year, the want of a proper system of irrigation, and in most places the entire want of any system of irrigation, is the chief thing that prevents this State from being a more prosperous one. There are miles and miles of most fertile land with water not very deep down under the surface, but not containing a single well, and there seems to be no attempt at present on the part of the Darbar to remedy this serious defect.

BHILS.

23. The Bhils have been generally quiet during the year, except on the Chilkari Sunth Border, from which part of the country constant complaints have been sent in to this office. With a view to remedying this state of affairs, the Assistant Political Agent is shortly about to visit the border. Everywhere else the border disputes and affrays seem to be diminishing gradually, not one case having been sent up to this office of a dispute between Bhils on the Pertabgarh-Banswara Border during the whole year. In connection with this it may be said that the Extradition Rules continue to have a good effect.

FINANCES.

24. The actual receipts from all sources for the Sambat year ending with 30th June 1885 amounted to Salum Shai ₹2,05,717, and the expenditure to ₹2,06,033: ₹15,220 were paid towards liquidation of debts, and ₹15,536 were borrowed locally to balance the accounts.

FEUDATORIES.

25. Most of the Sardars of the State appear to be fairly contented and give little or no trouble except the Rao of Garhi, against whom a case of harbouring a criminal was clearly proved. For this and other acts of insubordination to the authority of the Darbar, one of his villages was confiscated.

DOMESTIC OCCURRENCES.

26. In September last a son was born to the heir apparent of Banswara.

27. The only Kowar of Khandu, aged about 25 years, died at his residence in February last, leaving a son aged about 4 years.

KUSALGARH.

28. Kusalgarh was visited during the last few days of March, and everything in connection with this small (Semi-Independent) State was found to be most satisfactory. The town is being gradually rebuilt with good bricks made in the vicinity; a school has been started and efforts are being made to secure the services of a really good master. The prisoners are fairly well housed and fed, and the Rao and his eldest son take the keenest interest in, and personally superintend all that is going on, for the gradual improvement of the country. The land is very fertile in some parts, but there is a great scarcity of a good class of cultivators, the rural population being entirely composed of Bhils, who are with great difficulty induced to remain in one spot for any length of time.

29. The death of the Thakur of Choorabar, the Rao's second son, some three months ago, has been a source of great grief to the Chief and his family.

30. There is no Government Post Office as yet in Kusalgarh, the mail being carried by a system of runners engaged by the Rao on his own account between Kusalgarh and Jhalod in the Paneh Mahals.

BORDER COURTS;

31. Owing partly to the late appointment of the Assistant Political Agent and partly to the pre-occupation of the various Political Officers, no Border Courts were held this year for the settlement of disputes with the adjoining States of Central India and Guzerat.

BANSWARA-KUSALGARH BORDER COURT.

32. I held a Border Court at Khandu, and by means of Bhil Panchayats disposed of 22 cases, between Kusalgarh and Banswara, awarding ₹209-8, in favour of Kusalgarh.

Two cases of murder and wounding came up before me, and after due enquiry I have decreed suitable awards in each of them.

PERIOD SPENT IN CAMP, AND PLACES VISITED.

33. A period of 73 days was spent in camp up to the end of March last, namely, from 1st April to 22nd May 1885, and from 5th to the 31st March 1886.

The following details show the number of times each important place was visited :—

| | | | | | | | | | | | | | | | |
|------------|---|---|---|---|---|---|---|---|---|---|---|---|---|---|-------|
| Pertabgarh | . | . | . | . | . | . | . | . | . | . | . | . | . | . | Once |
| Arnod | . | . | . | . | . | . | . | . | . | . | . | . | . | . | " |

| Garhi | . | . | . | . | . | . | . | . | . | . | . | . | . | . | " |

A. F. PINHEY, *Lieutenant,*
Assistant Political Agent.

Appendix III.

WESTERN RAJPUTANA STATES REPORT FOR 1885-86.

No. 3 P., dated Jodhpur, 3rd April 1886.

*From—*COLONEL PERCY W. POWLETT, *Resident, Western Rajputana States,*
To—The First Assistant Agent to the Governor-General, Rajputana.

I have the honour to submit the Report on the Western Rajputana States for the year 1885-86, during the whole of which I have been in charge.

SEASON.

2. The rainfall was insufficient, and throughout the country the harvests have been below the average. In parts of southern Marwar and Malani the autumn crops were lost or nearly lost, and in Shiv and Jeysulmere a famine occurred. However, the people seem to be far better prepared for famine than they used to be, and the good crops of the preceding year had enabled most to lay up a store. Indeed, there is so much Bajra in Jeysulmere where the crops were worst, that some has been exported to Biekaniir, and, in spite of the loss of the harvest, famine prices do not prevail. The want of grass have indeed caused many to leave their homes, but there is no need for relief works. The rainfall recorded at Jodhpur was 13½ inches.

3. Cholera of a virulent type broke out at the Rām Deora Fair near Pokuran in September. The people assembled there rapidly scattered, and spread the disease over the country. But the dryness of the season soon killed the germs, and the visitation was a short one.

4. Small-pox has been unusually bad in the city of Jodhpur during the last few months, but vaccination progresses rapidly, being assisted by the chief Jagirdars who keep vaccinators, and energetically supervised by Doctor Adams.

5. The Municipal Committee at Jodhpur is maintained, and the non-official members manifest a good deal of interest in the work. Doctor Adams presides.

MARWAR.

ADMINISTRATION OF THE STATE.

6. There have been no changes in the personnel of the higher offices. An intrigue against those in authority, the circumstances of which have been put on record, attracted much attention and caused some excitement towards the end of the year, but order was not interrupted.

TREASURY.

7. The only great administrative innovation was the establishment of a State Treasury, a measure proposed in my last year's report. Previously the system has been to draw money from a banker as it was needed, so that on every penny spent interest and discount were charged.

8. During the last 14 years 10 lakhs have been spent on interest and discount. To stop this and to be prepared to meet a famine or other extraordinary call a treasury with cash balances was essential. The treasury was set going on April 1st, 1885, and though it has many enemies it has been kept going, and at the present time contains 3 lakhs of rupees.

HAKIMS OF PARGANAS AND OTHER OFFICIALS.

9. The position of the Hakims of parganas and of their judicial moharrirs who were introduced three years ago has been improved. The Hakims have been graded and their pay raised.

MANUALS OF RULES.

10. Short and clear manuals of rules have been prepared and published for the guidance of—

The Civil Court.
Dakaiti Suppression Department.
The Treasury (Head and Pargana).
The Jail.
Jagirdar's Courts (prepared last year).

Officials concerned have to undergo examination in these manuals. Up to date 25 have passed,

including 19 Jagirdars' officials. Some of these manuals have been sold in considerable numbers, and have attracted attention in several States.

POST OFFICE.

11. The new Post Offices have been found as useful as was expected, and further postal extension is taking place. The substitution of a postal for the "Cossid" system has been pecuniarily advantageous.

JAGIRDAR COURTS.

12. The Courts of Jagirdars established last year have been very successful. They furnish returns, and are kept under control by the Sardar's Court without difficulty. These Courts decided 1,552 civil suits, and 317 criminal cases during the year. Nineteen civil and 32 criminal cases were appealed or referred to the Court of Sardars.

SARDAR'S COURT.

13. This Court continues to work well, and to reflect credit on the Head of it—Lala Hardial Singh. I attach a statement of civil work done by it. Besides this it has dealt with numerous cases of Jagirdars' bankruptcy. More than 100 Jagirdars' estates are now in course of relief from overwhelming debt. The bankrupts have been declared incapable of incurring fresh debt till their present liabilities have been cleared off, and meanwhile comfortable provision for their support has been made.

OTHER COURTS.

14. As the Musahib Ala is about to print a report of his own, in which details of administration will be given, I need not notice at length the other Courts of Marwar, further than to remark that the mass of pending cases in the Dewani and Foujdari Courts was reduced in the course of the year, that the Hakims who formerly did no judicial work now decide a fair number of cases, and that the superior Courts seem to be doing well. The Hakims carry out the orders of the higher Courts better than they did. They are, however, still very slow and inefficient agents, and their reports on cases referred to them are generally of little value.

CRIMINAL TRIBES AND DAKAITI SUPPRESSION.

15. There has been no relapse into evil ways on the part of any criminal tribes. Sakra and the Jeysalmere border are quiet. The Bhils are behaving well in the south, and the Kaem Khanis in the north-east have been brought under control. The Baoris are complained of as looking too much to the officer in special charge of them, and disregarding local authority. This undoubtedly is a danger and must be looked to. I may here note that the considerable progress of the general scheme for the control of Moghias and Baoris has been pronounced in a Government Resolution of July last to be "largely attributable to the active and liberal measures adopted by the Marwar Durbar."

16. The Minas, though not on the whole behaving badly, are not yet under proper control. The famous dakaitis Padia and Timla are still unarrested, and commit, I believe, most of the dakaities reported. I make out that of the Minas about 40 per cent. do not regularly cultivate land, while of other agricultural castes only 25 per cent. do not.

17. For the first time for four years, I have no progress in dakaiti suppression to record. However, there has not been actual relapse, the figures being much the same as last year; thus corrected for 1884 they are:—

| | 1884. | 1885. |
|-----------------------------|-------|-------|
| Dakaities | 41 | 43 |
| Loss by dakaities | 6,870 | 7,100 |

Of these cases, 26 took place in the pargana of Godwar, 2 in Sojat, 2 in Pali, and 6 in Serohi, that is, of the whole number 43, 36 occurred in or about the Mina country. If Padia and Timla could be put down I should hope to see dakaiti cases reduced to a third of their present number. A special official on a high salary has been appointed to pursue Timla and Padia, and considerable funds placed at his disposal to pay for information.

18. In the course of the year 19 dakaitis have been convicted by the Court of Vakils and punished, while 35 have been convicted, sentenced, and released on security for reasons set forth in the last report.

19. The detail is as follows:—

| | Convicted and sentenced. | Convicted but not sentenced. |
|-----------------------|--------------------------|------------------------------|
| Rajputs | 6 | 5 |
| Baoris | 4 | 8 |
| Jogi | 1 | ... |
| Bhils | 4 | ... |
| Charans | 1 | ... |
| Koli | 1 | ... |
| Naek | 2 | ... |
| Kaem Khanis | ... | 15 |
| Mirasis | ... | 3 |
| Minas | ... | 1 |
| Chakar | ... | 2 |
| Naek | ... | 1 |
| TOTAL | 19 | 35 |

REVENUE AND EXPENDITURE.

20. For the first time I have some satisfaction in recording the financial results of the year. The regular revenue was ₹39,28,848, the expenditure, excluding payment of debt, was ₹30,03,021; the State debts have been paid off, and no new one's incurred, except one of 4 lakhs for the Pachbhadra Railway extension, and there is a cash balance in the newly established treasury of 3½ lakhs.

21. The debt cleared off during the past year was ₹8,73,000.

22. The Musahib Ala is, I think, entitled to much credit for having at last placed the finances of the State on a satisfactory footing. He is not responsible for the whole of the disbursements. Nearly 8 lakhs are expended directly by His Highness the Maharaja.

PUBLIC WORKS RAILWAY.

23. The Jodhpur Branch Railway paid 10.9 per cent. on its capital of ₹11,03,000. Repairs and the Pachbhadra extension are likely largely to reduce this percentage in future years.

24. The construction of the Pachbhadra extension is in progress, and should be completed before the end of the year.

25. The Balsamand Canal, so important to the city water-supply, was completed during the year at a total cost of ₹1,34,654. It has fully answered expectations, and it may be safely assumed that the chief tanks of the city need never again be dry.

26. The total sum spent on works during the year exclusive of railway is ₹2,73,000. Details will be found in Musahib Ala's annual report.

27. Mr. Home's services continue to be greatly valued.

CUSTOMS.

28. Owing to the diminished export of til and import of opium the Customs revenue was much below the estimate. From 1st April the Marwar Durbar will abolish transit duty at Erinpura road and station south at a cost of ₹5,000, while Serohi abolishes its remaining transit duty at a cost of about ₹2,000.

LAND REVENUE AND SETTLEMENT.

29. The field survey of the Khalsa villages has been nearly finished, and the Jagir villages of 4 parganas demarcated. Notwithstanding an unfavorable season the land revenue under the direction of Major Loeh has been for the most part collected, and notwithstanding the increased income from the land very few complaints are made.

30. Major Loeh has settled or directed the settlement of nearly 300 boundary cases. The most satisfactory feature in the work is the use of Marwari Amins. About 100 have been educated in surveying, and in future will be used almost exclusively for mapping village boundaries.

MALLANI.

31. The settlement and demarcation of boundaries has continued. I find the total number of villages in Mallani is 493. Of these, 396 have been demarcated, and the whole should be finished in a month.

32. I spent six weeks of the cold weather in Mallani, hearing appeals against the Munsiff's decisions, and directing the survey. There have been 909 boundary disputes to settle, of which 848 have been disposed of.

33. The cost has been much greater than I expected, partly because it was deemed desirable to employ Marwaris as much as possible rather than foreigners. However, I hope to report fully on the subject next year.

34. Crime in Mallani is kept well under, as the attached statement shows. In proportion to population, cattle theft, the commonest serious crime, is less rife than in Shikarpur of Sindh.

35. Education is progressing. By making the master of the Jessole school a small monthly allowance for each Rajput boy, the number of pupils who were Thakurs' sons was raised from 4 to 24 in a few months. A school has been started at Sindri, and one would have been set going at Gudah but for the unhealthiness of the place. The schools, however, need organization and inspection.

SEROHI.

36. My relations with the Serohi Durbar have greatly improved. Formerly it was suspicious and uncordial, now I meet with the utmost friendliness and confidence. Some important reforms have been begun, especially in the Customs system and in the Courts. His Highness is anxious to assimilate the former to that of Marwar, and the Courts, civil and criminal, are much improved.

37. The revenue is most prosperous as the following figures show:—

| | Average of 3 years. | | | 1884-85. | | |
|---|---------------------|-----------|----------|-----------------|----------|----------|
| | ₹ | a. | p. | ₹ | a. | p. |
| Land Revenue | 49,538 | 8 | 9 | 53,478 | 4 | 9 |
| Customs, including Transit duty | 43,405 | 14 | 9 | 74,401 | 9 | 9 |
| Miscellaneous | 74,711 | 3 | 9 | 82,198 | 5 | 6 |
| TOTAL | 1,67,655 | 11 | 3 | 2,10,078 | 4 | 0 |

38. At the request of the Durbar, boundary settlement has been begun in Serohi. About twenty of the most difficult cases were made over to Captain Herbert and myself, and about half have been disposed of. It is time that village demarcation in Serohi was taken regularly in hand.

39. I am in hopes that the Durbar will, in future, spend a considerable sum of money annually in public works.

40. Jowan Singh, son of the late Thakur Sadul Singh of Rewara, died during the year at Jodhpur, where he had come on account of his health. For three years he had been at Ulwar, where His Highness the Maha Rao Raja had most kindly taken charge of him.

41. The privilege of using postal service stamps was granted to the Serohi Durbar and its principal officials during the year.

JEYSULMERE.

42. I think there is no doubt that Jeysulmere, like Marwar and Serohi, has entered on a period of prosperity.

43. One indication of this is immigration on a considerable scale, which is a new thing in Jeysulmere. The incomers are from Sindh, from Bickanir, and from Hissar, and in 1884 are said to have been more than 1,500 in number. The famine of last year has, however, driven many away for the present.

44. For the first time I am able to give a fairly trustworthy statement of Jeysulmere revenue, deducting collections for marriage expenses—

| | 1884-85. | Average of previous 3 years. |
|--------------------------------|-----------------|------------------------------|
| | ₹. | ₹. |
| Land Revenue | 49,241 | 24,349 |
| Customs and Salt | 1,25,394 | 57,237 |
| Court Fees and Fines | 17,853 | 21,436 |
| Miscellaneous | 23,235 | 48,730 |
| TOTAL | 2,15,723 | 1,51,752 |

45. It will be seen that the revenue for 1884-85 was 40 per cent. in excess of the previous three years' average. This is due to reforms in the Customs, and greater energy in collecting the revenue, consequent on the appointment about 18 months ago of Moh'ta Nath Mal to the office of Diwan. Nath Mal has long been very influential at Jeysulmere, and whatever his conduct may have formerly been, I believe he now feels that his best course is to promote order and good management.

46. Complaints from Jeysulmere continue to be few, and crime seems unimportant, although the Darbar's authority is very weak. The Maha Rawal is exceedingly anxious for

assistance in improving his administration, and would be glad if a Political Officer could reside for some months at Jeysulmere.

TOUR.

47. I was 75 days at Abu and 148 days elsewhere on tour. I visited Bhadrarjun, Panchota, Jesol, Balmer, Chotan, Gudah, Erinpura, Serohi, Desuri, and Ajmere.

48. I held a Border Court in conjunction with the Political Agent, Mahi Kanta, and the Assistant Resident, Meywar, at Abu road in January and February.

NOTABLE INCIDENTS.

49. His Excellency the Viceroy, with Her Excellency Lady Dufferin and his Staff, visited Jodhpur in November, and together with a large number of European visitors were entertained by His Highness the Maharaja for four days. Although the reception and entertainments were in the best style, the cost was very moderate owing to the good management of Major Loch, who took charge of the arrangements.

50. His Highness the Maharaja met the Agent, Governor-General, at Desuri in March.

51. Maharaj Sir Partap Singh was made a K.C.S.I. last December, in recognition of his successful administration of the Jodhpur State for some years past.

52. Contributions to the London Exhibition have been despatched from Western Rajputana; the most notable is a handsome carved screen of wood, presented by His Highness the Maharaja of Jodhpur.

53. Major Loch, after serving in Jodhpur for more than four years as Boundary Officer, has just left on furlough. In addition to his boundary work he has been for two years in charge of the Customs, the Land Revenue, and the Land Revenue Survey, which last is almost complete. He has disposed of almost all the important boundary cases, his summary settlement and administration of the Land Revenue have been very profitable to the Darbar, and advantageous to the people, while the Customs have greatly prospered in his hands. He has also been always most ready to assist in any political complications or special work, which without his aid would have been accomplished with great difficulty. He has besides given me much loyal support, and I feel that I am greatly indebted to him. His work has been of an onerous nature, and I fear has injured his health, which, I heartily hope, rest and change will restore.

54. Things are going on prosperously in Western Rajputana just now, and the necessity of care to prevent a relapse—towards which there is a tendency—may be forgotten. It will, therefore, now that I am leaving Western Rajputana, be useful to recall what the state of the country and the administration was in the beginning of 1882, and what it may be again if caution is not exercised.

55. The country was harried by outlaws. In Serohi the Thakur of Rewara headed one band, while another in South Marwar was led by the Thakurs of Boyatra. The Minas were so bold that a large body of them from Serohi and Godwár plundered the shops of an Ajmere village in open day. Another party carried off a large number of cattle from the Merwara hills. Detachments of the Mer Battalion guarded with only partial success the Marwar-Merwara passes, and others from the Erinpura Irregular Force patrolled, without fully protecting the Serohi portion of the Ajmere-Abu Road. The Marwar Baoris were specially complained of in Ajmere. The Kaem Khanis of the Marwar Sikar border were plundering actively in Meywar. The Lohiana Bhils had killed an Erinpura Irregular Force sepoy defending his charge, and the Rana had distinctly refused to give them up, though known. Ontrages were frequent along the line of railway. There was trouble on the Jeysalmer and Sikar borders. Some Mina villages were at war with one another, and after setting at nought Raj authority, even to the extent of refusing arbitration, had entertained Pathans to strengthen their fighting power. The villages of Lohiana, Bararwa, &c., were nests of robbers, who plundered systematically, laughing at the sufferers and defying pursuers. Bahadur Singh of Mitri was in rebellion, and a Raj force had been for weeks before the closed gates of his fort. Throughout the country no central authority was respected.

56. The Courts were only such in name. The records of thousands of unsettled cases lay untouched, while those considered by the Courts were heard with a disregard of the principles of procedure and justice. The points at issue were lost in a mass of irrelevant papers, and it was in accordance with *written* law that a Judge should favor his relations. The feebleness of the Courts alone prevented their doing extensive harm, and civil cases were sometimes struck off the file for the recorded reason that the defendant refused to attend the Court. How little crime was punished appears from the fact that in the Jeypore Jail the great criminal tribes of Minas, Bhils, and Baoris were conspicuous by their absence. A large

majority of the Raj prisoners were untried, and the Court of Vakils had not been able to reach more than four or five dakaits annually.

57. The other branches of the administration were not in a more satisfactory condition than the Judicial and Police. The Customs were in a state of chaos throughout the three States, and opium was smuggled wholesale through Marwar and Serohi to Guzerat. Now, although the improved system is not likely to be thrown aside for the old, the check it places on speculation makes it most distasteful to a powerful class, who will always be trying to weaken it. The Durbar villages were in Marwar generally in the hands of oppressive contractors, allied with the official class, and these villages were generally the least prosperous in the State. The present arrangements which have altered this state of things, and the Land Revenue Settlement now in progress, have therefore many enemies.

58. Marwar and Jeysulmere are at the present time practically out of debt, but in the former the treasury for reasons explained is opposed by powerful interests, and it will be difficult to prevent a return of the old indebtedness and disregard of account.

59. As I am leaving Western Rajputana at least for a time, I think it right to place on record my appreciation of the services of Mr. Ardshir, Head Clerk of the Residency Office. He is capable, willing, well trained, well mannered, and educated. He has been of great assistance to me, and I consider him one of the best Head Clerks I have known.

Appendix IV.

EASTERN RAJPUTANA STATES REPORT FOR 1885-86.

No. 72 G., dated Jaipur, the 9th April 1886.

From—F. HENVEY, Esq., C.S., Resident, Eastern Rajputana States,
To—The First Assistant Agent, Governor-General, for Rajputana.

I have the honor to submit the Administration Report for 1885-86.

2. Surgeon-Major J. P. Stratton held charge until December 9th, 1885, when he was succeeded by me. My experience of this office during the year under review has, therefore, been limited to less than four months, out of which three weeks were spent upon a visit to Calcutta with the Maharaja.

JAIPUR.

RAINFALL AND CROPS.

3. The following table gives the figures of rainfall for 1885-86, compared with the average of 10 years ending December 1885 :—

| Month. | | Rainfall in 1885-86. | Average of 10 years. |
|-----------|------|----------------------|----------------------|
| April | 1885 | 0.02 | 0.15 |
| May | " | 0.67 | 0.68 |
| June | " | 3.33 | 2.38 |
| July | " | 7.31 | 8.51 |
| August | " | 15.96 | 7.15 |
| September | " | 0.37 | 4.05 |
| October | " | 0.01 | 1.30 |
| November | " | ... | 0.11 |
| December | " | 0.69 | 0.29 |
| January | 1886 | 0.58 | 0.35 |
| February | " | ... | 0.22 |
| March | " | 0.04 | 0.12 |
| TOTAL | | 28.98 | 24.31 |

The supply of rain was above average, but the monsoon came to an end too soon. This in a country which has a sandy soil and depends chiefly upon rain means a moderate autumn crop. In the cold season, however, rain fell in time and in sufficient quantity, so that the spring crops have done well. Some damage was caused by excessive cold and later on by hail, but on the whole I believe that the agricultural year may be described as fair; and certainly there are no signs of scarcity. Of this proof is given by the prices of the principal food-grains at the close of the year, viz.—

| | Seers. | Ch. | |
|--------|--------|-----|------------|
| Wheat | 16 | 8 | per rupee. |
| Barley | 29 | 0 | " |
| Jowar | 31 | 8 | " |
| Gram | 30 | 0 | " |

PROMINENT EVENTS OF THE YEAR.

4. The prominent events of the year were :—

- (1) The visit of His Excellency the Viceroy to Jaipur in November 1885.
- (2) The visit of His Excellency the Governor of Madras to Jaipur in October 1885.
- (3) The visit of His Highness the Maharaja to Calcutta in March 1886.

His Excellency the Governor of Bombay proposed to visit Jaipur after the military manoeuvres at Delhi in February 1886, and preparations were made to receive His Excellency, who, however, was unfortunately prevented by illness from carrying his intentions into effect

Besides the above it may be observed that His Highness the Maharaja has paid frequent visits to Bindraban, where His Highness' mother mostly resides.

ADMINISTRATION.

5. The constitution of the Council is unchanged. It is divided into three Departments—

- I. Revenue and Financial.
- II. Judicial.
- III. Foreign, Military, &c.

Thakur Sambhu Singh is dead, so the Revenue Department is now represented by Thakur Partap Singh of Digi and Pandit Motilal. These Departments have no final authority; they are merely consultative Committees, by whom questions are discussed and referred for orders to the general meeting of the Council. Centralisation is the result, for the decisions of the general Council follow the voice of the most potent member who thus becomes in fact, if not in name, the responsible adviser of the Chief.

Owing to various causes the "Petitioner's Day" has not been regularly observed.

In the Court of Appeal the services of Thakur Raghunath Singh of Achrol were dispensed with, and his place has been filled by Thakur Bakhtawar Singh of Mundawa, a nobleman of Shaikhavati, who, with care and practice, added to his local experience, may become a valuable officer of the Court.

FEUDATORIES.

6. There seems to be at present no difficulty in the relations of the Durbar with its Feudatories. I have observed no tendency on the part of the Durbar towards high-handed proceedings, while the absence of remonstrances from the principal Chiefs, such as the Rajas of Khetri and Sikar, shows that they are well disposed. This is creditable to both sides.

JUDICIAL.

7. I have lately reported upon the work done by Pandit Maharaj Kishen. He has issued a large number of circulars on Criminal and Civil Procedure, Police Registration, Stamps, and administrative arrangements. His efforts have been principally directed to the reform of inveterate abuses, such as the irregular and prolonged detention of prisoners and the like; but he has not neglected to make suggestions for the improvement of the machinery of the Courts, the distribution of judicial powers among the various tribunals, the re-arrangement of the City Police, &c. The difficulty in Jaipur, as elsewhere, is to make sure that orders are attended to. Unfortunately it has not hitherto been the custom for high officers of State to undertake frequent tours of inspection. Hence the duty of personal supervision is delegated to subordinates, and these subordinates are often connected with one another or with influential personages, so that offences are screened or neglect is insufficiently punished. This is an important matter, for it is vain to pass orders which are not obeyed, and orders are not obeyed unless obedience is enforced.

Among the changes lately effected or advised by Pandit Maharaj Kishen, the following are worthy of remark :—

REFORMS CARRIED OUT.

- Regular submission of monthly returns showing the work done by the Courts, 22 in number.
- Relief of the heavily worked Nazim of Jaipur by investment of the Naib Nazim with judicial powers.
- Clearance of old-standing cases in the Nazim's Courts consequent upon the submission of returns of work.
- Relief of the Faujdar of Jaipur—
 - First*, by the investment of his deputy with powers.
 - Second*, by directing that criminal appeals from the Nazim should go direct to the Court of Appeal, and not to the Faujdar.
- Revision of arrangements in the Jaipur Munsiff's Court, so that the two Judges now sit and dispose of cases separately.
- Relief of the Dewani Court by directing that civil appeals from Nazims should go direct to the Court of Appeal, and not to the Dewani.
- Investment of the Faujdar of Jaipur to pass sentences of whipping, so as to enable him to deal promptly with numerous petty cases for which sentences of imprisonment are unsuitable.

REFORMS UNDER CONSIDERATION.

Submission of returns showing work done by Police, crimes reported and detected, persons

arrested and so forth. No regular system of this sort has hitherto been enforced in Jaipur, though, of course, it lies at the root of effectual Police administration.

Distribution of judicial powers and work among the Tahsildars, in order to relieve the Nizamats, and also to bring justice closer to the doors of the people. This is a most important measure. At present it awaits the settlement of administrative questions which are under discussion in the Revenue Department, connected with the establishment of Nazims and Tahsildars.

Investment of the Naib Nazims in districts with judicial powers and appointment of additional Naib Nazims where the work is found to be excessive.

Proposal to appoint four Munsiffs of different grades and with separate jurisdiction in lieu of the present Courts of Munsiff and Dewani in Jaipur city.

Measures for facilitating the execution of decrees of Civil Courts.

STATISTICS, CRIMINAL AND CIVIL.

8. One mark of the great improvement wrought in the judicial administration of Jaipur is the collection of statistics exhibiting the work done by the various Courts. This is the first and indispensable step towards anything like reform of proper control of the Courts. Last year my predecessor was able to show the figures of the superior Courts of the city. On this occasion the Darbar has been so good as to place at my disposal statistics, not only of all the Courts in Jaipur itself, but also of the District Courts. The following is a summary of the figures :—

I.—Criminal Courts of Jaipur city.

| | Cases disposed of. | Cases pending. |
|---|--------------------|----------------|
| Naib Nazim | 1,491 | 52 |
| Navim | 1,597 | 104 |
| Naib Faujdar | 1,934 | 87 |
| Faujdar | 2,542 | 157 |
| Court of Appeal | 2,169 | 186 |
| Judicial Committee of the Council | 2,537 | 202 |

The Faujdar's Court is the most important tribunal of original criminal jurisdiction. The Faujdar has not only large powers for dealing with cases arising within his jurisdiction, but he also disposes of cases which are sent up by the District Nazims as being beyond their competence. He was quite overwhelmed with work until Pandit Maharaj Kishen recommended that the Naib Faujdar's authority should be increased.

II.—Civil Courts of Jaipur City.

| | Cases disposed of. | Cases pending. |
|---|--------------------|----------------|
| Nazim of Jaipur | 1,145 | 119 |
| Munsiffs | 5,632 | 231 |
| Dewani Court | 1,975 | 114 |
| Court of Appeal | 1,456 | 159 |
| Judicial Committee of the Council | 1,527 | 215 |

The Munsiff Court is the Court of Small Causes for Jaipur.

III.—Criminal Courts of Jaipur Districts.

| | Cases disposed of. | Cases pending. |
|----------------------|--------------------|----------------|
| Tahsildars | 460 | 12 |
| Nazims | 7,772 | 261 |

These figures are for the calendar year ending 31st December 1885.

IV.—Civil Courts of Jaipur Districts.

| | Cases disposed of. | Cases pending. |
|----------------------|--------------------|----------------|
| Tahsildars | 598 | 36 |
| Nazims | 4,247 | 220 |

These figures also are for the calendar year 1885.

There are only five Tahsildars throughout the territory of Jaipur who are invested with judicial powers. Consequently almost the whole work of the District Courts falls upon the Nazims, of whom there are ten, including the officer attached to the important post of Bandikui. These officers unite in themselves the functions of District Magistrate, Civil Judge, and Collector of Revenue.

An annual report does not afford a fitting opportunity for detailed criticism of judicial statistics.

A suggestion may, however, be thrown out that if there were less centralisation of authority at the head-quarters of the Nizamats, and if more Tahsildars or a few Honorary Magistrates were invested with judicial powers, under due restrictions and precautions, this

might give relief to some of the heavily worked Nazims and likewise prove of advantage to the people.

HEINOUS OFFENCES.

9. There is nothing to report under the headings of *Sati* and *Safety of the Government Mails*. It was brought to my notice quite recently that an insured parcel conveyed to the British Post Office at Jaipur was found to contain stones instead of valuable articles. At the instance of the Postal authorities the State Police were instructed to aid in the investigation. So far as enquiry has at present gone, there appears to be reason for charging a member of the establishment of the British Post Office at Jaipur with culpable neglect of duty which has increased the difficulty of detecting the thief.

One case of suspected infanticide is said to have occurred and is being enquired into.

No crimes of poisoning have been reported, and, according to intelligence received from the Darbar, there were only two crimes falling under the technical term of *Dakaiti*, for which seven men were arrested.

It must not be inferred that Jaipur is a territory in which scarcely any offences against property attended with violence are committed. The probability is that *Thauadars* are clever enough, for reasons which will be readily understood, to reduce the number of accused below the limit which brings the crimes within the category of *Dakaities*.

An atrocious murder was perpetrated by a man named Alexander Smith. He is said to be of French extraction. In a fit of jealousy or passion he shot his wife and her mother who were members of an East Indian family long settled in this territory. The murderer was caught red-handed, but the Council, before whom the case went for final orders, seem to have considered that there were extenuating circumstances, or that the crime was not premeditated, for the murderer was sentenced to imprisonment for life.

One serious affray took place at Nandpura in the Hindon pargana between the people of the village and some men who had been sent from Hindon to assist in the collection of revenue. One man was killed, and others were wounded. The official account of the affair is that the villagers were to blame for resisting lawful demands. Enquiry is still going on.

Judging from what is known as above reported, the Jaipur State enjoys a remarkable freedom from offences of a sanguinary and turbulent character. The streets of Jaipur city are not disgraced by riots: trade at the capital is carried on with security; life and property are fairly safe.

THE CENTRAL JAIL.

10. The jail is under the management of Mr. Williams. I visited the jail shortly after I arrived at Jaipur and was surprised to find under-trial prisoners mingled with, and treated like, convicts. I also observed a raving mad woman among the female prisoners, and I was informed that, although there was an asylum in the city, no separate wards had been provided for female lunatics. The jail, moreover, is very overcrowded, though the overcrowding does not seem to be fatal to the health of the prisoners. The average daily strength in 1885 was 943.00 and of daily sick 69.82 against 879.87 and 65.56, respectively, in 1881. The deaths were only 26 at the rate of 27.56 per *mille* prisoners, or 4.36 less than in 1880, which was the healthiest of ten years; whether the rate of mortality is affected by a rule of the Darbar that moribund prisoners are to be sent, if convenient, to their homes, I am unable to say. Soon after my visit a Committee assembled and measures for increasing and improving the jail quarters were discussed. The Executive Engineer submitted a plan of additions estimated to cost Rs. 1,35,785, but even these proposals will not suffice for more than 789 prisoners, whereas accommodation is required for 1,000 at least. Final orders have not been passed. The last week of the year was marked by an unfortunate event. Two long-term prisoners attacked the Jail Darogah and cut his face badly with a knife. They stated that the Darogah had treated them harshly, and that they were resolved upon killing him, and they would probably have succeeded in their object had they not been dragged off by a fellow-prisoner and a warder of the jail.

POLICE.

11. The Police of the city of Jaipur were re-distributed some time ago in accordance with the recommendations of Pandit Maharaj Kishen. Men were taken from the train of the Kotwal and other dignified personages and set upon their proper work of watch and ward. I have observed nothing which would lead me to the conclusion that the Police administration of the city is inefficient.

The management of the District and Border Police is entrusted to Narain Singh, the Superintendent of the local Thagi and *Dakaiti* Department. Speaking generally, the arrangements made three years ago for the protection of the Jaipur and Punjab Frontier have been

found effectual, though improvement is said to be required in several points, such as the registration and control of professional thieves and notorious rogues, strict attention to the rule that such persons shall not keep arms or camels, and so forth.

My predecessor, Dr. Stratton, took much pains to go thoroughly into this question of the District and Border Police, and it was in accordance with his advice that the Darbar agreed to adopt various measures, which may be shortly described as follows:—

- 1st.—An Assistant on Rs200 per mensem was appointed to help Narain Singh.
- 2nd.—Officers of Thanas and the Dakaiti Department were relieved of miscellaneous duties which had hampered them in the exercise of their police functions.
- 3rd.—Some Thanas which were too close together were reduced, and others were established in places where Minas of dangerous character were known to live.
- 4th.—A Thana was withdrawn from Chirawa in Khetri, on the ground that the R of Khetri had a thana of his own there, and that in view of the situation and circumstances of the town the retention of two thanas side by side was needless and likely to cause friction.

CRIMINAL TRIBES.

12. The Minas are thorns in the side of the Jaipur State. Plundering raids on a magnificent scale may have ceased, but rumours are occasionally heard that small parties are suspected of using the facilities presented by railways to carry on thieving operations at short distances from home. The system of roll-call ought to stop this, but it is not easy to arrange for calling the roll so often as to detect the absence of a Mina from his village for a week or less. Moreover, though Superintendent Narain Singh is a man of energy and resource, has beneath him Deputies, Inspectors, and Thanadars, some of whom are stated to be not quite so careful as they should be. The theory is that the Minas of Jaipur are forced, by constant and regular hammering, to betake themselves to agricultural pursuits. But if the Minas are too many for the land at their command, and if the fees which they are understood to draw for watch and ward are not enough to feed them, or are swallowed up in awards for compensation, it follows that the Minas, having no other sources of income, must either go elsewhere or steal or starve. Now and then they threaten to emigrate, but, as a rule, they prefer the alternative of stealing; this is a point which is engaging the thoughts of the Darbar. It was decided last autumn that Superintendent Narain Singh should confer with the Nazims, District Officers and endeavour to make sure of the facts. What he has to ascertain is in substance this—whether the Minas have sufficient resources for an honest livelihood and, if not, what should be done to help them. It was likewise provided that, in order to enable the local Thagi and Dakaiti Department to apply for Mina prisoners, who might be wanted for crimes other than those of which they were convicted, particulars should be sent to the Department before such prisoners were released from jail.

The Mogias, or Baoris, are not numerous in this State. To deal with them should be comparatively light task, and, so far as I am aware, the Darbar has shown no unwillingness to treat them liberally and to give them a chance of settling down as cultivators.

TRACKING RULES.

13. The course of procedure in attempting to carry out the Tracking Rules is usually as follows:—A theft is committed at night in an Ulwar village near the Jaipur border. The Ulwar Police and villagers discover what they consider to be the track of the thieves, and, with the help of professional trackers, they pursue the trail from village to village, each village showing the utmost zeal and alacrity in conveying the party beyond its own borders. At length the Jaipur frontier is passed and the track is conveyed to a Jaipur village. The Jaipur Police and villagers, knowing well that if the village is condemned they will be the sufferers, forthwith deny that the track is genuine, and this is inevitable, for until some unexpected change is wrought in human nature, no man will be eager to own a responsibility for which he will have to pay, and no man will profess himself satisfied with a chain of evidence of which he sees only one end and that end damaging to himself. Hereupon wrangling and recrimination ensue, and the dispute is referred to the Durbars concerned; each of which contends that the other is to blame. Finally, the Court of Vakils steps in and awards, or refuses compensation, upon the evidence before it. Now, my predecessor, Dr. Stratton, was of opinion that this procedure was susceptible of improvement in at least one point: and he proposed that when a trail is disputed, as it always is and always must be, the tracking party should be allowed, if they desire, to retrace the suspected village, and then the discovery of stolen property or the failure to discover stolen property would afford presumptive evidence as to which of the disputants was in the right. The Jaipur Darbar adopted this recommendation

tion, and there is a faint hope that the Border States may co-operate in the same way, but experience alone can show whether any practical good has been obtained.

RAILWAY JURISDICTION.

14. In the calendar year 1885 there were altogether 11 cases for trial by the Resident as District Magistrate, and of these three were transferred by the Sessions Judge for re-trial from the Court of the First-class Magistrate. The following is a list of the cases:—

| | |
|---|----|
| Theft | 2 |
| Criminal breach of trust | 1 |
| Assaulting a public servant | 1 |
| Voluntarily causing hurt | 1 |
| As a public servant attempting to obtain an illegal gratification in respect of an official act | 3 |
| Performing duty improperly so as to endanger human life | 1 |
| Being intoxicated on the railway | 1 |
| Willfully giving a false declaration of goods to be despatched by railway | 1 |
| | — |
| TOTAL CASES | 11 |
| | — |

12 persons were tried, 8 were convicted, 3 acquitted, and 1 remained undisposed of at the close of the year. Three were European British subjects and were sentenced to fines.

No civil suits were heard by the Civil Judge, but the extension of the Indian Succession and Probate Acts by Notification No. 1329 I., dated 30th April 1885, has enabled the Judge to take up long pending cases connected with the administration of the estates of persons deceased within the Railway jurisdiction.

COURT OF VAKILS.

15. The work of the Court of Vakils, so far as it is concerned with prisoners committed by the officers of the Department for the suppression of Thagi and Dakaiti, is described in Appendix A. The total work of the Court, which consists for the most part of the foregoing and of inter-territorial claims for compensation on account of offences affecting property will appear from the figures given below —

| | |
|-------------------------------------|-----|
| Cases from previous year | 27 |
| Admitted during the year | 131 |
| Cases disposed of | 121 |
| Cases pending | 37 |
| Number of persons accused | 108 |
| " convicted | 48 |
| " acquitted | 18 |
| " died | 1 |
| " awaiting trial | 41 |

Of the 121 cases disposed of no less than 84 were crimes of a serious character against property, such as dakaities committed in years gone by, cattle-lifting, &c. Consequently, the sentences passed by the Court are mostly heavy as shown below —

| | |
|---------------------------------|----|
| Imprisonment for life | 2 |
| " 14 years | 1 |
| " 12 " | 2 |
| " 10 " | 7 |
| " 7 " | 9 |
| " 5 " | 16 |
| " 3 " | 3 |
| " 2 " | 1 |
| " 1½ " | 1 |
| " 1 " | 4 |
| " 4 months | 1 |
| " 3 " | 1 |
| | — |
| TOTAL | 48 |
| | — |

Claims for compensation amounted to R18,833-5-9. The amount awarded was R3,273-2-6.

It was explained in the report for last year that when awards of the Courts of Vakils are not punctually paid by the States concerned, the sums payable are advanced by the Treasurer

of the Presidency. The Treasurer's Account of such outstanding claims for the year ending 31st March 1886, is as follows:—

| | R | a. | p. |
|----------------------|-------|----|----|
| Jaipur | 4 | 12 | 11 |
| Jodhpur | 48 | 15 | 1 |
| Bickanir | 25 | 9 | 7 |
| Kishengarh | 7,476 | 1 | 5 |
| Bhurlpur | 81 | 10 | 5 |
| Ulwar | 2 | 15 | 7 |
| Kerowli | 9 | 11 | 9 |
| Dholepur | 270 | 7 | 0 |
| Touk | 20 | 4 | 1 |
| TOTAL | 7,940 | 7 | 10 |

The aggregate is less than the total shown for March 1885, which was Rs,469, but the debt of Kishengarh is increasing.

LAND REVENUE SYSTEM.

16. The wish of the Maharaja is to induce his cultivators to accept a lease of their lands for 15 years on what is known as the "Chakbundi" system. This is based upon measurement of the irrigated and unirrigated lands belonging to each village and upon calculation of rates varying with the nature and capabilities of the soil, the caste of the cultivator, the revenue-roll of previous years, and so forth. By such a plan, if cautiously worked out, the evils inseparable from an actual division of the crops and from the alternative method of leasing villages to contractors are swept away. The advantages to the cultivator are that he reaps the fruit of improvements made during the term, and that he escapes from the exactions of contractors and petty officials. The danger is that the rates imposed may be so high, or the allotment of land to cultivators so unequal that the villagers will emigrate rather than agree to the conditions offered. All depends upon the moderation of the assessing officers and upon the care with which the work is done. With the view of securing these ends among others practical instructions have been issued, in accordance with the suggestions of Pandit Moti Lal, to all revenue officers from the Dewans and Nazims down to Patwaris: and it is possible that, if the Maharaja's wishes are intelligently fulfilled by his servants, the "Chakbandi" may prove to be as successful as the most scientific and elaborate settlement. But the people are suspicious of change, and complaints of over-assessment are occasionally heard.

FINANCE.

17. The accounts are made up in August-September.

The figures given by the Darbar for the financial year ending August 1885 compared with the figures of the previous year are—

| Year. | Receipts. R | Expenditure. R | Surplus R |
|---------|----------------|-------------------|--------------|
| 1883-84 | 52,27,868 | 48,07,441 | 4,20,427 |
| 1884-85 | 56,35,371 | 55,10,051 | 1,25,320 |

From this it appears that the revenue is increasing, but expenditure is increasing in a greater ratio: and the surplus is reduced to 1½ lakh, which is a narrow margin.

CUSTOMS.

18. The receipts from customs show a slight decrease. The figures given are—

| Year ending August | R |
|--------------------|----------|
| 1884 | 7,99,603 |
| Ditto 1885 | 7,13,894 |

Decrease 25,709

The decrease has taken place in the value of goods exported and imported. The duty leviable upon these fell altogether by 35,751

Setting against this an increase under contracts and miscellaneous duties of 10,042

The net decrease is as shown above 25,709

GARNETS AND OTHER MINERALS.

19. The Garnet Works are progressing well under the skilful management of Mr. Tellery. The stratum in which the garnets lie is said to extend for miles in the southern part of the territory about Raj Mehal, and the supply is practically inexhaustible. As the color of the garnets answers the present taste, and the demand in Europe and elsewhere is considerable,

expansion of the trade may be looked for even now. After laying out money in mining operations, purchase of tools, &c. Mr. Tillery is able to show a clear profit of some thousands of rupees. His method is to dispense with middlemen, and he employs a large number of cutters and polishers, who work under his eye upon contract and often earn as much as Rs 15 per mensem. Thus, not only is the State a gainer, but employment is given to many deserving and industrious artisans.

The search for beryl and aqua marine in the region near Toda Rai Singh has not hitherto led to any substantial returns. Stones have been found, but they are small or of bad colour.

Khetri is well known to be rich in copper, cobalt, and alum. If the ores of this tract in Shaikhawati were properly worked it is believed that the result would be satisfactory.

COTTON PRESS.

20. The Press at Jaipur began working on the 14th December 1885 and by the end of March 1886 over 11,000 bales had been pressed. The ordinary charge for pressing a bale is Rs 4. Colonel Jacob, the Executive Engineer, has used his best efforts to consult the wishes of merchants interested in the trade and has invited them to attend meetings, and to speak freely upon points of which they may see cause to complain.

The Darbar, moreover, has forbidden *Jagirdars*, and other privileged landowners to levy unlawful taxes on cotton in transit.

Among the regulations connected with this Press is an order directing the export tax on *unpressed* cotton to be raised from Rs 4-0 to Rs 12-0 per maund. The effect of this can hardly be other than to make a penal distinction between those exporters who use the Raj Press and those who might more conveniently arrange to have their cotton pressed elsewhere.

It is, at least, open to question whether a State is well advised in entering into trading speculations and in establishing what is practically a commercial monopoly. The few Rupees gained are a poor set-off against the loss of reputation arising from the discontent which monopolies invariably create. I understand that the Government of the North-West Provinces has already been petitioned on this subject by the cotton merchants of Agra.

PUBLIC WORKS.

21. No report on Jaipur would be complete without some notice of the important and useful work upon which Colonel Jacob, the Executive Engineer, is engaged. I am indebted to him for the following notes taken from his report, which is submitted separately.

For the 12 months ending 31st December 1885, the expenditure amounted to—

| | R | a. | p. |
|--------------------------------------|-----------|----|----|
| Original Works | 1,22,186 | 7 | 5 |
| Repairs | 1,30,122 | 9 | 7 |
| Irrigation | 4,28,510 | 9 | 4 |
| Miscellaneous Improvements | 2,94,945 | 10 | 1 |
| Imarat Work | 94,272 | 3 | 9 |
| Establishment | 31,971 | 6 | 2 |
| Other Works | 2,996 | 3 | 9 |
| TOTAL | 11,05,005 | 2 | 1 |

Among 18 *Original Works buildings*, the chief is the Albert Hall which, is being built in the public gardens. The Hall, when finished, will form a garden palace for the use of the public and for a museum. The marble-workers and stone-cutters of Jaipur are numerous, and the Executive Engineer has been able, by means of this magnificent work, to provide means of employment for a large class of laborers.

Original works communications.—Include the continuation of the metalled road from Hiudon towards Kerowli. The length of the road in Jaipur territory is 7.25 miles. The work was begun in March 1885 and finished in February 1886.

A new metalled road, 20 feet wide, has been made from the station to the city.

The heading *Miscellaneous Public Improvements* includes—

| | R |
|---|--------|
| The maintenance of the water-supply | 36,495 |
| Public Gardens | 36,727 |
| Gas Works | 65,167 |

Among new works are the Steam Hydraulic Cotton Press and the various buildings connected therewith; also the dam across the Amani Shah for the storage of water for the

use of the city. The whole of last year's rainfall into the Amani Shah in the neighbourhood of the city was caught and stored, and it is said that there is now no fear of any deficiency in the supply to meet the demands, which show a slight increase annually.

IRRIGATION WORKS.

22. The most important works, so far as the prosperity of the country and the happiness of the people are concerned, are the irrigation tanks. It was my good fortune to visit some of these tanks during a short tour in the cold season. The irrigation works of Jaipur will, if carefully maintained, form a noble and lasting monument of the enlightened liberality of the Darbar and of the indefatigable energy with which Colonel Jacob has conducted the operations. Nothing can be more striking than the contrast between the thirsty sands of the tracts unirrigated, and the fields within reach of the canals, as, for example, near the great lake of Tori Sagar.

As above stated, the expenditure of the year was R4,28,510. The works of greatest magnitude were the Tori Sagar and the Buchara tank. The expenditure on the Tori Sagar was R1,21,673. The dam, which is about $1\frac{1}{2}$ miles long, was completed in time to store the whole of last year's rainfall on a drainage area of about 310 square miles, and a fine sheet of water was formed some 5 square miles in area. There are two canals, with 58 miles of distributaries. Irrigation from this tank began on the 28th October 1885.

As regards the Buchara tank the masonry dam across the Sota stream in the hills north of Jaipur was 40 feet high when the rains fell, some water was stored, and the surplus passed away over the dam. The work is being pushed, and it is hoped that before next rains the dam will be built to its full height of 75 feet. The canals are making, and it is expected that next year irrigation will be possible from the reservoir, which will be about $1\frac{1}{2}$ square miles in area.

FORESTS.

23. Four lads were sent to the Forest School at Dehra. They are now under instruction, and satisfactory reports have been received with regard to their progress.

Sadhu Singh, a trained officer of the Punjab Forest Department, is in immediate charge of the Forest Operations in Jaipur.

It was also arranged that Mr. E. A. MacMoir, Deputy Conservator of Forests in the North-Western Provinces and Oudh, should visit Jaipur in the winter, examine all the forest-bearing tracts, and report upon their capabilities, and upon the measures required for the creation of new forests and for the preservation and development of those which already exist. Mr. MacMoir submitted his report on the 15th March 1886. It will be carefully considered by the Darbar, for there is no doubt that many of the Jaipur forests, especially those in the south near the fortresses of Rinthambhor and Kandhar, are valuable; and if the railway mentioned in paragraph 42 of the Report for 1884-85 is ever constructed, the value of these forests would be increased. The main problems are how to reconcile the strict conservation of forests with the prescriptive rights of villagers as to grazing and cutting wood for home use, and, secondly, how to enforce rules by impounding cattle and fining trespassers without putting too much power into the hands of petty officials, whose field of work is remote from the centres of executive authority. The best chance of success in solving one at least of these problems will be found to lie in taking up areas of reasonable extent, in well-defined blocks, and then in thoroughly fencing these blocks. Measures of this kind are doubtless expensive, but scarcely anything which is good can be got without payment; and no one will be disposed to deny that to make rules against cattle-trespass without enclosing the areas under protection is to provoke irritation and to increase opportunities for oppressive proceedings.

TRAINING IN SETTLEMENT AND ENGINEERING WORK.

24. Two men were sent by the Jaipur Durbar to Karnal to undergo training in settlement work. One of them took leave soon afterwards and his leave was extended on the plea of sickness. It is too early as yet to form any opinion as to whether this experiment will be of use.

With regard to the deputation of students from the Jaipur College to the Engineering College at Rurki, some difficulty has arisen. It was proposed by the Darbar, in July 1885, that the Principal of the Rurki College should be asked to allow the Jaipur boys, in the event of their failing to gain admission by competition, to receive the benefit of a course of Engineering study as a special case. This request was made in expectation that the boys would fail to pass, as some of the text-books were new to them, and it was thought desirable that they should

be sent to Rurki at once. However, it was not found possible to comply with the suggestion of the Darbar, and the matter for the present has gone no further.

CONSERVANCY AND SANITATION.

25. Surgeon-Major Hendley remarks that the sanitary condition of the district improves wherever the officials take an interest in the question; and he distinguishes the towns of Jhunjhun and Malpura as the most cleanly. My own observation leads me to believe that the Jaipur villages are not dirtier or more neglected than those in other parts of India with which I am acquainted. There is the pool of stagnant and filthy water around almost every well used for drinking and bathing purposes, and the familiar heaps of refuse are seen in forgotten corners. But, after all, the test of sanitation is the health of the people, and if the people are healthy, it might be unwise to disturb them for the sake of neatness.

The conservancy of a large city, such as Jaipur, is a more important affair. Here the Executive Engineer, Colonel Jacob, has suggested that a light portable railway should be laid down inside the walls of the town, so as to facilitate the export of the filth. The buffaloes or carts have at present to go several miles beyond the walls, and are stated to be not sufficiently numerous to effectually cleanse the city.

VITAL STATISTICS IN JAIPUR CITY.

26. The year 1885 was on the whole healthy. Births numbered 4,601 against 4,444 in 1884. Deaths numbered 4,557 against 5,626 in 1884. The population of the city is about 125,000.

There were very few deaths from cholera, and small-pox also is said to be less prevalent than it was, which is a result that may, perhaps, be placed to the credit of vaccination.

VACCINATION.

27. There has, nevertheless, been some decrease in the total number of registered cases of vaccination—

| | | | |
|-----------------|---|----------------|---------------|
| The figures are | { | 1881 | 53,173 cases. |
| | | 1885 | 50,920 „ |

Surgeon-Major Hendley, however, states that he has reason to doubt the accuracy of former statistics. The vesicle has improved in quality and the percentage of successful operations has risen from 86.8 to 91.05.

CHOLERA.

28. There was an outbreak of this disease in the spring and summer, chiefly in the Eastern and Southern districts, and, as usual, the seeds of the malady are believed to have been imported from fairs held elsewhere. But the cholera epidemic was not very severe; altogether 372 cases were reported, with 258 deaths.

MEDICAL INSTITUTIONS.

29. The Mayo Hospital and the dispensaries of Jaipur are under the able superintendence of Surgeon-Major Hendley, whose report is submitted separately. It is unnecessary for me to repeat the particulars which he gives, but the following may be marked as worthy of special notice :—

The generous offer of Seth Ram Mull, of Basao, to build a dispensary at Jhunjhun at his own expense.

The opening of a new dispensary at the important centre of Bandikui.

The sanctioned construction of dispensary buildings at Bandikui and Sambhar.

The construction of new latrines for the use of the Central Jail.

METEOROLOGY.

30. The most important point to be recorded under this heading is the effort which the Superintendent is making to supply outlying stations with instruments for registration of the rainfall, temperature, and direction of the wind. During 1885 rain-gauges were set up at 10 new stations, and thermometers were sent to 9 dispensaries. Each of the dispensaries in the Nizamats is to be a meteorological, as well as a medical centre.

POST OFFICE.

31. The relations between servants of the British Post Offices in Jaipur territory and the Raj officials have, on the whole, been conducted without friction. It was intimated by the

Deputy Post Master General that the line from Kot Putli to Singhana *via* Narnaul would be closed from 1st October 1885, and that a direct foot line from Kot Putli to Chirawa in Shaikbawati would be established instead.

The Deputy Postmaster General likewise announced his intention of opening a line from Jhunjhun to Mandawa in August 1885, and arrangements were made by the Darbar for escorting the mails.

Measures are also under consideration for facilitating the passage of mails across the river Bangunga on the road to Hindon during the rainy weather, when the stream is flooded.

EDUCATION.

32. The annual statistics for the Maharaja's School, the Rajput School, the Sanskrit College, and the Chandpole Branch School, all in Jaipur city, are given in Statements B and C.

In the Maharaja's College 1,033 boys were on the roll, as compared with 1,012 of the previous year, and the average attendance was 716, as compared with 659.

The total cost of the college was ₹24,038, so that the charge to the estate of giving a boy a good education is less than ₹24 per annum.

As might be anticipated nearly four-fifths of the pupils are Hindus, but there is a fair number of Mahomedans (227) and the Persian department numbers no less than 349 students, showing that the course of study for a Munshi's career is appreciated by Hindus, as well as Mahomedans.

The great majority of the pupils (684) learn English.

It was explained last year that the results of the University Examination for 1884 could not be exhibited until 1885. It appears that 13 were sent up for the Entrance Examination and 6 for the First Arts. None of the latter passed, but 5 out of the 13 were successful for Matriculation, 3 of them being placed in the Second Division and 2 in the Third Division.

Eighteen students went up for the Punjab Examination, namely 8 for the Munshi Examination, 8 for the Munshi Alim, and 2 for the Munshi Fazil. The success attained was poor, for only 3 passed the Munshi test and 1 the test for the Munshi Alim.

It struck me that it might be interesting to trace the career of those young men who had passed the Entrance Examination of the University, and to see how far the Maharaja's College is fulfilling one of the principal objects of the establishment, that is to say, how far it supplies the offices of the State with young men of good education. This I was enabled to do by the courtesy of the Darbar, and I find that from 1875 to 1882, inclusive, 35 students matriculated and of these 14 are employed by the Jaipur Government, besides 4 who are learning Forestry at Dehra Dun. Others have taken service in neighbouring States, and the fate of some is unknown.

The Nobles' School has a roll of 30, including one Mahomedan. The average attendance was 14, which is not very creditable to the pupils.

For the education of the people in the Rural Tracts there are said to be 465 schools with 10,015 boys, but of these 421 are indigenous schools, described as "more or less supported" by the Darbar. During my tour I tried to ascertain on what principle and under what conditions these schools were supported by the Darbar. In most of the villages which I passed through there were either no schools at all or schools consisting of a knot of boys sitting in a verandah around an aged Brahmin, who taught them to cast up figures and read the Shasters. The pupils pay small fees to the Brahmin, and now and then, on high days and festivals, he may get a trifle from the Darbar, but no such thing as a scheme of grants-in-aid exists, nor is there any machinery for discovering whether the instruction is good or bad; very likely this rude system of education is quite suited to the people, and I should be the last to advocate educating the masses of the rural population beyond their needs, or to advise the Darbar to spend money upon advanced instruction for which the persons who demand such instruction ought themselves to pay. What the Darbar methodically does is to maintain 44 schools with 1,042 pupils, and these schools are linked to the College by examinations and scholarships. Only 5 boys, however, out of 33 who were sent up from the District Schools in April 1885, were thought worthy of receiving scholarships of ₹4 each.

There are in Jaipur Territory 9 girls' schools, of which 7 are at the capital or in the suburbs, one is at Amher a few miles off, and the 9th is at Madhopur. These schools have a roll of 681 pupils. The most important is the Central School, with a roll of 334 girls, chiefly children of tender years. The total cost is ₹7,651, *viz.* ₹6,569 derived from the State and ₹1,082 from the proceeds of needle-work. Thus, the expense of educating a girl is on the average nearly ₹10-10 per annum.

From what has been seen of the small school close to the Residency there is some reason to suppose that the attendance may not be quite so regular as it ought to be. In the Central

School the elder girls seem to take at least as much interest in needle-work as in the more solid departments of instruction. But this is perhaps unavoidable, since in a country like Jaipur, where there is not any real demand for female education, if the schools are not made attractive, pupils will not resort to them.

Taking the population of the State at 2,523,949, and the number of boys of a school-going age at, say, 15 per cent. of the whole, the number of *male* scholars should be 378,585. The total number of boys being educated in Jaipur schools, including 421 indigenous schools of the rudest and most elementary type, is 11,383, so that out of 100 boys who should be at school, about 3 are getting some sort of education. When the instruction of the males of a country is in this stage of development, it is not amazing that the females should be suffered to grow up in ignorance. Female education, therefore, in Jaipur is still in *embryo*. The schools which are now working may in the course of time lead to something more worthy of a progressive community, but not less than two conditions are indispensable for the accomplishment of this end:—

First.—A living interest must be taken in the movement by those in power.

Second.—There must be a proper system of inspection, especially for schools remote from the palace, in order that the attendance of the scholars, the character of the teaching given, and the efficiency of the teachers may be duly tested.

LONDON EXHIBITION, 1886.

33: The following is the substance of notes given me by Surgeon-Major Hendley, who has taken the warmest interest in, and devoted much time and labor to, the collection.

The Jaipur contributions will fill the first six bays in the Provincial Courts of the Indian Section, besides a space equally large, probably in the picture gallery.

Moreover, Jaipur has provided a "Nakar Khana," or grand entrance gateway, to the whole Indian Section.

This building, and the screens which separate the bays from each other, as well as the front archways, are all constructed of teak-wood carved, by village carpenters from Shaikhawati. The upper panels of the screens are filled with *plaques* of different kinds of decorative work, such as tiles, glass or mirror-mosaic, fresco and distemper paintings, brass trays.

The courts will contain—

1. Mythological—

A typical collection of stone images, pictures, carvings, cartoons from the Jaipur *razimnamah*, or Persian précis of the *Mahabharat*, &c.

2. Pottery—

Stone images and panels, lacquer toys, a cartoon as in Court I, jewellery and Malpura felts.

3. Metal Court—

Fine metal work, old paintings, cartoon, arms, &c.

4. Ethnological—

Papier-maché models, cartoons, lacquer panels, arms.

5. School of Art—

Pottery, metals, &c., including jail carpets.

6. Lacquer Court—

Lacquer-work, fly whisks, betel-nut carving, &c.

The collection also shows—

Models of State vehicles and buildings.

Models of instruments in Maharaja Sawai Jay Singh's Observatory.

Papier-maché models of men and women.

Brass and stone shrines.

Textiles from Sanganer, and Jaipur.

Jewellery of peasants.

Lacquer panels, with pictures from the *razimnamah*.

Photographs and maps.

2,302 separate articles have been contributed. The total expenditure to 31st March 1885 is reckoned at ₹33,000, including purchases to the value of ₹2,500 for the Government of India;

but this does not comprise freight from Jaipur and insurance charges. The total insured value of the exhibits, inclusive of loans is about ₹57,000.

The whole work has been carried out under the supervision of Surgeon-Major Hendley. His Highness the Maharaja and his Council have met all Dr. Hendley's suggestions with the utmost readiness, and no pains have been spared to make the collection the finest that has ever left Jaipur.

Colonel Jacob, the Executive Engineer, assisted by placing the resources of his Department at the disposal of the Exhibition Officer, and also provided an elevation for the "Nakar Khana" and outline design for the screens.

RAILWAY FENCE.

34. For the past four months complaints of cattle trespassing on the line and of accidents caused thereby have been less frequent than they formerly were. Steps were taken, in the course of the year, to guard against the dangers by forbidding servants of the railway to keep within railway limits horned cattle and other animals, and by arranging for pounding or driving away stray cattle.

The Darbar has continued to press for thorough fencing of the line, throughout its length, as the only effectual remedy.

SMUGGLING.

35. The Darbar has shown praiseworthy readiness to meet the wishes of the British authorities in endeavouring to suppress the contraband traffic in liquor imported into Ajmere. The arrangements made include removal of liquor shops from the frontier, the appointment of special guards to patrol the border, and the offer of rewards for the capture of smugglers.

BOUNDARIES.

36. The question of the *shamilat* at Sambhar was noticed in paragraph 71 of the report for 1884.

The Jaipur Durbar appealed against the decision with regard to the Lake, but Lieutenant-Colonel Temple's settlement was upheld.

Lieutenant-Colonel Biddulph has been engaged in the adjustment of disputes on the Ajmere-Jaipur border: and Captain A. W. Muir has done similar work on the borders of Tonk and Kerowli, but the results are not yet known.

THE NOBLES OF JAIPUR.

37. The succession to the late Rawal Bijay Singh, of Samod, was settled by the selection of a young boy named Futeh Singh, of Ranwal, whom Bijay Singh himself had nominated.

This was not done without heart-burning and remonstrances on the part of other claimants: but the latter, though bitterly disappointed, have accepted their defeat with dignity and composure.

It is much to be regretted that the Rao Raja, of Uniara, who was considered some years ago to be a youth of promise, has allowed his affairs to drift into the hands of unprincipled managers. He now for the second time within recent years occupies the unenviable position of a man who cannot pay his debts.

The embarrassments of the estate are heavy, but it is hoped that, with the aid of a committee of nobles, they may, perhaps, be somewhat reduced: or at least that an arrangement may be arrived at which will secure the name of the Rao Raja from dishonor.

KISHENGARH.

THE SEASON.

38. The total rainfall of the year was above the average: and the agricultural year may be described as fair, the spring crop having shared the benefit of the timely cold-weather rain, which brought so much advantage to Jaipur.

EVENTS OF THE YEAR.

39. His Highness the Maharaja met His Excellency the Viceroy in November 1885, and proceeded to Delhi in February 1886 to witness the Military manœuvres.

INCOME AND EXPENDITURE.

40. The income of the State is returned as ₹3,30,823 for the year ending July 1885, as compared with ₹2,70,341 for 1884. But among the receipts appears a loan of ₹33,370,

while the expenditure shows ₹29,370 payment in part liquidation of previous debts: so that what is paid off with one hand is borrowed with the other, and the account sheet is exactly balanced.

EDUCATION.

41. There is one Government School in Kishengarh costing ₹1,241 to the State. This school provides an elementary course of reading and writing in Urdu and Hindi besides a little arithmetic, which is taught after the native fashion. If there are any indigenous institutions in outlying villages, I was unable to find them in the course of my short tour within the Maharaja's territory.

IRRIGATION AND PUBLIC WORKS.

42. The Kishengarh State is said to contain 41 irrigation "bunds." No fewer than 17 of these, including the Goodalao tank of Kishengarh town, were breached, and in great part washed away by the heavy flood of September 1884.

Repairs have been executed at a cost of over ₹30,000.

The enclosing wall of the Kishengarh town is in a deplorable state of dilapidation, which is likewise attributed to excessive rain. To repair this wall would be an expensive undertaking.

HEALTH.

43. A few isolated cases of cholera occurred during the summer: and malarious fever is reported to have been prevalent.

ADMINISTRATION.

44. No heinous crimes of the nature of *Sati* or *Infanticide* or *Mail Robberies* have come under notice. The Maharaja consented to provide for the safety of the mails upon a new line between Harmara and Parbatsar. His Highness is also preparing to introduce measures for suppressing the illicit exportation of liquor into Ajmere, and, lastly, Kishengarh has been brought into line with the rest of Rajputana in the matter of controlling the Moghias. According to information given to me by the Durbar, the Moghias of Kishengarh are in easy circumstances. Their fees for watch and ward are said to be liberal, and some of them are men of property in land.

MISCELLANEOUS.

45. From a political point of view the year has not been altogether uneventful, since it was thought necessary to expel two men who were alleged to have excited the people and stirred up complaints against the State and its officials. These men were Thakur Futeh Singh, uncle by blood of the present Maharaja, and a confederate named Moti Singh, who has made himself unpleasantly conspicuous for intrigues in other parts of Rajputana.

The complaints have been chiefly aimed at a prominent member of the administration who was credited with more skill as a trader than integrity as an officer of State, and the cotton press lately set up, which has taken the shape of a monopoly and, like all monopolies, has given rise to remonstrances, is cited as an example of commercial proclivities on the part of official personages.

The method of weeding out troublesome petitioners is familiar to the native mind; but it does not afford a convincing answer to the complaints themselves.

Within the last few weeks the valuable services of Babu Syam Sunder Lal, who was formerly employed in Jhallawar, have been placed at the disposal of the Maharaja at His Highness's own request. With this gentleman's advice, whatever defects may lie at the bottom of recent criticisms upon the affairs of Kishengarh will perhaps disappear, and it is hoped that this may be so, for, although Kishengarh is not a large and wealthy State, it boasts of high rank, and it should endeavour to live up to the level of the dignity which it claims.

The efforts of Babu Syam Sunder Lal will probably be, in the first place, directed to introducing regularity in the conduct of official business. If there is no systematic record of cases referred and orders issued, there can be no guarantee against the operation of improper influences.

The Courts of Justice will also call for examination. At present Kishengarh contains a multiplicity of tribunals with concurrent Civil and Criminal Jurisdiction and dealing with suits and complaints according to the caste or status of litigants.

The utmost caution, however, is needed in suggesting and enforcing reforms, and especially should a new comer be prudent and wary in this respect.

The object is to guide in a healthy direction the natural growth and development of the laws and institutions of the country, rather than to elaborate ape-like imitations of British methods, which are neither understood nor appreciated by the people.

Lawa.

46. I visited Lawa during the cold weather, on my march to Kishengarh. The estate appeared to be in a flourishing condition, and the heaviest troubles of the Thakur consist of petty disputes among the brotherhood. At his request a Native writer was sent to Lawa, in December 1885 to give help in preparing the accounts of the estate, and in conducting work of a routine kind.

Besides the ₹ 10,000, which is invested in Government 4-per-cent Paper, Lawa has a cash balance of ₹ 4,250-6-6, which is now in the hands of the Residency Treasurer, and the yearly income is always more than sufficient to meet the yearly expenditure.

The case of adoption to which reference was made in the Report of 1884-85 was settled in July 1885, by the adoption of the relative chosen by Ram Singh.

The only other point requiring remark is the state of the irrigation tank north of the village. The breach of the embankment near the outlet had been considerably enlarged and deepened by action of water. The Thakur brought the matter personally to my notice. I at once asked the help of Colonel Jacob, the Executive Engineer of Jaipur, and measures have been completed by which the tank will have been put into thorough repair at a cost altogether of ₹3,054, before the next monsoon.

STATEMENT A.

Annual Report on the operations for the Suppression of Thagi and Dakaiti for the year 1885.

There were 58 cases of Dakaiti and 9 of Thagi instituted during the year under report, making a total inclusive of the 5 cases pending in the preceding 12 months of 72 cases, involving the trial of 72 persons.

Of the 67 persons brought to trial during the present year, 37 were residents of Jaipur, 10 of Bikanir, 5 of Patiala, 4 of Bhurtpur, 4 of Ulwar, 2 of Bundi, 2 of Jodhpur, 2 of Kishengarh, and 1 of Shahjehanpur.

Of the foregoing 36 were arrested in Jaipur territory, 9 in Bikanir, 4 in Patiala, 4 in Ulwar, 2 in Bundi, 2 in Jodhpur, 2 in Kishengarh, 1 in Shahjehanpur, 1 in Tonk, 1 was received in transfer from the Delhi Jail, and 5 were voluntary surrenders.

Of the 72 offenders committed to the Court, 41 were convicted, 7 acquitted, 5 were returned to the Thagi and Dakaiti Department, owing to the insufficiency of the evidence against them in consequence of the escape of an approver, and 19 were undisposed of at the close of the year.

The sentences awarded in the cases of conviction were as follows:—

| | |
|-------------------------------------|----|
| Transportation of life | 2 |
| Imprisonment for 14 years | 1 |
| Do. 12 " | 2 |
| Do. 10 " | 7 |
| Do. 7 " | 9 |
| Do. 5 " | 16 |
| Do. 3 " | 3 |
| Do. 2 " | 1 |
| TOTAL | 41 |

There were 12 cases of appeal to the upper Court, the sentences in 6 of which were confirmed, one was reversed and the result of the remaining 5 has not yet been communicated to this office.

The relations between the officials of the Thagi and Dakaiti Department and the Native State under this Residency continue to be cordial and satisfactory.

EASTERN RAJPUTANA STATES RESIDENCY ;
Jaipur, 9th April 1886.

F. HENVEY,
Resident, Eastern Rajputana States.

Appendix. V.

BHURTPUR AND KEROWLI REPORT FOR 1885-86.

No. 4 P., dated Agra, the 27th April 1886.

From—COLONEL C. B. EVAN-SMITH, *Political Agent, Bhurtpur, Kerowli, and Dholepur,*
To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honor to submit the Annual Administration Report of the Bhurtpur, Kerowli, and Dholepur Agency for the Official year 1885-86.

2. During the year under notice, I have held continuous charge of this Agency. In June 1885, Colonel T. Denney, Political Agent, Dholepur, retired, and the Political Charge of the Dholepur State was then amalgamated with the Bhurtpur and Kerowli Agency, with effect from the 1st of June 1885.

BHURTPUR.

WEATHER AND CROPS.

3. The rainfall for the year was plentiful and much above the average. Owing, however, to the very heavy fall that took place in the month of August 1885, the Ajan Bund burst, and much damage was caused by the consequent inundations which surrounded the city of Bhurtpur on all sides, and are calculated to have submerged 400 square miles of Bhurtpur and the adjoining British territory. The crops were, however, excellent during the year. The entire rainfall during the year was 33·54 inches, as against 32·21 inches last year.

HEALTH.

4. The general health of the people has been excellent. There have been no epidemics of any sort during the year.

GENERAL RETURNS.

5. The usual returns have been received from the Durbar and are attached to this report. This office has, however, no means whatever of testing their correctness or otherwise, or of forming any opinion as to the results to be gathered therefrom. If taken as correct, they serve to indicate a satisfactory state of the finances and a vigorous Judicial, Educational, and general Administrative Agency. They are forwarded as received from the Native Government, but they are by no means guaranteed as being correct.

EDUCATION.

6. The number of schools now sustained by the State is set down at 167, as compared with 172 returned in last year's report; 6 new schools have been opened, and 11 abolished during the year. The total annual expenditure on education throughout the State is represented at Rs20,253-2-0. Eleven students were employed as teachers, the total number of whom is now returned as 227, as against 230 reported last year. The total number of students is given as 4,744, as against 3,912 in 1885, of whom 2,398 and 936 attend the Halkabundi and Tahsil schools respectively.

MEDICAL INSTITUTIONS.

7. There are 13 dispensaries and hospitals in the State kept up at an annual cost of Rs11,732-7-3 (including the cost of vaccinating operations), as against Rs13,284-0-9 last year. There were 14,232 cases of vaccination, of which 13,596 proved successful.

JAIL.

8. The usual Jail Returns are attached. There were 8 deaths in the jail out of a total number of 549 prisoners, or at the rate of 1·45 per cent. The jail is kept in a fairly clean and good condition.

JUDICIAL COURTS.

9. The usual Civil and Criminal Returns are attached. It will be seen that out of a total number of 7,165 cases brought before the Criminal Courts, of which 116 were pending from last year, no less than 7,208 cases were decided during the year, leaving 73 pending enquiry at the close of the year. While on the Civil side 1,600 cases were settled, leaving 108 pending, out of a total number of 1,708 cases brought before the Courts during the year. No capital punishments were inflicted during the year. No information is given as to how many decisions were appealed against successfully or otherwise.

RAILWAY JURISDICTION.

10. There were no Criminal or Civil Suits instituted or disposed of during the year. The official intercourse between the Railway Officials and the Durbar authorities is carried on amicably.

CRIME.

11. No cases of Dakaiti are reported to have occurred during the year under notice. In May, 1885 a serious occurrence was reported to have taken place on the Bhurtpur-Jaipur Border, in which 5 men of Jaipur territory were killed by the villagers of Moroli in Bhurtpur. The case was made over for adjudication to and has been decided by the Jaipur Court of Vakils, who have passed severe sentences on all implicated in the occurrence.

INCOME AND EXPENDITURE.

12. The return submitted by the Durbar shows that the receipts and expenditure during the year amounted to R27,07,632-5-3 and 168 Gold Mohurs, and R24,87,473-8-3 and 71 Gold Mohurs, respectively, as against R26,75,559-13-5½ and 79 Gold Mohurs, and R25,08,177-11-0 and 126 Gold Mohurs returned last year.

AJAN KHURKA BUND.

13. In August 1885 I was informed by the Durbar that the Ajan-Khurka Bund had burst in 18 different places owing to the heavy floods of the river Bangunga, and that considerable damage had been thereby caused to the neighbourhood of the city generally, and to the surrounding villages in the British districts. The floods, which appear to have lasted from the 22nd to the 29th August, were of an exceptionally severe nature, and the tract of country extending from Bhurtpur to Uchein and Rudawal, and for miles round Fattchpur-Sikri, and between Bhurtpur and Fattchpur-Sikri, was under water for a period of 5 days.

In September 1885, a Committee, consisting of the Commissioner, Agra, Colonel Lang, Secretary, Public Works Department, and Major Home, Joint Secretary, was convened at Agra by the order of His Honor the Lieutenant-Governor, in order to discuss the cause of the late floods in the Fattchpur-Sikri and Bhurtpur districts, and according to the conclusions arrived at by the Committee, Major Corbett, on the part of the North-Western Provinces Government, and Mr. Housden on the part of the Bhurtpur Durbar were deputed in November-December 1885 to examine the bund and country lying in the immediate proximity to it and to the Bangunga river. Copies of the reports submitted by the officers concerned were forwarded to the Rajputana Agency.

SALT OPERATIONS.

14. No complaints were received in respect of the working of the Salt Agreement, the provisions of which are rigidly observed. The result of the last periodical inspection of the abandoned salt works by the Customs Official was quite satisfactory.

TRADE.

15. The usual return received from the Durbar is attached, which shows that the total income derived from Customs during the year, amounted to R1,63,525-15-9, as against R1,30,917-10-8½, returned last year. The decrease in the income from transit dues is due to the recent abolition of transit duties throughout the State on all articles with the exception of those on opium and intoxicating drugs.

BORDER DISPUTES.

16. The long-pending dispute between the Bhurtpur and Ubwa Durbars as to the rights of the water of the Rupariel river has been satisfactorily settled with the consent of the paramount power by the mutual exchange of villages.

INFANTICIDE.

17. No cases of infanticide are reported to have occurred during the year under report.

EXTRADITION RULES.

18. The working of the rules for the mutual extradition of criminals between the States of Bhurtpur and Ulwar, still leaves much to be desired owing to the stupidity or obstinacy of local petty officials, who decline to give effect to the rules in their integrity and persist in refusing to deliver up the accused persons. The attention of both the Durbars has been drawn to this matter.

POST OFFICES.

19. No new Post Offices have been opened in Bhurtpur during the year under report. In December 1885 a proposal was submitted to the Maharaja by the Deputy Postmaster-General in Rajputana for the extension of British Post Offices throughout the whole of Bhurtpur.

pur territory, but His Highness has intimated that he does not consider this step necessary until the proposed system is universally adopted in the neighbouring States of Jaipur, Ulwar, Dholepur, and Kerowli.

MISCELLANEOUS.

20. In September 1885, His Highness the Maharaja proceeded to Agra, and exchanged visits with His Honor Sir Alfred Lyall, K.C.B., and the Governor of Madras.

VISIT OF HIS EXCELLENCY THE VICEROY TO BHURTPUR.

In November 1885, His Highness the Maharaja was honored by receiving at his capital Their Excellencies Lord and Lady Dufferin, who, accompanied by a large party, made a stay of three days' duration, of which one day was spent at Dig.

His Highness and the Political Agent accompanied His Excellency the Viceroy to Agra and Fattelpur-Sikri.

In December 1885, His Highness the Maharaja, accompanied by Colonel Euan-Smith, proceeded to Lucknow on the occasion of the Viceroy's visiting that city.

In January 1886, His Highness the Maharaja, accompanied by the Political Agent, visited Delhi to witness the Imperial manœuvres held there.

21. There has been no permanent change in the administrative personnel of the State during the year. His Highness the Maharaja conducts the entire business of the State, and nothing whatever is done without his knowledge. There is no Kamdar.

BHURTPUR VAKIL.

22. Pandit Bishen Lall has been in attendance on me as Vakil of the Bhurtpur State during the year, and has always given me great satisfaction by the way in which he performs his duties.

KEROWLI.

23. The rainfall during the year was 36.95 inches as against 29.38 inches registered last year. Of the entire fall no less than 18 inches fell in the month of August and filled all the tanks and wells in the State abundantly. The crops were excellent and much above the average.

HEALTH.

24. The general health of the people was very good. In the months of March and April 1885, there was an outbreak of cholera in the districts of Mandrail, Jirota, Utgar, and Machilpur. The disease was said to have been brought by the pilgrims returning from the Ganges Fair. Out of a total number of 110 cases, 59 proved fatal. The cholera was entirely confined to the pilgrims who had been to the Fair.

MUNICIPAL ARRANGEMENTS.

25. The Municipal arrangements initiated last year have continued to work admirably. The city of Kerowli is now clean, and the sanitary arrangements are well looked after. The Municipal Budget also rests on a sound basis. The usual return of the receipts and expenditure of the Municipality for the year under report is attached.

EDUCATION.

26. The usual return received from the Durbar is attached to this report. It will be observed that an average of 205 children daily attend the City School. Of these 24 boys read English, 103 Persian, and 118 Hindi.

DISPENSARIES.

27. There are 4 dispensaries in the Kerowli State. The total number of patients that have received relief during the year is as follows:—

| DISPENSARIES. | PATIENTS. | | |
|---------------------|-----------|-----------|--------|
| | In-door. | Out-door. | Total. |
| Kerowli | 275 | 7,775 | 8,050 |
| Saptra | ... | 2,950 | 2,950 |
| Mandrel | ... | 3,100 | 3,100 |
| Machilpur | ... | 2,655 | 2,655 |
| TOTAL | 275 | 16,180 | 16,755 |

Vaccination is successfully carried on in the State. Of a total number of 2,100 cases 1,879 proved successful. The dispensaries are most popular institutions and are largely attended by the people.

ADMINISTRATION.

28. The administration of the State has, as usual, been conducted by the State Council under the general supervision of the Political Agent. The Members of the Council have one and all worked with zeal, energy, and intelligence.

REVENUE.

29. Deputy Collector Shaikh Amanut Hosein continues to supervise the Revenue Department with conspicuous success. The revenue has been paid regularly and without difficulty.

STATE DEBT.

30. The annual instalment of ₹30,000, with interest, has been paid to the State Banker.

COURTS.

31. The duties of the Judge of Civil and Criminal Courts are carried on by Pandit Nandi Lal, who has worked very satisfactorily.

The Criminal and Civil Judicial Returns are appended herewith. At the close of the last official year there were 14 criminal cases pending, 624 cases have been instituted during the year, making a total of 638. Of these 624 have been decided during the year, leaving 14 pending settlement.

On the Civil side, out of a total number of 66 cases, including 9 remaining from last year, 62 cases have been decided during the year. Five decrees remained unexecuted out of a total number of 60 brought before the Court.

Of the 62 Civil cases decided during the year, 9 were appealed against to the State Council with the following results:—

| | |
|---------------------|---|
| Confirmed | 4 |
| Reversed | 4 |
| Pending | 1 |
| | — |
| TOTAL | 9 |
| | — |

On the Criminal side, there were 8 appeals made to the State Council out of a gross total of 624 cases decided during the year, with the following results:—

| | |
|---------------------|---|
| Confirmed | 5 |
| Modified | 1 |
| Reversed | 2 |
| | — |
| TOTAL | 8 |
| | — |

In the Tahsil Courts 247 Criminal cases were instituted during the year, of which 245 have been decided, leaving 2 pending. On the Civil side, 196 cases were brought before the Courts, of which 4 only remained pending at the close of the official year.

One hundred and fifty-three Revenue cases were heard before the same Courts, of which 140 have been disposed of, leaving 13 pending. Of these 2 cases were appealed against to the Deputy Collector, 1 was confirmed and 1 was reversed.

In the Revenue Department 1,383 cases were brought before the Deputy Collector for disposal during the year, of which no less than 1,264 have been settled, leaving 119 pending at the end of the year. There were 9 appeals made to the State Council this year and 2 were pending from last year, of which 8 were confirmed, 1 reversed and 2 remained pending.

PUBLIC WORKS DEPARTMENT.

32. The report of Mr. C. E. Housden, Executive Engineer, to whom the State has every reason to be grateful, is attached in original.

CRIME.

33. There were no cases of serious crime during the year.

INFANTICIDE.

34. There has been no cases of Infanticide during the year.

EXTRADITION OF CRIMINALS.

35. The rules for the mutual extradition of criminals between Kerowli and Jaipur, Dholepur, and Bhurtpur, have worked more smoothly during the year under notice.

BOUNDARY DISPUTES.

- 1. Between Baroda in Kerowli and Jaipur in Sankra.
 - 2. Between Naroli in Kerowli and Tatwara in Jaipur.
 - 3. Between Fattahpur in Kerowli and Khizerpur in Jaipur.
36. During the year Captain Muir has successfully settled the boundary disputes as per margin existing between Kerowli and Jaipur.

FINANCE.

37. As the accounts of the year are not made up, it is not possible to give details on this head. Nothing, however, has occurred of an abnormal character to seriously vitiate the forecast made in the Budget for the expenditure and income.

AMARGARH.

38. The balance of the debt due by the Amargarh Estate at the end of the last year, *viz.*, ₹1,919 has been paid off this year.

There was a cash balance in hand at the end of this year of ₹5,000, which amount, together with ₹1,000 borrowed this year, has been devoted to the construction of the bund at Amargarh. There is at present a sum of ₹11,000 due by this estate, bearing interest at 9 per cent. on account of new debt borrowed for the construction of the bund.

GUNUNT DEBTS.

39. Of the ₹3,569-14-3 due on this head at the end of the preceding year; ₹2,309-13-0 have been paid off, leaving a balance of ₹1,260-1-3 still to be collected.

MISCELLANEOUS.

40. The Rao of Hadoti, attended by several Sardars, was present at the Delhi Imperial manoeuvres in January 1886, and was greatly gratified by his visit. The health of the Maharaja continues excellent.

DHOLEPUR.

WEATHER AND CROPS.

41. The usual rainfall return for the year is attached, and shows that the entire rainfall registered at Dholepur was 30.12 inches as against 30 inches last year. This was sufficient for tanks and wells, which were all filled. The crops were everywhere good.

HEALTH.

42. The general health of the people was excellent. In the month of June 1885, there was a slight outbreak of cholera in Dholepur territory. Eighty-four cases in all occurred during the year, of which 32 ended fatally. The first case was registered on the 10th of June in Mouza Sarani-Khera, Pargana Gird in Dholepur, about 7 miles to the south-west of the city. The cholera then spread through other villages and finally ceased in July 1885. There was only 1 case in Old Chaoni and 1 in Dholepur.

EDUCATION.

43. There are 7 schools in all kept up in the State, of which 5 are Tahsili schools. The total daily attendance in all the branches in the State during the year is represented as being 362 only, of whom 21 read English, 105 Persian, and 236 Hindi. The expenditure on schools, including the salaries of teachers, who are 15 in number, is set down at ₹192 per month, or ₹2,304 per annum.

DISPENSARIES.

44. There are 4 dispensaries in the State kept up at an annual cost (including salaries, medicines &c.) of ₹4,583-6-0. The total number of patients that have received relief during the year is as follows:—

| DISPENSARIES. | PATIENTS. | | Total. |
|---------------------------|------------|---------------|---------------|
| | In-door. | Out-door. | |
| Dholepur | ... | 11,933 | 11,933 |
| Rajakhera | ... | 5,729 | 5,729 |
| Bari | ... | 7,827 | 7,827 |
| Jail Dispensary | 307 | ... | 307 |
| TOTAL | 307 | 25,489 | 25,796 |

Vaccination is carried on in the State at an annual cost of R838-10-0. Of a total number of 7,293 cases, 6,632 proved successful.

COURTS.

45. The usual Civil, Judicial, and Criminal Returns received from the Durbar are enclosed. It appears that out of a total number of 1,374 Criminal cases brought before the Criminal Courts of the Dholepur State, of which 47 were pending from last year, 1,301 cases have been disposed of during the year under notice, leaving 73 pending settlement at the close of the year. On the Civil side, 471 cases have been disposed of during the year out of a total number of 551 cases instituted and brought before the Civil Courts, leaving 80 for disposal at the end of the year.

During the year 1,042 Revenue cases were brought before the Revenue Courts for disposal, including 207 remaining from last year. Of these 840 have been settled, leaving 202 still requiring settlement at close of the year.

JAIL.

46. The usual Jail Return received from the Durbar is enclosed. It will be seen that 5 persons were sentenced to imprisonment for life during the year, 2 to imprisonment for 14 years, 1 to 12 years and 5 to 8 years. No information is given as to the number of deaths among the prisoners in the jail during the year.

The general management of the jail is very bad. The prisoners are not employed in any way whatever, and sit idle in the jail from year's end to year's end, and I have repeatedly called the notice of the Durbar to the necessity of reform in this respect.

GOVERNMENT LOAN.

47. The yearly instalment of R1,20,000 due by the State for the year 1885-86 has been paid, leaving a balance of R53,000 still due to Government.

FINANCE.

48. The enclosed returns marked Statement W give in full the estimated assets and liabilities of the State made up to the end of the year, and which shows a total indebtedness of R14,15,271-3-1. Detailed reports on this subject have from time to time been submitted to the Rajputana Agency.

The accompanying statement, marked X, exhibits the Budget Estimate of the receipts and expenditure of the State for the current year. This statement, however, must be regarded as merely of a nominal character. The financial circumstances of the Dholepur State render it impossible that for the present the administration should be carried on in accordance with the provisions of the Budget as set forth in the accompanying statement.

STATE QUARRIES.

49. The accompanying memorandum and enclosures,* received from Mr. C. E. Housden, Executive Engineer, Dholepur, show the financial condition of the Dholepur State quarries on the 31st March 1886.

50. Mr. C. E. Housden relieved Mr. Gahan, Executive Engineer, Dholepur State, on the afternoon of the 5th April 1886.

PUBLIC WORKS DEPARTMENT.

51. A memorandum drawn up by Mr. Housden, Executive Engineer, Dholepur, on the Public Works Department of the Dholepur State, is attached in original to this report.*

MISCELLANEOUS.

52. In December 1885, His Highness the Maharaj Rana was honored by receiving at his capital, Lord and Lady Dufferin, who, accompanied by a large party, halted at Dholepur for a few hours while returning from Gwalior *en route* to Lucknow.

His Highness the Maharaj Rana was present at Delhi in January 1886, on the occasion of the Imperial manœuvres held there.

* Not printed.

STATEMENT A.

Annual Statement of Temperature and Rainfall at Bhurtpur for the year 1885-86.

| MONTHS. | | TEMPERATURE. | | | RAINFALL. | |
|-----------|------|--------------|----------|-------|-----------|--------|
| | | Maximum. | Minimum. | Mean. | Inches. | Cents. |
| April | 1885 | 94.76 | 85.06 | 89.91 | .. | 5 |

APPENDIX VI.

HARAO TI AND TONK AGENCY REPORT FOR 1885-86.

No. 20-P, dated Deoli, the 14th July 1886.

From—LIEUTENANT-COLONEL J. BIDDULPH, *Political Agent, Harao ti and Tonk,*
To—*The First Assistant Agent, Governor-General, Rajputana.*

I have the honor to submit the Annual Administration Report on the States of the Harao ti and Tonk Agency for the year 1885-86.

2. Lieutenant-Colonel W. J. W. Muir held charge of the Agency for the entire year, but though I assumed office on the 1st April 1886, it was not till the 27th idem that Lieutenant-Colonel Muir proceeded on furlough, having remained at Tonk to complete work connected with the *Tonk Gazetteer*. During the whole of the year under report, Lieutenant-Colonel Muir resided at Tonk with the exception of brief visits to Deoli, Bundi, and Shahpura.

HEALTH.

3. The health of the district during the year was far from good. Early in May cholera of an epidemic character broke out in Tonk, an account of which will be found elsewhere. A few days later the disease showed itself almost simultaneously in the Deoli Agency Lines and in Shahpura and Bundi, but in neither of these places, except perhaps in Bundi, did it last for any length of time. In the end of July the disease re-appeared at Tonk and was confined chiefly to the city. An isolated fatal case, however, occurred in the Agency Camp, the victim being Jemadar Gopal Singh of the Deoli Irregular Force, then on escort duty at Tonk. Only nine cases of cholera occurred in the Deoli Agency Lines, resulting in five deaths. Soon after the subsidence of cholera, fever occurred and continued for some two months. The only report of deaths from this cause have been received from Tonk. In February, March, and April small-pox prevailed everywhere.

RAINFALL AND CROPS.

4. The rainfall of the year was as follows:—

| Months. | | Deoli. | | Tonk. | | Shahpura. | |
|-----------|------|--------|------|-------|------|-----------|------|

| TOTAL | | 36 | 39 | 41 | 08 | 21 | 24 |

5. Seed was put in with the first good fall in the latter end of June and beginning of July. At first the crops progressed favorably and gave promise of an excellent harvest, but the heavy falls in August, and the absence of sunshine injured Indian corn and jowar to some extent, such of the former as was on low ground being altogether lost. The scanty fall in September, and the almost total absence of rain in October, not only further damaged Indian-corn and jowar, but retarded rabi sowings, and prevented the whole amount of land

usually cultivated being brought under the plough. In February, gram and cotton, and such of the wheat as was sown on unirrigated land, were affected by frost, and, subsequently, opium by cloudy weather. The average outturn of the kharif crops throughout the Agency was estimated as follows:—Indian-corn 10-annas; jowar and cotton 9-annas, and til, orudh, and mung 11-annas in the rupee, while that of the rabi was, wheat and barley 12-annas, gram 9-annas, and opium 10 annas in the rupee.

6. The grass crop was everywhere an average one.

7. The prices of food-grain throughout the year are given in Statement A.

MINA KHERAR.

8. The number of births and deaths in Mina Kherar during the year as reported may be thus summarized:—

| Districts. | BIRTHS. | | DEATHS. | |
|------------------|---------|--------|---------|--------|
| | Boys. | Girls. | Boys. | Girls. |
| Meywar | 68 | 57 | 19 | 33 |
| Jaipur | 18 | 16 | 1 | 4 |
| Bundi | 19 | 18 | 2 | 5 |
| TOTAL | 105 | 91 | 22 | 42 |

On the 6th April a dakaiti was committed near the Jaipur Kherar village of Panwar, about 5 miles east of Deoli, in which cash and property, amounting to R400, was carried off. The case was tried in the Haraoti International Court of Vakils, and is now under appeal in the Upper Court in Abu.

9. During the year the Minas of the Deoli Irregular Force preferred, through two of their senior officers and their commandant, two requests, *viz.*, that pensioners who have served Government for upwards of 20 years may be exempted from roll-call, and that the rule under which they are bound to report pregnancies of their wives may be withdrawn. In the first request all three states of Bundi, Meywar, and Jaipur expressed their concurrence, and the privilege was accordingly granted. With regard to the second request the existing rule was modified, though not altogether abrogated.

INTERNATIONAL COURT.

10. The working of the International Court of Vakils is shown in Tables I and II in Statement B.

DEOLI CIVIL DISPENSARY.

11. Ninety-three in-patients and 2,501 out-patients were treated during the year.

12. Six hundred and sixty-seven vaccinations were performed in the station and the immediate neighbourhood, of which 42 were unsuccessful.

BUNDI.

13. No event of special importance has occurred during the year under review. The Maharao Raja continues to enjoy good health. Since the close of the year the Senior Maharani, who belonged to the Nagode family, has died. On the occasion of the Maharaja of Kishengarh lately passing through Bundi to Kotah, Jowan Sing, the Maharaja's brother, betrothed his daughter in marriage to the Heir Apparent.

STATE ADMINISTRATION.

14. The Administration of the State during the year calls for little remark. Owing to the early cessation of the rains a six-anna loss in the rupee was caused to the kharif harvest. A nearly equal loss was suffered by the rabi crops. In some of the more valuable crops, such as sugar and opium, the loss was estimated at one-half.

15. A lithographic press has been established for State purposes, and will no doubt be further developed as its use comes to be appreciated.

CRIME.

16. No dakaities were reported during the year, but there have been several complaints of petty theft committed on travellers owing to the want of good sarai arrangements. Attention is now being paid to this defect and several new sarais are to be constructed.

HEALTH.

17. The general health has been good, with the exception of an epidemic of cholera that visited the State in June, from which 169 persons died out of 205 attacked. The greater number of deaths occurred in the town of Bundi.

JAIL.

18. The average number of prisoners during the year was 107; five deaths occurred among them; to judge by the number treated in the dispensary their health is not yet as good as it should be. The garden attached to the Jail is now better cared for than it was.

DISPENSARY.

19. The dispensary work has been carried on at a cost to the State of ₹2,289-11-3.

Statement of Patients treated during the year.

| PARTICULARS. | Male. | Female. | TOTAL. |
|-------------------------------------|-------|---------|--------|
| In-patients | 2,490 | 387 | 2,877 |
| Out-patients | 1,243 | 418 | 1,661 |
| Jail and Kotwali patients | 1,803 | 377 | 2,180 |

Thirty-three boys and one hundred and nineteen girls were vaccinated during the year.

EDUCATION.

20. The total number of scholars in the State is shown in the following table. Only 13 of these learn English.

| SCHOOL. | Number of Scholars. |
|---------------------|---------------------|
| Bundi | 215 |
| Nayagaon | 21 |
| Hindoli | 22 |
| Dablana | 20 |
| Gotra | 35 |
| Ghar | 35 |
| Naenwa | 52 |
| Dehi | 25 |
| Karwar | 19 |
| Gaindowli | 27 |
| Patan | 48 |
| Kericha | 25 |
| TOTAL | 544 |

PUBLIC WORKS.

21. The causeway over the Mej Nadi is well advanced towards completion; ₹3,900 have already been spent on the work; the total cost is estimated at ₹5,415. The causeway over the Ghora Pichar is also under construction under the immediate supervision of Mr. Miles of Kotah; the total cost is estimated at ₹3,000. The Mej Nadi work will be completed before the monsoon sets in.

BOUNDARY CASES.

22. The boundary dispute between Bishenpura of Bundi and Parla of Tonk has been settled by mutual agreement. The following disputes have also been settled by Captain A.M. Muir:—

1. Bishenpura (Bundi) *versus* Kanwarpara (Indargarh).
2. Sripura (Bundi) *versus* Hanotia (Tonk).
3. Sunsa (Bundi) *versus* Rohet (Tonk).

A case between Bishenpura and Bakhla of Balwan in Kotah was also settled by agreement in presence of that officer.

A commencement has been made by Muhtamids from both States towards the demarcation of the 70 miles of boundary between Bundi and Meywar, but the work proceeds very slowly.

THE KAPRAN CHIEF.

23. The Maharaja of Kapran, the settlement of whose case with the Durbar was reported last year, has died during the year. His brother, Bir Sing, was seated on the Gadi by the Ma-

harao Raja in person. The customary succession duty "Matam pursi-ka dastoor" was remitted by the Durbar, in spite of which the new Chief is said to be disposed to show a spirit of disobedience to the Durbar.

CUSTOMS.

24. The following additional changes have been made in the tariff since the publication of last year's report. *Linsced, Opium seed, and Til*, which were formerly liable to a transit duty of one anna per maund are now subjected to a uniform duty of three annas per maund, either for export, import, or transit.

Silk, which formerly paid duty by weight at the rate of ₹6 per maund for import, and ₹2 per maund for transit, is now charged an *ad-valorem* duty of one anna in the rupee.

Gota Kinari, or gold lace, which formerly paid duty by weight at the rate of ₹6 per maund for import, and ₹3 per maund for transit, is now only liable to an *ad-valorem* duty of three pies per rupee for import.

Kesur, or saffron, now pays the same duty as *Gota Kanari*, instead of as formerly ₹1-4-0 per maund for import and eight annas per maund for transit.

Goats, which were originally exempt from all duties, are now subjected to a charge of three pies per head.

SALT.

25. No complaints have been made during the year of the illicit manufacture of Khari.

TONK.

26. No event of special importance occurred during the year. The health of His Highness the Nawab is good. During the year his family was increased by the birth of three sons and two daughters, and two sons died of small-pox. The total number is now six sons and eleven daughters. Lieutenant-Colonel Muir resided at Tonk during the whole of the year under review.

27. The financial difficulties in which the State is at present involved made it expedient that His Highness should not undergo the heavy expense of attending on the Viceroy on the occasion of His Excellency's visit to Ajmere in November last. In his place a deputation, consisting of Sahibzada Obeidulla Khan, C.S.I., Ahmed Yar Khan, and Mahomed Sadik Khan, attended on His Excellency at Ajmere as representatives of the Nawab and the Tonk State.

GENERAL HEALTH.

28. The general health of the people was moderate during the year; the city of Tonk suffered twice during the year, *viz.* from 4th May to 29th June, and again from 1st to 31st August from cholera epidemics. The Parganas of Nimbahera and Parawa also suffered from the scourge. A considerable number of deaths took place from fever and small-pox as shown in the following table:—

Deaths reported.

| Pargana. | Cholera. | Fever. | Small-pox. | Other diseases. |
|---------------------|----------|--------|------------|-----------------|
| Tonk | 947 | 438 | 259 | 843 |
| Aligarh | .. | 264 | 92 | 49 |
| Nimbahera | 509 | 314 | 255 | 857 |
| Sironj | .. | 558 | 113 | 604 |
| Pirawa | 467 | 634 | 176 | 247 |
| Chapra | 196 | 253 | 8 | 228 |
| TOTAL | 2,119 | 2,461 | 933 | 2,828 |

Of those attacked with cholera in Tonk, only 318 recovered. Detailed statistics of the number of cases in other Parganas are not forthcoming.

29. A considerable advance has been made towards establishing a regular system of conservancy in Tonk, in spite of opposition on the part of the townspeople. A special octroi tax has been instituted which is expected to yield annually about ₹5,700 for purposes of sanitation.

RAINFALL AND CROPS.

30. The rainfall was irregular, and both the kharif and rabi crops suffered. The wheat harvest, however, in Chapra and Parawa were above the average.

Though a considerable quantity of new land is reported to have been taken into cultivation during the year, I regret to have to notice a decrease in the agricultural population in five out of the six Parganas—

| Parganas. | Land taken up, bighas. | Immigrated | New ploughs. | Emigrants left the State. |
|---------------------|------------------------|------------|--------------|---------------------------|
| Tonk | 12,914 | 16 | 43 | 25 |
| Aligarh | 9,020 | 162 | 81 | ... |
| Nimbahera | 1,627 | ... | 79 | 111 |
| Sironj | 1,626 | 66 | 90 | 121 |
| Parawa | ... | 3 | ... | 4 |
| Chapra | 212 | 18 | 13 | 33 |

BOUNDARY DISPUTES.

31. During the cold season Captain A. M. Muir was appointed for the settlement of boundary disputes on the Tonk border, and sixteen cases, eight of them by mutual consent, were finally disposed of in the Parganas of Tonk and Aligarh, with the States of Jaipur, Kota, Bundi, and Indargarh. The case mentioned in last year's report between the Tonk villages of Parla and Bansla, and the village of Bishenpura in Bundi, has been settled by mutual consent without the intervention of a Boundary Officer. The case in Sironj in which Captain Masters' decision was appealed against, as mentioned in last year's report, has not yet been decided. In Nimbahera 30 disputes between Tonk and Meywar were disposed of by Major Wilson. A very small number of cases now remains for settlement.

EXCHANGE OF VILLAGES.

32. Negotiations are going on for an exchange of the village of Chandri in Sironj with a village in Maksudangarh.

JUDICIAL.

33. During the year a draft Code, on the lines of the Indian Civil Procedure Code, has been prepared by Mahomed Nujuff Khan, late Extra Assistant Commissioner of the Punjab. Hitherto there has been no fixed rules for the registration of documents or for the procedure of the Courts in any way. Nujuff Khan's enquiries have elicited the fact that 1,125 Civil and Criminal cases have been pending in the outlying Parganas, some of them for upwards of 23 years, without having been brought on the Registers and reported at the capital. No limitation of time exists within which Civil suits may be entertained. The Durbar yet has not given effect to the proposals, being of opinion that "however beneficial and estimable provisions of any law based on the most enlightened, liberal, and equitable principles may be, yet its introduction into an administration or enforcement on a people unacquainted with any other fixed law save that of equity and good conscience, must necessarily rouse their susceptibilities and probably raise disaffection."

34. Nujuff Khan has also prepared a scheme for the revision of the Judicial Establishments, which are at present greatly over-manned. One of the most important changes proposed is that of establishing Munsiff's Courts in the outlying Parganas, and relieving the Amils of the duty of hearing Civil suits. There can be no doubt of the urgent necessity of this change. The adoption of Nujuff Khan's proposals cannot fail to effect great improvements in the administration of justice in addition to economising expenditure.

CRIME.

35. No dakanities or cases of serious crime have been reported during the year.

JAIL.

36. The new jail is still unfinished, though some progress has been made towards completion. The sum of ₹ 15,550 has been expended on it during the year. The number of prisoners in jail at the close of the year was as follows:—

| | |
|--------------------------|-----|
| Life prisoners | 20 |
| Shorter terms | 43 |
| Under trial | 36 |
| | — |
| TOTAL | 100 |
| | — |

HOSPITAL AND DISPENSARY.

37. This has been working well. During the year 310 in-door patients and 13,480 out-door patients have been treated at an expense to the State of ₹ 2,784; less distrust is now being shown to vaccination, and 1,850 operations have been reported.

38. The Sironj Dispensary has been placed under the supervision of the Civil Surgeon of Sehore.

39. In connection with the Countess of Dufferin's Fund to which His Highness subscribed, a local school for the training of female nurses has been founded. It is intended to complete the training, at the Thomason Hospital at Agra, of all those who show promise of becoming skilled nurses in their preliminary training.

EDUCATION.

40. Under Syud Rachid-ud-din the cause of education in Tonk is prospering. As mentioned in last year's report the two private schools for girls have been taken charge of by the State, and during the past year two additional schools for girls have been opened, and show a good average attendance. The average daily attendance of the boy's schools has also increased. A special class in the High School for the sons of Sahibzadas is also well attended—

| On Report. | 1884-85. | | 1895-86. | |
|------------------------------------|----------|--------|----------|--------|
| | Boys. | Girls. | Boys. | Girls. |
| Mahomedans | 216 | 30 | 238 | 100 |
| Hindus | 332 | ... | 334 | ... |
| Christians | 2 | ... | 3 | ... |
| Average daily attendance | 310 | 23 | 334 | 85 |

Two boys were sent at the expense of the State to be examined at Ajmir for the North-Western Provinces and Oudh Anglo-Vernacular Middle Class; the result is as yet unknown.

Eleven sons of Nobles are now at the Mayo College, including the Heir Apparent, who is reported to be making progress.

PUBLIC WORKS.

41. The sum of ₹ 53,061 has been spent on Public Works during the year. Of this ₹ 2,300 was furnished by the Nawab's private purse; ₹ 33,182 were spent under the regular estimates, and the remainder, ₹ 17,577, is shown under the head of State and Personal expenses.

The following are the works executed:—

| <i>Regular Estimates.</i> | | R | |
|---|--|--------|--------|
| New Jail | | 15,550 | |
| Political Agent's Bungalow, alterations | | 4,553 | |
| Dak Bungalow, built | | 3,056 | |
| Dispensary, repairs | | 198 | |
| School " | | 268 | |
| Saperintendent of Work-house repairs | | 225 | |
| Bandmaster's house repairs | | 84 | |
| Old Jail, repairs | | 21 | |
| Munshi Khana, repairs | | 152 | |
| Miscellaneous " | | 104 | |
| City Road | | 1,501 | |
| Jaipur " | | 1,183 | |
| New Kucha Road | | 86 | |
| Miscellaneous " | | 2,805 | |
| Establishments | | 3,396 | 33,182 |
| <i>State and Personal Expenses.</i> | | | |
| Musjid | | 1,300 | |
| Chaudlai Bund | | 4,802 | |
| Government Buildings in Chapra | | 75 | |
| Repairing Bund in ditto | | 1,000 | |
| Government buildings in Parawa | | 100 | |
| Ditto ditto in Nimbahera | | 100 | |
| Ditto ditto in Sironj | | 100 | |
| Baradari and repairs to stable | | 10,100 | 17,577 |
| <i>Nawab's Private Purse.</i> | | | |
| New road in Tonk | | 2,300 | 2,300 |
| TOTAL | | ... | 53,059 |

CUSTOMS.

42. The existence of malpractices in the collection of customs having come to the knowledge of the Darbar, an enquiry is now being held. Misappropriations on a large scale have already come to light.

ARMY AND POLICE.

43. No changes have taken place in the strength of the forces maintained during the year.

| Number. | DESCRIPTION OF FORCE. | Where stationed. | TOTAL STRENGTH AND COST. | | | | | | REMARKS. |
|-------------|-----------------------|------------------|--------------------------|---------|-----------|----------|---------|----------|--|
| | | | CAVALRY. | | INFANTRY. | | TOTAL. | | |
| | | | Number. | Salary. | Number. | Salary. | Number. | Salary. | |
| 1 | Military | Sadr | 306 | 60,132 | 1,749 | 1,16,910 | 2,055 | 1,77,042 | * These Sowars being charged to the Jagirdars and Mnafidars, their salary is not shown here. |
| | | Parganas | 131 | 22,092 | 126 | 5,298 | 257 | 27,390 | |
| | | TOTAL | 437 | 82,224 | 1,875 | 1,22,208 | 2,312 | 2,04,432 | |
| 2 | Toshakhana | Nizamia | 54* | ... | 761 | 33,321 | 815 | 33,321 | |
| | | Police | ... | ... | 222 | 11,478 | 222 | 11,478 | |
| | | TOTAL | 54 | ... | 983 | 44,799 | 1,037 | 44,799 | |
| GRAND TOTAL | | | 491 | 82,224 | 2,858 | 1,67,007 | 3,349 | 2,49,231 | |

NIMBAHERA.

44. Numerous complaints of a serious nature having been made against the Amil Sahibzada Mahmud Khan, he was removed from his post, and Captan Saadat Ali Khan was transferred from Parawa in his place. Subsequent investigation has shown that the complaints were well-founded.

FINANCES.

45. The Financial position of the State has not improved since the submission of last year's report. The ordinary expenditure for the year Fasli 1292 gave a net surplus of Rs18,286. This was, however, swallowed up in the transactions with the bankers, and a further sum of Rs13,035 was borrowed. The accounts for Fasli 1293 (year ending 12th June 1886) will, I fear, show no improvement. The original estimates were arranged so as to allow a surplus of Rs48,000. These were afterwards revised under Lieutenant-Colonel Muir's advice so as to yield a surplus of Rs6,003 after allowing Rs2,54,784 for the payment of interest and liquidation of some portion of the existing debts. These anticipations have not been realised, and though the accounts have not yet been made up, sufficient can be gathered to show that, instead of a surplus, there must be a deficit of nearly 1½ lakhs, which is assigned to three causes, diminution of income, revenue uncollected, and excess of expenditure. The items are shown as follows:—

| PARGANA. | Diminution of Income. | Revenue in arrears. | Total. | REMARKS. |
|--------------------|-----------------------|---------------------|----------|----------|
| Tonk | 22,630 | 2,370 | 25,000 | |
| Aligarh | 8,000 | 2,000 | 10,000 | |
| Chapra | 9,000 | 6,000 | 15,000 | |
| Sironj | 10,000 | 5,000 | 15,000 | |
| Nimbahera | 20,000 | 20,000 | 40,000 | |
| Parawa | 7,500 | 7,500 | 15,000 | |
| TOTAL | 77,130 | 42,870 | 1,20,000 | |
| Transfer of Hundi | 5,000 | ... | 5,000 | |
| Excess expenditure | ... | ... | 22,486 | |
| GRAND TOTAL | 82,130 | 42,870 | 1,47,486 | |

Of this the arrears of revenue will, it is hoped, be recovered.

In Statement C is given a table showing accounts for the past seven years, together with estimates for Fasil 1292 and 1293.

46. The debts, with interest calculated to 14th August 1886, are as follows:—

| <i>Debts bearing interest.</i> | | R |
|---|------------------|---|
| To Bankers | 11,19,223 | |
| Deficit of year just closed | 1,05,000 | |
| | 12,24,223 | |
| <i>Not bearing interest.</i> | | |
| Miscellaneous | 24,791 | |
| Old State debts previous to accession | 3,69,451 | |
| | 3,94,242 | |
| TOTAL | 16,18,465 | |

To reduce this, a sum variously stated at R2,54,784, R2,19,000, and R2,14,784 will, it is hoped, be available when the year's accounts are made up.

On 28th March last His Highness the Nawab addressed a Kharita to the Agent to the Governor-General, stating his inability to extricate the State from debt so long as the rate of interest he pays to the bankers is so high. In addition to this difficulty, he feels the desirability of taking the management of the State finances out of the hands of the three banking firms who are the principal creditors of the State, and who at present act as joint receivers of the whole revenue. To enable him to overcome these and other hindrances to the establishment of a sound financial system, he solicited from the Government of India a loan of 12½ lakhs at a low rate of interest, to be paid off in instalments, spread over a period of eleven years. The answer is still awaited.

FAMILY JAGIRS AND CASH ALLOWANCES.

47. Among other measures under consideration, His Highness the Nawab has become aware of the necessity of revising the grants of jagirs and cash allowances, made by himself with too great liberality, not to say carelessness, since his accession. The principal recipients have been members of his own family. So carelessly have these favors been bestowed that there is good reason to suppose that the actual value of these jagirs is much greater than what they were rated at when granted. Another evil attending these grants has been, that they have been principally taken in the Tonk and Aligarh Parganas, which should naturally have been reserved for the Nawab's own administration, instead of being granted in the outlying Parganas. To such an extent has this occurred, that now, out of 235 villages in Tonk and 78 in Aligarh, 135 and 38 have been alienated from the State in the two Parganas respectively. The policy of former Nawab's was to give cash allowances in preference to jagirs, and there can be no doubt of the disastrous consequence to the State of the departure made by the present Nawab from this policy. His Highness' present resolution to return as far as possible to the system of cash allowances, and to bestow jagirs only in the outlying Parganas cannot fail to be beneficial to the State, though much opposition to the change may be expected.

The table given in Statement D shows the amount of jagirs, maafi lands, and cash allowances now alienated from the State.

SHAH PURA.

48. The affairs of this Chiefship have been satisfactorily carried on during the year. The Chief and his family have enjoyed good health. In April 1885 the Raja Dhiraj paid a visit to Kishengarh. On the journey he made acquaintance with the Raja of Rutham, who travelled in the same train with him to Ajmere. In October he paid a visit to the Rao Raja of Oniara, and in November he attended at Ajmere to meet His Excellency the Viceroy on his visit to that place; on the 6th November he was received by the Viceroy in private Darbar.

49. In December occurred, after protracted illness, the death of Mrs. Floyd who was engaged in the education of the Chief's eldest son. Miss Floyd has also left the State.

50. The Kamdar Ram Jiwan continues to work satisfactorily.

RAINFALL AND CROPS.

51. The rains fell irregularly as in other parts of Rajputana. In July a specially heavy fall caused the bursting of 15 tanks. The failure of the rain in September resulted in a poor outturn for all the kharif crops, and limited sowings for the rabi. Blight affected the wheat

in January. Altogether both harvests were considerably below the average. Over 7,000 bighas of land hitherto uncultivated were, however, brought under plough, by which a permanent increase to the revenue of nearly R9,000 is expected.

HEALTH.

52. In April and May there were severe visitations of cholera and small-pox, from which the following deaths occurred :—

| DISEASE. | Cases. | Deaths. |
|---------------------|--------|---------|
| Cholera | 195 | 62 |
| Small-pox | 325 | 117 |

With this exception the general health has been good.

DISPENSARY.

53. Twenty-eight thousand, seven hundred and eighteen patients were treated at the dispensary during the year, showing an average daily attendance of—

| | |
|---------------------------|-------|
| In-door Patients. | 6'58 |
| Out-door „ | 69'50 |
| Jnil. | 2'60 |

54. The vaccination operations amounted to 890 during the year, of which only 50 were unsuccessful.

JAIL.

55. The following table shows the number of prisoners during the year :—

| TERM OF IMPRISONMENT. | In prison on 1st April 1885. | In prison during year. | Released during year. | In prison on 31st March 1886. |
|------------------------------|------------------------------|------------------------|-----------------------|-------------------------------|
| Life. | 1 | ... | ... | 1 |
| From 5 to 14 years | 2 | 1 | ... | 3 |
| From 1 to 5 years | 16 | 1 | 10 | 7 |
| One year | 13 | 6 | 13 | 6 |
| Less than one year | 19 | 67 | 75 | 11 |
| TOTAL | 51 | 75 | 98 | 28 |

No cases of cholera or small-pox occurred in the Jail.

CRIME AND POLICE.

56. No cases of Thagi or Dakaiti occurred during the year, and there was a general diminution of petty crime. A portion of the property stolen from some Bhilwara Mahajans near Karmarawas in 1883, and which the Raj had to make good, was recovered, and one of the offenders arrested and convicted.

JUDICIAL.

57. The following tables show the work done by the Civil Courts during the year :—

Civil Courts, Original Jurisdiction.

| ORIGINAL SUITS. | Pending on 1st April 1885. | Instituted during the year. | Pending on 31st March 1886. |
|---------------------------------|----------------------------|-----------------------------|-----------------------------|
| Over R 1,000 in value | 4 | 1 | 4 |
| From R 500 to R 1,000 | 4 | 1 | 4 |
| From R 100 to R 500 | 36 | 50 | 43 |
| Below R 100 | 341 | 507 | 322 |
| TOTAL | 385 | 649 | 373 |

Civil Appellate Court.

| DESCRIPTION. | Pending on 1st April 1885. | Instituted during the year. | DISPOSAL. | | | Pending on 31st March 1886. |
|------------------------------|----------------------------|-----------------------------|-----------|-----------|-----------|-----------------------------|
| | | | Upheld. | Modified. | Reversed. | |
| Appeals | 11 | 10 | 4 | 4 | 7 | 6 |

| TOTAL | 38 | 14 | 8 | 4 | 21 | 19 |

Lower Criminal Court.

58. Cases tried during the year—

| CRIME. | Pending on 1st April 1885. | Instituted during the year. | Disposed of. | Pending on 31st March 1886. |
|------------------------------|----------------------------|-----------------------------|--------------|-----------------------------|
| Theft | 8 | 121 | 109 | 15 |
| Robbery | ... | 5 | 5 | ... |
| Grievous hurt | ... | 3 | 3 | ... |
| Causing abortion | 1 | 4 | 5 | ... |
| Suicide | 1 | 12 | 12 | 1 |
| Attempting suicide | 2 | 17 | 18 | 1 |
| Miscellaneous | 60 | 439 | 452 | 47 |
| TOTAL | 67 | 601 | 604 | 64 |

59.

Mahakma Khas Court.

| DESCRIPTION. | Pending on 1st April 1885. | Instituted during the year. | Decided during the year. | Pending on 31st March 1886. |
|--------------------------------|----------------------------|-----------------------------|--------------------------|-----------------------------|
| Revenue | 114 | 373 | 359 | 98 |
| Criminal (Original) | 12 | 54 | 51 | 15 |
| Criminal (Appeals) | 2 | 52 | 53 | 1 |
| Civil (Original) | ... | 3 | 1 | 2 |
| Civil (Appeals) | 1 | 3 | 3 | 1 |
| Objection cases | ... | 3 | 3 | ... |
| Review of judgment | 4 | 2 | 4 | 2 |
| Execution of decrees | 1 | 10 | 5 | 6 |
| Unclaimed property | ... | 8 | 7 | 1 |
| TOTAL | 134 | 508 | 516 | 126 |

This Court is presided over by the Raja Dhiraj. All appeals from Lower Civil and Criminal Courts lie to this Court. On the original side it disposes of all Revenue Cases, all Civil Suits of more than ₹ 3,000, and all Criminal Cases for which punishments of imprisonment for over 3 years, or fine above ₹ 500 are prescribed in the Indian Penal Code.

EDUCATION.

60. A new school was opened at Sangaria in September, and the older schools are all reported to be doing well. Fojmal Mehta, the new Head Master of the Shahpura School, gives satisfaction. There is altogether more attention paid to education in the State than was the case four years ago.

BOUNDARY DISPUTES.

61. The Panchayat appointed in 1884 to settle internal boundary disputes continues its work. Delay has, however, been caused by the death of one of its members, who has not yet been replaced. Two cases have been decided, and six now remain for settlement. Of the six

boundary disputes with Meywar that have been in existence for many years, two have been settled by the Kamdar and the Hakim of Jehazpur in concert, *viz.*, Kothiyan *versus* Paroli, and Kothiyan *versus* Chaprer.

JAGIRDARS' DEBTS.

62. The Panchayat for the settlement of the Jagirdars' debts worked satisfactorily during the year. The debts of the Jagirdars' of Nimbhera, Kajoria, and Sarsunda have been arranged for, and if the instalments fixed are regularly paid, the debts will be liquidated in a few years. The debts of four Jagirdars' remain for settlement, *viz.*, Rani Khera, Amli, Santokpura, and Sarans.

ADMINISTRATIVE CHANGES.

63. The Sangaria Tahsil being found to be too large for efficient control, a new Tahsil has been formed out of Dhanope and Kanichan and its attached villages.

FINANCES.

64. Considerable inconvenience having been experienced from the financial year differing from the revenue year, it has now been assimilated to it. The following is the account of Revenue and Expenditure for the eleven months ending 26th July 1885, in Chittori Currency:—

| REVENUE. | Sambat 1910. | Sambat 1911. | EXPENDITURE. | Sambat 1910. | Sambat 1911. |
|------------------------------------|-----------------|-----------------|--|-----------------|-----------------|
| Treasury balance in hand | 44,552 | 22,201 | Tribute | 16,291 | 16,078 |
| Land Revenue | 1,28,759 | 1,46,723 | Personal and family expenses | 23,272 | 16,006 |
| Arrears | 9,799 | 20,752 | Stable and elephants | 18,025 | 23,620 |
| Customs | 18,938 | 17,125 | Grass | 3,531 | 4,396 |
| Abkari | 4,099 | 4,251 | Gardens | 3,975 | 1,893 |
| Jagirdars | 14,621 | 14,591 | Civil establishments | 22,301 | 19,116 |
| Patel and Patwari Cess | 3,212 | 3,336 | Troops and Police | 26,590 | 22,238 |
| Chowkidari Cess | 2,290 | 2,294 | Buildings and roads | 8,757 | 8,007 |
| Judicial | 13,570 | 11,190 | Tanks | 9,155 | 16,817 |
| Salt compensation | 5,004 | 5,013 | Jail | 2,068 | 1,263 |
| Miscellaneous | 19,050 | 12,796 | Education | 1,031 | 781 |
| | | | Dispensary | 2,066 | 1,524 |
| | | | Charity and pensions | 6,565 | 5,573 |
| | | | Grants | 3,074 | 1,916 |
| | | | Guests and festivals | 14,267 | 4,043 |
| | | | Furniture and ornaments | 11,419 | 4,375 |
| | | | Travelling | 4,265 | 8,500 |
| | | | Famine Insurance Fund | .. | 2,000 |
| | | | Miscellaneous | 31,173 | 14,159 |
| | | | Transferred to Khans | 33,818 | 26,434 |
| | | | Balance in Treasury | 22,201 | 61,408 |
| TOTAL | 2,63,894 | 2,60,247 | TOTAL | 2,63,894 | 2,60,247 |

65. A commencement has been made towards the formation of a Famine Insurance Fund.

PUBLIC WORKS.

66. The systematic repairing of old tanks and construction of new is being actively prosecuted. Eight new tanks have been commenced, and sixteen old ones repaired and improved during the present year, at a total cost of ₹22,065. In the year under review ₹16,817 were spent on this work. The expenditure on roads and buildings calls for no remark.

POST OFFICE.

67. A new Post Office was opened at Lamia in June 1885. A considerable saving in time for the delivery of letters has been effected, and the Raj has now to escort the mails 6 miles instead of 14.

MARBLE QUARRY.

68. A quarry of grey marble of good quality has been discovered during the last two months at Jharole, and is now being worked for State purposes.

Appendix VII. ULWAR AGENCY REPORT FOR 1885-86.

No. 3—267P, dated Ulwar, the 16th April 1886.

*From—LIEUTENANT-COLONEL H. P. PEACOCK, Political Agent, Ulwar,
To—The First Assistant Agent to the Governor-General for Rajputana.*

I have the honor to submit the Annual Report of the Ulwar Political Agency for the year 1885-86.

GENERAL REMARKS.

2. The notable events were as follows :—

- I.—In January last His Highness the Maharao Raja was created a Knight Grand Commander of the Most Exalted Order of the Star of India, an honor which His Highness profoundly appreciates, and one which has been hailed by one and all in the State with the greatest delight.
- II.—In November 1885 His Excellency the Viceroy and the Countess of Dufferin honored His Highness with a visit to his capital; when the Chief spared no trouble in endeavouring to afford their Excellencies a fitting and loyal reception.
- III.—His Highness proceeded to Ajmere to be present at the formal opening of the Mayo College by His Excellency Lord Dufferin.
- IV.—Their Excellencies Mr. and Mrs. Grant Duff, and Lord and Lady Reay visited Ulwar. Many other distinguished Europeans and Natives visited Ulwar, among whom may be mentioned Sir William Gregory, late Governor of Ceylon, and His Highness the Maharaja of Kishengur.
- V.—His Highness visited the Agent to the Governor-General for Rajputana at Abu.
- VI.—His Royal Highness the Duke of Connaught presented His Highness with a Colonel's sword, on which has been engraved a long inscription.

H. H. THE MAHARO RAJA.

3. His Highness has continued to hold his Court regularly, and during the year 300 Jagirs, Revenue, Civil, and Criminal, and 4,000 Miscellaneous files passed under His Highness' signature.

All difficult cases involving momentous issues and appeals were disposed of by His Highness in Tjlas-Kamil, in which were associated all the Members of Council and various Judicial Officers of the State. In addition to this, His Highness has continued to exercise close supervision over the other departments; and there is no branch of the administration with the working of which His Highness is not thoroughly acquainted.

COUNCIL.

4. There was no change in the Council. It continued to meet and transact business regularly under the very able guidance of the Dewan Lala Sri Ram, M.A., a man of great ability, of the highest possible character, and of marked devotion to any duties he may undertake.

The relations of the Durbar with the Jagirdars continue friendly as ever. Six Jagirdars died during the year, and successors to five of these have already been appointed. Two claimants contest the other Jagir, one a distant relative, supported by the wives of the late Jagirdar, and whose adoption was never accomplished, although wished for by the late Jagirdar; and the other a first and only cousin of the deceased.

JUDICIAL.

CIVIL.

5. (Statement A.)—The number of cases disposed of during the year was 4,893, involving R1,92,262, as against R3,301, involving R1,95,832, in the preceding year. Of these R3,209

were decided by the Civil Judge and 1,684 by Tahsildars. There were 110 appeals from the decision of the Civil Judge, and 80 from those of the Tahsildars.

The arrears in the Civil Court have been greatly reduced, and it is hoped that next year the file will be pretty clear.

Cases triable by Tahsildars were expeditiously decided. Decrees are readily executed, and the working of the Department has been, throughout the year, very satisfactory.

CRIMINAL.

(Statement B.)—The number of cases investigated was 4,456, involving 5,259 persons as against 4,422, involving 5,111 persons in the preceding year. Of the 5,259 persons brought to trial, 2,600 were convicted and punished as follows—

| | |
|-----------------------------------|--------------|
| Imprisoned | 352 |
| Fined | 1,545 |
| Whipped | 87 |
| Expelled from the State | 13 |
| Dismissed from service | 1 |
| To furnish security | 602 |
| TOTAL | 2,600 |

Sheikh Wajid Ali, whose appointment as Faujdar was mentioned in last year's report, has fully come up to the expectations formed of him.

Fewer robberies have taken place than in any year since 1872. The temptation caused by the custom of bedecking children with jewels has led to some heinous crimes. All but one of the perpetrators, however, have been brought to trial.

INFANTICIDE.

6. No cases of infanticide were reported during the year.

MAIL ROBBERIES.

7. There were no mail robberies during the year.

DAKAITIES.

8. No dakaities in the Ulwar State were reported during the year. By the vigilance of the Ulwar authorities a case of Thagi by the administration of deleterious drugs was detected. The culprit, a resident of Khandela, Jaipur, was apprehended and sentenced by the Ulwar Durbar to life imprisonment. The Durbar, with great good sense, rewarded the apprehenders. Full particulars of this case will be found in my report on the working of the Eastern Rajputana Thagi and Dakaiti Agency.

EXTRADITION.

9. Extradition relations with Bhurtpur and Jaipur are still unsatisfactory, but with other territories bordering on Ulwar, the relations are all that could be wished.

RAILWAY JURISDICTION.

10. Three criminal cases involving five persons were tried:—

2 of theft.

1 of abetment of theft.

The offenders in each of the three cases were sentenced to imprisonment varying from 12 months to 3 years. Four of these were habitual offenders.

BOUNDARY AND OTHER DISPUTES.

11. The Bhurtpur and Ulwar dispute regarding the irrigation of four Ulwar villages has at last been settled by a territorial exchange sanctioned by Government.

EDUCATION.

12. (Statement C.) The number of schools, male and female, remained the same as in the preceding year, viz., 100 for boys and 14 for girls. It is considered that the number of schools for boys is sufficiently large to supply all the present educational wants of the people. Greater stress was therefore laid upon an increase of efficiency and the better working of the existing institutions. With this object Lala King Behari Lall, Head Master of the High School, was appointed Director of Education, and during the year he has inspected nearly every school in

the State, and has shown great zeal in his work. Mr. George Heatherly has hitherto held the appointment of Director of Education with much ability; but it was found that, in addition to his duties as gaoler, he was not able to give that attention to education inspection which the educational progress in this State now requires. The Durbar have marked their sense of Mr. Heatherly's services by giving him a special pension.

Lala Shamjas Rai, B.A., Head Master of the Thakur School, succeeded Lala King Behari Lall, as Head Master of the High School.

The tabular statements appended will speak for themselves.

His Highness personally takes great interest in the education of his people, and has formed a class at his palace in which his own son and nine children of nobles are being educated. Pandit Chuni Lall, one of the best Educational Officers in the State, is in charge of this class.

His Highness has passed orders for good school buildings to be constructed for all the higher schools in the State.

Two, out of six students, who were sent up from Ulwar, passed the Calcutta University Entrance Examination; and four, out of six students, passed the Munshi examination of the Punjab University. Of the two students who were sent to the Lahore Veterinary College, one obtained a diploma in 1885, and the other is still prosecuting his studies.

MAYO COLLEGE.

There were six Ulwar boys at this College during the year, and the report of their progress and conduct is satisfactory.

His Highness has intimated his intention of giving ₹50 annually for the purchase of books for prizes.

His Highness has also given an additional ₹2,000 for the construction of the Ulwar gateway at the College, for which purpose he has already given ₹10,000.

PUBLIC WORKS.

13. The total expenditure on Public Works was ₹2,26,190, against ₹2,03,245 of last year.

The Ramgurbh-Ferozpur road has been finished to the Ulwar border, and it is hoped the British portion of the road will soon be completed. The Umran-Thanaghazi road is being pushed on. Roads are kept in good repair, and great attention is paid to tree-planting along them.

The Ferney and Bara Darri have been completed.

Full particulars of the year's work will be found in the report to the Secretary to the Agent, Governor-General, in the Public Works Department.

SANITATION.

14. Great attention is paid to sanitation; the rules promulgated by the Agent to the Governor-General some four years ago, were printed and freely distributed to Patwaris and Lambardars. The result has been most successful. A translation of Dr. Cunningham's Sanitary Primer has been introduced into all the schools in the State, and a sanitary catechism, written in a very popular style, has been compiled under the auspices of His Highness.

MUNICIPALITIES.

15. Octroi is levied in eight towns, six of which have their Municipalities. The income from this source in most of the towns barely suffices for the maintenance of chowkidars. In Ulwar, Rajgarh, and Tijara, however, there is a surplus, which is expended in lighting and paving streets; in the construction of wells for drinking purposes, and in all other reforms calculated to give increased convenience to the inhabitants and to improve the appearance of the Town. The members of the Municipalities are nominated by the Durbar, and render valuable assistance in carrying out the duties entrusted to them.

ARMY.

16. The total expenditure on the Army was ₹5,32,335, or ₹16,034 less than that of the preceding year.

The Fateh Pultan and the two Body Guard risalas are the only troops well equipped.

During the year the Government of India was pleased to permit the issue of 800 smooth-bore muskets* for His Highness' Infantry, to replace old muskets with which they were armed some 30 or 40 years

* Enfield Pattern.

HARVESTS, &c.

17. The Rabi of 1885 was exceptionally good.

The Kharif of 1885, owing to the heavy rains late in the season was not up to the average, and had it not been for the cotton crop, the Zamindars would have suffered.

One hundred and eleven new wells were constructed, making up the total to 500 within the last five years.

His Highness has remitted several thousands of rupees on account of land rendered unculturable by the silting of sand and other causes; he has also remitted a number of vexatious little taxes, and in fact never leaves anything undone which he believes would lead to the happiness of his people.

Munshi Hira Lall, Deputy Collector, still continues to give great satisfaction, and has a good staff of Tahsildars, who for the most part devote themselves to their work, and to the interest of their master and the people confided to their care.

NEW SETTLERS.

Three thousand three hundred and fifty-eight new cultivators have settled in the State during the year; of these 1,123 left the State during the famine of 1877-78, and the rest have come from territories adjoining Ulwar.

PRICES CURRENT.

18. Statement D.—The prices of food-grains have this year ruled much lower than in the preceding year.

SALT.

19. The average retail price of salt throughout the State was 12 seers 15 chittacks per rupee during 1885-86.

TOURS.

20. I spent 105 days on tour, and visited every part of the State. His Highness the Maharao Raja was with me on tour for more than two months, and visited many places in the State which he had never seen before. His Highness interested himself much, and made frequent inquiries from officials as to their work. Each successive year I notice a very decided improvement in the condition of the people, and this year especially I found all classes, as a rule, contented and happy. The best proof of this is, I think, in the fact that cultivators are continually coming into Ulwar from the neighbouring and other territories. The general good order prevailing in all parts of the State speaks well for the officials, and for the administration which is so ably directed by the Diwan Lala Sri Ram, M.A.

AGENT TO THE GOVERNOR-GENERAL.

21. Sir Edward Bradford, K.C.S.I., Agent to the Governor-General, was present in Ulwar, during the visit of His Excellency the Viceroy.

FINANCE.

22. Statement E is a statement in detail of the actuals of 1884-85, and of the estimated income and expenditure for the year 1885-86, which will close on the 31st August 1886.

The subjoined is an abstract of these accounts—

| | 1883-84. | 1884-85. | 1885-86. |
|--------------------------------------|-----------|-----------|------------|
| | Actuals. | Actuals. | Estimates. |
| | ₹ | ₹ | ₹ |
| Income | 23,11,928 | 25,61,100 | 24,63,700 |
| Expenditure, ordinary | 20,09,547 | 19,47,023 | 19,15,740 |
| Surplus | 3,02,381 | 6,14,077 | 5,47,960 |
| Expenditure, extraordinary | 9,944 | 7,524 | ... |
| Nett surplus | 2,92,437 | 6,06,553 | 5,47,960 |
| Deficit | ... | ... | ... |
| Loans | ... | ... | ... |
| Cash balance | 20,33,524 | 26,45,290 | 31,93,250 |

INCOME.

The income of the year was Rs. 1,33,920, in excess of the estimate. The year proved a prosperous one; recoveries on account of arrears and Takavi advances were larger than estimated, as was the income under many other smaller heads; for these reasons the actual income was so satisfactory.

EXPENDITURE.

The expenditure was R24,117 less than the estimate. Charges on account of Administration and Public Works exceeded the estimate almost in every instance, and the saving has only been effected in the palace and personal expenditure of His Highness.

ESTIMATE.

To be on the safe side, Land Revenue income has been estimated at about one lakh below the nominal figures. The estimated expenditure is R38,807 less than the actuals of the preceding year. This is accounted for by the anticipated decrease in the applications for Takavi and other loans consequent upon increased prosperity.

CASH BALANCE.

The cash balance at the end of the year 1884-85 was R26,45,290, and that for the forthcoming year is estimated at R31,93,250.

The cash balance has been invested as follows:—

| No. | DESCRIPTION OF INVESTMENT. | Amount invested. | Interest accruing. |
|-----|--|------------------|--------------------|
| | | ₹ | ₹ |
| 1 | Government 4½ per cent. paper | 8,00,000 | 36,000 |
| 2 | „ 4 „ „ | 12,50,000 | 50,000 |
| 3 | Stock Notes „ „ | 1,50,000 | 6,000 |
| 4 | Fixed Deposit Bank of Bengal (Delhi), 4 per cent., subject to one year's notice of withdrawal, 4 per cent. paper | 3,00,000 | 12,000 |
| 5 | Fixed Deposit, Bank of Bengal, Calcutta, 4 per cent. paper | 1,00,000 | 4,000 |

These fixed deposit investments have been dictated in consideration that in the event of famine, funds might be ready at different centres for the purchase of grain, &c., &c., and to prevent the necessity of having to sell out Government Paper at a disadvantage.

MISCELLANEOUS.

23. The year's work of the Steam Hydraulic Cotton Press has been beyond all expectation. Twelve thousand bales were pressed last year, and it is calculated that 16,000 will be pressed this year.

Ulwar has become a mart for all the surrounding districts.

The value of landed property in the principal ganj in Ulwar has, in consequence, increased 25 per cent.

UNITED PRESBYTERIAN MISSION.

24. This mission is represented in Ulwar by the Reverend A. P. C. Jameson, and the Reverend F. Asheroft, who by their zeal and strict attention only to their own duties have rendered themselves very popular in Ulwar. His Highness has given land on which a church and a dwelling-house have been built, and has also permitted the purchase of a building in the city, which has been turned into a mission school. Several mission schools have also been opened in the mofussil. His Highness has received the thanks of the mission for his liberality.

25. On the break-up of the recent Camp of Exercise near Delhi, a heavy battery of artillery marched through part of the Ulwar territory, and His Highness did all in his power to do honor to the British troops, and has received the thanks of His Excellency the Commander-in-Chief.

26. A very large number of recruiting parties from various stations visited Ulwar during the year, to one and all of which His Highness afforded every assistance, and free quarters and rations so long as they remained in his territory.

LIBRARY.

27. His Highness, with his accustomed public spirit, has decided to have prepared an exhaustive catalogue of his rare and valuable library, a work which will be much appreciated and of great value to students of Oriental literature.

Professor Peterson of the Bombay University has kindly undertaken the preparation of the catalogue. A copy of this catalogue will be presented to the principal libraries in the world.

His Highness has also lent some valuable Sanskrit manuscripts to D. Hildebrandt, Professor of Sanskrit at the University of Breslau.

COUNTESS OF DUFFERIN'S FUND.

28. His Highness has taken deep interest in the Countess of Dufferin's scheme for providing female medical aid for the women of India, and, in addition to subscribing liberally and providing Scholarships, His Highness has appointed a lady Doctor (recommended by the Countess of Dufferin) to afford medical aid in his capital.

EXHIBITION.

29. His Highness has at his own expense sent a marble screen and many exhibits to the Indo-Colonial Exhibition. His Highness gave earnest attention in order that the arts and manufactures of his State might be fairly represented, and has decided to place the proceeds realized by the sale of the exhibits at the disposal of the Countess of Dufferin's Fund.

Ulwar jail carpets were awarded a gold medal at the Melbourne Exhibition, and two silver medals have been lately awarded to His Highness for arms and mail, and for a collection of wheat, barley, gram, maize, millet, pulses, &c, exhibited at the Calcutta International Exhibition.

HEALTH.

30. There was no epidemic of any description during the year, and with the exception of a little cholera and fever the general health was good.

Particulars of dispensaries, vaccination, and of the jail are supplied by the Agency Surgeon.

OFFICE ESTABLISHMENT.

31. As I am leaving Ulwar for a time, I should wish to place on record my appreciation of the services of the Agency office establishment.

Mr. Passanah, the Head Clerk, has always been most attentive, hard-working, careful, and willing, and I consider him an excellent and most reliable clerk.

Mir Munshi Sham Lall is a particularly smart munshi, in fact I could never wish for a better; I have ever found him reliable.

Naib Munshi Jumna Pershad is a rising young man, and is bound to give satisfaction wherever he is placed.

Mr. Wiseman, the second English clerk; Lala Pershadi Lall, the Record-keeper; Hassan Mahomed Khan, the Nazir, and Kamrudin the Duftary, have done their duties entirely to my satisfaction.

NIMRANA.

32. The death of Rajah Mokund Singh of Nimrana, at the Mayo College was much regretted, for he was giving fair promise. He has been succeeded, by the sanction of the Government, and at the request of the Ranis at Nimrana, by his first cousin, Janak Singh, a lad of some 10 years of age.

I am glad to report that Nimrana, which was much in debt a few years ago, has been able to pay the expenses of a Survey and Settlement, and to at once pay the succession fee to Ulwar of Rs26,000 without impoverishing its treasury, in which is still a cash balance of Rs8,519.

I have visited Nimrana twice during the year, and am well pleased with the very efficient way the Kamdar, Gulah Singh, continues to perform his duties. The people are happy and contented, and are assisted in every reasonable way.

FINANCE.

An abstract of the Financial Statement* showing the receipts and disbursements for 1884-85, and the estimates for 1885-86 is given below:—

* Statement F.

| | 1884-85. | | 1885-86. |
|-------------------------------|-------------------|-------------------|-------------------|
| | Estimates. | Actuals. | Estimates. |
| | R a. p. | R a. p. | R a. p. |
| Income, ordinary | 29,174 0 0 | 29,681 2 6 | 30,150 0 0 |
| „ extraordinary | 500 0 0 | 1,050 0 6 | 400 0 0 |
| TOTAL INCOME | 29,674 0 0 | 30,731 3 0 | 30,550 0 0 |
| Expenditure | 19,491 0 0 | 20,243 12 3 | 19,892 0 0 |
| Surplus | 10,183 0 0 | 10,487 6 9 | 10,658 0 0 |
| Cash balance. | 30,758 14 11 | 31,063 5 8 | 41,721 5 8 |

HARVESTS.

THE RABI OF 1884.

Although the outturn did not come up to expectations, it was more than enough to enable the Zamindars to pay up the revenue demand.

KHARIF OF 1885.

The cotton crop, which was exceptionally good, made up for the loss the cultivators sustained in the Jear and Bajra crops.

RABI OF 1885.

It is expected that this crop will be quite up to, if not above, the average.

TAKAVI.

The Takavi advances were freely given for cattle and wells.

PUBLIC WORKS.

Under this head R1,007 were expended as follows:—

| | |
|--------------------------------|-----|
| Buildings | 273 |
| New wells. | 426 |
| Repairs to old wells | 308 |

JUDICIAL.

CIVIL JUSTICE.

Thirteen cases, involving R14-2-9, were investigated and disposed of as follows:—

| | |
|-----------------------|---|
| Decreed | 5 |
| Compromised | 7 |
| Dismissed | 1 |

CRIMINAL JUSTICE.

Of 33 cases, involving 33 persons, 30 cases and 29 persons were disposed of during the year as follows:—

| | |
|----------------------------------|----|
| Imprisoned | 4 |
| Fined | 7 |
| Discharged on razinama | 2 |
| Acquitted | 16 |

SCHOOL.

The number of boys attending the school was 14 against 42 of previous year. Of these 12 are sons of cultivators.

STATEMENT A.

Statement of Civil cases instituted and disposed of during the year 1885.

| | PENDING AT THE CLOSE OF 1884. | | INSTITUTED DURING 1885. | | TOTAL. | | DISPOSED OF DURING 1885. | | PENDING AT THE CLOSE OF 1885. | |

| 3. † Average annual cost of educating each pupil in— | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| DEPARTMENTAL INSTRUCTION | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| Cost to Provincial Revenues | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| Cost to Local and Municipal Funds | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |
| TOTAL COST | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. | .. |

* The Percentages required for 2(a), 2(b), 2(c) are to be calculated from the figures given in columns 7(a), 7(b), 7(c) respectively of General Table IV.

† The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

† The Annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the Rols monthly during the year.

The Rs. 8-2 have been borne by the State and Rs. 5-9 calculated on local or village cess which is realized from the villages @ 1 per cent. on the Jamma.

Fractions of a Rupee should be omitted except in the columns showing the average annual cost of educating each pupil.

I.--The term classical language in column 25 includes European and oriental classical languages.
 II.--Mixed School should be shown as boys' schools or a girls' schools according as the number of boys or girls is greater.
 III.--Where boys and girls attend the same school, the column of Remarks should show the number of girls in boys' schools and number of boys in girls schools.
 IV.--The sub-division of column 27 regarding race or creed will vary according to circumstances.

KUNJ BEHARY LALL,
Inspector of Schools.

Political Agent, Ulwar.

Appendix VIII.
KOTAH AGENCY REPORT FOR 1885-86.

No. 2-P, dated Kotah, 1st May 1886.

From—CAPTAIN W. H. C. WYLLIE, Political Agent, Kotah,

To—The First Assistant to the Agent to the Governor-General in Rajputana.

I have the honor to submit the Annual Administration Report of the Kotah State for the year 1885-86.

COUNCIL.

2. On the 1st February 1886 a change was necessitated in the constitution of the Council by the retirement, owing to ill-health, of Pandit Ramdial, whose industry and intelligence in the discharge of his duties during 10 years' service, first as Appellate Judge and afterwards as a member of the Council elicited the warm approval of previous Political Agents. His place has been filled by Pandit Sheo Shunkar, who received his early training under the British Government in the North-Western Provinces and for the past eight years has held the appointment of Superintendent of Revenue. The advice and assistance given to His Highness the Maharao by Pandit Ramdial in the management of the Army is now rendered by Apji Amar Singh of Palaita who, as one of the senior Nobles in the State, and first member of the Council is specially qualified for the task assigned to him.

In the management of the Koties, Pandit Mati Lal of Sarola, second member of the Council, performs the same office that Apji Amar Singh does in Army affairs.

FINANCE.

3. The ordinary revenue and expenditure for the Sambat year 1941 ending on 31st July 1885 are shown by the following figures:—

| | Estimate. | Actuals. |
|-----------------------|-----------|-----------|
| | ₹ | ₹ |
| Revenue | 23,08,875 | 20,03,108 |
| Expenditure | 20,48,476 | 19,68,621 |

The actuals therefore fell short of the estimates by ₹3,05,767 and ₹79,855 respectively.

The Land Revenue receipts for the 12 months were estimated at ₹17,00,000, but the collections only amounted to ₹14,39,180, leaving an outstanding balance of ₹2,60,820,* a serious

* This sum includes a 10 per cent. remission sanctioned by the Council.

item in the year's accounts. The deficit must be attributed in a great measure to the continued depression in the opium trade, the low prices of cereals prevailing in the districts, and the difficulties of export, owing to the absence of proper roads of communication with the nearest railways.

On the date on which I write, the following are the wholesale rates current in 5 of the principal districts situated in the heart of the Haraoti plain:—

| | Opium per seer. | | | | Wheat per maund. | | | | Gram per maund. | | |
|-------------------|-----------------|----|----|-------|------------------|----|----|-------|-----------------|----|----|
| | ₹ | a. | p. | | ₹ | a. | p. | | ₹ | a. | p. |
| Baord | 3 | 0 | 0 | | 1 | 0 | 6 | | 0 | 9 | 0 |
| Digod | 3 | 4 | 0 | | 1 | 1 | 9 | | 0 | 10 | 0 |
| Bara | 3 | 4 | 0 | | 1 | 0 | 0 | | 0 | 9 | 0 |
| Antah | 3 | 0 | 0 | | 1 | 2 | 0 | | 0 | 9 | 3 |
| Mangrol | 3 | 4 | 0 | | 1 | 2 | 0 | | 0 | 9 | 3 |

The estimate for the current Sambat year 1942, ending the 31st July 1886 is:—

| | ₹ |
|-----------------------|-----------|
| Revenue | 22,88,375 |
| Expenditure | 19,88,623 |

but there is reason to apprehend that the same causes to which allusion has just been made will again injuriously affect the income of the State.

LAND SETTLEMENT.

4. The new assessment begun in 1876, and now in force throughout the State, is, I think, acceptable to the mass of the people. One of the chief objects, however, at which the settle-

ment aimed, was the re-adjustment of rent on holdings according to the prevailing rent rates; this re-adjustment has been strictly carried out, with the result that a good deal of discontent has been created among the village Patels, a powerful body of men who formerly, in nearly every instance (by the connivance of the local officials), held land on favorable terms, to which they could show no title.

The subject—which had also been under Colonel Bayley's consideration—engaged my attention during my cold-weather camping tour, and my enquiries led to the conclusion that some form of compensation was due to the Patels for the extinction of privileges which the sanction of custom for a number of years had caused them to regard as their legitimate right. I am glad, therefore, to report that the Council have resolved, with the concurrence of His Highness the Maharao, to grant, on certain conditions, to all Patels, a payment of 2 per cent. on the actual rent collections of their respective villages.

This concession will, it is hoped, put a stop to any further complaints, and at the same time give the Patels a direct interest in extending cultivation and checking embezzlement in the collection of the revenue. I should mention that this concession is to be considered a tentative one liable to modification or withdrawal at the end of five years. The re-assessment of the Nizamats of Baroda and Digod, which were the first to be taken in hand at the present settlement, and showed some mistakes in survey measurements, progresses satisfactorily, and will probably be concluded by the end of next year.

The total cost of the settlement up to the 31st March 1886 was Rs4,04,508. The Superintendent, Munshi Durga Prasad, deserves much credit for the judgment and efficiency with which he has carried out his work; it affords me, therefore, gratification to add that, with the approval of the Agent to the Governor-General, he has been nominated to succeed Pandit Sheo Shunker as Head of the Revenue Department. His appointment will not interfere with the completion of the settlement under his supervision.

COURTS.

5. No changes occurred among the officers presiding over the city Criminal and Civil Courts, and I readily endorse the favorable remarks made in former reports of the manner in which Syud Jafir Hossein discharges his duties as Appellate and Izlai Gair Judge. He has also done much useful work in connection with the Kotris under His Highness the Maharao.

The work of the Nazims, with one or two exceptions, has been much below par and of a very perfunctory character. Orders have from time to time been issued, which will, I trust, ensure in future a more careful procedure in the investigation of cases and the execution of decrees.

POLICE.

6. A slight, but continuous, decrease in crime is observable from the comparative statement given in the margin. Only

| | In 1884-85. | In 1885-86. |
|--|-------------|-------------|
| 1. Culpable homicide | 5 | 2 |

| 17. Other crimes | | |
| TOTAL | 1,108 | 1,089 |

two serious dakaities occurred during the year, the first at Dahikhera in the Khanpur Nizamats on the 11th April, and the second at Arandkhera in the Ladhpora Nizamats on 27th December 1885.

At Dahikhera, a number of armed Gujars, Bullahis, and Minas from Meywar, Bundi, and Gwalior came across the Meywar border and attacked the house of a Mahajan, carrying off property to the alleged value of Rs5,700, a small portion of which has been recovered. Two of the dakaitis have been arrested, convicted, and sentenced by the Appellate Judge to 10 years' rigorous imprisonment. In the Arandkhera dakaiti one man was killed, and

property valued at Rs3,000 taken. There is good ground for believing that the dakaitis came from the Bhainsongarh districts; although pursued to the border no captures were made, and no property has been recovered. The case still occupies the attention of the Superintendent of Girai, and has been brought prominently to the notice of the Assistant General Superintendent of Thagi and Dakaiti, Upper Rajputana.

CIVIL CASES.

7. The returns from the Civil Courts show 115 cases pending at the beginning of the year, and 763 instituted during the year, 784 have been disposed of, leaving 94 still to be dealt with. One hundred and twenty-six executions of decree cases were pending on 31st March 1885, and 559 applications for execution have since been filed; 590 have been disposed of and 95 are still on the roll.

CRIMINAL CASES.

8. From the statement annexed it will be seen that only 20 cases were left undecided at the end of last year, and that 1,089 new cases have since come before the Courts; of these 1,109 cases, 1,106 were disposed of, leaving a balance of 3. Of 747 persons arrested only 431 were convicted, and out of ₹30,388-15 worth of property stolen, only ₹7,041 worth was recovered.

INFANTICIDE.

9. No cases of infanticide were brought to notice during the year.

JAIL.

10. The total number of prisoners was 483 in 1885-86 as compared with 485 in the previous year, the death-rate being 13·89 against 11·08 in 1884-85.

Special precautions were taken to guard against cholera during the late epidemic. Only four cases occurred, in two of which the patients recovered. A short-term prisoner who was removed to the cholera hospital outside the Jail managed to effect his escape on the 16th June, and was not recaptured.

Madho Prasad continues to maintain his good character as Jail Daroga.

BREEDING STABLES.

11. The stud still consists of 3 stallions, one being a horse well-known in Australia named Dalesman, and 28 brood-mares, of which 22 are walers and 6 country-breds.

During the year 7 colts and 9 fillies were dropped, and 2 fillies died. The total number of foals is now 23. The maintenance charges for the year amounted to ₹4,088.

The following establishment is kept up:—

| | |
|--------------------------------------|------------------|
| | R |
| 1 Overseer at R15 | 15 |
| 19 Syces at R4-8 each | 86 |
| 4 Grass-cutters at R4 each | 16 |
| 1 Sweeper at R3 | 3 |
| | <hr/> |
| TOTAL | 120 per mensem. |
| | <hr/> |
| or | 1,440 per annum. |
| | <hr/> |

I am much indebted to Mr. J. H. B. Hallen, the General Superintendent of Horse Breeding Operations in India, for an unofficial visit he was good enough to pay Kotah in May last, when he gave us the benefit of much valuable advice. By Mr. Hallen's courtesy the Superintendent of the Raj stables, Pandit Dalpat Ram, was permitted to visit the Government Farm at Babugarh near Meerut, where he picked up many useful hints.

The experiment is too much in its infancy for an opinion to be expressed as to the advantages which will accrue from the introduction of horse-breeding on a small scale as a State measure.

My impression is that some modification of the system now followed may hereafter be found desirable.

MEDICAL INSTITUTION.

12. Surgeon J. Crofts was in medical charge of the Kotah and Jhallowar Agencies during the year under review.

Eight thousand two hundred and fifty-seven children were vaccinated in the cold season, with a percentage of 94·50 of successful cases, at the low cost of 9½ pies per head. A new branch dispensary is being built at Etao, the head-quarters of the Nizamat, and arrangements have been made for accommodating in-patients in the Khanpur branch dispensary. As an experiment, the hospital Assistants at Barah and Khanpur, were directed to spend 10 days in each month of the cold-weather travelling in the districts, with a view to bringing medical relief as near as possible to the homes of the poor, and the result has proved satisfactory.

HEALTH.

13. A severe epidemic of cholera, the seeds of which were imported from Ujein, occurred in June and July 1885, carrying off 660 people in Kotah city, and causing a large mortality throughout the State; in the absence of statistics the total number of deaths cannot be given but my inquiries show that few villages escaped the disease.

The first case in Kotah city was reported on the 31st May, and the last occurred on the 11th July 1885. Dr. Crofts remained at Kotah during almost the whole of this time, and was most active and persevering in his endeavours to check the epidemic. A cholera hospital was established outside the city gates, and every effort made to induce persons attacked to seek medical aid at an early stage of their illness; the number of people treated was, however, comparatively small. I would record my appreciation of Dr. Croft's services on this occasion; he was well supported by Hospital Assistant Kunnia Lal. Babu Izat Singh, in his executive capacity as Superintendent of the City Police, also did good work in trying to enforce sanitary rules. The registered numbers of births and deaths in Kotah city from causes other than cholera were 810 and 1,281, being 20·11 and 31·81, respectively, per thousand of the population, calculated at 40,270 souls. The death-rate in Kotah city would appear from these figures to be unusually high and out of all proportion to the birth-rate.

The correctness of this disproportion has more than once been questioned, but no error has been discovered in the monthly returns, in the preparation of which particular care is said to be taken. I cannot, however, bring myself to believe that the figures are altogether accurate.

Much has lately been done by the Municipal Committee towards improving the conservancy arrangements in the city, Chaubay Rangunath Das, the newly appointed Vice-President, having shown himself specially active.

Complaints are frequently made of the number of stray dogs in the city, a source of much annoyance to the poorer classes, but directly any scheme is brought forward for ridding the streets of this pest, the prejudices of the Brahmins prevent its being carried into execution, consequently the evil is likely to continue.

KOTRIS.**INDARGARH.**

14. The young Maharajah Sher Singh, a promising youth of 12 years, continues his education at the Mayo College; being a minor, his estate is under management. Last year, 1941 Sambat the revenue amounted to R93,550, while the expenditure, owing to the faulty management of the Kamdar, Kunwar Lal, since deceased, rose to R1,02,198-14-6, leaving a deficit of R8,648-14-6.

Saikh Lal Kothari, lately Civil Judge in Jhallawar, has been appointed Kamdar in Kunwar Lal's stead and is engaged in carrying out some necessary reforms.

The estate bears a balance debt of R50,000, which, with good seasons, should be paid off in four years.

BULWAN.

Maharaja Guggan Sal, who succeeded his uncle Gopal Singh in the Chiefship on the 24th July 1880, administers his Kotri exceedingly badly.

The estate is a poor one, and five villages are under attachment for arrears of tribute payable to the British Government and Jaipur for which Kotah has been held responsible. The revenue of the whole estate last year is believed not to have exceeded R7,000, the tenantry are ill-treated and discontented, and owing to desertions much land is lying out of cultivation. The Maharaja has been seriously warned of the necessity for appointing a good Kamdar and generally setting his affairs in order.

KHATOLI.

Maharaja Bhyron Singh, who is 77 years of age, has had a long-standing quarrel with his eldest son, Bhopal Singh, and owing to this family dissension the estate has suffered considerably; the Maharaja is said to be in debt to the extent of a lakh of rupees, his yearly revenue being estimated at R38,000:

The Maharaja and his eldest son are now in Kotah, and I am happy to be able to report that a reconciliation has been effected which appears to be genuine on both sides.

GAINTA KNOWN AS THE BARI KOTRI.

Maharaja Madho Singh, 18 years of age, left the Mayo College after four years' study in July last, in consequence of his eye-sight becoming affected. He is a very good-looking, promising youth, and his estate, thanks to a good Kamdar, is the most flourishing of all the Kotris.

The Maharaja also holds a Jagir from His Highness the Maharao of Kotah, and his total revenue may be put at ₹35,000 per annum.

KURWAR.

Thakur Sobbag Singh, aged about 37, succeeded his father 18 years ago, and has managed his estate so well that he has paid off some ₹60,000 of debt; his revenue may be estimated at ₹15,000.

PIPALDA, OR THE CHOTI KOTRI.

This estate is under management, the present Chief, Thakur Goman Singh, succeeded by adoption on the 14th August 1878, and for the last four years has been attending the Mayo College. The revenue of the estate is about ₹15,000.

PHUSOD, OR THE BICHLI KOTRI.

I regret to record the death of the Chief of this Kotri, Thakur Rnjjit Singh, of remittent fever on the 15th September last at the early age of 37; he was a capable man and much esteemed by his people. He has been succeeded, with the recognition of His Highness the Maharao, by Bukhtawor Singh, son of Bhawani Singh, the nearest of kin to the deceased. The revenue of the estate is between ₹14,000 and 15,000.

ANTARDA.

Maharaja Devi Singh is 21 years of age, and during the two years he has been in possession has administered his estate well. His income is said to be ₹16,000. There is a debt on the estate of ₹7,000, which is being paid off at the rate of ₹1,200, or ₹1,300 per annum.

The control over the Kotris and Puzarth remains in the hands of His Highness the Maharao, who continues to consult the Political Agent in all important business connected with these Departments. During the year under report matters may be said to have progressed satisfactorily.

MAYO COLLEGE.

15. The prevalence of cholera in the State caused some delay in the return of the Kotah boys after the midsummer vacation. By the withdrawal of the Maharajah of Gainta from the College, the number of boys on the roll was reduced to six.

It is proposed to send a new boy next July, Kunwar Dhul Singh, the son of Apji Bal Chaddur Singh of Dabri.

Some necessary additions and improvements suggested by Major Loeh are being made to the Kotah house at a cost of ₹5,425.

RAINFALL.

16. Although the total rainfall registered 30½ inches as compared with 19 inches the previous year, yet owing to its uneven distribution during the months of the south-west monsoon full benefit was unfortunately not derived. Over 21 inches fell in July and August, flooding the country in many parts and causing the seed in the ground to rot; then followed a long break, during which the young crops withered for lack of moisture. The consequence was a kharif outturn far below the average. The deficiency in the kharif has, however, been compensated for by an abundant rabi, due in no small degree to a most timely rainfall at the end of December which enabled additional land to be brought under the plough and gave a great stimulus to the young unirrigated crops.

Poppies suffered somewhat from high winds and storms in the early spring, but on the whole the opium yield was up to the average.

A larger area than in last year was planted with sugarcane, but the expense and trouble attending sugarcane cultivation is, I fear, a bar to its being extensively grown until better markets are opened out by improved means of communication.

IRRIGATION.

17. The cold-weather rainfall was heavier than usual, so there was less need for irrigation and no great demand for water from the Parbutti Canal, from which no direct profit can yet be shown to the credit of the State. In some instances no doubt wells were abandoned in favor of canal waterings, as being less costly at the rates charged by the State; but it will take some time yet before the people properly appreciate the form of water-supply which has been provided for them. An extension of the canal on a small scale is now being made in the hope of getting better results from a portion of the country, composed of yellow clay, which is said to be more suited for irrigation than the black cotton soil through which the canal chiefly passes.

The Eklera tank, alluded to in last year's report, was closed before the end of the hot weather and partially filled during the rains forming a fine sheet of water about one mile square.

Some 1,000 bighas were irrigated from it this year; all the ducts, however, are not yet completed.

Three other tanks have been sanctioned—

Ayani.—Estimate ₹19,724. Calculated to contain, when full, 99 millions of cubic feet of water; in progress.

Bagair.—Estimate ₹6,478; in progress.

Polai Khurd.—Estimate ₹5,382; not yet commenced.

In the Shergarh Nizamats, the improvement of an old and neglected system of irrigation ducts leading from the Andheri river, which in former days enabled a large area to be brought under rice cultivation has been taken in hand, the project being sanctioned at an estimated cost of ₹9,000.

FOREST CONSERVANCY.

18. The Kotah Forests cover a considerable area, and contain some valuable trees such as teak, sandalwood, mohwa, rija sal and others, which under proper management should prove a source of increasing revenue to the State. No attempt at conservancy was made until 1880, and during the last two years, owing to the incapacity of the late Forest Superintendent, Jugdumba Prasad, little or no progress can be recorded.

On the 8th March last, under the orders of the Agent to the Governor-General and Chief Commissioner, the services of Babu Sahib Roy were transferred to Kotah from Ajmere-Merwara, for employment as Superintendent. Babu Sahib Roy has a thorough knowledge of Forestry, and will, I have no doubt, maintain the excellent reputation he has brought with him.

EXHIBITION.

19. Kotah contributed a number of articles to the London Indo-Colonial Exhibition, including a handsome ivory inlaid wood screen, and various pieces of muslin and stamped cloth for the manufacture of which Kotah is noted.

POLITICAL AGENT'S TOUR.

20. Leaving Kotah on the 3rd December 1885, I marched through the Kunwas, Kunjer, and Sangode Nizamats to Atrou, visiting thence a spot on the Andheri river, where certain of the Tonk villagers of Anmandpura had constructed dams, with a view to diverting the stream for their own irrigation use. On my representation the dams have since been removed. From Atrou I proceeded through the Nizamats of Kishenganj, Mungrol, and Etao to the Kotris of Ganita, Bulwan, Indargarh, and Antarda, afterwards meeting the Agent to the Governor-General on the 21st January at Myana on the river Chambal. From Myana I accompanied the Agent to the Governor-General through the Anta and Khanpur Nizamats to Jhalrapatan, visiting with him *en route* the Kotris of Kurwar, Khatoli, Pipulda, and Phusud, and halting two days in Kotah itself, where the Agent to the Governor-General saw His Highness the Maharao.

From Jhalrapatan I marched to Taruj, returning to Kotah *via* Ghatoli and Girdurpura on the 25th February 1886.

My tour therefore extended over 82 days and afforded me the opportunity of making myself personally acquainted with the greater portion of the Kotah State.

GENERAL REMARKS.

21. His Highness the Maharao had intended to proceed to Ajmere in November last for the purpose of meeting His Excellency the Viceroy, but was prevented by illness at the last moment from starting, and his camp, which had gone on ahead, had to be recalled.

22. In conclusion, I regret to record the death of His Highness the Maharao's half brother, Maharaja Rai Singji, from cholera on the 28th June 1885, and the death of Her Highness the Rani Solunki, of fever on the 1st February 1886.

Her Highness was the daughter of the late Dolel Singh, Raja of Lunawara in Rewa Kanta, and was married to the Maharao in Sambat 1927, A.D. 1870-71.

KOTAH,
The 30th April 1886.

W. H. C. WYLLIE, Captain,
Political Agent.

Appendix IX.

JHALLAWAR AGENCY REPORT FOR 1885-86.

No. 175-G., dated Jhalrapatan, 5th June 1886.

From—MAJOR H. WYLIE, *Political Agent, Jhallawar,*

To—*The First Assistant Agent to the Governor General, Rajputana.*

I have the honor to submit the Administration Report of the Jhallawar State for the official year 1885-86.

2. The post of the Political Agent was held from the 1st to the 7th April 1885 by Major H. B. Abbott. That officer then proceeded to England on furlough, and Mr. T. W. Miles, C.E., Executive Engineer of Jhallawar and Kotah, assumed charge of the current duties of the office until the 25th idem, when I (having been posted as Major Abbott's successor) joined, and took up my appointment, which I held uninterruptedly until the close of the financial year.

HIS HIGHNESS THE MAHARAJ RANA.

3. His Highness the Maharaj Rana attended race meetings at Mhow and Meerut during the year; he also visited the Agent to the Governor-General at Abu in September, and in the same month visited the Maharaja of Marwar at Jodhpur; on both these occasions I accompanied His Highness. In the month of November the Maharaj Rana attended the opening of the Mayo College at Ajmere by the Viceroy, and took the opportunity of paying his respects to His Excellency.

THE POLITICAL AGENT'S TOURS.

4. During the year under report, I visited the outlying district of Shahabad, and made an extended tour in the Chowmehla; I also accompanied His Highness the Maharaj Rana on a tour through a portion of Central Jhallawar.

THE COUNCIL.

5. At the commencement of the year the Council consisted of the following Sardars: Thakur Bije Singh, Apji Narpat Singh, Maharaj Balbhadra Singh, Konwar Sheodan Singh, Dhabai Sheo Baksh, and Dhabai Bakshi Ram, but of these Dhabai Bakshi Ram died in August 1885, and Dhabai Sheo Baksh resigned his office in October. His Highness the Maharaj Rana has not filled up either of these vacancies.

WEATHER AND CROPS.

6. The years' rainfall was 47.90 inches at the Chaoni of Jhalrapatan. This fall was much above the average, but the crops did not suffer to any great extent, and the rabi harvest was decidedly good.

HEALTH.

7. There was some cholera at Jhalrapatan during the early weeks of the year under report, which was clearly imported from the large Ujjain Fair. Cholera also broke out in the month of October, with considerable virulence, in some towns and villages of the Chowmehla. In other respects the public health was on the whole good, for the number of fever cases was below the average, and there was no epidemic of small-pox.

MEDICAL AND VACCINATION.

8. The five dispensaries in the State continue to be well supplied with medicines and surgical instruments. The Agency Surgeon's report has been submitted departmentally.

9. The number of children vaccinated shows a steady increase year by year, for in 1883-84 there were 3,888 vaccinated, in 1884-85 there were 4,954, and in the year under report the number rose to 5,423.

EDUCATION.

10. The State Inspector of Schools appears to be well satisfied with the result of the changes that were made (as mentioned in my report of last year) in the principal school of the State, which is situated at the Chaoni of Jhalrapatan. From personal examination however, I cannot say that the condition of the mufussil schools is equally satisfactory. These schools require much careful attention by the Inspector himself, the class of masters might be improved, and the schools generally be made more attractive to children and to the pupils' rents.

11. Mr. Dammi Lall, Inspector of Schools, resigned his appointment last February, and the Maharaj Rana has appointed in his place a young Native Christian, Mr. Surgia, who was educated in England.

JAILS.

12. The average number of prisoners in the only jail in the State (which is situated at head-quarters) was 189.77 against 186 last year. The improvements in the jail buildings mentioned in the last report have proved beneficial.

Two deaths occurred in the jail from natural causes during the year, and one capital punishment took place.

COURTS.

13. At the commencement of the financial year the Appellate Court consisted of three Judges—Hakim Saadat Ahmad, Dhabai Hur Lal, and Munshi Kali Charan. The first two of these officials resigned the Jhallawar service during the year, and the Maharaj Rana has appointed in their room a man Hakim Muhammad Amir.

14. Statements of the work done by the Criminal Courts are attached. In the year under report 309 cases were filed on the criminal side of the Appellate Court against an average of 268 suits during the last five years. The whole 309 cases were disposed of.

15. It is reported that the special feature to be noticed is the increase of offences coming under section 60 of the Jhallawar Criminal Code (house-breaking).

16. In the Criminal Court itself there were 181 cases pending from last year, and 1,467 suits were instituted during the year under report, making a total of 1,648 cases against an average of 1,538. The number of cases disposed of during the year was 1,201 against an average of 1,074.

17. There have been four appeals against the decisions of the Tahsil Courts during the year, making, with one pending from last year, a total of five; out of these five, two were "upheld," one "modified" one "reversed," and one is still "pending."

POLICE.

18. The Police have not been so successful this year as in former years, and a smaller amount of lost property has been recovered.

BOUNDARIES.

19. There were 24 boundary cases pending from last year, out of these 22 cases were external and 2 internal. To these were added 8 more external cases during the year under report. No cases were settled during the year, so a balance is left of 30 external and 2 internal unsettled boundary cases.

PUBLIC WORKS.

20. The Public Works Department report has been submitted departmentally as usual. The chief point to be noticed is that three original "communications" have been sanctioned during the year under report. The most important of these is the causeway over the Kali Sind river, which work is 795 feet long by 25 feet broad. It is hoped that it will be completed for traffic before the rains of the present year.

TRADE.

21. Trade as a whole has been dull, but transactions in gúr have been rather brisk, as will be seen by the attached statement.

SALT.

22. There has been a slight decrease in the importation of salt into the State. No cases of smuggling have been reported.

THE MAYO COLLEGE.

23. There are four young gentlemen from this State studying at the Mayo College.

STUD.

24. The State horse-breeding arrangements continue as reported last year.

ENSILAGE.

25. An experiment in ensilage was again tried during the year under report. The silo was 22' x 10' 6" x 6'. Grass was deposited early in October, and taken out the end of March. The results are much the same as those mentioned in the report of 1884-85.

Appendix X.

BICKANIR AGENCY REPORT FOR 1885-86.

No. 3-P., dated Bikanir, 20th April, 1886.

From—CAPTAIN A. C. TALBOT, C.I.E., *Political Agent, Bikanir,*
To—*The First Assistant Agent to the Governor-General for Rajputana.*

I have the honor to submit the Annual Administration Report of the Bikanir Agency for the year 1885-86.

SARDARS.

2. There is nothing calling for special comment under this head. The Thakurs concerned in the disturbances of 1883 have completely settled down and have paid without demur the greater portion of the "Fouj Khureh" levied from them. The one rekh among Tazimi Thakurs to be decided, *viz.*, Jasana has been settled, and the only case still pending amongst the petty Thakurs was referred to the Special Committee for decision.

ADMINISTRATION.

3. There has been no change in the personnel of the Council, but Maharaj Bhiy Singh has not been able, as I hoped he might, to resume his seat. The advantages anticipated from the creation of four Nizamats have been fully realised, and the system is appreciated by the people. Early in January of this year, Lala Narayan Das, an experienced Deputy Superintendent of Settlement, whose services had been lent by the Punjab Government, was appointed to the charge of the Suratgarh Nizamat, where his knowledge of settlement work is of special importance. The Jaipur Durbar have agreed to a proposal that, in conformity with the procedure already obtaining between that State and the Punjab States of Patiala, Jhind, Nabha, and Loharu, border cases between Jaipur and Bikanir shall be decided in the local Nizamats, instead of being referred to the Jaipur Court of Vakils. The distance which complainants had to travel to depose to loss of a bullock or camel, the trouble and expense which this journey and the delays of the Court occasioned often led to their paying black mail rather than prosecute their claim. The success of this alteration will largely depend on the co-operation of the local officials and police: of course, I do not expect their mutual jealousies to disappear immediately, still it is an improvement on the previous procedure; and as the present Nizams of Shaikhawati and Roni are both of them sensible men, while the Nizam of Sujangarh and the Sikar officials have lately discussed the question in a friendly manner, as will be mentioned in paragraph 34, there are hopes that border crime will be dealt with in a more thorough manner.

4. The new customs system referred to in paragraph 8 of last year's report has proved an unqualified success, and the receipts have largely exceeded the estimate. The accounts for the whole year are not yet ready, but the actual income will probably not fall far short of 5½ lakhs, while 3½ lakhs was its anticipated amount. The State was at first divided into five, and afterwards into ten, customs circles each under a separate Daroga, who submits monthly accounts to head-quarters. There are at present 38 thanas and 105 chowkis on the border and in the principal towns. For the convenience of traders commission agents were appointed at Bhiwani and Sirsa, and authorised to grant rawannahs to traders who preferred to give hundis to Bikanir. By this plan about ₹ 1,75,000 were received at head-quarters, traders were saved the risk and trouble of sending money and agents to the frontier posts, and the Durbar was spared the corresponding risk of escorting the money to Bikanir. A similar plan would have been adopted at Ajmere in regard to opium receipts, were it not that that tax is collected by the Jodhpur Durbar for this State. After a few months' experience it was decided to issue rawannahs in triplicate, one copy being sent with the monthly accounts to head-quarters and the others given to the trader; one of these is handed over at his destination and the other kept by him as a voucher.

5. A considerable boon to the people was conferred early in the year by the remission of "khoont," or tax on the sale of animals within the State; if the receipts for the three months during which it remained in force, *viz.*, ₹ 7,235, are a guide to the annual amount paid on this score, the people have benefited to the extent of ₹ 29,000 per annum. In view of the satisfactory results of the new system, it has been decided with the Maharaja's approval to reduce the duty on sugar from ₹ 2 to ₹ 1-8 per maund, thus equalising it with that in force in Marwar, and the duty on piece-goods from ₹ 5 to ₹ 4 per cent. The duty on country fruits and vegetables

except mangoes and onions has been remitted, and all goods carried by travellers on which the duty does not exceed four annas will be allowed to pass free. This latter concession will be appreciated by the villagers on the border who often have occasion to make small purchases in the adjoining territory, whether British or Native. The total value of these remissions is estimated at ₹ 31,500 per annum. On the other hand, the export duty on "Til" has been raised from five annas to six annas, that on sheep and goats from 1½ annas to 2 annas, and that on ivory from 12 annas per maund to an *ad-valorem* duty of 5 per cent. These additions are expected to bring in ₹ 6,500, so that the net reductions amount to ₹ 25,000 per annum. Besides this, reductions have been made in the rates of duty on the following articles:—

| | Former. | Present. |
|----------------------------|--------------------|-------------------------|
| Slabs and stones | 2 annas per maund. | 2 annas per camel-load. |
| Log | 4 " " | 8 " " |
| Date palm leaves | 1½ ₹ " " | 10 " per maund. |
| Cotton, raw | 1½ " " | 10 " " |
| Oil | 1½ " " | 12 " " |
| Fuller's earth | 3 annas " | 1½ " " |

Saltpetre formerly free has been taxed according to quality at 2 annas and 4 annas per maund, and country spirits at ₹2 per maund.

6. The figures for the last month of the year are not yet complete, so I cannot submit a statement of the quantities of goods carried, but I am informed that they are largely in excess of former returns. It is probable that trade will be still brisker this year for an unfavorable season in the western parts of the State, and the prohibition against marriages amongst Hindus which prevailed for the first seven months of last year cannot fail to have had a depressing influence. Another reason for anticipating higher receipts this year is, that stocks laid in before the introduction of the new system, with its increased duty on some articles, will have been in a great measure consumed, and traders will have to import more freely.

7. There have been 108 applications for compensation for loss of privileges: 24 have been settled for an annual payment of ₹34,913-3-3, 5 cases have been rejected, and 79 have still to be decided. The following are the principal sums awarded:—

| | ₹ |
|----------------------------------|-------|
| Maharaj Lal Singh | 7,632 |
| Zenana | 6,155 |
| Rao of Pugal | 6,000 |
| Charans of Deshmok | 6,000 |
| " of 24 other villages | 1,898 |
| " of Sital | 1,200 |
| Brahmins | 3,875 |

A portion only of the compensation due to the Zenana has been settled. So far the Mahji Bhatianiji, widow of the late Maharaja, has hitherto declined to state the amount she expects, chiefly it is understood at the instigation of her Kamdar, Guman Mall Bairea, who probably fears an examination of his account books. Finding that there was considerable delay in the submission of claims, the Durbar lately issued an order requiring their presentation before the close of the year to entitle the claimants to compensation from the first, as application made later would only give a right to it from the date of the request. The claims now under consideration are mostly by Tazimi Sardars and have been submitted in consequence of that order; they will probably be satisfied for about ₹15,000 a year, and if the Mahji reconsiders the question her claim can be probably be settled for ₹5,000 or ₹6,000 more, so that probably ₹50,000 or ₹55,000 will be the total annual charge on this account. Considerable opposition was expected on the part of the Charans, and the question was of some importance, as on its decision depended the attitude of other "Akars," or untaxed classes, throughout the State. The Charans of Deshmok, however, took the lead, seeking the arbitration of the Dewan, in whose impartiality they declared their confidence, and cheerfully accepted his award. Their example was followed by others, and it speaks well for the reputation established by the Dewan that he should have been able to satisfy a class so tenacious of their privileges as these Charans have often proved themselves to be. The compensation to the Charans of a number of other villages took the form of a remission of certain "lags," or cesses, which, as they contended, established an invidious distinction between them and other Charans, and after some discussion the matter was settled in accordance with their wishes.

8. The cost of establishment in a country extending over 23,000 square miles with no natural barriers is of course high, but deducting half a lakh of rupees for this and the same amount payable as compensation, there will still be an annual gain to the State of 1¼ to 1½ lakhs in comparison with the former system. The chief credit for this satisfactory result is due to

Seth Nemi Chand, who has held sole charge of the Customs Department during the year. The Council, wisely allowed him considerable latitude in the choice and numbers of his establishment, and he has thoroughly justified the confidence reposed in him.

9. It has been a busy year in the Revenue Department, and a great deal of work has been done. The rough measurement of the Khalsa land referred to in last year's report has steadily progressed, and a small portion still unfinished in the Hanumangarh, Churu, Sirdarshehr, and Bikanir Tahsils will probably be completed by the 15th May. Up to the end of March 5,334,711 highas had been measured with a "Jarib," or chain, at a cost of 4 cowris per higha. The total expenditure for the year has been ₹10,043 15-8, of which ₹9,261-6-8 were spent in measurement and the remainder in miscellaneous work connected with it. The errors in measurement do not probably exceed 5 per cent. in a country like Bikanir of great extent and generally poor quality of soil; this is not a matter of much importance, while the advantage in point of cost over the more accurate, but expensive measurement, with a plane table is obvious. Rough maps of each village have been prepared and the usual settlement papers containing a record of the area cultivated and uncultivated, the names of the "Chowdris," or headmen, "Asamis" or cultivators, with the amount of their respective holdings, the different castes, the modes of collection and cultivation, the number of wells, tanks, plough cattle, &c., have been drawn up, so as to supply all needful information regarding the condition of each village. Details of the system previously in force and of the five years' summary settlement now made in the Nohor, Bahadera, and Rajgarh Tahsils will be given in a separate report; it is sufficient here to say that with a lower rate per higha in each tahsil than that formerly paid the revenue will be increased by about ₹18,000 per annum, as the measurement has shown the cultivated area to be much larger than the headmen admitted, and a very trifling rate per higha has been put upon the large uncultivated area in the hope of attracting cultivators from outside. Although the headmen have accepted the terms of the settlement, it is probable that they will petition against it, for, under the old system, they enjoyed practically unchecked power to oppress the cultivators, and by connivance with the officials secured a handsome profit at the expense of the Durhar in various fraudulent ways, all of which have now been closed to them. The cultivators on the other hand are quite satisfied with the new arrangement, as it secures them in rights on which the Chowdris were continually encroaching.

10. Arrangements have still to be made in the remaining Khalsa villages, and particularly is this important in the Suratgarh and Hanumangarh Tahsils, where there are vast tracts of good soil in the old bed of the Gaghar to be allotted. It is calculated that about 100 villages, each containing 12,000 highas, could be founded if the land is all taken up. More than 300 applications for these "Chaks" have been received from intending settlers from British territory, and the work of marking them out once completed—it is now about half finished—allotment will commence. Here too great opposition may be expected from the Chowdris, who have wilfully allowed many lakhs of highas to remain waste as a pasturage for their cattle, but they cannot be allowed to stand in the way of a reform, which, if carried out as intended should in the course of another five years bring in an increased revenue of 1½ lakhs of rupees, and this with rates no higher than those in the adjoining district of Sirsa which it is intended to take as a guide in fixing the assessment. The brunt of the work has fallen on Munshi Sohan Lal, who is a most painstaking, courteous, and industrious official. He is now about to march through the tahsils which still have to be assessed, and will reach Suratgarh and Hanumangarh by the time the allotment of "Chak" has been completed, when the terms of the new assessment will be settled with the headmen and cultivators.

11. The survey of the Gaghar river alluded to in last year's report has been completed and the plans have been submitted to the Punjab Government, so it will not be long, I hope, before a decision on a question of considerable importance to the prosperity of the northern districts of the State is passed.

12. Raja Fattah Khan Kaimkhani, whose former services in the Bhawalpur State were very highly spoken of by Colonel Grey, C.S.I., now Commissioner of Delhi, has been placed in charge of the Karkhanas and will, I hope, introduce order and economy into their management.

WEATHER AND CROPS.

13. The first fall of rain occurred on the 13th and 14th May, and was sufficient to tempt the people to plough and sow their fields. It was, however, for long followed only by light showers, and at Bikanir itself no rain fell again till the 26th June. In July and August the fall was again much below the average, indeed during the whole monsoon the Bikanir Tahsil only received 4.73 inches, or less than half the usual quantity. Day after day clouds came up and dispersed after only a few drops had fallen: the bajra which at first promised well gradually withered away, and for 30 miles round Bikanir itself the grass crop was poor and scanty.

Speaking generally, it may be said that to the west of an imaginary line drawn north to south of the State about 30 miles east of Bikanir city the rainfall was either much below the average or almost entirely deficient. To the east of that line both the rainfall and the crops have been up to, and in Sujangarh in the south-east corner of the State above, the average, though more rain at the end of the monsoon was required even there. For the first time returns in our measurement, instead of the "Ungal," or finger breadth, of the Bikanir zamindar, were obtained from the tahsils, and a glance at the list here attached will show how partial the rainfall has been this year:—

| | | | |
|-----------------------|--------------------|-----------------------|-------|
| Bikanir | 4.73 | Sardarshehr | 8.40 |
| Lunkaransar | 5.20 | Bahadera | 15.77 |
| Sujangarh | 20.85 | Rajgarh | 18.32 |
| Dungargarh | 11.68 | Suratgarh | 3.65 |
| Ratangarh | 9.72 | Hanumangarh | 0.49 |
| Churu | 8.2 | Nohar | 9.15 |
| | Anopgarh | | 0.40 |

14. The Hanumangarh and Suratgarh parganas suffered most; the soil there is generally the hard clayey bed of the Gaghar, and this requires a heavier fall of rain to fit it for the kharif crop than a sandy soil, which, though it seems poorer, retains moisture longer and is better suited to bajra. As soon as it became evident that the crops, and particularly the pasturage for cattle, must fail, the greater portion of the inhabitants migrated with their flocks and herds to more favored spots, leaving only a few care-takers in each village. The large stores of grain in the districts were ample for the consumption of the remaining inhabitants, and I satisfied myself in the course of my cold-weather tour by personal enquiry that no real distress existed. The principal headmen considered that when the absentees returned some assistance might be required, and it was arranged to supply grain to all who should apply for it; the customs duty on grain was remitted, and the people were warned that work would be given at tahsil head-quarters to all who cared to apply for it. The Tahsildars were enjoined to make frequent personal inspection of the villages within their charge. This was in December; two months later the Nazim of Suratgarh reported that grain was being distributed and work given to the very poor in the Hanumangarh pargana, but no other relief was required. In Suratgarh employment is being found in various useful works for those who need it, both at head-quarters and also at Sardargarh, where a tank is being excavated. In both districts the revenue collections have been postponed for two months, and will, if necessary, be suspended till next year.

15. The adjacent district of Anopgarh, which is in the estate of the Maharaja's father, and not under Durbar management, has been peculiarly unfortunate, in that this is but one of a series of bad years, and for several seasons the inhabitants have been compelled to take their animals into Bhawalpur for pasture. Throughout these three districts there is necessarily a great scarcity of fodder, and cattle not early driven elsewhere must have succumbed in numbers. The advantage of silos will perhaps be appreciated after the experience of this year's difficulties. A number of the most intelligent headmen of villages were sent at Durbar expense to the Government Cattle Farm at Hissar, to see for themselves the processes so successfully carried out there. The Superintendent kindly had everything explained to them and showed them that cattle would eat the ensilage, a point on which they had expressed some doubt; so, I hope that in another year they may be induced to profit by the lessons they learnt at Hissar. On the whole, there cannot be said to be anything approaching a famine in any part of the State, though prices will, of course, rule high until the character of the next season declares itself, and the difficulty of finding fodder for cattle must increase during the hot weather, now setting in.

FINANCES.

16. The completed accounts for Sambat 1941, which ended on the 16th March 1885, form an appendix to this report. They show a total income of ₹12,98,663-4, with an expenditure of ₹10,37,199-13; the cash balance at the close of that year was thus ₹2,61,463-7.

17. During this year an exhaustive enquiry into the liabilities of the State has been conducted by a Committee, consisting of Seth Milap Chand and Mangal Chand Rakecha, members of the Council. A notice was issued by the Durbar that any persons having claims against the State should present them within a period of two months, which was afterwards extended in the case of the creditors not resident in the State; on its expiry these claims were found to reach the large sum of ₹42,30,532-0-3. After comparison with the accounts recorded in the State Treasury the amount dwindled down to ₹22,29,032-3-9. It was at first proposed to pay this sum by annual instalments of one lakh of rupees, and to give creditors the option of taking the present worth of their claims in ready money. Various considerations, however, militated against this proposal, for only ₹7,87,524-11-3 represented the principal actually due, and it did

not seem fair to the State to expose it to the risk in case creditors should elect for instalments, of having to pay much more than would meet the circumstances of the case. The debts were mostly of very old standing contracted with the grand-fathers or even more distant ancestors of the present claimants, some of the original creditors through the favouritism of officials or from the pressure they could bring to bear on the Durbar had been granted exorbitant rates of interest, while others had received nothing. Moreover, but for the influence of Government, creditors would never have been paid at all, so that payment of the principal alone, by placing all on the same footing, would sufficiently satisfy these long-pending claims, and yet not press too hardly on the State. In this view the Maharaja fully concurred, and eight instalments of one lakh each were fixed. After payment of the first instalment tenders were invited for the purchase of two more. These tenders, when opened, were found to be at the rate of ₹65 in cash for every ₹100 of debt, and as the whole amount was eagerly taken up and there were sufficient funds in hand to pay off the whole debt, in a similar manner the offer was extended to the remaining creditors. Payments aggregating ₹4,98,605-1-6 have been already made and still continue, so that probably in the course of a few weeks the whole debt will be extinguished for about 5½ lakhs of rupees.

WORKING OF THE COURTS.

18. The returns from the Tahsils have not yet been received in detail, and I am only able to give the total number of cases disposed of without arranging them under separate heads; the Nizamats cases, however, are more fully shown.

CIVIL CASES.

19. In the tahsils 496 cases were pending at the close of the previous year and 1,527 were instituted in the course of it: 1,727 cases were disposed of, leaving 296 pending at the close of the year. In the Nizamats 88 cases were pending and 920 instituted during the year; decrees were given in 504 cases and 187 were dismissed; in 164 instances the dispute was amicably settled either by razinamah or arbitration, and 90 cases only were pending at the close of the year. By far the larger number of suits seem to have arisen out of money transactions.

CRIMINAL CASES.

20. In the tahsils 337 cases were pending at the beginning of the year: 2,005 were disposed of during its course and 223 were pending on the 1st April 1886. In the Nizamats 2,398 cases were under enquiry during the year, of which all but 215 were disposed of. Punishment was awarded in 329 cases only, and this proportion to the number of complaints seems small, but that of persons punished to those arrested, *viz.*, 600 out of 818, is a considerable improvement on last year. Robbery and cattle theft, as usual, swell the return more than any other crimes. The amount stolen is larger this year than last, the proportion of property recovered to that stolen being about the same, while the cattle recovered are about a third; last year they were nearly half of those stolen. Two murderers were executed at Bikanir. Suicide by jumping into a well is very common, and with a view of checking it orders were issued to put wooden gratings round the wells, since then there has been a marked falling off in the number of deaths.

21. Besides 2,026 miscellaneous cases the Nazims disposed of 464 regular revenue suits and 73 were still under enquiry on the 1st April 1886. Disputes about land and "Chowdhar" seem to have been the most numerous.

22. The Council confirmed the decision in five civil and three revenue cases sent up to them, but, out of 32 criminal cases, reversed the sentence in four and modified it in 10 instances. In appeal 105 civil cases came before them; the decisions were upheld in 52, were revised in six, and reversed in 38 cases; nine civil appeals are pending. They heard 81 criminal appeals, of which they confirmed the sentence in 39, reversed it in 28, and revised it in eight cases; six appeals are still pending. On the revenue side the number of appeals was also 81; 51 of the decisions were upheld, 16 were reversed, 7 were revised, one was transferred, and six are still to be decided. From the Thakur's Court there were 76 appeals, of which 47 were rejected, 12 were admitted, two decisions were revised, 11 cases were transferred, four being still pending.

IJLAS KHAS.

23. The Ijlas Khas had for confirmation two civil and four criminal cases. Civil appeals were 29, of which 23 were rejected, three admitted, and one decision was modified; two are still pending. On the criminal side 13 appeals were rejected and one was admitted. There were 22 revenue appeals, 17 of which were rejected and five were admitted. From the Thakur's Court 18 appeals were received, of which 9 were rejected, four were admitted, one was modified, and four are pending.

THAKUR'S COURT.

24. This Court had to deal with 528 cases, of which 282 were disposed of, leaving a balance of 246 to be settled this year. The majority of cases relate to land or villages. The heavy work of the Special Committee referred to in paragraph 5 of last year's report, which has only just finished its sittings, has much interfered with that of the Thakur's Court, as Pandit Kalka Pershad has been employed in both, and could only devote a portion of his time to the Thakur's Court. I hope, however, that in the course of another six months the cases now pending will have been cleared off, when the Thakur's Court will cease to exist, as it has been arranged that all future disputes of the nature of those laid before this Court shall be decided in the Nizamats.

SPECIAL COMMITTEE.

25. The Special Committee consisting of Pandit Kalka Pershad and Seth Nemi Chand have worked steadily since March last year. They sent me, from time to time, their opinions on the cases submitted to them, and these, to the number of 144, with my remarks on each, have lately been forwarded to His Highness the Maharaja for favor of his opinion. The question is one of considerable importance, and it will be some time before it is finally settled.

DISPENSARIES.

26. Surgeon P. D. Pank, I.M.S., who had officiated as Agency Surgeon from March 1885, was confirmed in the appointment on 5th January 1886. It is a pleasure to record this officer's zeal and energy, and we may look forward to a considerable development of the medical institutions under his vigilant supervision. He is often consulted by the Maharaja, and appears to have succeeded in gaining the confidence of the people.

27. During the past year the Bikanir city dispensary buildings have been greatly improved and put into a thorough state of repair; a male ward with 10 beds, a female ward with six beds, and a small ward for eye cases are now occupied; and a long partially closed ward, accommodating seven beds, has been added. Three new rooms have been built for male and female out-patients and operations respectively; also a cook-room and bath-house. Furniture, instruments, medicines, and all necessary equipment have been supplied in sufficient quantity to enable ordinary hospital routine work to be efficiently performed. Diets are now provided for all in-patients at the expense of the Durbar. The Hospital Establishment has been increased to meet increased requirements. During the year ending 31st December 1885, 6,860 out-door patients and 120 in-door patients were treated in the Bikanir city dispensary. This in the case of out-patients was 1,276 more than in 1884, and 2,727 more than the average of the five years 1880-84. In the case of the in-patients there is an increase of 77, compared with 1884, and of 67 over the average of the five preceding years. The daily average of out-patients for the past year was 65.4, for in-patients 5.37. Twenty-seven major operations were performed with one death, a mortality of 3.7 per cent.; 490 minor operations were also performed. Malarious fevers of a mild type, rheumatic affections, confined chiefly to the hot weather, and syphilitic affections were the diseases most met with in the dispensary patients and are a fair index for the rest of the State. The cost of the dispensary for the year 1885 was Rs,097-2-8.

28. Branch dispensaries were opened in November 1885 at Sujangarh, Suratgarh, and Reni. These have been well attended for the short time they have been working, and are much appreciated by the people. Six other dispensaries will be opened during the present year at the following towns:—Bahadran, Nohar, Churu, Sardarshehr, Rajgarh, and Ratangarh, provided that Hospital Assistants can be supplied. A wealthy banker of Churu is building a dispensary at his own expense, and this liberality, which will, I hope, find imitators, has been suitably acknowledged by His Highness the Maharaja in an autograph letter, accompanied by a dress of honor.

VACCINATION.

29. During the past year vaccination operations have been extended. Four vaccinators and one Native Superintendent have been employed. The total number of persons vaccinated is 7,339, with a percentage of 98.9 successful cases. The cost of vaccination for the past year has been one anna and one pie in each case. Last year the number and cost were 463 and four annas and one pie respectively. It is proposed to entertain eight vaccinators and two Native Superintendents for the coming season. Vaccination is not as yet generally appreciated by the inhabitants of this State, but this is only a matter of time, and a few years of careful work will probably remove all prejudices; these exist amongst the mercantile rather than the agricultural classes, for the Jats of Hanumangarh and Suratgarh appeared to thoroughly understand the benefits of the operation. I am in hopes that by degrees the Thakurs also will assist in the

spread of vaccination. One of them, Bhukarka, expressed his readiness to send a man living on his estate to be taught how to vaccinate.

SANITATION.

30. The sanitary condition of Bikanir city is still capable of much reform, and though no little progress has been made this year the difficulties of bringing about any marked improvement can only be gradually overcome. Iron silt-carts are now used to remove refuse and filth, latrines are being constructed, a large staff of sweepers is employed, and the old sites outside the city formerly used for the deposition of refuse, &c., have been cleaned, and new and better places selected for spreading sewage and sweepings. The city kotwal has been appointed to supervise the working of the conservancy establishment, and shelter is being provided for the animals employed.

HEALTH.

31. The general health during the past year has been good. There have been no epidemics calling for special remark. At Hanumangarh malarial fever prevailed during the rainy season, but not of so severe a type or extent as in former years. Six cases of cholera, with one death, occurred in the city of Bikanir, in September 1885: they were all imported cases from the Ramdeoji fair at Pokaran Marwar, and none originated in Bikanir city itself.

JAIL.

32. There are in the jail 257 prisoners, of whom 12 are females and 2 are juveniles in the proportions of 210 Hindus and 47 Muhammadans. During 1885, 310 prisoners were admitted and 273 discharged. The daily average strength of prisoners was—

| | |
|-------------------|-------|
| Males | 221.6 |
| Females | 1.9 |

The number of hospital admissions were 315, number of deaths 5, giving a death-rate of 1.5 on the admissions, and 2.1 of daily average through. This low death-rate is to be accounted for by the fact that a large proportion of the prisoners are employed on extramural work. The present jail accommodation is bad, and new wards, with a cook-house, mill-room, and workshop, are being built, and when finished they will add greatly to the comfort of the prisoners. During the year the diet of the prisoners has been improved, and a large reduction made in the opium ration without injurious effect. Head Jailer Hira Singh from the Ajmere Jail, has been placed in charge, and it is expected that remunerative labor and a more effective discipline will result from the changes that have been made in the Jail establishment.

INFANTICIDE.

33. No cases were reported during the year.

BORDER POLICE.

34. I was not able to visit every one of the border posts this year, but saw most of those situated between Churu and Sujangarh. Alterations of site, suggested the previous year, had been carried out and the work seemed to be properly done. Enquiries in the neighbouring villages left no doubt of the benefits of the system, but as complaints had been made of the inactivity of the Sikar officials, the Rao Raja was good enough to meet me at Tathuta, when he assured me of his intention to punish any future neglect of duty. The opportunity of our meeting was taken advantage of to settle the best means of carrying out the new system of trying border cases in the Nizamats, instead of referring them to the Jaipur Court of Vukils. The procedure to be followed by the Sikar Musahibs and the Nizam of Sujangarh was laid down in accordance with the recommendations of the committee assembled at Ajmere in 1881-82, and I hope that a better understanding will henceforth prevail between the border officials, on whose co-operation the successful working of the extradition rules so much depends.

BOUNDARY DISPUTES.

35. The dispute referred to in paragraph 26 of last year's report between Sarouda of Bikanir and Bhojawas of Marwar gave a good deal of trouble, and to prevent a breach of the peace a Thanadar from each State was stationed for some months at Bhojawas, one Bās, or hamlet, of which belongs to the Thakur of Sarouda, the other and larger Bās to Marwar. In February 1885 the Thakur of Sarouda wished to repair the well at Bhojawas, asserting that one of its runs belonged to him; this was not allowed by the inhabitants of the Marwar Bās who claimed the whole well; other questions regarding the use of a burning ground near the well and of certain ponds in Sarouda and Bhojawas limits afterwards arose. Two attempts to settle the dispute through State officials failed, and the questions were taken up by Captain Loch, Assistant Resident, Western Rajputana States, and myself in February last. Both parties having agreed to accept our decision, we endeavoured to bring about a settlement by

panchayat, but this was declined by the Thakur of Sarouda, and every proposal made by one party having been rejected by the other, we were obliged, after an enquiry lasting five days, to decide the points at issue ourselves.

36. The position of the well was in favor of the Marwar claim, though no proof of its ownership could be produced by either side, and both had used it in common. To prevent further disputes it was decided that a new well should be sunk in the Bickanir hamlet, the Marwar Jagirdar paying one-third of the cost, the Bickanir people were required to set a part of a new burning ground in their own limits, and each party was restricted to the use of ponds within its own village area. As a further precaution against future collisions the whole boundary between Sarouda and Bhojawas was demarcated, after being walked in our presence by a representative from each village, and a space of neutral ground in Bhojawas itself, to be common to both hamlets, was marked out by pillars. If the well is not sunk within a year, the inhabitants of the Bickanir Bās of Bhojawas will have to get water from Sarouda for one year; they will obtain it as hitherto from the Bhojawas well. The Thakurs were also required to give security to the amount of ₹1,000 against any breach of the peace. At the same time they were privately advised to save themselves the expense which their obstinate quarrels had entailed upon them and to revert by mutual agreement to the former friendly understanding when the people of both hamlets seem to have had all rights in common. Possibly after a time they may do so, but the feeling has become so bitter that I fear there is little hope of so sensible a termination of the quarrel. The boundary between Sarouda and Tathuwas of Marwar regarding which a trifling dispute existed was rectified at the same time to the satisfaction of both parties.

POST OFFICES.

37. I reported last year that the Durbar had consented to the establishment of Imperial Post Offices in all the principal towns of the State, and accordingly offices were opened at Reni, which was connected by a line of runners with Churu, and at Sardarshehr, which, by a line through Ratangarh and Bidasar, was placed in communication with Bickanir. In January last Mr. Firth, Inspector of Post Offices, visited Bickanir, and, as a result of his recommendations, offices will be opened experimentally as soon as possible at Rajgarh, Nohor, Bahadera, Suratgarh, Hanumangarh, Rajaldesar, and Deshnuk. The line from Ratangarh to Sardarshehr has been laid between Sardarshehr and Churu, as this places all the tahsils of the Reni Nizamat in communication with each other, and the line from Ratangarh will now go direct to Sujangarh, instead of *via* Bidasar, thus saving 10 miles in distance. This extension of the Imperial system necessitates adequate protection for the mails, and the Durbar propose to establish 14 new thanas along the different lines; this, of course, entails no little extra expense, but has the advantage of bringing the interior of the country under closer police supervision than heretofore.

SCHOOLS.

38. Education has made some progress this year. An English Master has been appointed to the school at Bickanir and has a fair attendance, the average being 62.5; the Urdu class contains 50 and the Hindi 85 boys. A new school-house is being built and will be ready for occupation before the rains; a portion of the cost has been defrayed by a subscription among the bankers of the city, and the remainder provided by the Durbar. Schools have, also been opened at Reni and Sardarshehr, and, owing perhaps to the interest taken in the subject by the Nazim Hafiz Hamid-ulla, are well attended. I examined both schools in the course of my tour, and particularly at Sardarshehr was surprised at the progress the boys, who are mostly the sons of Sahukars; had made in the nine months the school had been opened. The master, Dhunsukh Rai, deserves much credit for the progress his scholars, who number about 28, have made. A wealthy banker at Churu having offered to build a school there at his own expense received a dress of honor and autograph letter from the Maharaja in acknowledgment of his liberality, and this good example is, I learn, likely to be followed elsewhere. Schools will, I hope, be opened at other large towns in the State during the present year, as the inhabitants seem anxious to have their children educated.

MAYO COLLEGE.

39. The Thakur of Mahajan and Konwar of Rawatsar joined the Mayo College as I anticipated last year, and their relations are thoroughly satisfied with the care taken of them. The Maharaja has liberally sanctioned an expenditure of ₹7,787 on additions to the Bickanir boarding-house, which was too small to accommodate the number of boys likely to be sent from his State, and when the new rooms have been built, eight pupils can be admitted; the boys must find a college life a great change from their desert homes, but they evidently appreciate it, for the young Thakur of Mahajan, I am told, preferred to stay and work on at the college rather than take the leave offered him.

MAHARAJA'S HEALTH.

40. His Highness the Maharaja has been fairly well, except for a slight return of last year's complaint. His father Maharaj Lal Singh has lately had a slight stroke of paralysis which has affected him more or less, both physically and mentally, and he will probably never be the same man again. One of the widows of the late, and also a great uncle of the present, Chief died during the year.

LONDON EXHIBITION.

41. The Durbar at once responded to the invitation to contribute to the Colonial and Indian Exhibition, and besides sending as good a collection of art ware as could be formed, His Highness the Maharaja lent some valuable specimens of old armour, &c., and of the silver work peculiar to Bikanir. An ornamental screen decorated in a style which is believed to be a specialité of Bikanir was also constructed, the whole expense being defrayed by the Durbar.

POLITICAL AGENT'S TOUR.

42. Work connected with the Exhibition detained me longer than usual at Bikanir, and it was not until the 10th December that I was able to commence my cold-weather tour, which lasted till the 23rd February or 75 days. I first marched northwards towards Suratgarh and Honamangarh, thence to Nohor, Bahadera, Reni, Churn, and along the border to Sujangarh. From the latter place I turned back through Chapar and Ratangarh to Sirdarshehr going from there *via* Dungargarh to Bikanir, where after a day's halt I again started to meet Captain Loch at Sarouda. The only portions of the State I was not able to visit were the southern border adjoining Marwar and the western districts towards Pugal and Anopgarh. From the scarcity of grass and water a march through the last-named districts would have been harassing to the people, and had to be postponed till next season, when I hope no such impediment will exist.

COUNCIL.

43. The members of the Council individually have had a more than ordinary amount of business to get through this year. The examination of the account books in verification of creditors' claims was a laborious task, most carefully performed by Seth Milap Chand and Mangal Chand Rakhecha; and the settlement work has given Munshi Sohan Lal incessant occupation. The experience of another twelve months has only served to strengthen the high opinion I expressed last year of the value of the Dewan's services, and I have no hesitation in saying that any measure of success attained by the present administration is largely due to his capacity for work and to the trust which the people have learnt to put in his impartiality.

OFFICE ESTABLISHMENT.

44. There has been no change in my office establishment, the members of which continue to deserve my acknowledgments. There has been a good deal of extra work in connection with the special committee cases, but it has been cheerfully done by Mr. Jamshedji Aderji, Lala Piari Lal, and the Mir Munshi Kishen Lal.

1888.

REPORT
ON
THE POLITICAL ADMINISTRATION
OF
THE RAJPUTANA STATES
FOR
1886-87.

Part I.

My review will necessarily be brief, as I assumed charge of the office of Agent to the Governor-General only a few days before the close of the year, relieving Sir Edward Bradford, whose long and honourable connection with Rajputana ceased on his appointment to the post of Political Secretary at the India Office. It does not fall within my province to refer in any detail to the measures undertaken by Sir Edward Bradford during his tenure of office to improve the condition of Rajputana, but I cannot let this opportunity pass without recording my sense of the debt of gratitude which the States owe to him for the years of unselfish and unwearying labour which he devoted to their welfare according to the views held by him of the progress of which they were capable.

No events of particular importance occurred during the year, and the rainfall and crops were average.

A statement, marked A, showing the meteorological observations taken in Rajputana during 1886 is appended.

Rajputana was not behind the rest of India in public manifestations on the occasion of Her Majesty's Jubilee, and the liberal donations which have been contributed to memorials and for other similar purposes connected therewith, are practical tokens of the prevailing spirit of loyalty towards the Sovereign.

A review of the Political Officers' reports on the various states is subjoined. Of Meywar, Ulwar, Bhurtpur, Jaipur, Kotah, Kerowli, Kishengarh, Jeysulmcre, Serohi, Banswara, Pertabgarh, Dungarpur, and Shahpura, there is little that is to be noted in this part of the report.

The states in which affairs are not satisfactory are Jhallawar, Dholepur, and Tonk.

In Jhallawar the young Chief has not fulfilled the expectations formed of him, and has allowed the management of the different departments of the State to fall away in a marked manner, at the same time neglecting the judicious advice offered to him by competent authority.

In Dholepur, the finances have become disordered, and will require close supervision for some years to come, while in Tonk a similar state of things exists, though energetic measures of reform are already beginning to have good results.

The efforts which have been made to ameliorate the condition of Marwar have caused some dissatisfaction among malecontents, whose predisposition to evil has been checked, but I have no reason to think that the Maharaja is not pleased with the manner in which the administration is conducted, or that he is unmindful of the unswerving energy with which the Resident assists him in all matters bearing on the well-being of the State, more especially the suppression of dakaiti, and the careful control of the revenue.

The Jodhpur railway has continued to be worked well and economically, and an important extension of the line to Pachbadra was completed during the year, which will do much to open out the trade in salt and other commodities.

Marwar has lost a valuable servant by the death of Mr. F. T. Hewson, C.S., one of the most promising officers of the Political Department. He endeared himself to all by his courtesy, chivalry, and kindly disposition, while the courageous and unsparing labour with which he concentrated his ability on the service of the State, claimed and received the highest acknowledgments. As an instance of the benefits which the Darbar derived from the skilful application of his talents, I may mention the re-organization of the Customs Department, by which the revenue was increased several lakhs without introducing extra taxation.

The state of affairs in Bikanir has continued to improve, and is marked by financial prosperity, and the absence of many of the former elements of discontent.

TOUR.

During the winter tour, Sir Edward Bradford visited Dholepur, Ajmere, and Jaipur by rail. He marched with his camp from Abu *viâ* Balotra to Jodhpur, and thence by Didwana to Seekar and on to Ulwar, where he arrived at the end of January. From thence the march was continued to Bhurtpur. Here Sir Edward Bradford was obliged to leave camp to be present at the Jubilee celebration at Ajmere, shortly after which he had to return to Abu to wind up affairs preparatory to leaving for England.

Part II.

JUDICIAL AND POLICE.

The following statement gives the number and nature of the cases adjudicated by the International Courts of Vakils in Rajputana during the year 1886 :—

| OFFENCES. | NUMBER OF CASES. | | | | |
|--|------------------|---------|---------|----------|--------|
| | Meywar. | Jaipur. | Marwar. | Harowti. | TOTAL. |
| <i>Against the person.</i> | | | | | |
| Murder | ... | 5 | 2 | 3 | 10 |
| Assault with wounding | ... | ... | ... | 1 | 1 |
| Culpable homicide not amounting to murder | ... | 1 | ... | ... | 1 |
| TOTAL | ... | 6 | 2 | 4 | 12 |
| <i>Against property.</i> | | | | | |
| Highway robbery | ... | 3 | 12 | 2 | 17 |
| Highway robbery, with aggravated circumstances | ... | 2 | 2 | 6 | 10 |
| Theft | 7 | 9 | 15 | 9 | 40 |
| Theft, with aggravated circumstances | 2 | 3 | ... | ... | 5 |
| Thagi and Dakaiti | 2 | 35 | 25 | 10 | 72 |
| Recognition of cattle | ... | 3 | 3 | ... | 6 |
| Cattle-lifting | 4 | 8 | 11 | 8 | 31 |
| Burglary | ... | ... | 6 | 2 | 8 |
| Abduction | ... | 1 | ... | ... | 1 |
| Miscellaneous | ... | 7 | 8 | 8 | 23 |
| TOTAL | 15 | 71 | 82 | 45 | 213 |
| GRAND TOTAL | 15 | 77 | 84 | 49 | 225 |

As compared with last year, the statement shows an increase of 3 in the number of offences against the person, the figures being 12 against 9. As regards the number of offences against property, the Meywar Court has had 15 cases against 13 last year; Jaipur 71 against 114; Marwar 82 against 111; Harowti 45 against 46. The total number of cases in the four Courts is therefore 213 against 284 in the previous year.

The subjoined statement indicates the number of appeals disposed of by the Upper or Appellate Court during the year. Of the 78 cases appealed, the decisions in 54 were confirmed, in 9 revised, and in 5 reversed, leaving 10 undisposed of at the close of the year.

| AGENCY. | Pending at the beginning of the year. | Instituted during the year. | TOTAL. | Confirmed. | Revised. | Reversed. | Remainng at the close of the year. |
|-------------------|---------------------------------------|-----------------------------|--------|------------|----------|-----------|------------------------------------|
| Meywar | 2 | 4 | 6 | 3 | ... | 1 | 2 |
| Jaipur | 12 | 20 | 32 | 27 | 3 | 1 | 1 |
| Marwar | 6 | 9 | 15 | 7 | 2 | 1 | 5 |
| Harowti | 8 | 17 | 25 | 17 | 4 | 2 | 2 |
| TOTAL | 28 | 50 | 78 | 54 | 9 | 5 | 10 |

The efforts which have been made to ameliorate the condition of Marwar have caused some dissatisfaction among malcontents, whose predisposition to evil has been checked, but I have no reason to think that the Maharaja is not pleased with the manner in which the administration is conducted, or that he is unmindful of the unswerving energy with which the Resident assists him in all matters bearing on the well-being of the State, more especially the suppression of dakaiti, and the careful control of the revenue.

The Jodhpur railway has continued to be worked well and economically, and an important extension of the line to Pachbadra was completed during the year, which will do much to open out the trade in salt and other commodities.

Marwar has lost a valuable servant by the death of Mr. F. T. Hewson, C.S., one of the most promising officers of the Political Department. He endeared himself to all by his courtesy, chivalry, and kindly disposition, while the courageous and unsparing labour with which he concentrated his ability on the service of the State, claimed and received the highest acknowledgments. As an instance of the benefits which the Darbar derived from the skilful application of his talents, I may mention the re-organization of the Customs Department, by which the revenue was increased several lakhs without introducing extra taxation.

The state of affairs in Bikanir has continued to improve, and is marked by financial prosperity, and the absence of many of the former elements of discontent.

The annual report of the working of the Rajputana-Malwa Railway Police has been separately submitted to Government. The office of Superintendent was held throughout the year by Mr. R. E. Acklom. The relations of the Railway Police with the officials of the Native states have been cordial.

CRIME.

The statistics of crime in the Western states compare unfavourably with the figures for the previous year. Dakaitis have increased from 43 to 55, and there were 98 highway robberies. This increase is attributed by the Resident to a display of spite at the capture and execution of Padia, the noted dakait leader, of whom mention was made in the report for 1885-86. Towards the close of the year, however, there was a decrease of crime.

In Meywar also there was a slight increase in the number of dakaitis and highway robberies. On the other hand, the police measures adopted in the case of the Bhainsrorgarh pargana appear to have borne fruit, for no complaint has been received from Kotah of any further depredations by dakaitis from that quarter.

The calendar contains only one case of poisoning, but this was of a very serious kind, the victims being the son and daughter-in-law of the Rao of Deogarh, a noble of the first class. The offence was brought home to two Kamdars of the estate, who have been sentenced to imprisonment for life in the Udaipur Jail.

A case of *Johar*, or human sacrifice, occurred at Girawla in the Nimbahera pargana, which, though belonging to Tonk, is under the political supervision of the Resident in Meywar. The village consists of about sixteen or seventeen houses, inhabited chiefly by Brahmins, who considered that their lands should be exempt from assessment. The Darbar, however, persisted in their demand, and the villagers proceeded to perform *Johar* by way of protest. Four women consented to immolate themselves, but two only had the courage to carry out their determination. The case, of which a full report was submitted to the Government of India, was investigated by a Committee composed of Darbar officials in no way connected with the Nimbahera district, and the parties who were found to be guilty were suitably punished.

Under heinous offences in Jaipur, the Darbar report only three dakaitis and four cases of poisoning. To these must be added one or two affrays between border villages, and an organized dakaiti in the Uniara estate.

There were four dakaitis committed in Tonk territory, in two of which property valued at R2,635-12-0 was carried off and three men were wounded. On the other hand, one dakait was killed.

Three dakaitis occurred in Bundi, but complaints from travellers, to which reference was made in the previous year's report, have decreased in the year under review.

No case of dakaiti is said to have been committed in Ulwar and Bhurtpur, and only one in each State is returned for Kotah and Shahpura, the value of property stolen being in both instances very small.

There were no cases of serious crime in Kishengarh, Dholepur, and Kerowli.

No cases of sati, infanticide, or attacks on the Government mails have been reported.

The reports show that, with a few exceptions, there has been a general diminution of crime in the province.

CRIMINAL AND OTHER TRIBES.

The reports of the Resident in Meywar and his Assistants show that the Bhils have behaved fairly well during the year. Excepting four murders which

occurred in the Hilly Tracts, there has been a total absence of anything like serious crime. There was no case of witch-swinging or border affray. During the year under report the Bhils and Grassias of the Kotra district, following the example of their brethren in the country under the political superintendency at Kherwara, erected memorial stones in token of their abandonment of witch-swinging.

In Marwar the Minas have been giving some trouble. It was anticipated that were the notorious dakait Padia arrested, dakaiti would diminish. But this expectation has not been realized, for though Padia and a trusted follower of his were captured and hanged in Godwar, the heart of the Mina country, these measures have tended to embolden for the time being rather than discourage the offenders. It is to be hoped that the feeling of resentment is only temporary.

As regards the Moghias, a separate report has been submitted to Government, and the subject need not be alluded to here further than by mentioning that satisfactory progress is being made in the reclamation of the tribe, and that the registers are now fuller and more trustworthy than heretofore.

THAGI AND DAKAITI.

Towards the close of the year, the three sub-agencies of the Thagi and Dakaiti Department in Rajputana were combined in a single agency under one Assistant to the General Superintendent for Rajputana, whose report will have reached the Government of India through his departmental superior. I understand that satisfactory work has been accomplished.

BOUNDARY SETTLEMENT.

Four officers were employed on the demarcation of boundaries in Rajputana.

Captain A. P. Thornton commenced operations on the Meywar-Tonk border in the month of January 1887, but was shortly afterwards transferred to another appointment, being relieved by Mr. L. W. King, C.S., who continued work up to the 27th of March 1887. These officers disposed of 21 cases between them, but a good number of disputes still remain, and it is proposed to depute an officer again in the ensuing cold weather to proceed with their settlement.

Major W. H. C. Wylie, C.I.E., was appointed to continue Lieutenant-Colonel McRae's work on the Meywar-Marwar border. He assumed charge of his duties at Beawar on the 26th of November 1886, but owing to the absence of the Motmids, or representatives of the states, and other causes, he was unable to move into camp before the 14th of December. As explained in the report for 1885-86, the settlement of this border is of an exceptional nature and presents great difficulties, and though every endeavour has been made to push on the work, no great progress has been made. Arrangements are, however, under consideration which, it is hoped, will enable the boundary officer to do much during the ensuing cold weather.

Dr. J. P. Stratton was deputed in the cold weather to settle boundary disputes in Serohi, and did excellent and painstaking work, notwithstanding the contumacious behaviour of some of the Thakurs with whom he had to deal.

The demarcation of internal boundaries in Marwar is progressing both within and beyond the scope of the revenue settlement of the State, while in Mullani the limits of 74 villages have been defined since the submission of the last report, leaving only 23 to be demarcated.

EDUCATION.

The report on the Mayo College is attached, marked Appendix B. The year closed with an enrolment of 76 boys against 80 at the end of 1885-86. There were 9 admissions during the year against 13 withdrawals, which accounts for the difference of 4.

The College contains representatives from all the states except Banswara, Bhurtpur, Bundi, Dholepur, Dungarpur, Jeysulmere, and Pertabgarh.

The College was honoured by a visit from Their Royal Highnesses the Duke and Duchess of Connaught in January 1887.

The receipts from all sources amounted to R40,220-1-2 and the total expenditure was R33,655-7-2, leaving a credit balance of R6,564-10-0.

Of Native states Jaipur carries the palm in matters educational, and the report for 1886-87 is a record of still further progress. The expenditure on education during the year amounted to nearly R70,000.

Next after Jaipur come Ulwar and Meywar. Some of the other States are also evincing an increasing interest in the cause of education, as shown by the number of new schools which have been opened during the year—

| | |
|-----------------------|-------------|
| In Bikanir | 2 for boys. |
| „ Kotah | 2 „ |
| „ Jhallawar | 1 „ |
| „ Tonk | 1 „ |
| „ Mullani | 3 „ |

On the other hand, 6 schools in Bhurtpur and one in Shahpura have been closed.

Three girls from Ulwar and 2 women from Tonk have been sent to study in the Agra Medical School, and have been granted scholarships by their respective Darbars.

On the whole, the results exhibited in the reports are fairly satisfactory.

LOCAL CORPS.

The four Local Corps in the Agency were inspected during the year—the Erinpura Irregular Force and the Meywar-Bhil Corps by Major-General A. Carnegie, Commanding the Northern Division of the Bombay Army, and the Deoli Irregular Force and the Merwara Battalion by Brigadier-General B. H. Pottinger, Commanding the Nasirabad Brigade. All four corps have been favourably reported on by the inspecting officers.

The Merwara Battalion has been permitted to inscribe upon its colours and appointments the words “Central India” in commemoration of its services in Rajputana in the year 1857-58.

RAJPUTANA-MALWA VOLUNTEER RIFLE CORPS.

By Military Department Notification No. 126, dated the 18th of February 1887, sanction was conveyed to the conversion of the half battery of Futtchgarh Volunteer Artillery into a rifle company, and to the transfer of the Futtchgarh Volunteer Corps to the Rajputana-Malwa Volunteer Rifle Corps, for administrative purposes. Shortly afterwards, however, the Government of India authorized the amalgamation of the Rajputana-Malwa Volunteer Rifle Corps and the Bombay, Baroda and Central India Railway Volunteer Corps into a double battalion corps, to be designated the “Bombay, Baroda, and Central India Railway Volunteer Rifles,” and to be under the orders of the Government of Bombay.

This office connection with the volunteers has thus ceased.

SANITATION, VACCINATION, DISPENSARIES AND JAILS.

SANITATION.

In Native states, as has been observed in previous years, the importance of vital statistics is not as yet fully recognized. Returns have, however, been received from 3 cities and from one state which did not furnish them for

1885, while the information afforded by those states which have been in the habit of rendering these statistics is certainly improving year by year in accuracy and completeness.

The increased attention which has been paid to sanitation of late years in Native states shows no signs of slackening, and in several States the advance mentioned in former reports has been steadily continued. Considerable sanitary activity has been displayed in Jodhpur, Bikanir, Udaipur, Ulwar, Jaipur, Kotah, Kerowli, and Tonk. In the first three states, marked improvements have been effected during the year, and the steps previously taken by the other Darbars to promote sanitation have been maintained.

VACCINATION.

The number of successful primary vaccinations decreased by 7 per cent. This decrease, which occurred in 6 out of 13 States, is most marked in Jaipur, where it amounted to 43 per cent. The reasons given by the Agency Surgeon for this diminution are "obstruction, change of native superintendents, and a determination to overcome resistance by steady working at one spot, which led to loss of time and consequent loss of numbers." If the vaccinators are concentrated in a few places where there is much opposition, a falling off in the number of operations must be the result, so it is hoped that if it be found necessary or desirable to pursue these tactics during the next season, they may be followed in a modified manner. The percentage of success, 96, is higher by 1 per cent. than in the previous year, while the average number of persons vaccinated by each vaccinator (1,142) was less by 17 per cent. than in 1885. The reason of this diminution is that many of the Jodhpur Thakurs sent men to be trained in the art of vaccination, and 42 of these vaccinators have been operating during the year, but the amount of work done by several of them was limited owing to the small number of villages owned by their masters. The large increase (18 per cent.) in the number of vaccinations in Marwar, and the manner in which the "Thakur scheme" has been brought to a successful issue, reflects much credit on the Darbar and on Dr. Adams, the Agency Surgeon. In Udaipur also the Darbar and the Officiating Residency Surgeon, Dr. Webb, have been active in their efforts to extend vaccination. The establishment in Native States, which previously numbered 118, was increased during the year to 131 members.

The slight increase in expenditure, shown almost entirely under the head of Establishment, is due to the larger staff employed during the year under report. The average cost of each successful case was 22 pie against 19 pie in 1885.

DISPENSARIES.

Seven new dispensaries were opened during the year, *viz.*, 4 in Udaipur and 3 in Bikanir, and one was closed which had been opened temporarily in Jaipur while some large engineering works were in progress. The number of institutions therefore has risen from 79 to 85, including, as in the previous year, five dispensaries belonging to the Northern India Salt Revenue Department.

In-door patients were more numerous by 12 per cent., and out-door cases by nearly 13 per cent. Excluding the institutions opened and closed during the year, we find that in 13 states and in 56 dispensaries an enhancement took place in the total number treated, while in 3 states and in 23 dispensaries fewer persons applied for medical aid than in the previous year.

Malarial fever was 2 per cent. less frequent and 2 per cent. less fatal than in 1885, 16 per cent. of the admissions and 10 per cent. of the deaths being caused by this malady. Excluding the institutions opened during the year, this disease was less prevalent in 43 dispensaries, while in 37 hospitals a larger number of patients were treated for it.

Boils, abscesses, and ulcers occasioned 16 per cent. of the sickness (which is 1 per cent. higher) and 2 per cent. of the mortality (which is 1 per cent. lower than in 1885). Respiratory diseases and bowel complaints caused 6 per cent. and 5 per cent. of the total number of cases against 7 per cent. and 5 per cent. in the previous year, and 17 per cent. and 22 per cent. of the death-rate, these ratios being larger by 4 per cent. and 1 per cent. than those recorded for 1885.

A violent outbreak of cholera occurred at the Pushkar Fair, which is held annually at the same season about six miles from the city of Ajmere. On the 11th, 13th, and 16th of November returning pilgrims began to arrive at Jaipur, Jodhpur, and Bikanir. According to the returns, the epidemic lasted in Native states from the 11th of November till the 11th of December, and during that period 127 cases and 57 deaths were registered. Sixty-six seizures, 43 of which proved fatal, took place in Jaipur, and 28 cases with 5 deaths in Bikanir. The Agency Surgeon of Jaipur writes—"Not a single case has been even heard of here which could not be traced to Pushkar." In Jodhpur 33 cases and 9 deaths were recorded, but these figures give an altogether inadequate idea of the numbers attacked, and of the extent of the mortality. The Agency Surgeon is of opinion that all the sufferers had been to Pushkar and he is supported in this opinion by the Hakims of districts, and by the Hospital Assistants stationed at outlying dispensaries; but from enquiries made in several of the affected villages it is clear that a considerable number of persons died of the disease who had not been to Pushkar.

Seven hundred and forty-two major operations were performed at the different dispensaries and of these 29 proved fatal, compared with 537 operations and 25 deaths in 1885. In contrasting the numbers for 1885 and 1886, we find that operations on the eye rose from 77 to 138, for stone from 44 to 59, on bones from 60 to 80 and on tumours from 96 to 116, while amputations increased from 45 to 70. One hundred and forty-six major operations were done at the Jaipur Mayo Hospital by Dr. Hendley, at Bikanir the number rose from 25 to 106, and at Jhallawar from 18 to 66—results which speak well for the energy and tact of Drs. Pank and Leahy, and for the confidence which they must have established amongst the people. The instruments necessary for the operation of lithotomy have been purchased by the Jaipur and Jodhpur Darbars.

The expenditure was greater by 33 per cent., the increase being due mainly to the cost of building, which has not hitherto been furnished, being entered in several of the returns for 1886, and partly to the opening of new dispensaries. The sums expended on these institutions by the Udaipur and Bikanir Darbars rose from R3,305 and R4,982 in 1885 to R11,941 and R17,201 in 1886, in consequence of the improvement effected in old hospitals, and of the establishment of new ones. The average cost of each case treated, 57 pie, was 9 pie more than in 1885, and the average expenditure on each diet, 17 pie, was higher by 3 pie than in the previous year.

JAILS.

In the 13 jails from which returns are received, the daily average number of prisoners was 3,405 against 3,271 in 1885. The total number of cases treated in hospital and the average daily sick were higher by 6 per cent. and 11 per cent. respectively, while the mortality, which was heaviest in the third and fourth quarters of the year, rose from 29 to 34 per thousand; the average death-rate for the past five years is 35 per mille.

Taking first the 9 jails in which the daily average number of prisoners exceeded one hundred, we find that in 6 of them the mortality was higher than in 1885 and notably so at Udaipur, Dholepur and Jaipur, where it rose from 35,

38 and 27 to 82, 64 and 38 per thousand. At Jodhpur, Bikanir and Kotah it fell from 34, 21 and 26 to 14, 7 and 12 per mille.

There are four small jails in which the daily average number of prisoners aggregated 271. In one of these, Tonk, there was no fatal case, but at Serohi and Shahpura, the death-rate mounted from nil to 64 and 20 per thousand; at Kerowli it fell from 51 to 22. The total number of deaths in these jails was in Serohi 4, in Shahpura 1, and in Kerowli 2.

Not a single case of cholera occurred in any of these jails during 1886.

It has not yet been settled whether to enlarge the present jail at Jaipur or to construct a new one. There can be no doubt that the question of providing additional accommodation for the prisoners is one for which urgency can fairly be claimed, for, as the Agency Surgeon remarks, "So great is the overcrowding that it is evident that something must very shortly be done or serious results may ensue." Much has been effected during the last few years in the way of improving the condition of prisons in Native states, but in most of them crowding still exists, and the results of this great evil would probably have been made more apparent, had the prisoners not been almost universally employed on extra-mural labour. The new jail at Bikanir has been occupied during the year, and promises to have an excellent effect on the health of the prisoners. The building of the Udaipur Jail was unavoidably delayed, but it is now completed and the prisoners have been transferred to it. It is calculated to accommodate 400 prisoners.

The information required in Statement XV (Vital) has been supplied regarding convicts from all the jails, but for those "under trial" it has been furnished by only four Darbars and for civil prisoners by one State (Tonk). As observed in the report for 1885, it is improbable that Statement XIV will be willingly submitted for some time to come, as several of the Darbars are averse to giving details about the cost of their prisons.

The subject of the medical education of women has been brought to the notice of all the Darbars in Rajputana, and several of the States have responded by taking advantage of the opportunities offered at Agra for the training of female students.

His Highness the Maharaja of Jaipur contributed the princely sum of a lakh of rupees to Lady Dufferin's Fund, and four pupils were sent to Agra from the Jaipur Female School to be educated in medicine.

The lady doctors at Udaipur, Ulwar, and Khetri have done excellent work during the year, and have maintained and strengthened the confidence previously gained by them. Three women from Ulwar are now studying medicine at Agra.

The Kotah Council have agreed to defray the expenses of a female student at the Agra Medical School for three years, and trust that at the expiration of the above period the Principal of the School will be able to select a Hindu for Kotah, possessing sufficient tact and good judgment to render it likely that she will be able to make her way into the zenanas of the better class in the State.

The Bundi Darbar is willing to provide funds for women sent to Agra from Bundi; and Shahpura expresses its readiness to act in a similar manner. The Tonk Darbar agrees to pay for a pupil and requests to be favoured hereafter with a list of successful candidates, to allow of one being selected for employment in Tonk.

Remembering the suspicion and jealousy with which new proposals are usually regarded in Native states, it may be considered that the scheme for improving the medical education of women has met with a fair share of success during the past year in Rajputana.

POST OFFICE.

Appendix marked C gives the number of post offices, letter-boxes, and postmen in existence at the close of the years 1885-86 and 1886-87. There is a net increase of 28 post offices, 13 letter-boxes, and 14 postmen. Most of the new post offices were opened in Marwar territory.

Marwar and Bikanir are the only states where every facility is given by the Darbar to the extension of the post office.

Appendix D is a list of mail lines in Rajputana. One hundred and forty-four miles of mail line were opened during the past year.

The extension of the Jodhpur Railway from Luni to Pachbadra enabled many improvements to be made in the transmission and delivery of mails in that part of the country.

The Tonga Dāk line between Jaipur and Tonk, worked under contract by Mr. John, had to be closed on account of mismanagement. A runners' mail line was opened in its stead.

A Tonga Dāk was established by certain Borah merchants between Chitor and Udaipur. It has been utilized for the conveyance of mails.

No highway robbery or attempt at highway robbery occurred during the past year.

Appendix E is a return showing the correspondence delivered in Rajputana during the past two years. There is a net increase of 915,914 articles.

During the past year 98,891 money-orders, representing a sum of R27,41,674, were issued from post offices in Rajputana, and during the same period 82,533 money-orders, amounting to R32,58,950, were paid. About two-thirds of the money-orders issued were from post offices south of Ajmere; whilst the bulk of payments were made in Shekhawati, Bikanir and other places north of Ajmere. The reason assigned for this difference in the money transactions of the two parts of the country is that the people of Shekhawati and other states north of Ajmere emigrate in large numbers, and remit their savings to their homes by money-orders, whilst in the south emigration is comparatively rare, and trade is much more extensively carried on than in the north.

Eleven thousand eight hundred and forty-two letters and parcels insured to a value of R43,81,342 were posted in this circle during the past year, and 20,440 were received for delivery. The value of these cannot yet be ascertained. Of these 32,282 insured articles, only two insured parcels containing gold were tampered with by subordinates of the department.

At the close of the year, a sum of R53,73,543 was deposited in the Post Office Savings Bank of this circle by 28,230 depositors.

An arrangement was introduced from the 1st of October 1886 by which the amount of R2,04,150 due by the British Government to the Meywar Darbar on account of salt compensation was paid out of the surplus postage collections of the post offices in Meywar to the Darbar. This arrangement had the double advantage of putting a stop to the transmission of cash in mail bags, and of settling the claims of the Darbar without the risk, trouble and expense of remitting a large sum of money from the Ajmere treasury.

For the first time last year, two large unbridged hill streams were spanned with wire, for the purpose of crossing the mails during floods. This arrangement proved very useful, particularly at the Banas river, between the railway station and Abu, where the mails crossed regularly and without detention of any kind.

Part III.

PUBLIC WORKS.

The total public works outlay in the province during the year, exclusive of the expenditure on irrigation in the districts of Ajmere-Merwara, was R34,40,605, as shown below—

| | R |
|--------------------------------------|------------------|
| Imperial | 4,14,311 |
| Incorporated Local Funds | 18,872 |
| Contributinal | 36,675 |
| Native States of Rajputana | 29,70,747 |
| TOTAL | <u>34,40,605</u> |

The total expenditure of R29,70,747 on public works in the Native States is made up in the following manner:—

| | R |
|---|------------------|
| Meywar | 4,15,841 |
| Marwar, including Jodhpur railway | 9,59,189 |
| Jaipur for year ending 31st December 1886 | 10,81,940 |
| Ulwar | 1,42,881 |
| Kotah | 2,52,812 |
| Jhallawar | 1,18,084 |
| Dholepur | } |
| Kerowli | } ... |
| TOTAL | <u>29,70,747</u> |

Nearly all this expenditure has been incurred under the control of the Public Works Department Officers, whose services have been lent by Government to Native states; and this circumstance is a satisfactory proof of the good that is achieved wherever competent officers are deputed.

Taking the grand total expenditure on public works of R34,40,605 during this year, against that of the year preceding of R33,51,881, also the total Native States public works expenditure of this year of R29,70,747, against that of the previous year of R29,56,299, the comparison is satisfactory.

MILITARY.

Owing to the restricted nature of funds, only a few major works could be carried out during the year, and the outlay on repairs and minor works was also limited.

At Nasirabad, quarters with out-houses were constructed for the Commissariat Conductor at a cost of R4,916. At Deesa, two new cells were added to the present block in the European infantry lines at a cost of R2,723, and the floors of certain wards in the station hospital were asphalted at a cost of R4,776. At Abu, mules and equipment sheds and drivers' quarters for the Commissariat were erected at a cost of R2,318. At Kotra, the Ordnance Magazine was improved at a cost of R1,163, a few other minor works were executed. The special repairs to barracks in the European infantry lines at Deesa have nearly been completed.

CIVIL BUILDINGS.

The only major works carried out during the year were: (1) increasing accommodation in, and improvements to, the lock-up at Deesa at a cost of R6,362, (2) completion of the additions and alterations to the Salt Commis-

sioner's house and the new treasury and guard rooms at Pachbadra at a total cost of ₹4,010, and (3) construction of barracks for the accommodation of the detachment of the Merwara Battalion at Sambhar at an estimated cost of ₹4,053, the year's expenditure being ₹1,726 for materials only, the site not having been made over.

Some minor works were also executed.

COMMUNICATIONS.

The new Abu cart road was completed this year after some estimates and revised estimates had been sanctioned, the last amounting to ₹1,42,087. The total expenditure against this sum was ₹1,42,191. The new road, as now completed, is nearly 17 miles in length from the Abu Post Office to the Abu Road railway station.

The execution of the work of improving portions of the road between Kherwara and Kotra, for which an estimate had been sanctioned for ₹9,714, had to be postponed till the local Political Officers were in a position to proceed with it.

LOCAL AND CANTONMENT FUNDS WORKS.

No important works were under execution during the year, but the total expenditure under this head for works and repairs amounted to ₹4,177.

MEYWAR.

The grant budgetted for expenditure during the year amounted to ₹4,15,800, as detailed below—

| | ₹ |
|---|-----------------|
| A.—New Works— | |
| 1. Buildings | 92,800 |
| 2. Roads | 30,000 |
| 3. Irrigation works | 87,000 |
| 4. Udaipur gardens | 24,440 |
| 5. Miscellaneous | 42,239 |
| TOTAL | <u>2,76,479</u> |
| B.—Repairs of existing works— | |
| 1. Buildings | 47,972 |
| 2. Roads | 33,390 |
| 3. Irrigation works | 3,000 |
| TOTAL | <u>84,362</u> |
| C.—Establishment | 40,000 |
| D.—Provision to meet expenditure which may be found necessary for works not included in above | 15,000 |
| GRAND TOTAL | <u>4,15,841</u> |

NEW BUILDINGS.

The principal works under this head were—

New Jail at Udaipur. | Palace at Sujjungarh.
Cenotaphs at the Mahasutty.

The Jail was finished and good progress was made on the Sujjungarh Palace, which is expected to be completed during 1887-88. The remaining grant was spent on minor works, costing between two and four thousand rupees each. In addition to these, about ₹25,000 were spent from a distinct fund on

district schools and dispensaries and the new Walter Hospital at Udaipur. Seven schools and 3 dispensaries were completed, and 2 dispensaries were in progress.

NEW ROADS.

These consisted chiefly of the new Chitor and Mangarwar road, which has been completed; and of the Ghat portion of the Udaipur and Eklingji road, on which R4,000 were spent and which is expected to be shortly completed.

NEW IRRIGATION WORKS.

These comprise the reconstruction and enlargement of bunds of several small tanks throughout the state. The construction of a new tank near Deoli, and the improvement of the waste weir and escape channel of the Pichola lake at Udaipur. Six tanks in the districts, which are being enlarged, were well advanced. Good progress was made on 4 others, and the extension of the Pichola waste weir was expected to be finished before the next rains.

GARDENS AT UDAIPUR.

The planting and laying out had made considerable progress and are being steadily proceeded with.

MISCELLANEOUS.

This comprises a large number and variety of small works (such as petty improvements to palaces and public buildings generally) and private roads and gardens, on all of which good progress was made.

REPAIRS.

These included, under head Buildings, R22,000 for repairs to the Udaipur city walls and the Chitor fort walls, which are still in a dilapidated state and will require some years more to put them in proper order. The remainder of the grant was chiefly devoted to miscellaneous repairs of various buildings. Of the Road Repairs grant R10,000 were towards repairing the old Udaipur and Mangarwar road, which requires extensive repairs, but is expected to be completed during 1887-88.

The irrigation repairs were executed mainly on the large Raisamand Lake bund at Kankroli; the face wall of which was much broken up.

MARWAR OR JODHPUR.

The Pachbadra branch of the Jodhpur railway was completed at the close of the year and opened for traffic on the 23rd March 1887. The length of this branch is 60 miles, and it extends from the Luni river to Pachbadra. Its completion brings the total length of the railways in Marwar to 124 miles. The total cost on the branch was R10,90,153, of which R6,16,015 were spent during the year.

The working results of the Jodhpur railway during the year 1886-87 are shown in the abstract below—

| Receipts. | | Expenditure. | |
|-----------|----------|---------------------------|----------|
| | R | | R |
| Coaching | 1,11,100 | Way and works | 20,305 |
| Goods | 91,400 | Locomotive | 34,110 |
| Telegraph | 7,500 | Carriage and wagon | 3,820 |
| | | Traffic | 11,116 |
| | | Special and miscellaneous | 5,518 |
| | | General charges | 3,171 |
| | | TOTAL | 78,040 |
| | | Profits | 1,31,960 |
| TOTAL | 2,10,000 | GRAND TOTAL | 2,10,000 |

Thus, it will be observed that the net profit this year was Rs. 1,31,960, as against Rs. 1,20,536 of last year. The income was Rs. 2,10,000, whilst the outlay against it amounted to Rs. 78,040. The capital expenditure up to the close of the year being Rs. 11,06,062, the percentage of profit on it during the year was at the rate of 11.93.

This result is satisfactory. Eventually so large a percentage cannot be expected, as the line, engines, and rolling stock will require repairs and renewals from time to time. Great credit is due to Mr. Home for the good work and able management of this railway.

During the year under review, the Marwar state expended a total sum of Rs. 9,59,189 on public works. Of this Rs. 66,440 * went towards the working of the open railway line, Rs. 6,18,428 towards the capital expenditure of the line and the new branch, and the rest, Rs. 2,74,321, on public works generally.

The principal public works carried out and the amounts spent on each during the year were—

| | R |
|---|--------|
| 1. Darbar kacheries | 54,648 |
| 2. Balsamand Gulab Sagar canal | 1,329 |
| 3. Jodelao canal | 29,849 |
| 4. Powta tank and canal | 30,015 |
| 5. Public gardens | 32,986 |
| 6. Barracks at Ratanada and Shekhawati tank | 18,490 |

The first buildings, when completed, will unite and provide for all the various offices and courts which are now scattered over the Jodhpur city. They were commenced during the year at an estimated cost of Rs. 3,48,796, the second is the completion of the works going on in previous years for the purpose of supplying the city of Jodhpur with water, at a cost of Rs. 1,41,324 against an estimate of Rs. 1,68,375, the third is a branch of the second—to tap a tank in the hills beyond the Balsamand—and was practically completed at a cost of Rs. 30,000, the estimate being Rs. 37,065, and the fourth is an auxiliary to the above series of canals, of which the estimated cost was Rs. 50,264. Much attention has been paid this year towards public gardens.

The barracks are intended to accommodate each 50 sepoy, 50 sowars, and 50 horses. They were commenced and completed during the year, the estimate being Rs. 25,706.

JAIPUR.

Lieutenant-Colonel Jacob has submitted a printed report on the Public Works Department of the Jaipur state for the twelve months ending 31st December 1886.

The expenditure during this period was Rs. 10,81,940, as under, inclusive of the expenditure on the gas works of Rs. 46,737—

| <i>Original Works—</i> | R |
|---|------------------|
| Civil buildings | 90,079 |
| Communications | 25,366 |
| Repairs | 1,14,009 |
| Irrigation | 2,80,592 |
| Miscellaneous public improvements | 2,33,529 |
| Imarat department | 2,92,765 |
| Establishment | 33,173 |
| Other items | 12,427 |
| TOTAL | <u>10,81,940</u> |

In addition to the above, a few extra works were carried out for private individuals, involving an expenditure of R15,424.

A comparison with the last year's expenditure shows that during the year under report less was spent on irrigation works, whilst on the other hand there was a large increase of expenditure on buildings, *viz.*, about two lakhs of rupees.

It is satisfactory to observe that the charges for supervision amount to only 6·10 per cent.

The chief civil works (buildings) under construction during the year were the Albert Hall and the Hydraulic Steam Cotton Press. On the former the total expenditure was R4,24,160 against the sanctioned estimate for R4,89,589, and the expenditure during the year was R62,666. On the latter the expenditure of the year was R30,797.

The operations of the cotton press began for the first time in December 1885, the beginning of the cotton season. In that month 423 bales, and during the year 1886, 27,623 bales were pressed. The total cost of working the press was R46,206, the returns amounted to R1,04,361, the net profit being therefore R58,155 (not deducting anything for wear and tear), which gives a percentage of 27·23 on the total outlay. The differential duty, which was levied on loose cotton exported from the state, has been removed by the Darbar; and the charge for pressing has been reduced from Co's. R4 to Jaipur R3-8.

The principal work of road construction in the Jaipur state was the last section of 7½ miles beyond Hindown to the Kerowli border, which was completed this year.

JAIPUR WATERWORKS.

The large earthen dam—the *Amanisha Bund*—to ensure a supply of water to the city, has been described in former reports. During the year under review the highest point the water reached was 19' 6½", and this was on the 5th September 1886.

The average daily consumption of water for the past three years was as shown below—

| | Gallons. |
|--------------------------|----------|
| In 1884 it was | 518,002 |
| „ 1885 „ | 560,890 |
| „ 1886 „ | 605,573 |

The total amount of water consumed was equal to 221,964,000 gallons.

The total cost of raising the above quantity of water 109 feet was R32,446, or 2·34 annas per 1,000 gallons. Of this total cost, R22,513 were spent on fuel only. The total cost, including the charges for distribution in the city, repairs, clearance of reservoirs, &c., &c., was R39,088, or 2·82 per 1,000 gallons.

The daily consumption of water during 1886 per head of the population was *more than 5 gallons*.

IRRIGATION.

The expenditure incurred under this head during 1886 was R2,80,592.

Some outlay was incurred on the large Tori Sagar work alluded to in last report, and of the other good projects alluded to in the same report the Boochura Bund, 75 feet in height, was completed, canal dug for some miles, falls made, and work in progress, and irrigation had begun.

The revenue realized during 1886 from irrigation was R2,01,600 and was the largest ever collected.

The area irrigated was 85,287 bighas.

Since the commencement of irrigation works in the Jaipur state, or since the year 1868 the total expenditure on this head has been ₹26,68,544 and the returns derived therefrom amount to no less than ₹10,64,511. This latter figure does not include the revenue realized since August 1886. Deducting from the amount of total expenditure since 1868, the works still in progress, some of them of considerable importance and value, which cannot be expected to yield any return just at present, also the items which are not in their nature remunerative, such as surveys, &c., the total amount realized would bear a proportion of 47·50 on the capital outlay. The cost for supervising the working and the guarding of the tanks, and establishment salaries, &c., averaged 2·71 annas per bigha. Printed statements accompany Lieutenant-Colonel Jacob's report, showing in detail all work done, expenditure incurred and returns realized.

The maintenance charges for the Ram Newas Public Gardens amounted to ₹16,559. The popularity of these gardens as a place for public resort appears to continue unabated. With the printed report of Lieutenant-Colonel Jacob, are also printed, as usual, the reports of his two Native Assistant Engineers and of the Superintendent of the Imarat Works. Although these reports do not appear to require any special mention, they show that these officials have worked well, and Lieutenant-Colonel Jacob finds that the submission of printed reports helps to keep them up to the mark.

The report of the Gas Works by its Superintendent, Mr. Tellery, is also printed as an accompaniment to Lieutenant-Colonel Jacob's report. In 1886 the total expenditure on these works amounted to ₹63,751, and the revenue realized was ₹5,618 against ₹46,798 and ₹2,828 respectively of the year previous.

Regarding Forest Conservancy.—In November 1885 the services of Mr. E. McA. Moir, Deputy Conservator of Forests, and of Bhai Sadhu Singh, Forest Ranger, were lent by Government for the purpose of advising and reporting upon the best means of promoting and managing forest conservancy. Mr. Moir left in March 1886, submitting his report, which was drawn up with ability and care after personally inspecting the country, for which he has earned the well-merited acknowledgments of the Darbar. The services of Bhai Sadhu Singh have been retained for three years, and since Mr. Moir left, he has had sole charge of the Forest Department. The result of these measures was, that eighteen preserves have been sanctioned by the Darbar in the vicinity of Jaipur, of which 11 have been marked out, but owing to certain unavoidable delays in settling existing claims only a small portion has actually come under control. Thirty-five maunds of various seeds were sown. The important subject of date culture, the introduction of which had been strongly advised by Dr. Bonavia, as being valuable in times of scarcity or famine, is receiving considerable attention. Lieutenant-Colonel Jacob brings to notice the energy, ability, and tact of Bhai Sadhu Singh. As the Government of India require notice to be taken of the qualifications and character of non-commissioned officers in the Military Department serving in the Forest Department, Lieutenant-Colonel Jacob specially notices the excellent manner in which Forest Ranger Bhai Sadhu Singh, formerly School Master, 14th Sikhs, has done his work, and his good character. Commencing with the deputation of Mr. Moir in November 1885 up to the close of the year 1886, the expenditure incurred was ₹10,311. Great care is being exercised in introducing and enforcing the Forest Rules with leniency.

As usual, Jaipur stands first amongst the states of Rajputana in its expenditure upon Public Works. Lieutenant-Colonel Jacob's report is full and

interesting and he is deserving of the greatest credit for the quiet unostentatious manner in which he conducts the important duties entrusted to him by the Darbar.

KOTAH.

The expenditure incurred on Public Works in this state during the year was R2,52,812, *viz.*—

| | R |
|---|----------|
| Civil buildings | 35,904 |
| Communications | 42,496 |
| Miscellaneous public improvements | 23,712 |
| Works for other departments | 3,117 |
| Repairs | 60,721 |
| Irrigation | 69,782 |
| Establishment | 17,080 |
| TOTAL | 2,52,812 |

The expenditure during 1885-86 was R2,20,773.

CIVIL BUILDINGS.

The principal works completed during the year and those in progress at its conclusion are enumerated below separately—

WORKS COMPLETED.

| | R |
|---|--------|
| 1. Etawah dispensary, at a total cost of | 5,212 |
| 2. Gunshed in artillery lines, at a total cost of | 11,058 |
| 3. Stud stable, 2nd line, at a total cost of | 11,779 |

WORKS IN PROGRESS.

1. Late Maharao's chattri platform.
2. Kotah sarai.
3. New works to city walls.
4. Nizamat taraj.
5. Topekhiana carpenters and khullassis' shed.
6. Shergarh Fort buildings.
7. Thanas at Untah and Bara.

COMMUNICATIONS.

In the same order are shown the works under this head—

WORKS COMPLETED.

| | R |
|--|--------|
| 1. Khanpur and Bagair road, at a cost of | 9,322 |
| 2. Mundawar and Kalisind road, at a cost of | 3,006 |
| 3. Kalisind causeway at Munderi ghat, at a cost of | 10,811 |

WORKS IN PROGRESS.

1. Rungbari road.
2. Bara and Bapaor road, pucea works.
3. Bhawargarh and Kailwara road.
4. Extension of Lake road in the city.
5. Khanpur and Bagair road, pucea works.
6. Ghat Chumbul below Sakatpur.
7. Kunwas and Durrah road.
8. New road to Chaturpura Mehel.
9. Sangodo road, earthwork.
10. Khanpur and Bapur road, pucea works.
11. Extension of Kalisind causeway.

IRRIGATION WORKS.

The Parbatti Canal.—The hopes entertained of the profitable working of this canal have not yet been realized. To the failures of the past years has been added a difficulty this year by the stoppage at an earlier date than usual of the flow in the river. The extension of the canal to Mangrole, alluded to in the last year's report, about 40 miles from the head, was carried out after the rains. Irrigation from it was commenced, but had to be stopped owing to the cause above set forth, *viz.*, the cessation of the river flow. There are hopes, however, that if a railway is made in this part of the country, an impetus will be given to the cultivation of the lands bordering on the canal and that its usefulness will thus be ensured.

If the supply of water can be insured, the canal would, no doubt, be a protection against famine and prove of great value.

The next irrigation work in importance in the State—*the Eklera Tank*—did not fill this year owing to scanty rainfall. To secure a more permanent supply of water for this tank than the ordinary supply obtainable from the drainage area, a scheme has been sanctioned to divert the flood waters of the Bilas river at an estimated cost of ₹12,175. With this feeder as an auxiliary this fine tank should be safe to fill, even if its own drainage area failed altogether, and should undoubtedly prove a remunerative work.

The Ayani tank will, it is expected, be closed before the next rains.

The Polai khurd tank was commenced this year and was well advanced to completion.

The Bager tank was completed during the year at a cost of ₹6,060.

The small village tanks referred to in last report continue to receive attention, and some work is done in this direction every year for the benefit of villages which suffer from a scanty supply of water.

A small canal in Shergarh Nizamut, now in progress for rice cultivation, will, it is hoped, prove remunerative. The sanctioned amount, ₹9,000, will, however, it is said, have to be increased to about ₹25,000 to enable the ducts being extended, and the waters from the Lussi river being included.

Durrah Neemoda Sarun tank.—The estimate for this work amounts to ₹25,632, of which ₹1,406 were spent during 1885-86, and ₹12,554 during 1886-87, or ₹13,960 in all were expended on the work.

Chatterpura tank.—Sanctioned estimate ₹27,307. This is in no way an irrigation scheme, but was taken up at the express desire of His Highness the Maharao.

The Political Agent speaks of Mr. T. W. Miles, the State Executive Engineer, as continuing fully to merit the favourable comments previously recorded and of his tact in dealing with all classes of Natives, which ensures the smooth working of his department.

JHALLAWAR.

The total expenditure, under all heads, for public works in this state during the year, amounted to ₹1,18,084 as follows:—

| | |
|--------------------------|----------|
| | ₹ |
| Original works | 45,377 |
| Repairs | 23,404 |
| Irrigation | 28,835 |
| Miscellaneous | 5,577 |
| Establishment | 14,891 |
| TOTAL | 1,18,084 |

CIVIL BUILDINGS.

The new works undertaken during the year were—

- Renewing broken wall of Patan city, cost ₹1,474 (completed).
- Sentry boxes, or gumtis, in palace compound (in progress).

Those in progress from previous years, but completed or in progress during this year, were—

| | | |
|---|---|--------------|
| Chuttri to late Maharaj Rana Muddan Singh | } | (completed). |
| Inside works of Chauni jail | | |
| Cook-house at Peetum Newas | | |
| Alterations to Garri-khana | | |
| Patan garden-house (in progress). | | |

The chuttri was completed at a cost of ₹17,532, and the inside jail works cost ₹7,978.

The total expenditure on Patan garden-house was ₹21,538 against the sanctioned estimate of ₹36,533. Work was stopped during the year, as further funds were not available.

COMMUNICATIONS.

No new works of any importance were undertaken during the year. Those commenced during the preceding year and mentioned in the last report for 1885-86 were all completed during this year.

IRRIGATION WORKS.

Under this head also nothing new was done.

The Baria Sagar Tank project mentioned in last report was in progress during the year. The total expenditure on the work was ₹23,036 against the sanctioned estimate of ₹30,253. The grant for the year was not sufficient to finish the work.

It is to be regretted that the Darbar does not show more interest in public works, while they have so efficient an officer as Mr. Miles to carry them out.

ULWAR.

The total amount of outlay on public works in this state during the year was ₹1,42,881, divided under the different heads as follows:—

| | <i>R</i> |
|------------------------------------|-----------------|
| Buildings | 70,992 |
| Roads | 25,921 |
| Bunds (irrigation works) | 17,961 |
| Workshops | 18,691 |
| Establishment | 7,650 |
| Miscellaneous | 1,666 |
| TOTAL | 1,42,881 |

BUILDINGS.

No new buildings were commenced, the expenditure under this head being confined to the following works in progress:—

- Baradari in the Moti Dungri garden.
- Breeding stables and coach-house.
- Fernery.
- Barracks.
- Iron railing in front of palace stables.
- Malakhera gateway, entrance to city.
- Minor works.
- Marble tank in the Moti Dungri garden.

ROADS.

The only new road under construction is that from Umrān to Thana Ghazi, and it is expected that some seven miles of this road will be finished before 31st August 1887; the year's expenditure on it was ₹8,330; the remaining expenditure under this head was incurred on repairs to existing roads.

BUNDS.

Two new bunds, the Baghor in the Lachmangarh and the Galakhera in the Kathumar districts, were under construction, and repairs to existing bunds were carried out.

As there is no Public Works Officer now in the states of Dholepur, Kerowli, or Bhurtpur, no reports are received from these states in the Public Works Branch of this Administration.

Part IV.

REVIEW OF THE REPORTS OF THE POLITICAL AGENCIES.

MEYWAR RESIDENCY.

UDAIPUR, DUNGARPUR, BANSWARA, AND PERTABGARH.

The charge of the Residency was held by Mr. Chiehele Plowden till the 14th of April, by Mr. A. Wingate from the 15th of April to the 27th of July, and by Colonel C. B. Enan-Smith to the 6th of November 1886, on which date Colonel C. K. M. Walter, the permanent incumbent, returned from furlough and resumed charge. Lieutenant-Colonel S. B. Miles, who transmits the report, relieved Colonel Walter on the 28th of April 1887, *i.e.*, after the close of the year under notice.

The rainfall of the year, though generally sufficient, was irregular. Indian-corn was almost destroyed in many parts by excess of rain, while wheat and opium were damaged by frost.

The Jubilee of Her Majesty the Queen-Empress was celebrated with great manifestation of loyalty and good-will by the Chiefs under this Residency. In commemoration of the event, His Highness the Maharana of Udaipur abolished all transit dues within the State except on opium, contributed handsome donations to the Imperial Institute and to the Countess of Dufferin's Fund, and in June 1887 laid with due ceremony the foundation-stone of a building at Udaipur, to be called the Victoria Hall, in front of which it is proposed to erect a full-length statue of Her Majesty.

His Excellency the Viceroy and Governor-General in Council conferred on one of His Highness' nobles, Rao Takht Sing of Bedla, the title of Rao Bahadur as a personal distinction. The Maharana also obtained a well-merited honour in being appointed a Knight Grand Commander of the Most Exalted Order of the Star of India.

UDAIPUR.

The administration continues on the same footing as before, except that the members of the "Mahendra Raj Sabha," or High Court, now number 22, of whom 13 are nobles of the state and 9 officials. The Court is presided over by His Highness in person in all important cases. The judicial statistics furnished by the Darbar do not call for any remarks.

Mr. A. Wingate, Settlement Officer, Meywar, was transferred to Kashmir, and was succeeded by Mr. C. E. Biddulph of the Sind Revenue Survey Department. The Resident, while bringing to notice the very excellent service rendered to the Darbar by Mr. Wingate, remarks that the settlement he has made will prove a lasting benefit to the Chief and people of Meywar, by one and all of whom his name will be handed down to posterity as that of a real benefactor to the State.

The new settlement has been introduced in the zilas of Rasmi and Sarra in the Kapasan and Nagawali parganas of the Chitor zila, and on the Bhilwara zila comprising five parganas. The settlement of the Akola pargana of the Girwa zila is being proceeded with.

The finances of the state are in a very satisfactory condition. The income for the Sambat year 1912, ending on the 16th of July 1886, amounted to Government R26,71,000-5-9, while the expenditure was R24,28,939-12, the resulting balance amounting to R2,45,060-9-9.

Seven thousand four hundred and forty-nine and half chests of opium were weighed at the Chitor scales; of these 7,225 were exported to China and the rest to British India. The amount of duty realized by the British Government was ₹48,53,400.

A most cruel case of poisoning occurred at Deogarh on the 2nd of January 1886. The son of the Rao of Deogarh and his wife were poisoned by Kamdars Nuthraj and Chunilal, who have been sentenced to rigorous imprisonment for life and are confined in the Udaipur jail.

No case of infanticide or of mail robbery occurred during the year. The offenders concerned in the mail robbery that occurred last year on the Udaipur-Chitor postal line were secured and sentenced to various terms of rigorous imprisonment.

The Court of Vakils has done good work this year, and it is satisfactory to note that the more heinous offences, such as murder and highway robbery with wounding, have no place in the record of the year's crime.

The health of the people in the city of Udaipur was very good. Vaccination shows marked progress. A new jail, to accommodate 450 prisoners, is to be opened during the ensuing year.

The Sujjan Hospital at Udaipur was well attended.

The "Shepherd Mission Hospital" was formally opened by His Highness on the 28th of December 1886. The new "Walter Hospital" is still under construction. The hospital for women continues to make satisfactory progress under the superintendence of the Lady Doctor, Mrs. Lonorgan. There are now five dispensaries open in the districts of Meywar, and a hospital is being built at Bhilwara.

The work done in the Maharana's school shows satisfactory results. Education in the districts is making steady progress. The attendance at the four Bhil schools under the Magra Hakim is not so good as it was last year. The Maharana made a grant of ₹1,000 to the Reverend C. S. Thomson of the Church Missionary Society to aid him in carrying on the work of education among the Bhils. At the Mayo College there were 5 Meywar students at the close of the year, as compared with 6 last year.

HILLY TRACTS.

Colonel A. Conolly was in uninterrupted charge of the district throughout the year.

Four cases of murder are reported to have occurred. In only 2 of these have the criminals been arrested and brought to justice. A case of suicide has also been reported.

The Bhil Pals of Surra and Chikla having refused to pay the fine imposed on them for their complicity in the murder of the late Thakur of Umria, the Meywar Darbar in January last proceeded against them in force and took possession of the Pals. Advantage was also taken of the presence of the Darbar troops to realize from the Kodarmal Pal a fine of ₹1,500 decreed against it some five years ago, in connection with a witch-swinging case. Through the exertion of Colonel E. Temple the Bhils and Grassias of Jura have by common consent resolved to renounce the cruel practice of witch-swinging.

A more efficient system of supervision than has hitherto obtained on the Meywar-Mahi Kantha border is under consideration.

No border courts have been held this year.

DUNGARPUR.

The Maharawal of Dungarpur continues to conduct the administration of his state satisfactorily.

BANSWARA AND PERTABGARH.

The charge of the Assistancy was held by Lieutenant A. F. Pinhey during the year.

No cases of witch-swinging or of infanticide have been reported from either Banswara or Pertabgarh.

The extradition rules between Pertabgarh and Banswara are said to have been working not quite satisfactorily.

The Assistant Political Agent held a border court at Khandlu, and in conjunction with the Political Agent, Bhopawar, disposed of 50 cases between Indore, Jhabua, Banswara, Kshahgarh and Pertabgarh. He also met the Assistant Political Agent, Rewa Kantha, and settled 125 cases between Sunth, Baria, Kshahgarh, and Banswara.

BANSWARA.

Owing to the embarrassed condition of the Banswara finances the Kamdar, Rai Bahadur Jwala Pershad, has not succeeded in carrying out all the reforms he has projected. The system of land revenue collections has, however, received some attention during the year.

PERTABGARH.

The management of this state by Mr. Framji Bhickaji is favourably reported on. On the 1st of March 1887 a son and heir was born to His Highness the Maharawal.

WESTERN RAJPUTANA STATES RESIDENCY.

JODHPUR, MULLANI, SEROHI, AND JEYSULMERE.

Colonel H. P. Peacock officiated as Resident from the 4th of April to the 10th of December 1886, during the absence on furlough of the permanent incumbent, Colonel P. W. Powlett, who was present in his charge during the remainder of the year under review.

The rainfall at Jodhpur and Serohi was average, while at Jeysulmere and in Mullani it was somewhat scanty, and consequently in the west and north-west crops were poor. The rabi harvest was greatly injured by frost.

Cholera showed itself at Jodhpur, but the epidemic was not serious.

Mr. Oldham, of the Geological Survey, made a tour through Jeysulmere and Western Marwar in hopes of finding coal, but without success.

The 16th of February 1887, the Jubilee day of Her Majesty's reign, was celebrated in the capitals of the three states under this Residency, with all possible éclat, and handsome contributions were made to the Imperial Institute and the Countess of Dufferin's Fund.

MARWAR.

The Maharaja visited Poona during the year, and had an interview with His Royal Highness the Duke of Connaught. His Highness also saw His Excellency the Viceroy in November at Marwar Junction.

There have been no changes among the leading native officials connected with the Administration. The work of the Civil, Criminal and Appellate Courts appears satisfactory, and cases are disposed of with sufficient promptness.

At the end of the year, the cash balance in the Treasury was ₹3,44,176. The cost of the construction of the Jodhpur Branch Railway, amounting to 22 lakhs of rupees, has all been paid off, except 5 lakhs of rupees. The customs revenue amounted to ₹9,55,000. The salt revenue increased from an average of ₹3,20,000 to ₹4,17,000 last year, while the land revenue yielded ₹6,87,000

against R6,55,000 in the previous year. The total income of the state from all sources amounted to R39,77,059, while the expenditure was R32,61,260.

Maharaj Sir Pertap Singh, K.C.S.I., at the end of March 1887 sailed for England, accompanied by Captain Bruce Hamilton.

The Luni-Paehbadra extension of the Jodhpur railway cost R6,18,428. The line was opened for traffic on the 23rd of March 1887.

Under the efficient direction of Mr. Walter Home, the Engineer-in-Chief and Manager of the railway, large sums are being spent on public works and irrigation. The chief work during the year has been the construction of the state courts and offices.

Boundary settlement work has been pushed forward, and 304 villages have been demarcated.

The famous dakait Padia and his associate, mentioned in last year's report, have been captured and hanged in Godwar, in which pargana there has been a serious increase of dakaiti. Kishorilal, the Durbar Superintendent of Dakaiti Suppression, is reported to have elucidated a number of cases, made many arrests, and recovered a great deal of stolen property.

The Thakurs of Karara and Dewlatti showed a somewhat defiant spirit, but they were soon reduced to submission by the Darbar.

Under the vigorous superintendence of Dr. Adams, sanitation and vaccination continue to progress in Marwar.

Mr. F. T. Hewson, C.S., guardian to the Maharaj Kunwar, died of typhoid fever at Bombay on the 10th of August 1886. His death is deeply and universally felt in Marwar, and especially by His Highness the Maharaja. To commemorate his memory, a girls' school and an hospital have been opened at Jodhpur.

MULLANI.

The settlement and demarcation of village boundaries has progressed fairly well. Out of a total of 493 villages, only 23 remain undemarcated.

Three new schools have been established at Sindri, Godha, and Chotan.

Heinous crime is on the increase in Mullani, while cattle and other thefts have largely decreased.

SEROHI.

There is no statement of the income and expenditure of Serohi, but according to the Darbar reports, the State revenue has fallen far short of last year's.

Owing to the contumacious behaviour of the Raipur and Magriwara Thakurs, the settlement of their border disputes was slow.

The long-standing differences existing between the Rao of Serohi and his uncle Jamat Singh have been amicably settled. The latter agreed to give up his Jagir to the Darbar in return for a monthly pension, which is to be continued to his widows, and to the heirs of his body.

JEYSULMERE.

Owing to the failure of crops, little progress is reported in this state. The revenue is given at R1,39,354, and the expenditure is estimated at R1,74,300.

During the year the Resident visited Jeysulmere and saw many Sardars, and endeavoured to arouse them to the necessity of discouraging theft and robbery in their estates.

EASTERN RAJPUTANA STATES RESIDENCY.

JAIPUR, KISHENGARH, AND LAWLA.

Mr. F. Henvey, C.S., held charge of the Residency throughout the year.

At Jaipur the rainfall was below the average, while at Kishengarh it was between 27 and 28 inches, but, owing to untimely distribution, its effect on the crops was unsatisfactory. The rahi harvest was damaged by frost. General health was good, although there was a little cholera imported from Pushkar Fair.

The Jubilee of Her Majesty the Queen-Empress of India was celebrated on the 16th and 17th of February 1887 with much demonstration of loyalty, both at Jaipur and Kishengarh. In honour of the occasion, His Highness the Maharaja of Jaipur remitted to the agricultural classes arrears of fines, compensation, and process fees, amounting to not less than twelve lakhs of rupees, bestowed the title of "Bahadur" on (1) Thakur Gohind Singh of Chomu, premier noble of the state; and (2) Rao Raja Madho Singh of Sikar, and contributed one lakh of rupees to the Countess of Dufferin's Fund. The Government of India raised the Maharaja's salute from 17 to 19 guns as a personal distinction, and conferred upon His Highness's trusted Councillor, Babu Kanti Chandra Mukerji, the title of "Rao Bahadur."

JAIPUR.

Sir Edward Bradford, K.C.S.I., opened, on the 21st of February 1887, the Albert Hall, founded by the late Maharaja Ram Singh in 1876, in commemoration of the visit of the Prince of Wales to Jaipur.

The relations of the state with its feudatories are amicable. During the year, certain Rajput zamindars of Kot Putli complained against the Raja of Khetri for exacting more revenue than was due. At the suggestion of the Jaipur Darbar, the complainants were conciliated by the Raja, and for the present the quarrels between the parties have ceased.

Sangram Singh, Rao Raja of Umara, died without issue on the 20th of September 1886. He had adopted as his heir his brother, a child about two years old, whose succession to the Chiefship has been confirmed by the Maharaja. During the minority it will be the care of the Jaipur Darbar to provide for the proper management of the estate, which is reported to be heavily indebted.

The constitution of the Jaipur Council remains unchanged. It has now become necessary for the heads of the three departments into which the Council is divided to inspect the offices which they control. The working of the civil and criminal courts shows that the officers are diligent and expeditious. Pandit Maharaj Kishen has continued to do good work as Judicial Officer in the Council.

Owing to the badness of the season the income of the state for 1886 only reached R53,51,315, the expenditure being R52,77,825 and 87 gold mohurs.

Of the sum expended, R7,50,000 were devoted to works, repairs, improvements and public buildings, while R2,80,592 were spent on irrigation. It is under contemplation to build a new jail, the cost of which is estimated at R1,13,000. In spite of the insufficient accommodation in the present building the health of the prisoners is stated to have been good.

There were fewer of the more serious offences against life and property. This result is in a great measure due to the excellent frontier police arrangement made some years ago.

The question of settling down the Minas, who are more numerous in Jaipur than the Moghins is engaging the attention of the Darbar, which has deputed Sardar Bahadur Singh to ascertain whether this criminal tribe has sufficient resources for an honest livelihood, and, if not, what measures should be adopted to improve its status.

As District Magistrate on the railway, the Resident tried 11 cases; among the criminals were 7 European British subjects, of whom 2 were sentenced to rigorous imprisonment, and 2 were fined.

The Court of Vakils disposed of 77 cases during the year. Claims for compensation amounted to R3,823-4-6, but only R1,084-13-4 were awarded.

The Darbar inflicted heavy punishments on certain of its customs officials and others, who were found guilty of conniving at, and aiding, the illicit exportation of opium by some Punjabi traders from the Hindown district to territories under the Punjab Government on passes made out for Ulwar.

The cotton press established in December 1885 has been successfully and profitably managed.

Since the departure of Mr. E. MacA. Moir in the spring of 1886 the Jaipur forests are under the charge of Forest Ranger Sadhu Singh, who does his work well under the supervision of Colonel Jacob.

Education is steadily progressing.

With the sympathy and approbation of the principal nobles of the State, the Maharaja has framed certain regulations for the limitation of expenses on the occasions of marriages and funerals among Rajputs.

All important boundary disputes were settled during the year.

KISHENGARH.

In the summer His Highness the Maharaja proceeded upon a pilgrimage to Kotah, passing through Bundi, where he met the Maharao Raja.

In January 1887, the Maharaja's youngest sister was married to the Maharaj Rana of Jhallawar.

Babu Syam Sunderlal has succeeded in carrying out many reforms in the administration of the state. A proper method of keeping accounts has been introduced, the forms of revenue returns and records have been revised, a city police has been organized, the judicial powers of the various tribunals have been re-distributed, and an improvement in the machinery of the State courts is commenced.

The Durbar Office is now presided over by His Highness, who regularly conducts business in person daily, with the aid of the Council, and hears petitions from the people once a week.

The budget for the year ending July 1887, which has been prepared for the first time, shows an income of R3,47,583, including an opening balance of R18,956, and an expenditure of R2,76,916, leaving a balance of R70,667.

The actuals for eight months ending March 1887 show receipts R2,12,004 and expenditure R1,99,137.

Two new irrigation tanks are under construction, one at Didwana and the other at Surgaon.

In commemoration of Her Majesty's Jubilee, a school-house is to be built. The State school bears 82 scholars on its rolls.

LAWA.

This small chiefship is in a flourishing condition. Its income is largely in excess of the ordinary expenditure.

On the 5th of May 1886, the Thakur lost his only son, a child of tender age.

BHURTPUR, KEROWLI, AND DHOLEPUR.

Colonel C. B. Euan-Smith, C.S.I., was in charge of the Agency from the 1st to the 29th of April 1886, Captain C. Herbert from the 30th of April to the

26th of July 1886, Lieutenant-Colonel F. A. Wilson from the 27th of July to the 7th of November 1886, Colonel Euan-Smith from the 8th of November 1886 to the 8th of March 1887, and Major N. C. Martelli from the 9th to the 31st of March 1887. The last-named officer submits the annual report which has been written from the notes left by his predecessor.

BHURTPUR.

Notwithstanding a rainfall below the average and severe frosts in February 1887, which did a deal of damage throughout Rajputana, the crops are said to have been excellent.

There were no epidemics and the general health was good.

The number of schools is decreasing year by year, being 161 in 1886-87 against 167 in 1885-86, 172 in 1884-85, and 176 in 1883-84, while the cost of their maintenance has risen from R20,258-2-0 in 1885-86 to R21,745-6-6 in 1886-87. These charges are, however, below those of 1881-85, when they were returned at R23,335-13-6. The students were also fewer in number than in the two preceding years.

The circumstances under which the Darbar troops were employed to reduce to submission the rebellious Thakurs of the village of Pathana have already been reported to the Government of India, who considered that the Darbar's action was, under the circumstances, justifiable.

The finances of the state are in a sound condition, the income being over R1,69,773 in excess of the expenditure.

No cases of daktaiti or infanticide are reported to have occurred.

The trade returns show an increasing revenue from customs.

The Maharaja visited Simla for one month in the hot weather. He also left his capital to call on Sir Alfred Lyall at Agra, and to accompany the Agent to the Governor-General on tour through the Bhurtpur territory.

There were two sons born to His Highness during the year, one on the 30th of November 1886, and the other on the 7th of January 1887.

The Queen's Jubilee was kept up in this state as loyally as in other parts of Rajputana.

KEROWLI.

The crops suffered at one season from excessive rain, and at another from frost and cold, the result being harvests below the average.

Cholera did not visit the district, but small-pox claimed several victims. The general health of the district, however, is said to have been on the whole good. The municipality seem to be doing their utmost to keep the city clean.

The attendance of the boys at the City School has diminished. The figures for 1884-85, 1885-86, and 1886-87 are respectively 221, 208, and 141-68. But a new Head Master has been appointed, and it is hoped he may be able to secure better results. Education in the district is at a stand-still. The schools, which it was mentioned in the Report for 1884-85 would be opened at the head-quarters of each of the five tehsils in the state, have not yet been established, but the Council have again considered the project, and there is some prospect of action being taken in the matter.

The dispensary returns exhibit satisfactory results. The numbers relieved at them have increased from 16,755 in 1885-86 to 18,076 in 1886-87. There is a very considerable decrease in the number of cases of vaccination, but the percentage of successful to total number of operations is a trifle below that of the preceding year.

His Highness the Maharaja joined the State Council as President. No change has taken place in the personnel of the Administration.

In addition to the annual instalment of ₹30,000 towards repayment of the State debt, the Maharaja paid ₹36,824 out of his private purse to the banker. It is anticipated that the entire debt will be repaid during the current year.

The judicial administration appears to have been successful, judged by the small number of appeals preferred and cases left pending.

There were no cases of serious crime or infanticide during the year.

Maharaja Urjan Pal died on the 26th of July 1886, and was succeeded by Bhonwar Pal, Rao of Hadoti, who is said to have developed a marked capacity for the work before him.

In commemoration of the Queen's Jubilee, the Darbar are about to erect a bridge to be called the "Kaiser-i-Hind Bridge" over the Panchua river.

DHOLEPUR.

The cause of education does not appear to be making any advance in this state. Within the last four years the number of schools has decreased by one and of students by 118.

Twenty-three thousand and thirteen patients were treated at the four dispensaries in the state.

Crime appears to be diminishing, the number of criminal cases before the courts, including those brought over from the preceding year being 1,974 in 1884-85, 1,374 in 1885-86, and 1,229 in 1886-87.

The number of civil cases increased from 551 in 1885-86 to 734 in 1886-87; 80 cases were left pending at the close of the former year and 112 at that of the latter.

The number of prisoners sent to jail was 71, against 60 during the preceding year.

Rupees 53,000, being the balance of the Government loan due, were repaid, and this account is therefore closed. A statement showing the liabilities of the State on the 31st of March 1887 is appended to the Political Agent's report. A special report on the finances of the state has since been submitted to the Government of India.

His Highness the Maharaj Rana resided at Simla for four months during the hot weather.

The Queen's Jubilee was celebrated on the 16th of February 1887 with suitable rejoicings.

HARAOTI AND TONK AGENCY.

BUNDI, TONK, AND SHAHPURA.

Lieutenant-Colonel J. Biddulph has held charge of this Agency during the year.

The general health of the district was exceptionally good, there having been no cholera and but few cases of small-pox. The rainfall of the year was considerably below the average.

Kharif crops suffered much damage, and the rabi sowings were short. In February severe frosts destroyed the gram crop, while wheat, barley, and opium all suffered.

The Jubilee of Her Majesty the Queen-Empress was celebrated with suitable rejoicings in the states under this Agency. In commemoration of the event the Maharao Raja of Bundi announced his intention of constructing a house for European visitors, a serai for native travellers, and a new hospital.

In addition to the contribution of ₹1,000 towards the Imperial institute in London, His Highness the Nawab of Tonk subscribed ₹5,000 for the establishment of a school of industry with a permanent endowment of ₹3,000 for its support, and for building a serai. The Raja Dhiraj of Shahpura held a special Darbar at which all the jagirdars were present.

The Haraoti International Court of Vakils disposed of 49 cases during the year.

BUNDI.

The Maharao Raja continues to enjoy good health. The senior Maharani of the Nagode family and Ruggluhar Singh, the youngest son of His Highness, died during the year. It was this son, not the heir-apparent, as erroneously mentioned in last year's report, who was betrothed to the niece of the Maharaja of Kishengarh.

There have been certain changes in the personnel of the Administration. Pandit Ganga Sahai resigned the Kamdarship of the state, and was succeeded by Bohra Haridutt, who previously held the office of Bakshi of Jagirs.

Two old orders of the Darbar with regard to witchcraft and infant marriage were re-published.

There were 3 cases of dakaiti. Some improvement has been effected in the police arrangements by the entertainment of 102 additional chowkidars.

The Ghora Pichar causeway and Khawasji-ki-Baori were completed during the year. The services of a trained overseer have been secured by the Darbar.

The old Bundi rupee, containing an alloy of $3\frac{1}{2}$ rattis, was superseded by a new rupee containing $1\frac{1}{2}$ rattis alloy.

Nothing is known about the state of the finances, as the Darbar has not furnished the usual statements.

His Highness's relations with Bir Singh, the new Maharaja of Kapran, are not on a satisfactory footing.

TONK

During the year four sons and two daughters were born to His Highness the Nawab.

A complete reform has been introduced into the various branches of the State administration. A council has been formed, a sound system of accounts has been established, extravagant expenditure has been checked, improvements have been made in the judicial machinery of the state, the numerous imposts, which were the cause of constant complaints have been abolished, and the customs department has been re-organized under the supervision of Mirza Muhammed Akbar Ali Khan.

Under the direction of Captain T. C. Pears, whose services were placed at the disposal of the Darbar in November 1886, good progress is being done in the work of land revenue, survey, and settlement.

A case of "Johar," or human sacrifice, occurred at Girawla in the Nimbarahera pargana, in which two women were burnt alive. Prompt measures were taken by the Darbar on intimation of the offence reaching them, and the ring-leaders and others concerned in the affair were brought to justice.

The new Central Jail, which has been under construction for some years past, was completed.

Education appears to be progressing steadily. The heir-apparent continues to study in the Mayo College.

The establishment of Munsiff's courts in outlying districts has given general satisfaction.

Certain Sahibzadas of Tonk showed a spirit of disobedience to the Darbar; but, on being punished, they made their submission and were restored to favour.

The sanitary arrangements of the capital are improving.

Of the 66 boundary disputes pending on the Meywar-Nimbahera border, 19 were decided during the year.

SHAH PURA.

The Rajadhiraj visited Maxudangurh and Mount Abu.

The affairs of the chiefship have been satisfactorily carried on. The income of the estate was R2,88,983 and the expenditure was R2,45,563.

Numerous petitions were received during the year complaining of mal-administration in Shahpura, but on enquiry the complaints were found to be ill-founded.

In August, 1886 Thakur Nathu Singh, of Khamore died, and was succeeded by his brother Zorawar Singh.

ULWAR AGENCY.

ULWAR AND NIMRANA.

The political charge of the Agency was held from April to December 1886 by Lieutenant-Colonel A. W. Roberts, when he was relieved by Colonel H. P. Peacock.

The rainfall was good, but owing to untimely distribution its effect on crops was unsatisfactory, the kharif and rabi being both below the average.

The Queen's Jubilee was observed with much ceremony. His Highness, in addition to the ordinary programme for the day, further gave proof of his loyalty by presenting a Jubilee offering of R50,000 to the National Association for supplying Female Medical Aid to the Women of India, founding a hospital for women in the capital of Ulwar, ordering the construction of three dispensaries in the Ulwar territory, and dedicating a beautiful marble tank now under construction in Ulwar.

The state suffered a heavy loss by the death in December 1886 of Lala Sri Ram, M.A., Diwan of Ulwar, who is reported to have rendered valuable assistance to the Maharao Raja in the administration of His Highness's state. The vacancy in the Council caused by his death has not yet been filled up.

The various judicial courts continued to transact business actively and satisfactorily.

No case of infanticide, mail robbery, or dakaiti, came to notice during the year.

The Political Agent, in his capacity of Magistrate of the Railway jurisdiction, had but 4 unimportant cases to dispose of.

The education report is satisfactory, and shows an increase in the number of scholars and schools. Including the Raja of Nimrana there are now five Ulwar boys at the Mayo College.

The revenue of the state amounted to R25,07,727, while the expenditure was R18,86,970, of which R1,42,881 were spent on Public Works, and R5,34,658 on the Army. The cash balance of the state has now reached R32,68,816.

There was no epidemic during the year. Miss Smith, the Lady Doctor, is reported to have done much good work in Ulwar.

The jail is well managed.

The Political Agent was on tour for 52 days, during which he visited every district in the state.

NIMRANA.

The young Raja is being educated at the Mayo College.

The income of the estate amounted to ₹31,993-6-0, while the expenditure was ₹15,949, of which ₹26,000 were on account of nazrana to Ulwar on succession to the gadi of Nimrana. The cash balance amounted to ₹17,107-6-2.

KOTAH AGENCY.

The political charge of this Agency was held by Major W. H. C. Wylie, C.I.E., from the 1st of April to the 24th of November 1886, on which date Lieutenant-Colonel C. A. Bayley resumed charge on return from furlough.

There was no change during the year in the constitution of the Council.

The revenue and expenditure of the state fell short of the estimates by ₹2,32,617 and ₹15,798 respectively. The heavy deficit in revenue receipts is almost entirely due to the continued depression in the opium trade, and the low selling price of cereals, though these prices, owing to a brisker export trade, appear latterly to have been improving considerably. The estimated receipts for the current year have been reduced by ₹1,13,900, and the estimated expenditure increased by ₹36,792. This increase in the estimated expenditure is mainly owing to a fresh item in the shape of an allowance to village patels termed huq pateli, which was sanctioned in August last, and the total amount of which is calculated at ₹32,000. Notwithstanding the deficit in the revenue, the finances of the state appear to be in a satisfactory condition.

The revenue settlement has been practically brought to a conclusion owing to the exertions of Munshi Durga Pershad, Superintendent, and Chobe Rughnath Das, Assistant Superintendent of the Settlement, who have performed their duties in a most zealous and able manner. The district revenue officials and the patwaris are being gradually and steadily trained in revenue and survey work.

The working of the civil, criminal, and appellate courts, which were presided over by the same officials as last year, does not call for any special remarks.

The report for the year under review shows a trifling increase in crime, but only one dakaiti occurred, in which property valued at less than ₹20 was carried off.

No cases of infanticide were brought to notice during the year.

The Kotah Jail continues to be well and carefully managed. The total number of prisoners in 1886-87 was 494, as compared with 483 in the previous year. The death-rate was 13.01 against 13.89 in 1885-86. There were no escapes, and no epidemic outbreak occurred.

Two new schools have been opened during the year. The daily average attendance at the schools, including that at the Kotah City school, was 662.

During the cold season 3,736 children were vaccinated, the percentage of successful cases being 95.90.

The general health of the people in the city of Kotah and the district has been good, and there was no outbreak of disease in an epidemic form.

There were 7 boys from the Kotah state at the Mayo College during the year.

The fall of rain was fairly good, being 31 inches, but being untimely, the kharif crops were not so much benefited as they would otherwise have been. There was no cold-weather rain, consequently the rabi crop has proved light and below the average. Much damage was also caused to the opium and gram crops by the frosts early in February, and the linseed suffered from disease, which nearly destroyed it in places.

Under the head of Irrigation, there are no new works of importance to record, but the extension of the Parbatti canal northward seems likely to be a success.

The work of preserving the forests from destruction is making slow but sure progress, and Babu Sahib Roy, the trained Forest Superintendent who was appointed last year, seems likely to do good work as he becomes thoroughly acquainted with the large forest tracts of the state.

During tour the Political Agent visited 11 out of the 15 districts of the state.

The principal event of the year was the celebration of the Queen's Jubilee, the rejoicings in connection with which were entered into most heartily by the Maharao, His Sirdars, and officials, and by the people generally at Kotah.

Her Highness the Maji Mansingothji, one of the widows of the late Maharao of Kotah, died of fever on the 16th of June 1886.

THE KOTRIS.

There is little to remark with reference to the Kotris which are all in a satisfactory condition, with the exception of Indargarh, Khatoli and Bulwan.

Little improvement has as yet been effected in the financial condition of the last three, but steps have been taken to place them under more efficient management, which will, I trust, lead to satisfactory results.

JHALLAWAR AGENCY.

Lieutenant-Colonel H. B. Abbott resumed charge of the Agency on the 19th of December 1886. During his absence on leave Major H. Wylie, C.S.I., and Captain W. H. C. Wylie, C.I.E., held charge of the office at different times.

In January 1887 the Maharaj Rana married the sister of the Maharaja of Kishengarh. The marriage took place at Kishengarh, where the festivities were kept up for four days. The Maharaj Rana returned to Jhalrapatan on the 16th of February. This being the day set apart for commemorating the Jubilee of the Queen-Empress, the town and chaoni were decorated with triumphal arches, and at night illuminations and fireworks provided entertainment for the people. An imperial salute of 101 guns was fired at noon.

Kunwar Sheodan Singh was summoned to Jeysulmere by his relative the Maharawal, and was therefore obliged to resign his seat in the Jhallawar Council. The two vacancies in the council mentioned in last year's report have been filled up, but the appointments are still under discussion.

The rainfall was about the average, and except for the opium and wheat crops, which suffered from the cold, the harvests were good.

Small-pox made its appearance in the state, but, on the whole, health was fair.

Vaccination does not appear to be increasing in popularity, judging from the fact that during the year the number of operations was less than during the two preceding years, says Colonel Abbott, but perhaps the birth-rate had something to do with the diminished number of operations, since in last year's report (page 241) a steady increase year by year was recorded.

In the budget for 1885-86 provision was made for ₹1,50,000 for public works, but of this sum only ₹1,31,653 were utilized. The Political Agent notices the decreasing interest of the Darbar in works of this nature, and will draw their attention to the importance of the subject.

Another school was opened during the year.

The finances of the state appear to be in a satisfactory condition. The surplus balance with which the year 1885-86 opened, was ₹5,58,000, and that carried forward as the opening balance of 1886-87 was ₹5,80,000. In 1885-86 the receipts under land revenue, customs, and miscellaneous were far below the

estimated amounts. The reason given by the Darbar for the diminished receipts under Land Revenue is that they are due to land being thrown out of cultivation, damage to crops by hail, and low prices, but the Political Agent attributes the loss to bad management by incompetent officials who have replaced really capable men.

Having taken over charge so late as the middle of December, the Political Agent was only able to make a tour extending over three weeks, visiting the eastern parganas and the district of Shahabad.

BIKANIR AGENCY.

Major A. C. Talbot, C.I.E., continued to hold charge of this Agency until the 5th of March 1887, on which date he was relieved by Captain A. P. Thornton, who held charge until the close of the year under review.

With reference to the Sirdars there is nothing calling for special mention beyond the death of Rawat Ranjit Singh, Pattadar of Rawatsar, who was succeeded by his son Hukm Singh.

No change has taken place in the constitution of the Council during the year, who have done excellent work in continuing and consolidating the reforms detailed in previous Administration Reports.

The customs department has been under the supervision of Seth Nemi-chand. A tax known as the "Dhunwa" and "Rakhwali-bach," which brought in about ₹18,000 annually, was abolished during the year, its retention being considered unnecessary.

There have been 123 applications for compensation on account of trade privileges, which have been abolished by the new custom system. Thirty-two of these claims have been settled for an annual payment of ₹6,700-4-0. Ten have been rejected, leaving ₹1, which have still to be decided.

The chain measurement of khalsa land has been completed: 56,33,340 bighas of land were measured at a cost of ₹13,500, or about half a pie per bigha.

No orders have as yet been published by the Punjab Government on the scheme for the better utilization of the water in the Ghaggar river. This delay is the more to be regretted, as, owing to the scanty rainfall during the past two years, the cultivators of the Bikanir parganas interested in the matter have and are suffering great loss and hardship from want of water.

The rainfall was below the average throughout the state, the parganas of Hanumangarh, Nohar, Suratgarh, and Anupgarh having suffered most. In the parganas of Sirdarshahr, Sujangarh, Ratangarh, and a portion of Dungargarh, where the rainfall was of average amount, there is sufficient grain and fodder, but in the other parganas there will in all probability be some scarcity.

The condition of the cultivating classes is fairly good, except in the tahsils of Hanumangarh, Suratgarh, Anupgarh, and a portion of Nohar. Recoveries on account of grain advanced to distressed cultivators by the Darbar have been deferred till next year, and a remission of revenue to the amount of ₹25,000 has also been granted in the above-named villages.

In some places in the Hanumangarh and Suratgarh parganas silos have been dug and stocked with green grass.

The finances of the state are in a satisfactory condition, the total income and expenditure being respectively ₹19,14,261-14-9 and ₹16,10,986-8-3, leaving a favourable balance of ₹3,03,275-6-5 at the close of the year. The inquiries into the liabilities of the state were completed, and the debt extinguished by a total disbursement of ₹5,46,488.

The working of the courts, both civil and criminal, has been satisfactory. The nizamats and tahsils had to deal with 7,062 revenue cases, and 971 were pending on the 1st of April 1887. The working of these courts calls for no special remark.

The Thakurs' Court was abolished from the 1st of January 1887, and its president, Pundit Kalka Pershad, was appointed Nazim of the Sadr Nizamat at Bikanir.

Branch dispensaries were opened during the year at Ratangarh, Sirdarshchr, and Churn, and a second city dispensary will be opened shortly. Dispensary buildings are ready for occupation at Nohar, Bahadra, Hanumangarh, and Rajgarh, but their opening has been delayed by the difficulty of obtaining the services of properly qualified assistants. Great progress in the medical administration of the state has been made in late years, as is evident from the fact that the number of in and out-patients treated shows an increase in 1886 of 507 and 14,810, respectively, over the average number of cases treated in the last five years. The vaccination establishment was increased to one native superintendent and 8 vaccinators, and 10,308 individuals were operated on during the year. Improvement is also being made in sanitation.

Cholera broke out in the middle of November, but was slight, only 5 cases, with one death, being reported in Bikanir city, and 23 cases, with one death, in Ratangarh.

Surgeon P. D. Pank continued in medical charge of the Agency, and it is chiefly due to the exertions of this zealous and able officer that such great progress has been made during the last year in the development of medical institutions, whilst the large increase of applicants for relief, and the number of important surgical cases brought for operation, testify to the confidence of the people in his skill.

With reference to the jail, little improvements have been made either as to management or accommodation.

No cases of infanticide were reported during the year.

Eight new post offices were opened during the year.

The school at Bikanir is largely attended, the average daily attendance during the year being 201.4. Two new schools have been opened, and His Highness the Maharaja has also signified his intention to build a girls' school at Bikanir in honour of the Jubilee of Her Majesty the Queen-Empress.

There are 6 boys from the Bikanir state now being educated at the Mayo College. His Highness the Maharaja has subscribed R600 towards the institution of a prize for proficiency in Hindi.

The Jubilee of Her Majesty Queen Victoria, Empress of India, was celebrated with great éclat and all the rejoicings were entered into by His Highness the Maharaja, the State officials, and the people, with a loyalty and sincerity which was very marked. His Highness announced his intention, in honour of the occasion, of devoting one lakh of rupees in providing wells and schools in the state, and he has also forwarded a donation of R30,000 to the Imperial Institute, and a second donation of R5,000 to the Countess of Dufferin's Fund, the inhabitants of Bikanir contributing a large sum on their own account.

The Political Agent was on tour from the 15th of November 1886 to the 30th of January 1887, during which time most parts of the state were visited by him.

APPENDICES.

APPENDIX A.

Statement showing such Meteorological Observations as have been obtained from Stations in Rajputana during the year 1886-87.

APPENDIX B.

REPORT ON THE MAYO COLLEGE, AJMERE, FOR 1886-87.

No. 71, dated the Ajmere, 14th April 1887.

From—MAJOR WILLIAM LOCH, A.D.C., *Principal of the Mayo College, Ajmere,*
To—*The First Assistant Agent to the Governor-General in Rajputana, Abu.*

I HAVE the honour to submit, for the information of the Agent to the Governor-General and Chief Commissioner, a report on the Mayo College for the year 1886-87.

Number of pupils at last report.
Admissions during the year.

2. On the date of my last report there were 80 boys on the College roll, the new admissions during the year were 9, making a total of 89.

3. The withdrawals during
Withdrawals.
Number of boys remaining on College roll.

the year were 13, thereby leaving 76 boys on the College roll, exhibiting a small decrease of 4, but which number I have every reason to hope will not only be recovered by new admissions during the current year but considerably exceeded.

Names of new admissions.

4. The names of new admissions are as follows :—

- (1) Fateh Singh, Rawal of Samode, Jaipur. Joined 28th June 1886.
- (2) Janak Singh, Raja of Nimrana, Ulwar. Joined 28th June 1886.
- (3) Dhul Singh, son of the Thakur of Dabri, Kotah. Joined 10th July 1886.
- (4) Ram Singh, son of the Rao of Nizamnagar, Ulwar. Joined 16th July 1886.
- (5) Tej Singh, son of the Rao of Salumber, Meywar. Joined 24th July 1886.
- (6) Madhava Singh, grandson of the Rao of Batera, Meywar. Joined 3rd August 1886.
- (7) Durjan Singh, brother of the Thakur of Pokurn, Marwar. Joined 30th August 1886.
- (8) Kalian Singh, son of the Thakur of Barli, Marwar. Joined 30th August 1886.
- (9) Lachman Singh, Thakur of Bursu, Marwar. Joined 4th September 1886.

Names of boys withdrawn.

5. The boys who left the College were :—

- (1) Maharaj Zalim Singh of Jodhpur.
- (2) Thakur Karan Singh of Jobnir, Jaipur.
- (3) Thakur Jawahir Singh of Baniana, Jaipur.
- (4) Thakur Daulat Singh of Khora, Ulwar.
- (5) Thakur Simbhu Singh of Awa, Marwar.
- (6) Thakur Ratan Singh of Bansia, Marwar.
- (7) Rawat Sheonath Singh of Ahmet, Meywar.
- (8) Thakur Debi Singh of Palwa, Ulwar.
- (9) Kanwar Amir Singh of Ulwar.
- (10) Tika Balbir Singh of Faridkot, Punjab.
- (11) Thakur Gobind Singh of Khaehariawas, Jaipur.
- (12) Rawat Hukm Singh of Rawatsar, Bikanir.
- (13) Sahibzadah Muhammad Abd-ul-kuddus Khan of Tonk.

The first 12 had attained their majority, and the 13th was withdrawn at the request of the Darbar.

Distribution of the College roll.

6. The College roll now stands as follows :—

| | | | |
|-------------------------|----------|---------------------|----------|
| Ajmere | 10 boys. | Mahikanta | 1 boy. |
| Bikanir | 5 " | Meywar | 7 boys. |
| Central India | 1 boy. | Serohi | 1 boy. |
| Jaipur | 11 boys. | Tonk | 10 boys. |
| Jhallawar | 4. " | Ulwar | 3 " |
| Kerauli | 1 boy. | | — |
| Kishengarh | 1 " | | — |
| Kotah | 7 boys. | | — |
| Marwar | 14. " | | — |
| | | TOTAL | 76 boys. |

States remaining unrepresented.

7. The following states of Rajputana still remain unrepresented :—

Banswara, Bhurtpur, Bundi, Dholepur, Dungarpur, Jeysulmere, and Pertabgarh.

8. It is with pleasure I am able to report greater punctuality in the return of the boys from their summer vacation on the 28th June 1886 : 43 boys against 22 in the last year were present on the opening day, and I trust that the encouragement which is now being given to punctual rejoining from leave and regularity in attendance, may lead to still better results in the future.

Return from vacation.

9. The conduct of the boys throughout the College has been on the whole satisfactory, and I have much pleasure in reporting the selection of Kanwar Dip Singh of Garhsisar, Bikanir, for the Good Conduct Medal.

Conduct.

The following names were also submitted by the boys as worthy of special mention for good behaviour :—

Kanwar Gaj Singh of Bandanwara,
 Sahibzada Muhammad Inayatullah Khan of Tonk,
 Maharaj Mul Singh of Dattigaon,
 Thakur Mangal Singh of Pokurn,
 Bhanwar Madhav Singh of Batera,
 Kanwar Onkar Singh of Palaitla,
 Sahibzadah Muhammad Inamullah Khan of Tonk,
 Maharaj Man Singh of Fatehgarh,
 Thakur Harnath Singh, brother of the Thakur of Para,
 Kanwar Pratab Singh of Bagru and
 Kanwar Ram Singh of Nizamnagar.

10. The health of the boys has been exceptionally good, the daily average number of sick showing the extraordinarily low figure of .7 and bearing favourable comparison with 1.17 of last year.

Health.

11. In November last an epidemic of cholera which broke out at Pushkar extended into the Mayo College Park, but I am thankful to report there were no cases amongst the boys.

Daily average number of boys on College roll and present at College.

12. During the year under report the daily average number on the College roll has been 77.34 against 75.65 in 1885-86.

13. The daily average number present at College was 63.66 against 64.11 in the preceding year, showing the slight falling off of .45, which, although immaterial, was, I regret to say, due to the continued absence of Kanwar Takht Singh of Dhanoda Jhallawar, and Thakur Udaya Singh of Danta, Jaipur, throughout the whole term, as well as to a greater number of marriages taking place, which necessitated leave of absence being granted to a number of the boys.

14. I beg to attach a progress report (Appendix E) for the term commencing 28th June 1886, and ending 30th March 1887, and I would specially mention the following boys for their industry and attention :—

Progress.

Kanwar Dip Singh of Garhsisar, Bikanir,
 Thakur Lachman Singh of Bagsuri, Ajmere,
 Thakur Mangal Singh of Pokurn, Marwar,
 Kanwar Dalpat Singh of Manadar, Sirohi,
 Thakur Sham Singh of Raghnnathgarh,
 Rana Zorawar Singh of Lohiana,
 Kanwar Onkar Singh of Palaitla,
 Sahibzadah Mubammad Abdul Latif Khan of Tonk,
 Thakur Bijaya Singh of Riyau,
 Kanwar Rirmal Singh of Dobri,
 Sahibzadah Muhammad Inam-ulla Khan of Tonk,
 Sahibzadah Muhammad Abdul Hafiz Khan of Tonk,
 Bhanwar Madhav Singh of Batera,
 Maharaj Mul Singh of Dattigaon,
 Thakur Hari Singh of Mahajan,
 Kanwar Durjan Singh, brother of the Thakur of Pokurn and
 Kanwar Tej Singh of Salumber, Meywar.

Prizes. 15. The prizes for the year 1885-86 were distributed on the 30th March 1887.

I beg to attach the Prize list (Appendix F) which contains a number of prizes, which several of the Chiefs of Rajputana were good enough to present to the College, as notified in paragraph 36 of my last year's report.

16. On the 16th February 1887, on the occasion of the Jubilee of Her Most Gracious Majesty, the Queen-Empress, the Ajmere boys attended the Chief events during the year: "the Queen's Jubilee." Darbar held by the Agent to the Governor-General for Rajputana, in the Kaisar Bagh, and the whole College was subsequently present at the large public meeting held in celebration of the event. In the evening all the boarding-houses were by the kindness of the several Darbars, illuminated, accompanied by a brilliant display of fire-works.

17. On the 23rd of January 1887 their Royal Highnesses the Duke and Duchess of Connaught visited the College.
Royal visit.

The boys were duly presented to their Royal Highnesses, and at the conclusion of the ceremony His Royal Highness the Duke of Connaught addressed to them a few kind words. The building was then inspected, and after a short rest at my own house, their Royal Highnesses visited three or four of the boarding-houses, and graciously expressed their pleasure with everything they had seen.

18. His Highness the Maharaja of Kishengarh visited the College during the month of November 1886, and on my going to his capital in the following January, he mentioned to me the great pleasure his visit had given him.
Visit of His Highness the Maharaja of Kishengarh.

19. The total expenditure on Imperial works, consisting of the annual repairs and some minor works, amounted to ₹5,055-3-8, against the sum of ₹7,491-7-7, as incurred last year.
Expenditure on Imperial works.

A statement showing the details of this expenditure is attached (Appendix K).

20. I beg to attach a statement (Appendix L) showing the receipts and expenditure on account of contributory works for the year under report. The total outlay on these works has been ₹16,538-10-7.
Transactions on account of Contributory works.

21. A revised estimate for providing the Ulwar Gateway with rolled iron girders in place of the stone beams which were fractured, as mentioned in paragraph 25 of my last year's report, having been sanctioned, the work will be resumed and completed, with as little delay as possible.
Ulwar gateway.

22. In addition to the usual annual repairs the following additions and improvements have, by the kindness of the several Darbars concerned, been made to the several boarding-houses.
Darbar buildings.

23. The eight syces' houses which were in course of construction at the time of my last report, have been finished.
Ajmere house.

The court-yard in front of the boarding-house has been remettled.

The garden has been considerably improved, and the well attached to the boarding-house has been deepened.

24. The roof of the stables attached to the Jaipur boarding-house has been re-thatched, and the Darbar has also kindly sanctioned the deepening of the well attached to the residence.
Jaipur residence.

25. The house for the tutor of the Thakur of Ghanerao has been finished.
Jodhpur residence.

The privy, suitable for the accommodation of only four boys, having been found insufficient the Darbar was good enough to sanction the addition of four more compartments. The work has been finished.

26. The additions to the Bikanir boarding-house which were in course of construction, as mentioned in paragraph 30 of my last year's report, have been finished. Four syces' houses have also been constructed during the year, and slab floorings provided in front of the out-houses.
Bikanir residence.

27. The former privy was converted into a bath-room, and a new one, suitable for eight boys, together with a latrine for the servants and a sweeper's house attached, were constructed during the year.
Kotah residence.

The iron gates at the four entrances to the court-yard have not yet been provided.

The ground near the boarding-house required for the new out-houses has been levelled, and two garden cisterns and a water-course have been made.

28. Three syces' houses have been constructed during the year.
Bhurtpur house.

29. Four syces' houses have been erected, and slab flooring in front of the out-houses have been provided during the year. The work of replacing the flooring of the entrance hall with red sand-stone is in course of construction.
Jhallawar residence.
30. The six syces' houses in course of construction at the commencement of the year under report have been finished.
Tonk residence.
31. A further addition of two bighas and 15 biswas of land has been made to the Mayo College grounds. College Park during the year, at a cost of ₹375.
32. The erection of the temple has, I regret to say, still remained uncommenced, owing to the owner of the land where it is desirable to build the temple not having come to terms.
The Temple.
33. I beg to attach a statement showing the financial condition of the Mayo College for Finance. the year 1886-87.
34. The receipts during the year under report amounted to ₹30,623-3-10 against ₹29,837-11-3 of the past year, showing an increase of ₹785-8-7, as detailed below :—
Receipts.
- (a) The interest on the endowment fund amounted to ₹24,911-8-5 against ₹24,917-8-10 in 1885-86, showing a small decrease of ₹6-0-5.
- (b) The contributions from Native states and private persons amounted to ₹4,000 against ₹3,709-15-6 of the last year, showing an additional ₹290-0-6 due to an increase in the number of boys.
- (c) The conservancy and garden receipts amounted to ₹1,624-10-5 against ₹1,210-2-11 in the last year, showing an increase of ₹414-7-6.
- (d) A sum of ₹87-1-0 was also received during the year on account of sale proceeds of old furniture, &c.
35. A sum of ₹930 was recovered from the late Riding Master, Honorary Jemadar Sheikh Muhammad Azim, being the difference between his pay at ₹60 per mensem and his pay at ₹50 per mensem, plus his pension of ₹144 per annum from 1st April 1878 to 31st December 1885, the Government of India having been pleased to sanction his pension with effect from the former date.
Extraordinary receipts.
36. The total receipts during the year therefore amounted to ₹31,553-3-10, to which may be added the cash balance in the Ajmere Treasury on 1st April 1886 (₹8,666-13-4), thus making a total asset of ₹40,220-1-2.
Total receipts.
Total assets of the year 1886-87.
37. The actual expenditure amounted to ₹27,713-13-8, to which may be added a sum of ₹5,941-9-6, being the amount expended in the purchase of promissory notes of the value of ₹6,100, making a total of ₹33,655-7-2, and which, when deducted from the total receipts, leave a balance of ₹6,564-10-0 in the Ajmere Treasury, as per Treasury Officer's certificate (Appendix H) herewith attached.
Actual expenditure.
Total expenditure.
38. The estimated receipts for the year 1887-88 amount to ₹30,320 against ₹29,880 for the year 1886-87, showing an increase of ₹440 as explained below :—
Estimated receipts for the ensuing year.
- (a) There is an increase of ₹140 under head Interest owing to the investment of ₹6,100 in Government securities out of the surplus balance.
- (b) The increase of ₹300 under head "Contributions from Native states and private persons," is due to an increase in the number of boys.
39. The estimated expenditure amounts to ₹29,340 against ₹28,440 in the previous year, showing an increase of ₹900, as detailed below :—
Estimated expenditure for the ensuing year.

The additions and alterations under head Salaries are the following :—

- 1.—An increase of ₹300 under head "Masters and Teachers" in consequence of the entertainment of two extra Masters.
- 2.—A decrease of ₹120, under Drill Masters owing to the reduction of the salary of the Riding Master from ₹60 to ₹50 per mensem.
- 3.—A small decrease of ₹40 under Conservancy and Garden establishment, due to the redistribution of the pay of establishment under this head.
- 4.—An increase of ₹260, under Book, Play, and Medical establishment due to an increase in the pay of Librarian and Racket boy.

The contingent charges remain unchanged, with the exception of an increase of ₹500 under head Conservancy of garden and grounds, due to the extra expenditure required for the improvement of grounds.

40. The following additions and alterations were sanctioned to the Mayo College establishment during the year under report :—

- 1.—Reduction of the pay of the post of 3rd English Master from R50 to R40.
 - 2.—Increase of the pay of 5th English Master from R30 to R35 per mensem, and that of the 6th English Master from R20 to R30.
 - 3.—Appointment of an 8th English Master on R20 per mensem.
 - 4.—Appointment of two Hindi Masters on R20 each, in place of one on R40 per mensem.
 - 5.—Reduction of the pay of the post of the Riding Master from R60 to R50 per mensem.
 - 6.—Reduction of one pakhal bhishti on R12 per mensem.
 - 7.—Appointment of six extra bhishtis on R6 per mensem.
 - 8.—Reduction of the pay of one gardener from R8 to R6 per mensem.
 - 9.—Reduction in the number of garden coolies from 12 to 9, causing a saving of R15 per mensem.
 - 10.—Reduction in the number of conservancy coolies and sweepers from 12 to 10, causing a saving of R10 per mensem.
 - 11.—Increase of the pay of the Librarian from R10 to R30 per mensem.
 - 12.—Increase of the pay of Racket Boy from R2 to R4 per mensem.
41. I have the honour to bring to the notice of the Agent to the Governor-General the satisfactory manner in which the entire educational staff have done their duty during the past year, but I would specially mention Pundit Sheonarain for having prepared a series of Hindi Letter Writers in the dialects special to Rajputana, in which work he was assisted by Munshi Sheopratap, Pundit Petamber, Pundit Gauri Shankar, Lala Rikhikesh, and Lala Bhawani Sahai, also for the revision of a Hindi Grammar used in the College.

My thanks are also due to Lala Rikhikesh for rendering into Urdu the History and Geography College Text-books.

List of Appendices.

42. I beg to attach the following Statements :—

- A.—List of Pupils in the Mayo College at the end of the year 1886-87.
- B.—Examination Marks for the year 1886-87.
- C.—Class Marks for the year 1886-87.
- D.—Holiday Task Marks for vacation 1886.
- E.—Progress Report for the year 1886-87.
- F.—Prize List for 1885-86.

MEYWAR RESIDENCY ANNUAL REPORTS FOR 1886-87.

No. 89-G., dated Udaipur, the 11th June 1887.

From—LIEUT.-COLONEL S. B. MILES, *Officiating Resident, Meywar,*
To—The First Assistant Agent to the Governor-General in Rajputana.

I have the honour to submit the Administration Report of the Meywar Residency for the year 1886-87, together with the reports of officers in local political charge of states.

2. The report, as will be seen, has been entirely compiled by my predecessor Colonel Walter, as I took charge of my present office after the close of the official year.

OFFICER IN CHARGE.

1. The charge of the Residency was held by Mr. Plowden till 14th April, by Mr. Wingate from 15th April to 27th July, and by Colonel Euan-Smith to the 6th November, when I returned from furlough and resumed charge.

JUBILEE.

2. The Jubilee of Her Majesty the Queen-Empress was celebrated with much éclat by the Chiefs under this Residency and at the British Cantonments of Kherwara and Kotra, where the Bhumat Chiefs of the district assembled on the appointed day in manifestation of their loyalty to the Queen-Empress. A full report of the proceedings was submitted at the time.

3. As a permanent memorial of the day, His Highness the Maharana of Udaipur has abolished all transit dues within his state, except on opium. His Highness has also contributed Rs10,000 to the Imperial Institute in London and given a further donation of Rs5,000 to the Countess of Dufferin's Fund. It is also the intention of His Highness to lay on the 20th June next, with due ceremony, the foundation-stone of a building in the beautiful new gardens at Udaipur to be used as a museum for the indigenous products of Meywar and as a library and reading-room. A slab, with a suitable inscription, will be placed in the wall of the centre hall, and opposite the building, which it is hoped will be called the "Victoria Hall," a full-length statue of Her Imperial Majesty will be erected.

4. The Sanad received from His Excellency the Viceroy conferring on Rao Takht Sing of Bedla the title of "Rao Bahadur" as a personal distinction was presented by me to the recipient at the Darbar held by His Highness in honour of the Jubilee.

5. His Highness was much gratified by receiving, on the second day of the Jubilee, a telegram from His Excellency the Viceroy informing him that Her Imperial Majesty had been pleased to confer on him the Grand Cross of the Most Exalted Order of the Star of India.

SEASON OF 1886-87.

6. There was little or no rain in May, the monsoon set in about the middle of June ; during the month of July the amount of rainfall registered was somewhat below the average, whilst that of August was heavy and continuous, 14 inches being registered in Udaipur itself, the total for the year being 33.16 inches. In Appendix A is given the total rainfall registered at Udaipur during the last ten years.

7. As regards the area affected, the rainfall was on the whole partial, in some districts it was deficient. The following is the return of rainfall registered at eighteen stations in the Meywar state :—

| STATIONS. | April. | | May. | | June. | | July. | | August. | | September. | | October. | | TOTAL. | |

| Udaipur Residency | ... | 50 | ... | 16 | 3 | 83 | 9 | 14 | 14 | 4 | 57 | ... | 82 | 33 | 16 | |

CROPS.

8. The kharif and rabi crops were on the whole good, though the wheat crop was slightly below the average. The spring crops, in particular opium, suffered slightly from late frost in February.

PRICE-CURRENT.

9. The prices current at Udaipur during the year will be found in Appendix B to this report. Though the prices of food grains for the year 1886-87 appear to have risen greatly in comparison with that for 1884-85 and 1885-86, yet on examining the average for the last ten years, to be found in Appendix C, it will be seen that they are not after all very excessive.

PUBLIC HEALTH.

10. The Officiating Residency Surgeon Dr. W. W. Webb reports as follows regarding the public health of Udaipur:—

The health of the people in the city of Udaipur was very good during the year.

The death-rate was 6.38 per thousand of the population.

The number of births in the city was as follows:—

| | |
|-------------------|------------|
| Males | 604 |
| Females | 122 |
| TOTAL | <u>726</u> |

Ratio of births per thousand of the population 18.99.

The sanitary condition of the city is fairly looked after. A Sanitary Committee was assembled during the year, of which the Residency Surgeon was the Secretary. The report of the working members of the Committee is under the consideration of His Highness the Maharana.

VACCINATION.

11. The operation of vaccination was performed upon 4,483 persons, showing an increase of about 450 operations over the number performed in 1885. Vaccination was extended for the first time to the districts of Meywar and to the Hilly Tracts. The percentage of successful operations was 95.4.

JAIL.

12. Average daily strength of prisoners 413.04.

Death-rate per mille of average strength 132.94.

There was rather a severe outbreak of scorbutic dysentery in the Jail during the rainy season, but dysentery was also prevalent at that time in the city of Udaipur.

A new Jail to accommodate 450 prisoners is to be opened during the coming year.

DISPENSARIES.

13. The Sujjan Hospital, Udaipur, was well attended. Eighteen thousand six hundred and eighty out-patients and 937 in-patients were treated during the year.

The daily average attendance of patients at Hospital was 208.58.

Twenty-four major and 1,187 minor operations were performed in the hospital during the year.

A new dispensary was opened at Serara in the Hilly Tracts.

There are now five dispensaries open in the districts of Meywar, and a hospital is now being built at Bhilwara.

Ten thousand four hundred and thirty-four patients were treated during the year in the district dispensaries, and 332 minor operations were performed.

The Banswara and Pertabgarh Dispensaries were both well attended. Eleven thousand nine hundred and thirty-seven patients were treated in the Banswara and 4,548 at Pertabgarh. Seven hundred and forty-one operations were performed in these dispensaries during the year; of which seven were major operations.

HOSPITAL FOR WOMEN.

14. This hospital continues to make very satisfactory progress under the supervision of the Lady Doctor Mrs. Lonorgan. During the year 14,781 patients were treated, as compared with 2,645 last year. From these figures it is evident that the popularity of the institution is increasing. The new Walter Hospital is still under construction, but will probably be completed this year.

MISSION HOSPITAL.

15. The new Mission Hospital, of which mention was made in paragraph 13 of last year's report, was formally opened by His Highness the Maharana on the 28th December 1886. This institution owes its existence solely to the indefatigable and conscientious labours of Dr. James Shepherd, and, at the special request of His Highness, has been named the "Shepherd Mission Hospital." The building itself cost R21,000, and there are altogether 40 beds in it, the cost of maintaining each bed being estimated at R50 per annum. Close upon 35,000 patients were treated during the past year in the old hospital, and now that a new hospital has been opened, I feel sure that the number of patients will largely increase, and without interfering with the good work performed in the Mahārāna's own hospital, will prove a source of immense benefit to the sick people of Meywar. The following table shows the number of patients treated during the years 1885-86 and 1886-87:—

| | 1885-86. | 1886-87. | Decrease. | Increase. |
|-------------------------------|----------|----------|-----------|-----------|
| Total attendance | 34,929 | 34,971 | ... | 42 |
| Daily average | 95.6 | 95.8 | ... | 2 |
| In-patients treated | 183 | 176 | 7 | ... |
| Major operations | 18 | 28 | ... | 10 |
| Minor operations | 711 | 635 | 76 | ... |

FINANCES OF THE STATE.

16. It is satisfactory to note that the finances of the state are in a very satisfactory condition.

The income for the Sambat year 1942, which ended on the 16th July 1886, was Udaipur R33,82,610-7-4, equivalent to Government R26,74,000-5-9 and the expenditure Udaipur R30,82,608-6-9 equivalent to Government R24,28,939-12-0, thus leaving a balance of income over expenditure of R3,00,002-0-7, or, in Government currency, R2,45,060-9-9.

OPIUM.

17. During the year under report 7,449½ chests of opium were weighed at the Chitor scales, as compared with 7,000½ during 1885-86, thus showing an increase of 449 chests. Of these 7,225 were exported to China and the rest to British India for consumption. The amount of duty realized by the British Government was R48,53,400.

SALT.

18. The subjoined table shows the average price of salt during the year in all the districts under this Residency—

| DISTRICTS. | Rate per Government rupee. | |
|----------------------------------|----------------------------|-----|
| | Soers. | Ch. |
| Udaipur | 11 | 14½ |
| Country round Kherwara | 11 | 5¾ |
| Do. Kotra | 11 | 9½ |
| Dungarpur | 11 | 8¾ |
| Banswara | 12 | 9 |
| Pertabgarh | 17 | 9¼ |

19. The terms of the Salt agreement have been strictly observed, and the sums assigned to the Meywar Darbar under it have been duly disbursed.

20. With the previous sanction of the Government of India, an arrangement was concluded with the Meywar Darbar, with effect from the 1st October 1886, for the payment of surplus collections of the Post Offices named in the margin to the Darbar, in lieu of the annual

| | |
|-------------|------------|
| Udaipur. | Rakabdeo. |
| Bhilwara. | Kherwara. |
| Chitorgarh. | Dungarpur. |
| Nathdwara. | Sagwara. |

sum of Rs2,04,150 paid by Government as compensation on account of the closure of salt works in Meywar. This plan has been adopted with the view of relieving the Postal Department from the risk of conveying large sums in cash by runners, and at the same time affording the Meywar Darbar the convenience of getting its annual payment in question without the trouble of sending all the way to Ajmere for it. So far the measure is working satisfactorily.

REVENUE SETTLEMENT.

21. Mr. A. Wingate, C.S., C.I.E., Settlement Officer, Meywar, was transferred to Kashmir during the year under report, and was succeeded by Mr. C. E. Biddulph, of the Sind Revenue Survey Department, Bombay.

22. The very excellent service rendered to Meywar by Mr. Wingate, since his arrival in August 1879, has been so often brought to notice that it is only necessary to say here that I had ample proof of the popularity of the assessment made by him in the districts in which it had been introduced and through which I marched in my cold-weather tour. The satisfaction evinced by all, whether heads of districts or ryots, was evidently genuine, and it must be a source of much gratification to Mr. Wingate to know that so far as human judgment can discern, the settlement he has made will prove a lasting benefit to the Chief and people of Meywar, by one and all of whom his name will be handed down as that of a real benefactor to the state.

23. The great assistance Mr. Wingate had rendered to the state in the establishment of dispensaries and schools in the districts will also redound to his credit, and will be remembered and spoken of in all future times.

24. Mr. Biddulph submits the following report of the work done by his department during the year :—

“Mention was made in paragraph 17 of last year’s report that the new settlement had been introduced in the Rasmi and Sarra zilas, comprising seven parganas, but that in four only of these had the work been finished and copies of their accounts distributed to the Asamis, in the remaining three, the work of hearing complaints and consequent revision of the settlement being as yet incomplete; this has now been completed, and the copies of their accounts have been distributed to the Asamis, the settlement of these two zilas is thus complete in all respects.

(2) During the year the new settlement has been introduced in the Kaparan and Nagauli parganas of the Chitor zila, and the collections of revenue for the present year have been made in accordance with it, the remaining pargana of Chitor will be completed in the course of the current year.

The new settlement has been introduced in the Bhilwara zila, comprising five parganas in three of which it has been announced, *viz.*, Bhilwara, Pur, and Mandal, the hearing of complaints and consequent revision of the rates fixed is now proceeding and will shortly be completed, when copies of their accounts will be distributed to the Asamis, and collections in accordance will be commenced from the next year, the remaining two parganas will be completed in the course of the current year.

(3) The proposals for the settlement of the Akola pargana of the Girwa zila having been made out and having received the sanction of His Highness the Maharana, the work of distributing the rates and introducing the settlement into this pargana will now be proceeded with.

(4) Owing to the late frost in the month of February, some damage accrued to the opium and wheat crops, and numerous applications for remissions of revenue in consequence were received from different villages in the Rasmi and Sarra zilas and the Kaparan and Nagauli parganas of the Chitor zila. I accordingly deputed my assistant to visit and enquire into the extent of damage sustained by the crops in the above localities; from the result of his enquiries, I am of opinion that the damage done was much exaggerated by the villagers, and as I consider that it would constitute a very bad precedent to grant remissions without very serious grounds for doing so in the villages of these zilas, which have been but very recently settled, I shall take some time to enquire into the cases which appear to have any claim to remission for revenue, and then grant this, but very sparingly. As regards this subject it must be taken into

consideration that the total revenue levied according to the new settlement upon any particular village has been based upon the mean revenue realized from the same for the past ten, fifteen, or twenty years according to the statistics available for the calculation; the previous collections of revenue being upon the batai system, when the revenue varied according to the season. This mean of course, including as it does many years of scarcity, as well as of ordinary produce and occasional abundance, shows the amount that the cultivators can pay without difficulty in an ordinary year, and as they are the profitters by the new settlement to a large extent in a year of abundance, they must be prepared to suffer a little from such trifling misfortune as a slight frost, and it is only in cases of great scarcity or very serious injury being sustained that I should be disposed to recommend any remissions, and then only after very careful consideration."

ADMINISTRATION.

25. No change has taken place in the administration during the year under report. The number of the members of the "Mahad Raj Sabha" is now twenty-two, of whom thirteen are nobles of the state and relations of His Highness and nine officials.

26. The whole of the members are seldom all at Udaipur together, but there are always a sufficient number to provide for the proper and efficient carrying out of the work allotted to them.

27. Mahad Raj Sabha is the highest court of appeal, and is presided over by His Highness in person in all important cases. In other cases the members are divided into courts of three and five, and, after hearing such cases as come before them, submit the same with their opinion for the final orders of the Mabarana.

28. The decisions arrived at by the members of this appellate court are as a rule correct and just, and it always appears to me that government of this nature in a Native state is the most popular that could be introduced. Those nobles who are members are all men who hold large estates and have therefore a great stake in the country, and in all matters of dispute regarding land, boundaries, or cases which have to be decided according to ancient custom, their decisions are formed with sound judgment.

JUDICIAL STATISTICS.

(1) Criminal Cases.

29. In Appendix D is given a translation of the return of criminal cases furnished by the Darbar. Comparing this statement with that of the preceding year, I find the total number of cases instituted has been 1,494 against 1,445, or a slight increase of 49. The aggregate number of cases, including 988 pending from last year, the courts had to deal with was 2,482. Of these 1,373 were disposed of, convictions being obtained in 1,149 cases, while 224 were dismissed for various causes, leaving a balance of 1,109 at the close of the twelve months, being 121 more than last year.

30. No case of infanticide has occurred.

(2) Civil Litigation.

31. Appendix E is a translation of the Annual Return of Civil Cases furnished by the Darbar. Altogether 695 cases were instituted during the year, being 87 less than last year.

Cases of debt and disputes affecting land and immoveable property have risen from 297 and 141 to 330 and 197 respectively, while on the other hand there has been a general diminution of litigation under each head. The total number of cases for disposal was 1,421. Of these 660, or a little less than half, were disposed of, leaving 761 pending at the close of the year. In the latter number are comprised 292 suits for debt, representing the adjustment of claims to the value of ₹1,48,212-3-6.

(3) Appeals.

32. Appendix F shows the result of appeals to the "Mahad Raj Sabha," or Chief Court of Meywar, as reported by the Darbar. It will be seen that there were in all 1,045 civil and 622 criminal appeals for disposal, as compared with 872 and 603 respectively last year. The number decided was 655 civil and 417 criminal, leaving 390 and 205 pending at the end of the year.

Of the 655 civil appeals heard, the orders of the lower court were upheld in 493, reversed in 122, and revised in 40.

Of the criminal appeals disposed of, *viz.* 417, the lower courts' decisions were confirmed in 197 cases, upset in 72, and revised in 148.

(4) Court of Vakils.

33. Appendix G is a statement of work performed by the Court of Vakils during the year. The total number of cases for disposal, including a balance of seven from the previous year, was 22, against 29 in 1885-86. Of these 22, 13 cases were decided, leaving nine pending at the close of the year. In 1885-86, 22 cases were decided out of a total of 29, so that the working of the court during the year was below the average. The amount awarded as compensation was Udaipur R373-12-8 and Imperial R476-2-11. Fifteen fresh cases were instituted during the year as shown in Appendix H, but none of them were of any importance. It is satisfactory to note that the more heinous offences, such as murder and highway robbery, with wounding, have no place in the record of the year's crime.

34. There were in all five appeals to the Upper Court, in three of which the Lower Courts' decision was upheld, and two remained pending at the close of the year.

35. A most cruel case of poisoning occurred at Deogarh on the 2nd January 1886. The son of the Rao of Deogarh and his wife retired to rest, as usual, after dinner in good health, but in the morning they were found insensible and shortly afterwards died. This gave rise to the suspicion that they had been poisoned, and accordingly a trustworthy official of the Meywar Darbar was deputed to hold a preliminary investigation into the matter. After making due enquiries, he submitted a report which disclosed facts necessitating the appointment of a special commission. At the earnest request of the Meywar Darbar, Mr. A Wingate, C.S., C.I.E., Settlement Officer, Meywar, was authorized by the Agent to the Governor-General to take part in the commission, which consisted of the members named in the margin, and after a searching investigation they came to the conclusion that the unfortunate couple had been poisoned by the Kamdars Nuthraj and Chooni Lal of Deogarh. These individuals were sentenced to rigorous imprisonment for life and are now confined in the Udaipur jail.

The Rao of Bedla
 „ Raj of Oilwara.
 „ Maharaj of Bhunccr
 Maharaj Guj Sing.
 Rai Punna Lal.

TRANSIT OF GOVERNMENT MAILS.

36. No instance of mail robbery has occurred during the year. The criminals concerned in the Vana mail robbery, mentioned in paragraph 25 of last year's report, were, through the exertions of the Meywar Darbar, all brought to justice and sentenced to various terms of rigorous imprisonment.

37. A tonga dak for the conveyance of Government mails and passengers has been established between Udaipur and Chitor from the 21st July 1886.

JAIL.

38. The number of convicted prisoners in jail during the year was 326. Of these 117 are under sentence for murder, 56 for dakaiti, and 72 for theft. There were 22 under-trial prisoners in confinement, 15 of whom were charged with murder, and 6 with theft. The above information is supplied by the Darbar, a translation of whose return will be found as Appendix I to this report.

THE MAHARANA'S SCHOOL.

39. The post of Head Master is still held by Mr. Hazari Lal, who was appointed in May 1884. At the close of the year under review, the number of pupils on the rolls, as compared with the preceding year, was as under—

| YEAR. | Boys. | Girls. | TOTAL. |
|---------|-------|--------|--------|
| 1886-87 | 436 | 130 | 566 |
| 1885-86 | 429 | 151 | 580 |

40. The decrease in the number of girls attending the school is a matter of regret, but it is chiefly due to the prejudice the people have against female education, a prejudice which it is hoped will gradually wear away.

41. The average number of pupils on the rolls and the daily average attendance are compared below with the past year—

| YEAR. | Average number of pupils on the rolls. | Average daily attendance. |
|---------|--|---------------------------|
| 1886-87 | 598.71 | 388.47 |
| 1885-86 | 612.23 | 443.25 |

The decrease is said to be solely due to the levy of tuition fees, the initiation of which was mentioned in the previous year's report. The average percentage of attendance was 65.67, whilst last year it was 73.0.

42. It will be seen from the particulars noted below that there has been a decrease in the number of students studying Urdu, Sanskrit, and Hindi—

| LANGUAGE. | 1885-86. | 1886-87. |
|--------------------|----------|----------|
| English | 129 | 134 |
| Sanskrit | 26 | 25 |
| Persian | 13 | 21 |
| Urdu | 72 | 60 |
| Hindi | 463 | 448 |

43. The girls are taught needlework, in which they are said to be making satisfactory progress.

44. The expenditure during the year amounted to ₹10,480-4, against ₹10,174-8-8. This increase is owing to the opening of a normal class. The average cost of educating each pupil rose slightly from ₹15-6-8 in 1885-86 to ₹15-11-1 this year.

45. Two students of the normal class, started in December 1885, have been appointed as teachers to the village schools at Sahara and Potlan.

46. Scholarships amounting to ₹408 and prizes to the value of ₹60 were awarded to the deserving students in accordance with the result of the annual examination.

DISTRICT SCHOOLS.

47. Education in the district is making steady and satisfactory progress. In addition to the eight schools already established, four new ones have been added to the number this year. These new schools have been opened in Kuraj, Potlan, Sahara and Arni, and are attended by 222 pupils. This attendance is very encouraging, and shows that there is on the part of the people of the district a growing desire to take advantage of the means of education so liberally provided for them by the Darbar.

BHIL SCHOOLS.

48. The number of the Bhil Schools under the Magra Hakim has not been increased this year. There still exist the four schools at Jawar, Bara Pal, Paduna and Rakabnath. The attendance at these schools is not quite so good as it was last year, showing a ratio of diminution from 90 to 72. It is to be hoped that this decrease is only temporary, and that by more careful supervision these schools will not only regain their former position but even surpass it. The Hakim of the Magra takes a great interest in this movement.

49. It is gratifying to be able to report that His Highness the Maharana, with his usual liberality, has given a very handsome grant of ₹1,000 to the Reverend C. S. Thompson, of the Church Missionary Society, to aid him in carrying on the work of education among the Bhils.

MAYO COLLEGE.

50. At the Mayo College there were five Meywar students at the close of the year as compared with six last year. There were two admissions and three withdrawals during the year. The names of the new boys who joined are—

1. Tej Sing, son of the Rao of Salumbar.
2. Madho Sing, grandson of the Rao of Batera.

The report made of the progress of the boys at the College is satisfactory.

PUBLIC WORKS.

51. As a separate report on this subject has been sent to the Secretary to the Agent to the Governor-General in the Public Works Department, particulars are here unnecessary, but it may be noted that a sum of ₹4,15,841 was provided in the current year's budget for expenditure under the following heads:—

| | |
|------------------------------------|----------|
| New buildings | R |
| Roads | 92,800 |
| Irrigation works | 30,000 |
| Gardens | 87,000 |
| Miscellaneous | 21,440 |
| Repairs to old buildings | 42,239 |
| Establishment | 84,362 |
| Unforeseen expenses | 40,000 |
| | 15,000 |
| TOTAL | 4,15,841 |

BOUNDARY SETTLEMENT.

52. Captain A. P. Thornton was deputed in the month of January 1887 to continue the demarcation of the boundary line in dispute between the states of Meywar and Tonk, and was engaged on this duty until the 24th February, when he was transferred to another appointment, and Mr. L. W. King, C. S., relieved him, continuing work up to the 27th March 1887. Twenty-one cases in all were settled by the above-named officers, particulars of which are noted below :—

| | |
|-----------------------------------|----------|
| By mutual agreement | 4 |
| By Panchayat | 3 |
| By the Boundary Officer | 14 |
| | TOTAL 21 |

53. Major W. H. C. Wyllie, C.I.E., has also for some months during the year been engaged on the Meywar-Marwar border, but his work, so far, has been confined to thoroughly examining the disputed line and in making preliminary investigations.

FOREST OPERATIONS.

54. There is hardly anything to record under this head.

During the year 812 sissou trees were planted along the road sides and in the different forests. The net revenue derived from sale proceeds of grass and fuel was ₹7,844-6-8, besides providing hay and green grass for the State cattle and horses.

INTRODUCTION OF PERSIAN DATE-PALM IN MEYWAR.

55. In the month of September 1886 Mr. Storey, the Superintendent of the Sujjan Niwas gardens, received through the Government Botanical Gardens, Saharanpur, 100 off-sets of Persian date-palm, which reached Udaipur in splendid condition, only three being injured in transit. They were planted in large bamboo baskets and kept well watered under the shade of mango trees, and very soon began to make roots and to throw out healthy young leaves.

56. The Superintendent tried a few plants in the ground, placing a layer of straw at the bottom, then filling in with clay, manure, &c., putting another layer of straw half-way up the hole, but just as he expected the white-ants attacked the straw in the first instance, and then working up destroyed the fresh centre of the plants. Mr. Storey is of opinion that this mode of planting might be successful in Arabia, but would not do for India, where the soil is infested with white-ants.

57. Another batch of 200 plants and 20 lb of seed (5 lb cleaned and 15 lb in pulp) was obtained direct from the Persian Gulf by this Office. Of these only 64 plants reached Udaipur alive, the remaining 136 having died on the way.

58. Almost all the plants are now in the gardens in a large clump and are thriving well. The seeds were carefully sown in the nursery in pots, and germinated freely. There are at present 870 healthy plants. The climate of Meywar is apparently suitable to the growth of this very valuable tree. The Superintendent hopes soon to distribute seedlings to all the favourable saline localities in the districts.

TOUR OF RESIDENT.

59. Colonel C. B. Euan-Smith, Officiating Resident, spent 28 days on tour and visited Kherwara, Dungarpur, and Chitor, before I returned from furlough early in November 1886. Shortly afterwards I marched through Kapasan, Rashmi, and Bhilwara to Jehazpur, returning to head-quarters on the 22nd December. After a halt of about ten days at Udaipur, I proceeded to Pertabgarh, Banswara, and Dariawad. From Dariawad it had been my intention to march to Jethana *via* Bhorai, with the object of settling certain cases which had been pending between Meywar and Dungarpur for some years; but owing to the celebration of Her Majesty's Jubilee I was obliged to return to Udaipur on the 8th February. My own tour therefore extended over 63 days.

HILLY TRACTS.

60. Colonel Conolly held charge of this district throughout the year. His report and that of Colonel Temple, the second Assistant Resident, are annexed. I was unable, as before remarked, to visit Kherwara during my cold-weather tour.

HEALTH, CROPS, AND PRICES.

61. With the exception of a passing epidemic of pneumonia, the health of the district has been good. Four Bhils who have been instructed as vaccinators were employed in the district, and the people appear to have appreciated their services.

62. Owing primarily to the lateness of the rains and afterwards to the very partial showers which fell, the autumn crop was more or less a failure. The outturn of Indian-corn is stated to have been about 4 annas in the rupee and of rice 12 annas.

63. The spring crops suffered much from frost and is stated to have yielded not more than 6 annas in the rupee. Consequently all grains have been selling at a higher rate than in the previous year; but, judging from the rates quoted at the end of paragraph 3 of the Superintendent's report, prices have not risen in proportion to the estimated failure of the crops, from which it may be inferred that local wants were met by larger imports of grain food than usual.

64. There has been an abundance of pasturage and the cattle are generally in good condition, but immediately after the rains there was a rather sharp epidemic of cow-pox which thinned the herds in the Bhumat chiefships considerably.

CRIME.

65. Four cases of murder are reported to have occurred in the district. In only two of these have the criminals been arrested and brought to punishment. In the two remaining cases the murderers have, in spite of all efforts to trace and arrest them, effected their escape, but the Darbar has been able in one of these latter cases to mete out punishment to the village near which the murder took place, by depriving it of its annual subsidy paid for the protection of the high road on which the village is situated.

66. A case of suicide has also been reported.

67. A more efficient system of Police than has hitherto obtained on the Meywar Mahikanta border is under consideration. At present, owing partly to the wild nature of the country, but still more to the ready shelter and assistance given to criminals by their clansmen, it is next to impossible for the present weak Police force on the border to follow up and arrest a criminal. Any such attempt would surely result in failure and discomfiture to the Police party. The subject is one which requires careful consideration, and any system that may be decided on must have true reciprocity of action to render it successful.

BORDER COURTS.

68. No Border Courts have been held this year. The Superintendent of the Hilly Tracts, who is also Commandant of the Meywar-Bhil Corps, being again unable to leave his regiment during the drill season owing to the paucity of officers. This is to be regretted, as the adjustment of their grievances by British officers is looked forward to by these wild tribes, and the regular sitting of these courts tends much towards keeping the border in a peaceful condition.

69. In paragraph 13 the Superintendent reports the formation of a Panchayat, composed of officials of the Meywar and Dungarpur states to dispose of cases pending between suitors of the two states. To this court has been made over the cases which I was unable to settle personally, of claims preferred by Dungarpur against Meywar for losses sustained during the Bhil disturbance of 1851.

DUNGARPUR.

70. The management of this state is, as usual, carried on in a satisfactory manner. The question of the export of opium from the state has been re-opened by the Finance Committee, and it will be a matter of great disappointment to the Maharawal if the arrangement sanctioned by the Government of India is done away with.

PANURWA.

71. The Ruana of this estate estimates his loss from failure of the crops at Rs,000.

72. Mention was made in paragraph 42 of last year's report of steps being taken to bring to justice the murderers of the late Thakur of Umria. Finding the Bhil Pals of Surra and Chikla still persistent in refusing to pay the fine imposed on them for their complicity in the tragedy, the Meywar Darbar in January last proceeded against them in force and took possession of the Pals, the actual murderers however escaped. Arrangements are being made to re-settle the Bhils, and the Darbar has undertaken the management of the Thakurate of Umria, the Chief of which is young and unequal to the task of extricating his estate from the heavy debt in which it is involved.

JURA.

73. The finances of this estate having been put in order, the entire control was again made over to the Rao Zorawar Sing in August last.

74. It is gratifying to notice that the Bhils have by common consent resolved to renounce the practice of witch-swinging, and that a memorial stone to that effect has been set up near a small temple. Also that the 18 Grassia Pals of the Bikurni Putta of this estate have

similarly notified their intention of abstaining from this cruel practice, and have accordingly built a memorial stone in the Padul-Wara-Pal. Great credit is due to Colonel Temple for the manner in which he has carried through this desirable measure.

75. Advantage was taken of the presence of the Darbar troops at Umria in January last to realize from the Kodurmal Pal a fine of ₹1,500 decreed against it some five years ago in connection with a witch-swinging case.

76. The question of the claim mentioned in paragraph 18 of the Superintendent's Report of the Meywar Bhils to gather Mhowa berries in Edur territory, a right which they state they have enjoyed from time immemorial, but which the Edur Darbar denies, has been judiciously postponed pending a searching enquiry.

BANSWARA AND PERTABGARH ASSISTANCY.

77. Lieutenant A. F. Pinhey has held charge of this office during the year. I visited both states during the cold season, marching from Pertabgarh to Banswara and from Banswara across to Dariawad of Meywar, accompanied by the Assistant Political Agent. Whilst at Dariawad I was able to dispose of several interstatal cases by means of local Panchayat.

RAINFALL, CROPS, PRICES AND HEALTH.

78. The rainfall at Banswara was 42.45 inches and at Pertabgarh 36.55 inches. Although the fall was in excess of last year's, yet it was not seasonable. Consequently grain has been dearer than it was in 1885-86, the average prices of Indian-corn (the staple food of the country) was respectively 28¾ and 26¼ seers per rupee.

79. With the exception of small-pox no epidemic of any kind occurred, and the general health is said to have been fairly good.

CRIME.

80. It is satisfactory to note that no cases of witch-swinging or of infanticide have been reported during the year.

PERTABGARH.

81. On my arrival at Pertabgarh, the Maharawat again brought a complaint against the Banswara authorities for not carrying out the provisions of the agreement made between the two states in 1882-83 for the mutual surrender of criminals. I have asked Lieutenant Pinhey to thoroughly investigate the matter and his report is still awaited.

82. The management of the state by Mr. Framji Bhikaji, the late Political Assistant, is favourably reported on. I have known him intimately for very many years, and think the Maharawat has acted wisely in selecting him as his adviser.

83. The Jail and Dispensary are well managed, and the services of a really good teacher have been secured for the school. Satisfactory progress is reported in the working of the courts and great activity has been shown in disposing of civil and criminal cases.

84. A son and heir was born to His Highness at Sailana on the 1st March 1887.

BANSWARA.

85. Rai Bahadur Jowala Pershad continues to evince an active interest in the administration of the state, but owing to the embarrassed condition of the finances his efforts have only met with partial success. The system of land revenue collections has however received some attention during the year and a market has been established at Danipipla on the Banswara-Rutlam road to enable the Bhils to purchase the common necessities of life near their homes.

BORDER COURTS.

86. Lieutenant Pinhey, in conjunction with the Political Agent, Bhopawar, disposed of 50 cases that were pending between Indore, Jhabua, Banswara, Pertabgarh, and Kushalgarh. He also met the Assistant Political Agent, Rewa Kanta, and settled 125 cases between the states of Sunth, Baria, Kushalgarh, and Banswara.

KUSHALGARH.

87. The administration of this petty state is noticed as "very satisfactory."

S. B. MILES, Lieut.-Colonel,

Officiating Resident, Meywar.

No. 73-G., dated Kherwara, the 9th April 1887.

From—COLONEL A. CONOLLY, *Political Superintendent, Hilly Tracts, Meywar,*
To—*The Resident in Meywar.*

I have the honour to submit for the year 1886-87 the Administration Report of this Superintendency, of which I have been in political charge during the period under review.

HEALTH.

1. A statement by Surgeon C. Mactaggart, officiating in medical charge of the Meywar Bhil Corps and Superintendent of the Charitable Dispensary at Kherwara, containing dispensary returns and statistics of the health of the regiment and station, is appended and marked A. There has been no outbreak of disease worth mentioning, though a certain number of deaths are reported as having occurred in the district towards the end of the cold weather from a passing epidemic of pneumonia. The cattle are, as a rule, in good condition owing to the ample rainfall of last year and consequent abundance of pasturage.

2. Four vaccinators, Bhils, who have been duly instructed in the practice, have recently been appointed to the district, and their services appear to be appreciated by the people who, generally speaking, are beginning to recognise the superiority of this precaution against small-pox over that usually followed by themselves, *viz.*, inoculation.

CROPS.

3. The autumn crops of last year are reported as having been in a measure spoilt, the Indian-corn especially, by the lateness of the rain; the outturn of this grain and rice is stated at 4 and 12 annas in the rupee respectively, but the computed loss in the former would appear to be exaggerated, the rainfall appears to have been partial, some districts receiving considerably more than others. As regards the spring crops of this year, the yield of gram is put down at 6 annas in the rupee, having been largely frost-bitten; wheat and barley have suffered less. A list of prices current in the Kherwara and Dungarpur bazars is appended.

| | KHERWARA. | | DUNGARPUR. | | |
|-----------------|-----------|------|------------|------|-------------|
| | Srs. | Chs. | Srs. | Chs. | |
| Wheat . . . | 13 | 0 | 15 | 0 | per rupees. |
| Barley . . . | 23 | 0 | 30 | 0 | „ |
| Rice . . . | 17 | 0 | 15 | 0 | „ |
| Indian-corn . . | 31 | 0 | 30 | 0 | „ |
| Gram . . . | 19 | 0 | 20 | 0 | „ |
| Ghee . . . | 1 | 10 | 1 | 11½ | „ |
| Salt . . . | 12 | 0 | 11 | 4 | „ |

CRIME.

The year has been marked by the occurrence of four cases of murder, in one of which the two criminals, being convicted on their own confession, were awarded long terms of imprisonment at Udaipur, and in the second capital punishment, which was duly carried out. In the two remaining instances the murderers have, in spite of all efforts to trace them, so far escaped detection: the village however within the limits of which one of these latter cases had occurred, being deprived as a punishment of one year's subsidy received from the Meywar Darbar for the protection of the high road passing through it, near which the murder took place. No other instances have occurred of crime, beyond a suicide resulting from a family quarrel, which was duly adjusted by Bhil Panchayat.

5. Some prominence has lately been given to the subject of a more efficient system of police arrangement than has hitherto obtained in the petty estates of the Meywar Bhumat Chiefs bordering on Mali Kantha, owing to the alleged harbouring to a considerable extent, within Bhumat limits, of criminals who have fled from justice in Edur. The question is by no means a simple one; for the wild and in places inaccessible nature of the country, comparative paucity of men available for, and capable of, the more onerous police duties, such as arrest of dangerous characters, the traditional dislike of the Bhils to surrender their fellows even when guilty of heinous offences, and the difficulty of successfully surprising a village either with a handful of men, who would probably meet with resistance, or a larger number whose movements could hardly be kept secret—all combine to render shelter an easy, and capture a

very difficult matter. Arrangements are however under consideration, having for their object a better system of obtaining intelligence and checking the movements of Bhil and other classes possessing waudering, predatory, or savage instincts.

BORDER COURTS.

6. No Border Courts have been held this year: the paucity of officers with the Meywar Bhil Corps, the amount of regimental work required of them, and the uncertainty attending the date of annual inspection rendering it almost impossible for the Commandant, who is *ex officio* Political Superintendent, Hilly Tracts, Meywar, to leave the corps during the season in which Border Courts are held. The accumulation, in consequence, of unadjusted cases between the states comprised in this Superintendency and those across the border is annually increasing and calls for the creation of some arrangement by which the services of the officer holding the dual appointment abovementioned can be spared for the discharge during the tour season of his political, as well as military duties.

ROADS.

7. Improvement of the track between Kherwara and Kotra alluded to in the last Administration Report, has engaged attention during the past year; it has been surveyed, and the passes near Kotra, the most difficult portion of the route, closely examined, with a view to ascertaining the practicability or otherwise of utilising them for a partially new route: further action is deferred pending inspection of the line by the Engineer-in-Chief of the Meywar state, which it is hoped will shortly take place.

TANKS.

8. Two tanks of a considerable size are being built in the Jawas and Madri estates. These were commenced in the last summer when the scarcity then prevailing rendered relief works on a small scale advisable.

TOURS.

9. A sketch of the tours undertaken during the year is appended, marked C; the demands of regimental work alluded to in paragraph 6 of this report and the fact of the Meywar-Bhil Corps being again short of its complement of British officers during the past drill season, restricted my movements and prevented the extended tours which would otherwise have taken place.

MEYWAR-BHIL CORPS.

10. The regiment was inspected on the 10th and 11th of January 1887 by Major-General A. Carnegie, Commanding Northern Division, Bombay Army, with satisfactory results. Previous to the inspection the Major-General visited Dungarpur to the keen gratification of the genial and hospitable Chief of that state, who had long wished to do honour to his distinguished guest.

11. There is nothing of interest to report with regard to the experiment in enlisting Moghias, but one is apt to view with distrust any appreciable increase to the numbers of these men, having regard to the conduct of their kinsmen forming a small settlement within cantonments, who, with no ostensible means of subsistence, excite the suspicion of living by means other than honest or laborious, and whose time is often occupied by quarrels (at times drunken ones) requiring repressive measures.

12. The map of the Kherwara cantonment spoken of in the previous report has been supplied by the Survey Department.

PANCHAYAT.

13. A court consisting of members deputed by the Meywar and Dungarpur Darbars respectively assembled on the 22nd ultimo for the disposal of a vast accumulation of cases pending between suitors of the two States concerned: the result of their labours must necessarily be left for communication in next year's report; advantage will be taken before the court dissolves of the presence at this gathering of the principal gomotis, or village headmen, of the neighbourhood, to inform them by direction of the Resident in Meywar that in future, murder, of which (*vide* paragraph 4) some instances have lately occurred in the vicinity of Kherwara, will not, as hitherto, be allowed condonation by fine, but be more severely dealt with than in the past; the warning being accentuated by special reference to the recent infliction of capital punishment in one of the cases above referred to.

14. In connection with the subject of interstatal disputes, it may be mentioned that the bulk of claims preferred by Dungarpur on Meywar for loss inflicted in raids by Bheels of the latter on villages of the former during the disturbances of 1881, have lately been disposed of by the Resident, the remainder being made over for adjustment to the Panchayat above referred to.

RESIDENT IN MEYWAR.

15. Colonel C. B. Euan-Smith, C.S.I., Officiating Resident, visited Kherwara and Durgarpur in October 1886, being accompanied by Major-General T. E. Gordon, C.B., C.S.I., a former Political Superintendent of these Tracts and Commandant of the Meywar-Bhil Corps, which he was good enough to review and address in terms commendatory of its appearance and efficiency. These officers were met, not as a matter only of duty, but evident pleasure, by the Bhumat Chiefs of both the Kherwara and Kotra districts.

JUBILEE.

16. The celebration of the attainment of fifty years rule by Her Most Gracious Majesty the Queen-Empress of India, was observed in the capital of the Durgarpur state and the cantonments of Kherwara and Kotra with much manifestation of loyalty and good-will. At the former place a Darbar was held by His Highness the Maharawal, attended by his nobles and retainers at which "kharitas" were formerly exchanged, having been received from and addressed to the Viceroy and Governor-General of India, expressive on the one hand of the solicitude and sympathy with which Her Imperial Majesty regarded the welfare of the Chief and the relations of his court with that of Her Government, and, on the other, of the appreciation by the Maharawal and His Highness's subjects of the protection and security enjoyed by them under the ægis of the British Empire, the contrast it afforded with previous times, and their earnest good wishes for the continued prosperity and stability of the paramount power. At Kherwara and Kotra Darbars were held in honour of the occasion by the Political Superintendent and the 2nd Assistant Resident, Meywar, attended by the Bhumat Chiefs of the Hilly Tracts and the Kotra district respectively: festivities took place, including games, illuminations, fire-works, the distribution of sweetmeats, and dancing. Both the 16th of February and the following day were observed as holidays, which will long be remembered in this part of Meywar.

GEOLOGY.

17. The district was visited in November by Mr. Hacket, of the Geological Department, Government of India.

SUNDRY.

18. A question has arisen, important as materially affecting the interests of parties concerned, and interesting as showing the relations towards each other of Bhils on both sides of the border, affecting the right claimed by Meywar Bhils, but refused by the Edur Darbar (except at its own bidding), to the gathering, within the limits of the latter state, by Bhils of the former, of the berry known as "mhowa," which furnishes both human beings and cattle with food, and from which liquor is distilled. An annual migration of Meywar Bhils has hitherto taken place in large numbers to pick mhowa in Edur territory, payment at stipulated rates being made for the same, in pursuance of custom, which, according to their statement, has prevailed for generations past, the right being, as they say, conceded to them by Edur, or Chiefs subordinate to her, in return for services performed by their forefathers, and one which, considering its contribution towards the yearly maintenance of those enjoying the privilege, they are naturally slow to relinquish. By the good offices of the Political Agent, Mahi Kanta, the Edur Darbar has been induced to allow the gathering of the berry by Meywar Bhils to proceed, as usual, this season till opportunity has been afforded for the thorough sifting of the question before a final decision is arrived at.

DUNGARPUR.

19. There is nothing special of note to report on with respect to the finances, public works, or administration of justice. A return of cases heard in the Durgarpur courts for the year 1st of July 1885 to the 30th of June 1886 is appended and marked B.

20. The amount of goods sold at the Baneshar fair was in excess of the average of many years past, with the exception of last year, when the sales were extraordinary.

21. The attention of the Darbar was invited to the abolition of the transit dues in Edur and Meywar, and enquiry made as to whether Durgarpur could not reciprocate, but it states that the diminution in income which has undoubtedly been caused by the diversion of merchandise from road to railway renders such transit dues as remain to it, and which, till recently, formed one-third of its gross revenue, all the more valuable. While conceding, moreover, the general principle of probable ultimate profit accruing from removal of restrictions which may be in some cases vexatious and even prohibitive, the Darbar clings to the present tangible, though reduced, source of income afforded by the maintenance of the tax in question.

22. A packet of Arabian date-palm seeds has, through the courtesy of the Resident, been lately furnished to the Durbar for experimental purposes.

23. His Highness has, by contributing to the fund inaugurated for the purpose, shown his appreciation of the efforts made by the Collector of Muthra to restore some of the most famous of the bathing-ghâts at that sacred city.

24. A supplementary treaty was executed in December 1886 between the Government and the Dungarpur state rendering the procedure as to extradition of offenders more simple and effective, and at the same time bringing it into harmony with that prescribed by the law in force in British India.

25. The last phase of the question concerning export of Dungarpur opium by the high road to Ahmedabad has taken the form of a reference by the Finance Committee as to the possible risk of loss to the Imperial revenues involved in the special arrangement under which the export is permitted; and the questionable utility of continuing the concession made to the Dungarpur Darbar in view of the insignificant extent to which exporters have availed themselves of the privilege granted. The Darbar maintains that the original closing of the Ahmedabad route has driven former purchasers to other markets, and that this, combined with dulness of trade, accounts for the present poverty of traffic, which however, it is hoped, will revive in due course. It points out its own responsibility in the matter of enforcing the regulations framed to prevent the chance of smuggling, and solicits a continuance of the privilege on which the prosperity of the state is said largely to depend. A final decision is awaited from Government.

BHUMIA CHIEFS.

26. The liquidation by the Jawas estate of the debts spoken of in previous reports is not progressing so rapidly as had been hoped, owing it is said to difficulty in realising rents in certain quarters, but the Chief is alive to the necessity for economical management of his finances and early discharge of his liabilities.

27. The statistics presented by Chiefs of the remaining states, Para and Madri, and the two petty Thakurates of Chhani and Thana, contain nothing of sufficient interest or importance to be recorded.

KOTRA.

The Administration Report of the Kotra district by Colonel E. Temple, 2nd Assistant Resident, Meywar, is attached, the chief points of interest being those alluded to in paragraph 9, regarding the punishment of the Bhil Pals of Surra and Chikla for the murder in 1884 of the Umria Thakur, and the assumption of management of that estate by the Meywar Darbar.

Paragraph 10.—The restoration of financial control of Jura to the Chief of that state.

Paragraph 11.—The renunciation by certain Bhil Pals of the practice of witch-swinging as recorded in writing and graven in stone, and the conclusion of a further similar agreement also to be emphasised by a memorial stone.

Paragraph 12.—The realisation of a fine from Kodurmal for a case of witch-swinging recently brought to light.

STATEMENT A.

Kherwara Dispensary.

| | |
|---|-------|
| Total attendances during the year | 4,452 |
| Out-patients | 4,408 |
| In-patients | 44 |

KHERWARA,
The 1st April 1887.

A. CONOLLY, Colonel,
Political Superintendent, Hilly Tracts, Meywar.

No. 22-G., dated Kotra (Meywar), the 7th April 1887.

From—COLONEL E. TEMPLE, Second Assistant Resident, Meywar,

To—COLONEL A. CONOLLY, Political Superintendent, Hilly Tracts, Meywar.

I have the honour to submit the annual Administration Report of the Kotra district for the year 1886-87.

2. The meteorological observations for the year were as follows:—

| Mean temperature of the year. | Hottest month and its mean temperature. | Coldest month and its mean temperature. | Mean daily range. | Extreme daily range. | Number of days in which rain fell. | Total rainfall. |
|-------------------------------|---|---|-------------------|----------------------|------------------------------------|-----------------|
| 79.42 | May. 94.06. | January. 67.31 | 22.69 | 37 | 70 | 44.29 |

3. The general health of the station and district has been good during the past year. There were 123 cases treated in the detachment military hospital, with one death, and 464 cases in the so-called dispensary, with 3 deaths.

4. A severe epidemic of cowpox occurred after the rains which appears to have been prevalent in the estates of all three Chiefs and to have carried off in some places a large number of cattle.

5. The rainfall began most unusually early, and was so abundant as to cause serious damage to the crop of Indian-corn, the staple food of the Bhils, which in some places resulted in little more than a 4-anna crop. Great expectations were raised at first as to the rabi crop, but the late frost destroyed fully half of them.

6. The only public work of importance constructed during the year in Kotra has been a new powder magazine with a terraced roof.

7. No border court has been held this year. An abstract of criminal cases brought before the Second Assistant Resident, Meywar, will be found in Appendix A, and an abstract of the tours made during the year by the same officer in Appendix B.

PANURWA.

8. The Rana reports a serious loss of revenue owing to the failure of the crops, the amount stated to have been realised being only Rs,000, which is less by some Rs,2,000 than the income usually given, otherwise matters in this state are much as usual.

9. The affairs of Umria have engaged a good deal of attention during the latter part of the year, as, owing to the persistent refusal of the Bhils of the pals of Surra and Chikla to pay the fine imposed on them for the murder of the late Thakur, mention of which will be found in last year's report, it became necessary for the Meywar Darbar in January to employ for their coercion a force of some 250 men, a lesson much needed. The main objects of the expedition having been attained, with the exception of the apprehension of the alleged actual murderer who is unfortunately still at large, arrangements are being made to resettle the inhabitants of these pals, whilst the Darbar has decided to maintain a thana of 20 horse and 40 footmen in their midst to ensure their future good behaviour. In addition to the above arrangements, this little estate being deeply involved in debt, and it being found after more than two years' trial that the present young Thakur is unequal to the task of extracting it from these difficulties, and also having little or no influence with his Bhils, it was considered politic in the best interests of the estate for its management to devolve upon the Darbar for the present, and consequently on the 28th of March, Lala Durgaparsad, the Darbar Manager, formally took over charge, and it is to be hoped that in the course of a few years he may be able by careful and prudent management to liquidate the debts and make the estate a thriving and prosperous one.

JURA.

10. The debt due by this state to the Meywar Darbar having been liquidated, as noted in last year's report, as well as the smaller debt therein referred to, the financial management of the state by this office has ceased, and its entire control was again made over to Rao Zorawar Singh in August last, but the well-known indolent and apathetic nature of the Rao will, I fear, soon land the state in financial difficulties again.

11. At the beginning of the year in April last a gratifying circumstance occurred in this state, the inhabitants of all the Bhil Pals being induced to formally renounce the barbarous practice of witch-swinging. A written agreement on oath on their own behalf and that of their successors was drawn up and signed by them, and afterwards a memorial stone with a verbatim inscription of the agreement was erected in their presence close to a small temple dedicated to Hanuman. A similar agreement was also obtained from the 18 Grassia Pals of the Bikarni Patta of the state, and a memorial stone is about to be erected in one of their Pals in a similar manner.

12. The fine of Rs,1,500 imposed on the Pal of Kodurnal in this state for a witch-swinging case of some five years ago to which reference was made in last year's report, being still unpaid and there being evidently no intention of payment, advantage was taken last month of the presence in Umria of Darbar troops to enforce payment of the same by the seizure of their cattle, &c., with the result that the fine has been realised in full; unfortunately in this case also the special culprit and three brothers, who have long been the terror of the more peaceful Grassias in the neighbourhood escaped the hands of justice, but it is hoped that they may yet be apprehended.

OGHNA.

13. The crops in this usually flourishing little state seem to have suffered more than in that of the other states, and the loss of cattle from the epidemic mentioned in paragraph 4 is estimated by the Rao in some places as high as 75 per cent., a calculation which I trust is in excess of the reality.

APPENDIX A.

The following is an abstract of the cases brought before the Second Assistant Resident, Meywar, during the year 1886-87 :—

| Description. | MEYWAR. | | SEROHI-MEYWAR. | | | | MAHIKANTA-MEYWAR. | | | |

KOTRA (MEYWAR),
The 7th April 1887.

E. TEMPLE, Colonel,
Second Assistant Resident, Meywar.

No. 166, dated Banswara, the 30th April 1887.

From—LIEUT. A. F. PINNEY, Assistant Political Agent, Banswara and Pertabgarh,
To—The Resident, Meywar.

I have the honour herewith to submit the Administration Report for the year 1886-87 of the states of Banswara and Pertabgarh and the small principality of Kushalgarh.

2. I have held charge of this office throughout the year, besides that of Magistrate and Assistant General Superintendent, Thagi and Dakaiti at Abu, during four months, June to September 1886.

3. The most notable event during the year in these states as elsewhere was the celebration of Her Majesty the Queen-Empress's Jubilee. At Pertabgarh a Darbar was held, at which a kharita from the Viceroy was read and an appropriate speech delivered by the Chief; a salute of 101 guns was fired and the town was brilliantly illuminated in the evening. At Banswara, too, great preparations had been made in honour of the occasion: all the nobles of the state had been summoned to attend at the capital and a public Darbar was to have been held. Unfortunately, however, the death on the 15th February of the heir apparent's wife necessitated the postponement of such rejoicings and festivities as had been arranged for until the last day of the month, when the town was brilliantly illuminated and a public holiday was observed by the people. Similar rejoicing and festivities were also observed throughout the Kushalgarh estate.

CROPS.

4. The reports received under this head from all sides have been of a very disheartening character. The Indian-corn crops on which the large Bhil population of these districts chiefly subsist were almost entirely destroyed by excess of rain. While wheat, gram, and opium were considerably damaged by frost during the months of January and February.

In Pertabgarh the average outturn of the kharif crops is said to have been—India-corn 4 annas in the rupee, jowar and urad 12 annas, moog and til 10 annas, while that of the rabi was—wheat 12 annas in the rupee, gram 8 annas, and opium 10 annas.

The following statement shows the prices of the principal food grains during the year under report :—

| MONTHS. | | BANSWARA. | | | PERTABGARH. | | | | | | | | |
|-----------|------|-----------|----|--------|-------------|----|--------|--------|-------|----|----|----|----|
| | | Wheat. | | Mukki. | Gram. | | Wheat. | Mukki. | Gram. | | | | |
| | | S. | C. | S. | C. | S. | C. | S. | C. | | | | |
| April | 1886 | 28 | 2 | 37 | 8 | 41 | 8 | 22 | 8 | 31 | 14 | 34 | 6 |

| June | " | 25 | 13 | 33 | 2 | 37 | 8 | 20 | 8 | 24 | 6 | 27 | 13 |
| July | " | 25 | 9 | 35 | 0 | 31 | 4 | 19 | 9 | 21 | 4 | 20 | 10 |
| August | " | 24 | 11 | 36 | 4 | 27 | 8 | 17 | 3 | 20 | 0 | 20 | 15 |
| September | " | 23 | 2 | 36 | 4 | 26 | 12 | 18 | 14 | 26 | 4 | 21 | 4 |
| October | " | 22 | 8 | 35 | 0 | 39 | 1 | 17 | 10 | 27 | 8 | 20 | 10 |
| November | " | 22 | 8 | 37 | 8 | 40 | 0 | 17 | 0 | 27 | 13 | 26 | 14 |
| December | " | 21 | 12 | 33 | 12 | 38 | 2 | 15 | 0 | 29 | 6 | 28 | 2 |
| January | 1887 | 19 | 6 | 37 | 8 | 35 | 0 | 14 | 1 | 28 | 12 | 25 | 10 |
| February | " | 15 | 16 | 31 | 4 | 31 | 4 | 12 | 13 | 27 | 8 | 27 | 8 |
| March | " | 15 | 10 | 28 | 12 | 28 | 12 | 13 | 8 | 26 | 4 | 26 | 14 |

RAINFALL.

5. Below is given the rainfall registered at Banswara and Pertabgarh during the year :—

| MONTHS. | | Banswara. | Pertabgarh. |
|-----------|-------|-----------|-------------|
| May | 1886. | 0.37 | 0.56 |
| June | " | 8.11 | 2.21 |
| July | " | 10.98 | 11.64 |
| August | " | 17.22 | 17.9 |
| September | " | 2.9 | 0.53 |
| October | " | 3.68 | 4.39 |
| January | 1887 | 0.0 | 0.10 |
| TOTAL | | 42.45 | 36.53 |

GENERAL HEALTH.

6. The health has been fairly good throughout the country, no epidemic having occurred. Small-pox, however, has been prevalent in the principal towns, and has carried off a large number of children, in consequence of which the Chiefs of both Banswara and Pertabgarh have decided to entertain the services of a vaccinator in each state on the recommendation of the Meywar Residency Surgeon from the commencement of the next cold weather.

DISPENSARIES

7. The dispensaries, both at Pertabgarh and Banswara, are well attended, and the services of the Native Doctor, especially at the latter place, are most thoroughly appreciated by the people. At Kushalgarh, I am sorry to say, there is no institution of the kind at present and the want of it is very much felt.

POST OFFICES.

8. Both at Banswara and Pertabgarh have become recognized institutions. I have not, however, yet been able to persuade the Rao to start a post office at Kushalgarh, from which place letters and parcels are still carried by private runners, a distance of 20 miles, to Jhalod in the Panch Mahals.

MAIL ROBBERIES.

9. No mail robberies have been reported during the year under notice.

EDUCATION.

10. At Pertabgarh great improvement is to be noticed in the matter of education. Since last year the services of a really good master, formerly a teacher in the Rutlam school, have been engaged on a suitable salary. English, as well as Persian, Sanskrit, and Hindi,

is now being taught in the school, and the attendance has largely increased. During the year 1886 there were 158 names on the rolls, namely, 40 on that of the English class, 20 of the Persian, 8 of the Sanskrit, and 90 of the Hindi. In January the school was visited by Colonel Walter, who distributed prizes on behalf of the Maharawal and the first annual report was read. At Banswara, I am sorry to say, there is nothing very encouraging or new to report under this head.

JAILS.

11. Both at Pertabgarh and Banswara are in a very satisfactory condition. In the Pertabgarh jail there were 58 prisoners on 1st January 1887, 4 of them being life convicts.

IRRIGATION AND PUBLIC WORKS.

12. The present condition of the finances of the states under this charge does not allow of much expenditure on public works. A few new wells have, however, been sunk in Banswara, and the short road across the hilly country to Pertabgarh has been much improved. In Pertabgarh a new bridge is to be built in honour of the Jubilee, and a metalled road is being made between the city gate and the Maharawal's hot weather residence outside the town.

INFANTICIDE.

13. No case of infanticide has been reported during the year.

WITCH-SWINGING.

14. No fresh case of witch-swinging has been reported during the year. The accused in the case referred to in paragraph 7 of last year's report remained at large till a few months ago, but was finally captured and sentenced to imprisonment for life.

DOMESTIC OCCURENCES.

15. At Banswara three deaths occurred in the Maharawal's family within a few weeks of each other in February and March. The wife of the heir apparent died on 15th February, and she was followed on 21st March by the Chief's aged mother and by the Kuar's only child, a son aged 1 year, the following day.

At Pertabgarh a son and heir was born to His Highness on the 1st March—an event which has lately been celebrated with the most spontaneous rejoicings throughout the country, and has given an opportunity to all classes of testifying to the great popularity enjoyed by the reigning Chief.

BANSWARA.

16. The administration of affairs is still in the hands of Rai Bahadur Jawala Parshad, who, though he finds himself very much hampered by a want of funds and the incompetency of minor officials, is doing his best to improve things gradually, and continues to enjoy the most complete confidence of the Maharawal. It has been his chief concern lately to introduce improvements in the system of land revenue collections in those parts of the country where the land is good; but the cultivators are entirely Bhils, whose contributions to the revenue of the state have hitherto been most irregular and uncertain. Information with regard to the number of cultivators and the amount of property, ploughs, oxen, &c., in their possession is now being gradually collected and tabulated.

Another good work that has been lately started is the establishment of a market at Daniplā on the Banswara-Rutlam road. The want of suitable markets has been long felt in Banswara, and the Bhils have hitherto been obliged to go long distances across the border, either into Jaora, Rutlam, or Pertabgarh territory, for all trading purposes, and occasionally even to purchase the bare necessaries of life. This new market has only been started a very few months, but it has already attracted thousands of Bhils who used formerly to go to Puniakheri in Jaora territory and also traders from Rutlam and Sailana. A thana has also been located on the spot, wells are being sunk, and shops built.

FINANCES.

17. Separate reports have lately been submitted to you on the unsatisfactory condition of the Banswara finances. The want of a sufficient police force for controlling the large Bhil population of the country, the scarcity of good roads for the promotion of traffic, and the absence of any adequate system of irrigation for the improvement of agriculture, and consequently for the increase of the revenue, may all be put down to the want of funds and to the comparatively large amount of debt in proportion to the revenue of the state. The Kamdar has

hitherto, I am sorry to say, been unable to cope at all satisfactorily with this difficulty, but I do not consider that matters have yet reached such a pitch that they cannot be dealt with by careful and judicious management on the part of the Darbar.

THE FEUDATORIES.

18. The Rajput Sirdars of the state have been giving little or no trouble lately, except in the case of the old offender, the Rao of Garhi, whose numerous grievances, however, against the Darbar were at length finally settled by yourself during your recent visit to Banswara, and it is to be hoped he will for the future thoroughly understand his position and give no further cause for anxiety.

The various Bhil Chiefs, on the other hand, along the north-western border of Banswara have not yet been brought under proper control. They are still said to be in the habit of harbouring criminals in their villages and of living rather by plunder than by agriculture, though their depredations are much less frequent and on a much milder scale than formerly, and efforts are now being made by the Darbar to reduce them gradually to a better frame of mind.

THE BHILS.

19. Except on the Banswara-Pertabgarh border, the Bhils have been generally fairly well-behaved. In the district of Chilkari and the whole of the country bordering on the Bombay Presidency, there has been a very marked improvement lately in the conduct of the Bhils themselves and in the supervision exercised by the border officials.

EXTRADITION RULES BETWEEN PERTABGARH AND BANSWARA.

20. In last year's report it was mentioned that these rules were continuing to have a good effect. Since that time, however, several complaints have reached this office from the Pertabgarh side to the effect that the rules framed some three years ago are not working quite so satisfactorily as had been supposed and that border affrays are consequently on the increase. This matter is now being thoroughly investigated and will form the subject of a separate report.

THE ADMINISTRATION OF JUSTICE.

21. In this matter a certain amount of improvement is being made gradually. The number of cases of crime reported during the year to this office has certainly increased, but this, I think, rather points to the fact that more vigilance is being exercised in the detection and investigation of crime than that the actual amount of it has exceeded the average of former years.

INTERNAL BOUNDARY SETTLEMENT.

22. The hopes expressed on the subject of the settlement of boundary disputes amongst the Thakurs and between the Thakurs and the Darbar in last year's report, have been, I am sorry to say, only very partially realised: only a very few boundaries have been settled, and those not without a good deal of unnecessary delay and an exhibition of very bad feeling amongst the disputants. The Jagirdars are, as a rule, a very ignorant class in Banswara, and are always very suspicious of anything which savours of innovation or of interference on the part of the Darbar. Knowing that fact, the latter ought to have explained matters more thoroughly and have gone to work much more gradually and cautiously than they apparently did at the first. I hope, however, that some distinct understanding will be arrived at before long in this matter.

GOVERNMENT TRIBUTE.

23. Is being paid regularly, though the first instalment for the current year from Banswara is now some four months overdue. The Darbar has lately petitioned Government that the dates for paying in the half-yearly instalments may be changed from January and July to March and November for reasons specified in a report submitted to you from this office a few months ago.

PERTABGARH.

24. Mr. Framji Bheekaji, whose assumption of the management of the affairs of this state as confidential adviser to His Highness the Maharawal was noticed in last year's report, and who has lately entirely superseded the late Kamdar Muhamedi Beg, has been working very hard throughout the year to improve the administration, and owing partly to his own untiring energy and partly to the complete confidence reposed in his judgment by the Chief, he has met with a very large measure of success. He has worked off all arrears in both criminal and civil cases; has introduced the system of paying the police regularly every three months, having satisfied all claims against the Darbar up to date and has abolished the janadari system, by which the sepoy's have become really servants of the state instead of their respective

Jamadars as previously. He has also foundtime to make a tour through the district and to attempt a gradual improvement in the settlement and collection of the land revenue. I have paid several visits to Pertabgarh during the course of the year, and have been enabled to witness the gradual but sure improvement that is going on in every department of the state.

REVENUE AND EXPENDITURE.

25. The total income from all sources during the Sambat year ending 30th June 1885 was ₹2,72,187-12-9, while the expenditure amounted to ₹2,75,283-11-3. A debt of ₹29,306-6-9 was incurred, and ₹27,701-4-3 were paid towards the liquidation of old debts, while a recoverable balance of ₹26,210-10-3 remained uncollected. With regard to the general state of the finances, it may be remarked that the revenue has decreased very considerably of late years in consequence, as it is represented, of the prohibition by the Bombay Government of the sale of opium at the Samlaji fair in the Edar territory, and also of the British monopoly of the salt trade, the transit duty on which had to be abandoned. The steady fall, too, in the price of opium, one of the chief products of this part of the country, and the diversion of a good deal of the Guzarat traffic from its old route through Pertabgarh to the new route by the Rajputana-Malwa Railway, may be regarded as additional causes for the impoverishment of this State.

FORESTS.

26. One of the two students sent last year to Delhra Dunto to be instructed in forestry has lately been very unfavourably reported on, both in point of health and of application to his studies. The Darbar is, therefore, thinking of removing him, and I have urged upon it the necessity of sending some more promising candidate in his place. The other student is reported to be making fair progress.

KUSHALGARH.

27. There is nothing very special to report with regard to this small principality. I have visited the town of Kushalgarh twice during the year, and have always found things in a very satisfactory condition. The ryots seem contented, and there appears to be very little crime, although nearly the whole of the population is composed of Bhils.

From the following facts may be gathered the condition of the finances, administration of justice and education at Kushalgarh.

The income for the year ending 30th June 1886 was S. S. ₹57,608-13-0, and the expenditure amounted to ₹56,069-2, leaving a surplus of ₹1,538-11-0.

The revenue from the various duties levied on import, export, and transit of merchandise, &c., amounted to ₹4,767-15-0.

Three hundred and five cases were disposed of by the criminal court, leaving 15 cases pending at the end of the year, and 106 cases by the civil court, involving ₹2,027-5-6, leaving 14 cases pending.

There were eight prisoners in the jail at the end of the year.

The daily attendance at the school is said to be 45 to 50 boys.

BORDER COURTS.

28. In the beginning of December last a Border Court was held at Thandla in Jhabua, and in conjunction with the Political Agent, Bhopawar, 50 cases in all were disposed of between Indore, Jhabua, Banswara, Kushalgarh, and Pertabgarh, some of which had been pending settlement for upwards of four and twenty years. ₹3,360-12-0 were awarded on the occasion.

At the end of the same month another Border Court was held at Sunth-Rampur, where in conjunction with the Assistant Political Agent, Rewa Kantha, 125 cases in all, between Sunth, Baria, Kushalgarh, and Banswara, were settled, and ₹1,817-8-0 were awarded against the various states concerned.

I am sorry to say that no meetings could be arranged during the cold weather, either with the Political Agent, Western Malwa, or the Political Superintendent, Hilly Tracts, Meywar, for the settlement of the various cases pending between the states under their charge, in consequence of those officers having been otherwise engaged.

There are some 35 cases pending settlement between Banswara and Kushalgarh, and I intend to hold a Border Court about the beginning of next month for their disposal.

BOUNDARY DISPUTES.

29. There appear to be some 16 boundary disputes of more or less magnitude between Rutlam and Banswara, Kushalgarh and Rutlam, and Pertabgarh and Meywar. These have been pending settlement for a considerable length of time; and though only one, that between

Rutlam and Kushalgarh, is giving any serious trouble, yet it is very advisable that the whole of them should be settled as soon as possible.

On the Ranga boundary between Rutlam and Kushalgarh, which was settled and demarcated so far back as January 1885 by Mr. Evans-Gordon, no pillars have yet been erected by the Rutlam Darbar, though their appeal against the decision arrived at was rejected nearly a year ago, and though they have been repeatedly ordered to build pillars by the Political Agent for Western Malwa. The Kushalgarh share of the pillars was built some six month ago.

THE RESIDENT, MEYWAR.

30. Made a tour through Pertabgarh and Banswara territories in January last, and spent three days at each of the capitals. The Residency Surgeon also accompanied the Resident and inspected the dispensaries at Pertabgarh and Banswara.

PERIOD SPENT IN CAMP AND PLACES VISITED.

31. A period of 167 days has been spent in camp during the year and the distance travelled was 857 miles.

The following table shows the number of times each important place was visited :—

| | | | |
|----------------------|------------|----------------------|--------|
| Pertabgarh | Four times | Chhaja | once |
| Arnod | once | Bbakea | " |
| Raipur | twice | Talwara | thrice |
| Banswara | ten times | Semalia | once |
| Khandu | twice | Pipalkhunt | twice |
| Garhi | once | Khania | once |
| Shergarh | twice | Narwali | twice |
| Motagam | once | Metwalla | once |
| Ghantol | " | Bhimsor | " |
| Arthana | twice | Kushalpara | " |
| Onwara | once | Sodalpur | " |
| Kushalgarh | twice | Mowrikhera | " |
| Tambesra | " | | |

A. F. PINHEY, *Lieutenant,*
Assistant Political Agent.

WESTERN RAJPUTANA STATES REPORT FOR 1886-87.

No. 2-P., dated Jodhpur, the 9th April 1887.

From—COLONEL PERCY W. POWLETT, *Resident, Western Rajputana States,*
To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honour to submit the report on the Western Rajputana states for 1886-87.

2. From April 4th to December 10th I was absent on furlough, and Colonel Peacock acted as Resident. I have been in charge during the rest of the year. Colonel Peacock supported the existing arrangements with persistency.

SEASON.

3. The rainfall at Jodhpur and Sirohi was average. At Jeysalmer and in Malani it was somewhat below the average. Consequently to the west and north-west crops were bad and grass was scanty. No distress was however apparent. The rabi crop has been greatly injured by frost, but before the frost the price of wheat was very high owing to the exports. Other grains are however at moderate prices, so the poor do not suffer, indeed the high price of wheat is certainly a benefit to the country.

4. During the year there was a mild visitation of cholera, which was brought from Pushkar by the pilgrims returning. The previous year it was due to a similar cause. Vaccination has continued to progress under the vigorous direction of Doctor Adams. The successful operations have increased 14 per cent. I consider the successful employment of local vaccinators, instead of the unsympathetic foreigners formerly used, extremely creditable to Dr. Adams. Sanitation has, also, under Dr. Adam's direction made great progress, and has extended beyond the city of Jodhpur to Pali and elsewhere.

ADMINISTRATION.

5. There has been no important change of Native officials during the year in any of the three states of Western Rajputana.

MARWAR.

COURTS.

6. Now that a full annual report is printed by the Darbar, giving all the details of administration, it is unnecessary for me to dwell on them at any length. I will notice the courts very briefly.

7. *The Mahakama khas*, or chief appellate court, disposed of a great deal of business, and left less work pending at the end of the year than there was the year before.

8. *Court of Sirdars* maintains its reputation. I receive few complaints.

9. *Jagirdars' Courts*.—Twenty-one Jagirdars have judicial powers. The greatest anxiety is manifested to obtain these powers, which apparently are not abused, for I rarely get a complaint. Every Jagirdar who exercises powers has a trained official who has passed an examination and seen the working of a regular court. Appeals go to the Sirdars' Court. They are not numerous, although the cases heard by the Jagirdars were more than 2,000.

10. *The Court of Bankruptcy* is a branch of the Sirdars' Court. Its object is to get Jagirdars involved in debt out of their difficulties. One hundred and fifty-two estates are now paying off their liabilities, which amounted to more than 8 lakhs of rupees. During the term of liquidation no fresh debts can be contracted.

11. *The Appellate Court* has diminished the number of cases pending at the beginning of the year.

12. *Hakims' Court*.—The Hakims who now correspond with the Tahsildars of British territory, except that they do not collect the land revenue, have settled nearly 10,000 petty civil and criminal cases. Until within a recent period they settled none.

POST OFFICE.

13. The post offices are entirely in the hands of the Imperial Postal Department, according to the agreement reported two years ago. Eighteen additional village post offices were opened during the year, and there are now 55 offices in all. The runners are regularly escorted by the Jagirdar horse, and there have been no losses by daktari.

REVENUE AND EXPENDITURE.

14. The financial results of the year are again most satisfactory. The revenue, which amounted to ₹39,77,059, was in excess of the budget estimate. The expenditure, which was ₹32,61,260, was below the estimate. In this expenditure was included a lakh remitted to Bombay in anticipation of the expenses of Maharaj Sir Partap Singh's visit to England: The state owes only five lakhs of the twenty-two spent on railway construction, and it has ₹3,44,176 in the Treasury as cash balance.

15. The salt revenue, now supervised by a young educated Jodhpur official, has increased in his hands from an average of ₹3,20,000 to ₹4,17,000 last year. The price is not enhanced, as it used to be, by fraudulent cesses or monopolies, and the increase of revenue is due entirely to improved management.

CUSTOMS.

16. The customs were superintended up to August by the late Mr. Hewson, from then to December by Maharaj Sir Partap Singh, and afterwards by Major Fraser.

17. The net income from customs is estimated at ₹9,55,000 for the past year. By a revision of the tariff, duties to the annual value of ₹17,300 were given up last year. From the 1st of April of current year the duty on iron, amounting to ₹32,000 and ₹10,000 miscellaneous, were remitted, while the only enhancement was on mowah, used in making spirit. The great improvement in this branch of the revenue is due to the officers, Mr. Hewson and Major Loch, who have had charge of it; the former who organized the department, and whose devotion to duty shortened his life, would not willingly have undertaken the work if not permitted to let the people benefit from the prosperity of the revenue. Mr. Hewson's successor, Major Fraser, I know, will keep this object in view and gradually eliminate everything objectionable from the tariff or the practices of the department.

PUBLIC WORKS.

18. *Railway.*—During the year ₹6,18,428 has been spent on the Pachbhadra extension. Up to date the total capital sunk on the Marwar Branch Railway amounts to ₹21,96,215, or close on ₹22,00,000.

19. The railway has paid 11.93 per cent. during the past year, or all but 12 per cent. on the capital outlay. It is not likely that the Pachbhadra extension will be so profitable. But we may fairly expect 7 per cent. The state thus possesses the very best protection against severe famine, not only through the increased facility of importing grain, but also in possessing a property on which a large loan may at any time be raised.

20. *Other works.*—The State courts and offices is a great work begun during the year. It is to be regarded as a Jubilee work. Its design was furnished by Colonel Jacob of Jaipur. The architecture is of the elegant style common in Rajputana, and will be a great ornament to the suburbs of Jodhpur. Its estimated cost is three and a half lakhs of rupees.

21. The Jodelao canal completed during the year will supply a large increase to the water available for the city and its suburbs. It has been economically constructed at a cost of ₹30,000.

22. The Paota tank has been made to hold this additional water; for, instead of, as heretofore, the difficulty being to obtain sufficient water for the city, the question now is how to store all the water which can be brought to it. The Paota tank has cost only ₹30,000, a very moderate sum, considering the amount of water it is expected to hold.

23. Another work deserving special notice is the cleansing of the Phulelao tank, an offensive cess-pool, which, owing to its situation, was difficult to drain. The purification is an immense advantage to the city.

24. Large sums are being spent on gardens at Jodhpur. This, I think, is to be regretted, as the soil is such that the result is not likely to be commensurate with the outlay. Many other minor works have been carried out by Mr. Home during the year. His services to the Darbar are such that I can but regret very much that his pay is not much higher than it is. He is Engineer-in-Chief and Manager of the railway, and besides the construction of the latter, costing last year more than 6 lakhs, he has planned or directed and carried out economically work costing 3½ lakhs more.

LAND REVENUE.

25. The land revenue yielded ₹6,87,000, against ₹6,55,000 the previous year. A system of granting receipts to payers of revenue, and an improved manner of compiling the rent-roll, have been introduced. The land revenue system introduced under the direction of Major Loch continues to work well. No complaints reach me. Information is being collected, and

records prepared for a regular settlement, but no villages have been assessed. The field survey is completed.

INSPECTION.

26. Inspection of Jagirdar and Pargana courts, of Hakumats and Thanas has been carried out during the year. Compared with what existed not long ago, an astonishing degree of regularity has been attained.

REGULATIONS.

27. I mentioned last year that manuals for five courts or departments had been compiled. Mr. Hardial Singh has prepared three more, *i.e.*—

1. Rules for Thanadars.
2. Rules for Military Department (regarding recruiting, dismissals, punishment, pay, &c.)
3. Code of Criminal Procedure.

BOUNDARY AND LAND REVENUE SETTLEMENT.

28. Before the commencement of the present year the demarcation of jagir and rent-free village boundaries in four parganas was completed. Work is proceeding in five parganas thus:—

| | Completed. | In progress. | Remaining. | TOTAL. |
|-----------------------|------------|--------------|------------|--------|
| Pachbhadra | 99 | 3 | ... | 102 |
| Jalor | 93 | 56 | 111 | 260 |
| Sanchor | 52 | 26 | 130 | 208 |
| Siwana | 30 | 15 | 95 | 140 |
| Shiv-Sankra | 30 | 41 | 8 | 82 |

29. The settlement records are in progress and the field survey complete, except in villages which have lately lapsed to the state.

CRIMINAL TRIBES AND DAKAITI REPRESSION.

30. There has been a serious increase of dakaiti. It occurred in the first three quarters of the year. During the last quarter it was less than usual. This was due to the execution of the famous dakait Padia mentioned in last year's report. Ho and a noted follower were arrested and hanged in Godwar, where the greater number of cases occurred. Thus—

| | Dakaiti. | Highway robberies. | Loss. R |
|---------------------------------|-----------|--------------------|---------------|
| Godwar | 30 | 23 | 3,600 |
| (Elsewhere) Sojat | 2 | 2 | 1,400 |
| Jalor | 2 | 4 | 5,200 |
| Pachbhadra | 4 | 5 | 6,535 |
| Nagore | ... | 14 | 2,421 |
| Siwana | 1 | 1 | 823 |
| Shiv | 1 | ... | 254 |
| Shergarh | 1 | ... | 1,452 |
| Jaswantpura | ... | 2 | 87 |
| Sanchor | ... | 1 | 824 |
| Makrot | ... | 4 | 4,124 |
| Merta | 2 | 2 | 577 |
| Jodhpur | 1 | ... | 800 |
| Phalodi | ... | 1 | 226 |
| Nawa | ... | 1 | 130 |
| Didwana | ... | 7 | 1,157 |
| Parbatsar | ... | 2 | 368 |
| Biltra | ... | 2 | 182 |
| Jaitaran | ... | 1 | 425 |
| TOTAL (Marwar) | 44 | 72 | 30,585 |
| Malani | 5 | 6 | 5,911 |
| Sirohi | 6 | 20 | 1,353 |
| GRAND TOTAL | 55 | 98 | 37,879 |

31. In the course of the year 10 dakaiti have been convicted by the Court of Vakils and punished, 14 have been convicted and released on security, 28 have been convicted by the Marwar courts. Kishori Lal, the Durbār Superintendent of Dakaiti Suppression, has done

excellently. He has elucidated a number of cases, made many arrests, and recovered a great deal of stolen property. One of the best worked out and most important cases in the year was one which occurred in Malani. The offenders were traced by Malani Police and Thakurs to Jeysalmere territory, and found to belong chiefly to the village of Rajgarh. They were arrested, convicted, and sentenced to long terms of imprisonment. This is, I think, the first time that a band of Jeysalmere dakaits has been properly punished. It must be attributed to the presence in Malani of Colonel Peacock when the dakaity occurred.

32. The detail of the dakaits convicted and sentenced and those released on security is as follows:

| | Convicted and sentenced. | Convicted but not sentenced. |
|---|--------------------------|------------------------------|
| Rajputs | 13 | 1 |
| Báoris | 3 | 4 |
| Minás | 6 | ... |
| Bhils | 2 | 1 |
| Játs | 2 | ... |
| Chárans | 1 | 1 |
| Kacm Khánis | 3 | 7 |
| Náeks | 1 | .. |
| Chákar | 1 | ... |
| Mussulman | 3 | ... |
| Others (Kalal, Dholi, and Bralumin) | 3 | ... |
| TOTAL | 38 | 14 |

MALANI.

33. I spent two weeks of the cold weather in Malani. I regret that I am unable to report the completion of the boundary survey. However, only 23 out of 493 villages remain undemarcated. Heinous crime has increased in Malani, while cattle and other thefts have largely diminished. Some dakaits and thefts were well elucidated, and influential supporters of crime were punished. A criminal statement is attached.

34. The education of young Jágirdárs in Malani goes on progressing. In the Jasol school there are 28 Rajputs and in the Balmere there are 22. Three new schools have been opened at Sindri, Gudha, and Chotan. In these new schools there are 20 Rajputs.

SIROHI.

35. According to the Darbar reports the Sirohi revenue has fallen far short of last year's. But I am not able to check the figures, and I have some reason to believe them under-stated. I cannot account for the large decrease in land revenue, customs, and miscellaneous.

36. Boundary settlement has not prospered well in Sirohi. Doctor Stratton took over the work in the cold weather, but owing to the contumacious behaviour of the Raipur and Magriwara Thakurs little could be effected in spite of his earnest efforts. However, his very full and clear expositions of cases will be very valuable.

37. The introduction of a new customs system into the state caused some complications during the year. Probably the Darbar gave the Thakurs substantial cause for apprehension. Though the main difficulty seems to have been overcome, yet the new system cannot be said to be fairly started, and I reserve comment on it till next year.

38. Abu Road station, which is in village Kharari, has often been difficult to arrange for, owing to the constant quarrels between the Darbar and Sahiban Jamat Singh, within whose Jagir it is situated. During the year Jamat Singh agreed to give up his land for a perpetual pension, and the Darbar has taken possession.

JEYSALMERE.

39. The badness of the season has prevented progress in Jeysalmere. The revenue according to figures furnished has fallen off thus—

| | 1880. | 1885. |
|----------------------------|----------|----------|
| Land Revenue | 7,200 | 49,241 |
| Customs and Salt | 1,07,178 | 1,25,394 |
| Courts | 1,976 | 17,858 |
| Miscellaneous | 23,000 | 23,235 |

The expenditure was Rs. 1,74,300.

TOUR.

40. I was in camp from December 30th to March 4th, or 65 days altogether. I visited Malani, Jeysalmere, Dewalati, and Sirohi. At Jeysalmere I saw many Sirdars and endeavoured to arouse them to the necessity of discouraging theft and robbery in their estates. At Abu I was 20 days occupied with Sirohi business. Colonel Peacock, when Resident, made a tour in Malani, Western Marwar and Sirohi, and spent two weeks at Ajmere in disposing of Court of Vakils' cases.

NOTABLE INCIDENTS.

41. In September His Highness Maharaja Jaswant Singh of Jodhpur visited Poona, and had interviews with His Royal Highness the Duke of Connaught. In November His Highness saw His Excellency the Viceroy at Marwar Junction, which Lord Dufferin was passing.

42. In December the Agent to the Governor-General came with his camp and staff to Jodhpur, where the Maharaja entertained a large party including General Keatinge and other visitors for several days.

43. The Jubilee festival was duly observed at the three capitals, and handsome Jubilee grants were made to the Imperial Institute and Lady Dufferin's Fund.

44. At the end of March Maharaj Sir Partap Singh set off for England accompanied by Captain Bruce-Hamilton.

45. Major Fraser arrived in December to take charge of the Maharaj Konwar. He has also undertaken to supervise the land revenue and the customs, and to give assistance in other ways.

46. Major Wylie has been appointed to demarcate the border between Marwar and Meywar, and began his enquiry in December.

47. The Pachhbadra line of railway extension from the Luni was opened on the 23rd March.

48. Mr. Oldham, of the Geological Survey, made a tour through much of Jeysalmere and Western Marwar in the cold weather in hopes of finding coal. Some very curious fossils and lignite were discovered, but no coal.

49. The tendency to reversion to disorder, which I noticed last year, was slightly manifested in both Marwar and Sirohi. In Dewalati the Thakurs of Karara practically set the Darbar at defiance, and cultivated land in spite of prohibition, and the Thakurs of Magriwara in Sirohi made preparations for going into outlawry on account of a boundary decision. The Karara party has been punished. The Magriwara case has been kept pending, and will not be decided until all appearance of threatening dakaiti has passed away.

50. The death of Mr. Francis Hewson was the event which during the year most affected the interests of Marwar. He first came to Marwar in November 1882 to take charge of and reform the Customs Department. In a very few months the main abuses had been abolished, a single Import or Export duty had taken the place of all the numerous cesses which before prevailed; speculators had been detected and punished; an effectual system of check had been instituted, and the department re-organised. The effect was immediate. The revenue increased by several lakhs, and without disregarding the interests of the Darbar, large reductions in the tariff became possible. This reform will be of permanent benefit to Marwar, and its success has much affected the action of neighbouring states.

51. After about a year and a half's work in Marwar, during which time he aided the Darbar in much besides the customs, Mr. Hewson went on furlough to Europe, and did not return to Marwar till April 1886. Some months of hard work in the Foreign Office had weakened him, and he was little fit for the trying work which he undertook. The supervision of the customs had ceased to be onerous, but Mr. Hewson, in addition to the customs, took charge of the land revenue and the settlement, both land revenue and boundary. He also became guardian to the Maharaj Konwar, and into all his duties he threw his whole energy. His health suffered in consequence, and when in July he was attacked by typhoid fever, he was ill able to contend with the disease. It is thought, however, that he would have recovered if he would have allowed himself perfect rest. But his work was always on his mind, and he could not be kept from it sufficiently. He died at Bombay on the 10th of August. His devotion to work, disregard of emolument and comfort, his activity, courage, and conscientiousness have made an impression in Marwar, which will help to establish a higher standard of official duty in the state—an effect which he would value infinitely more than the respect to his memory which has been shown by giving his name to a hospital and a girls' school.

Comparative Statement showing cases of Dakaitis, &c., in Malani.

| Description of cases. | 1885. | 1886. | REMARKS. |
|---------------------------|-------|-------|---------------------------------------|
| Dakaiti | 2 | 5 | 4 persons convicted and sentenced. |
| Highway robbery | 5 | 6 | |
| Murder | 2 | 5 | 11 persons convicted and sentenced. |
| Cattle-theft | 95 | 70 | |
| Other „ | 66 | 61 | |
| TOTAL . | 170 | 147 | } 52 persons convicted and sentenced. |
| | | | |

JODHPUR,
The 9th April 1887.

P. W. POWLETT, Colonel,
Resident, Western Rajputana States.

Statement showing the Working of the Marwar International Court of Vakils during the year ending 31st March 1887.

| ACTIONS. | Number of cases pending at the beginning of the year. | Number of cases instituted during the year. | TOTAL. | Number of cases disposed of during the year. | Number of cases pending at the close of the year. | TOTAL AMOUNT OF DECREES. | APPEALS TO HIGHER COURT. | | | | | |

JODHPUR,
The 9th April 1887.

P. W. POWLETT, Colonel,
Resident, Western Rajputana States.

EASTERN RAJPUTANA STATES REPORT FOR 1886-87.

No. 43 G., dated Jaipur, the 12th April 1887.

From—F. HENVEY, Esq., C.S., Resident, Eastern Rajputana States,
To—The First Assistant Agent to the Governor-General for Rajputana.

I have the honour to submit the annual report for the Eastern Rajputana states of which I held political charge throughout 1886-87.

JAIPUR.

RAINFALL AND CROPS.

2. The usual table is given below—

| Month. | | Rainfall in 1886-87 | Average of ten years. |
|--------------|------|---------------------|-----------------------|
| April | 1886 | ... | 0.13 |
| May | " | 0.34 | 0.65 |
| June | " | 1.61 | 2.48 |
| July | " | 10.37 | 7.40 |
| August | " | 4.83 | 7.46 |
| September | " | 1.03 | 3.74 |
| October | " | 1.01 | 0.39 |
| November | " | 0.02 | 0.06 |
| December | " | ... | 0.28 |
| January | 1887 | 0.72 | 0.46 |
| February | " | ... | 0.17 |
| March | " | 0.01 | 0.09 |
| TOTAL | | 19.99 | 23.31 |

Hence the rainfall was below the average and it was very light in the later months of autumn. The crop of *moh* generally failed, and the tanks were insufficiently filled. Again, in the winter the showers were scanty and partial, and excessive frosts did much harm to the growing corn.

The consequence of all this is seen in rising prices—

| | 1886. | | 1887. | | |
|--------|-------|-----|-------|-----|------------|
| | Rs. | Cs. | Rs. | Cs. | |
| Wheat | 16 | 8 | 13 | 0 | per rupee. |
| Barley | 29 | 0 | 25 | 4 | " |
| Jowar | 31 | 8 | 24 | 8 | " |
| Gram | 30 | 0 | 24 | 0 | " |

There is, however, no sign or apprehension of anything like distress. Our hopes are staked upon the coming monsoon, for stocks are believed to be low, and, although the granaries of Harauti, are not far off, we cannot easily get at them for want of good and cheap communications.

PROMINENT EVENTS OF THE YEAR.

3. On the 10th and 17th February 1887 the Jubilee of the Queen-Empress was celebrated with splendour and enthusiasm. The Maharaja gave one lakh of rupees to the Countess of Dufferin's Fund for the medical relief of women in India, and announced in Darbar that he remitted to the agricultural classes arrears of fines, compensation, and process fees, amounting to not less than twelve lakhs of rupees. His Highness was much gratified by the intimation that his salute had been raised from 17 to 19 guns as a personal distinction, and he also rejoiced to hear that his trusted Councillor, Babu Kanti Chunder Mukerji, had received from the British Government the title of Rao Bahadur.

On the 21st February 1887 Sir Edward Bradford, then Agent to the Governor-General for Rajputana, opened the Albert Hall. This building was founded by the late Maharaja Ram Singh in 1876 in commemoration of the visit of the Prince of Wales to Jaipur. It is intended to serve as a public hall, library and Museum, and it is likely to become an exceedingly popular institution, not only from the interest of the objects displayed to view, but also because of the beauty of the building and its excellent situation in the Ram Navaz gardens, close to the city of Jaipur.

FEUDATORY CHIEFS AND NOBLES OF JAIPUR.

4. The relations between the Darbar and the subordinate Chieftains of the state continue to be good. In honour of the Jubilee the Maharaja bestowed the title of "Bahadur" on Rao Raja Madho Singh, of Sikar, who possesses a rich and powerful principality in Shekhawati and who is distinguished for the success of his administration. The title of "Bahadur" was also given, in the same way, to Thakur Gobind Singh, of Chomu. This gentleman is the first among the nobles of Jaipur. He is a Councillor and he bears a character which is in every respect worthy of his rank.

The affairs of the Raja of Khetri led to some difficulty during the year. This chief holds of the British Government the pargana of Kot Putli, which was given to his ancestor for services rendered to Lord Lake. Among the zamindars of the pargana there are many Rajputs of the Tuar race, who have held their lands from time immemorial and whose forefathers sat as Hindu Emperors at Delhi. Some of these men complained at the Residency that their rights had been disregarded by the Khetri officials, that their revenue had been unduly raised, and that numerous exactions had been imposed upon them. The British Government, though holding the sovereignty of Kot Putli, looks to Jaipur for the primary control of the pargana, and the remonstrances of the Tuar zamindars were accordingly made over to the Darbar for enquiry and disposal. The investigation was conducted with care and impartiality. The Darbar decided that the zamindars had cause of complaint and the Raja of Khetri was given the choice, either of re-arranging his demands so as to satisfy the ryots, or of reverting to the ancient system of actual division of the crops which had been superseded by leases renewed at short periods and at ever-growing rates. The Raja, who is not without prudence and good intentions, contrived to come to terms with the cultivators; and, for the present, quarrels between the parties have ceased, though it may become necessary at no distant time to undertake a regular settlement of the land revenue of Kot Putli.

The embarrassments of the Rao Raja of Uniara were mentioned in the 37th paragraph of last report. Rao Raja Sangram Singh, head of the Naruka sub-elan, died without issue on the 20th September 1886. He had adopted and nominated as his successor his brother, a child about two years old. This nomination was recognised by the Maharaja; and, as the estate is heavily indebted, it was determined to depute a trustworthy officer as manager and controller of the finances. The yearly income of Uniara is about Rs1,60,000. The expenditure has been cut down to Rs1,07,771, leaving a saving of Rs52,229 per annum for the liquidation of debts. The creditors have been ordered to produce their accounts within a specified time, and, as soon as the accounts are examined and passed, the Darbar will advance money, on mild conditions, to the estate to pay off the debts.

ADMINISTRATION.

5. There has been no alteration in the machinery of Government. The Council is composed of the departments and members named on the margin. One remarkable change for the

- Foreign, &c., &c.*
- Rao Bahadur Kanti Chunder Mukerji.
- Thakur Govind Singh Bahadur of Chomu.
- Judicial.*
- Thakur Sawant Singh of Bagru.
- Pandit Maharaja Kishen.
- Revenue.*
- Thakur Pratab Singh of Diggi.
- Pandit Moti Lal.

better requires notice. It has been recognised as one of the duties appertaining to high appointments that the heads of departments should inspect the offices which they control. Hence Pandit Moti Lal made a tour with the view of examining the actual working of the arrangements in force for the assessment and collection of revenue. Pandit Maharaja Kishen visited the provincial

courts with results which will be described further on. I induced the chief member of Council, Rao Bahadur Kanti Chunder Mukerji, to meet me at Sambhar, where we looked into some disputes, which, though of a petty kind, had led to never-ending correspondence. Half an hour's discussion on the spot was enough to put matters in train of adjustment.

FINANCE.

6. The revenues of the state are not growing—

| | |
|----------------------------------|-----------|
| | ₹ |
| In 1884 the income was | 52,27,868 |
| In 1885 it was | 56,35,371 |
| For 1886 the figures are { | 55,92,778 |
| | 53,51,945 |

Expenditure, however, has been reduced in proportion, the figures for 1886 being—

| | |
|--------------------|----------------------|
| Estimate | 55,93,406 |
| | and 120 gold mohurs. |
| Actuals | 52,77,825 |
| | and 87 gold mohurs. |

I am informed that about six lakhs were handed over to the Maharaja, to be placed in the reserve treasury, but this sum represents the accumulated surplus of former years.

In a country where the revenue is extensively collected in kind, that is by actual division of the crops; it is natural that, when the agricultural season has been poor, the income of the state should not expand.

The figures of the Customs Department for the Samhat year 1942 show some increase.

The total was—

| | |
|--------------------------------|---------------|
| In weight | Mds. 9,26,458 |
| In value | ₹ 7,83,593 |
| Compared with, in Sambat 1941— | |
| In Weight | Mds 8,44,755 |
| In Value | ₹ 6,82,421 |

The total increase, including miscellaneous items, called "Sewai Sigha" is shown as ₹1,04,822.

Apparently Jaipur exports, both in weight and value, a little more than it imports. The value of the imports is ₹3,79,064, or at the rate of 2 annas 5 pies per head of a population of, say, 2½ millions.

JUDICIAL.

7. I have already said that Pandit Maharaj Kishen made a tour for the inspection of the provincial courts. He was enabled thereby to enforce obedience to instructions issued for the guidance of Magistrates and Police, and to detect errors needing correction, such for example as the irregular and prolonged detention of prisoners who should have been set free on bail pending appeals, the heavy manacling of prisoners, the detention during holidays of prisoners whose terms had expired, and so forth. Maharaj Kishen has done good work in other directions. He has compiled and re-arranged his circulars, and he has laid before the Council the following draft regulations:—

- (1) Rules of civil procedure.
- (2) List of offences, with terms of imprisonment.
- (3) Regulations as to stamps and court fees.
- (4) Law of limitation.

He suggested, and it was ruled on his recommendation that, in order to relieve the Appellate Court of the pressure of business, all decisions by Munsiffs that might be upheld by the Dewani Court, should be appealed direct to the Council, and not to the Appellate Court.

The most remarkable result, however, achieved by Pandit Maharaj Kishen is shown in Appendix I, which gives the civil and criminal statistics of all the courts of the Jaipur State for the year 1886. It will be seen that the civil courts disposed of 12,427, and the criminal courts 17,347 cases, and that only 500 civil cases and 310 criminal cases were left pending at the close of the year.

The Police do not appear to have been very successful in the recovery of stolen property; for, in 1,994 cases reported to the Thanas, only ₹1,263 were recovered out of ₹1,09,800 stolen; and in Jaipur city ₹2,400 were recovered out of ₹30,000.

The Appellate Court has been strengthened by the retirement, on pension, of Moulvi Hayat Ali, and by the appointment of Haji Mahomed Ali, who had served with distinction as Nazim of Shekhawati.

HEINOUS OFFENCES.

8. The year has been generally free from offences of a serious or turbulent character. No cases of sati, infanticide, or attacks on the Government mails have been reported. The Darbar return shows only 3 dakaits and 4 cases of poisoning.

There have been one or two affrays between border villages: and the Uniara estate was lately the scene of an organised dakaity which is now under investigation.

Robberies of trifling sums are not infrequent, and it is probable that the number of such offences and of cattle thefts on a small scale which reach the ears of the Thanadars is much less than the number of crimes which are really committed. But, speaking generally, there is a notable absence of those occurrences which signify a lax administration and a disorganised society. For this tranquillity we are in a great degree indebted to the excellent distribution of the Frontier Police, which was effected some years ago.

THE CENTRAL JAIL.

9. The daily average of prisoners was 986, though the Jail is intended to hold about 500.

It has been my constant object to impress upon the Darbar the necessity for providing more accommodation, and I am glad to say that this is going to be done. The Darbar has undertaken to build a new jail outside the Chandpole gate of the city, at a cost of ₹1,13,000. The new jail is to have three separate enclosures, *i.e.*, one for civil prisoners, one for under-trial prisoners, and the third for short-term prisoners. Notwithstanding the over-crowding, the health of the prisoners is stated to have been good. There were 40 deaths, and out of these 4 were lunatics, 10 came in very ill from the lock-up, and died a few days after admission, and the rest had not been a year in jail.

The conduct of the prisoners appears to have been affected by the outbreak which took place at the close of the last year (*vide* paragraph 10 of Report for 1885-86), but strict discipline has brought them into better order.

CRIMINAL TRIBES.

10. I alluded to the Minas in paragraph 12 of last report. The closer this question is examined, the more thorny it becomes. Though we have Bowreahs and Moghins in easily manageable numbers, we have not to deal in the case of the Minas with professional criminals who are recognised and can be segregated and treated as such, but with a people who were once masters of the country and who now avenge themselves upon society for political degradation and for loss of land. Hence there are good Minas and bad Minas; there are Minas who are honest zamindars and there are Minas who hold land as a screen behind which they can pursue avocations of another kind: there are Minas who serve as useful watchmen and Minas who use their opportunities as watchmen to steal the cattle of their own villages, and then make money by negotiating with confederates for the restoration of the stolen property: lastly, there are Minas who are ready for any dangerous and desperate adventure, and who would lead parties of dakaits into neighbouring states if it were not for the energy and vigilance of the border Police.

The duties of Superintendent Narain Singh are so heavy and multifarious that it has been found practically impossible to charge him with the work of enquiring into the circumstances and providing for the settlement of thousands of people spread all over the state. Accordingly, the Darbar has put the matter into the hands of a *Tazimi* Sardar, named Bahadur Singh. He is now preparing a list of the Mina families dwelling in each village whether *khalsa* or *jagir*: and he has already gone over the Nizamats of Torawati which is one of the principal Mina centres. He has received orders to ascertain, in consultation with *Tahsil* officers and *jagirdars*, what arrangements can be introduced for giving Minas who have no means, or insufficient means of livelihood, cultivable land on indulgent terms, and for making advances of *Takavi* to enable them to start fairly in agriculture. He has also to find out what able-bodied Minas are willing to take service under the Raj.

It may also be prudent to improve the status of chaukidars and to encourage those whose villages are kept free from thefts; since there can be little doubt from what is generally heard that the criminal Minas, being debarred from distant excursions, are now at work nearer home.

These are measures which will take some time to consider and elaborate. But, although interesting from an administrative point of view, they do not press. The difficulty is one confined almost entirely to the internal districts of Jaipur, and it does not at present materially affect the condition of neighbouring states.

SMUGGLING.

11. Opium may not be exported, without special permission, from Jaipur to British territory, and under the orders of the Darbar the prohibition extends even to the Native states of the Punjab. These orders were grossly and fraudulently disregarded by both traders and customs officials. Punjabi traders were allowed to take away as much opium as they required on passes made out for Ulwar whence the goods could be easily run into the Punjab. Information given simultaneously to me and to the Deputy Commissioner of Gurgaon led to the discovery of an extensive system of contraband traffic which had been carried on in this way, especially from the Eastern Nizamats of Hindon. Some seizures of opium were made. The Darbar at once understood the gravity of the case and acted with praiseworthy vigour. Several of the traders were caught and punished for fraud; the Nazim of Hindon and the Head of the Customs Department have been removed from their posts; and an example has been made of a large number of subordinate officials who must have been guilty of either culpable neglect or dishonesty in accepting as *bona-fide* merchants of Ulwar men who were notoriously Punjabis, wearing the Punjabi dress, speaking the Punjabi dialect, and trading to and from the Punjab.

RAILWAY JURISDICTION.

12. In the calendar year 1886, 11 cases were tried by the Resident as District Magistrate. The following is a list of them :—

| | |
|---|----|
| Criminal breach of trust | 1 |
| Theft | 1 |
| Insult intended to provoke a breach of the peace | 1 |
| Attempt to receive an illegal gratification as a public servant | 1 |
| Voluntarily causing hurt | 3 |
| Assault | 1 |
| Mischief | 1 |
| Quitting a railway carriage while the train was in motion | 1 |
| Being drunk on duty | 1 |
| TOTAL | 11 |

Fourteen persons were prosecuted, eight were convicted and the rest discharged or acquitted.

Among the accused there were seven European British subjects of whom two were sentenced to rigorous imprisonment and two were fined.

The cases in which European British subjects were sentenced to imprisonment were, in both instances, remarkably bad. In one, a man in search of work lodged with a hospitable engine-driver and absconded with all the cash he could lay hands on. He got six months'.

In the other, a carriage examiner at Phalera amused himself by wantonly stabbing and killing a heifer. He had no excuse whatever for his conduct but attempted to prove an *alibi*, which defence entirely failed. He was sentenced to rigorous imprisonment for three months and fine of Rs50. On appeal, the High Court remitted about one-third of the term of imprisonment. To those who know the feelings of the Chiefs and people of Rajputana upon this subject, nothing need be said as to the effect produced by wanton kine killing along the line of railway. It is bad enough that cattle should be accidentally destroyed owing to want of fencing.

COURT OF VAKILS.

13. Appendix II shows the work of the court in dealing with cases prosecuted by the Thagi and Dakaiti Department.

The total work was as follows :—

| | |
|--|-----|
| Cases from previous year | 37 |
| Admitted during the year | 60 |
| Cases disposed of | 77 |
| Returned to the Thagi Department | 4 |
| Cases pending | 16 |
| Persons accused | 111 |
| " convicted | 38 |
| " released | 63 |
| " died | 2 |
| " returned to Thagi Department | 4 |
| " awaiting trial | 4 |

It may be necessary to explain the large proportion of men released to men convicted. This arises from the peculiar jurisdiction and procedure of the court. Offences such as dakaiti are carefully prosecuted by the Thagi and Dakaiti Department; and hence in such cases convictions are generally secured and the sentences passed by the court are heavy, *e.g.*—

| | |
|---------------------------------|----|
| Imprisonment for life | 1 |
| Ditto 14 years | 3 |
| Ditto 12 years | 1 |
| Ditto 10 years | 6 |
| Ditto 7 years | 3 |
| Ditto 5 years | 17 |
| Ditto 3 years | 1 |
| Ditto 1 year | 6 |
| TOTAL | 38 |

But where the charges are brought by the people of one state against the people of another, the court is moved, because the states cannot agree. Prosecutions are laid without much regard to legal proof, and as the evidence often consists of little more than the carrying of a track, which can be as easily disputed as it is easily invented (*vide* para. 13 of last report) acquittals are often the result. In like manner claims for compensation amounted to Rs3,823-4-6 but only Rs1,084-13-4 were awarded.

It is not to be inferred that there is frequently a failure of justice. On the contrary, I am persuaded that the fault lies with those who recklessly accuse their neighbours with the view of diverting blame from themselves. For example, when a cattle-theft is committed in a village of the Dosa Nizamat of Jaipur, nothing is more simple and convenient than to say that the criminals are villagers of Ulwar. The court, however, examines such accusations with close scrutiny and very often rejects them.

The accounts of the Treasurer connected with advances made on behalf of the states under decrees of court were enquired into during the year, and it was found that, contrary to orders, compound interest had in some instances been charged. This has now been put right; arrears have been paid up, and the sums still outstanding against states are in nearly all cases of recent date and all of trifling amount. There is one demand against Dholepur for Rs5-12-4 principal and interest, on account of an advance made at the end of March 1885. The Darbar has been asked to settle this petty claim at once.

COTTON PRESS.

14. The Press has been successfully and profitably managed. The total capital outlay was Rs2,36,45

The press began working in December 1885, and the number of bales pressed were as follows:—

| | Number of bales. |
|----------------------------|------------------|
| In December 1885 | 423 |
| During 1886 | 27,623 |

The income amounted to Rs1,04,361 and the net profit to Rs58,155, not making any allowance for wear and tear.

About 30 men, women, and boys find employment daily.

The differential duty which was levied on the export of impressed cotton from the state has been abolished and the charge for pressing has been reduced from Rs4 to Rs-8 per bale.

PUBLIC AND IRRIGATION WORKS.

15. As the Executive Engineer submits a separate report, only the main facts will be noticed here with special reference to their bearing upon the financial and administrative management of the state.

Colonel Jacob has controlled an expenditure of Rs10,51,940, or nearly one-fifth of the whole expenditure of the state. Out of this large sum 7½ lakhs are devoted to works, repairs, improvements, and public buildings, while Rs2,80,592 have been spent on irrigation. As a mere investment of money, it is evident that this last is a profitable speculation, for the return from water rates and increased share of produce, &c., is estimated at Rs2,01,600. Comparing this sum with Rs26,68,544, the total expenditure on irrigation since 1868, we conclude that the tanks and canals of Jaipur yield over 7 per cent. on the aggregate outlay since the foundation of the department. In a dry season, such as we have lately had, the value of irrigation to the cultivator is beyond calculation. The area watered was 85,286 bighas. The Tori Sagar, near Malpura, is in full working order and the Bucharra tank has likewise been completed for the advantage of the Kot Putli pargana. I do not rest the claim of these tanks and lakes to appreciation solely upon their value as protective measures against famines, for, although every grain is worth much in seasons of drought, still at such times a populous state must in the main depend for its supplies upon importation, and a railway tapping the grain stores of Kota would do more to fill the markets of Jaipur than any number of canals. But any one who saw or heard of the peasants struggling for water at the close of last rainy season would understand that in a dry country the greater the area irrigated the less is the risk of the villages becoming devastated by the exodus of the cultivators. The Darbar has now learnt that its direct interest lies in the extension of these operations.

The Albert Hall is nearly finished, and the Hindon Road towards Kerauli which has been completed is a line of communication that was much wanted.

FORESTS.

16. Since the departure of Mr. E. MacA. Moir in the spring of 1886, forest operations have been entrusted to Bhai Sadhu Singh, Forest Ranger. Mr. Moir proposed to have 214 square miles, or 1,37,000 acres, as state reserves, and to close some 12,700 acres against all sorts of grazing, 52,000 acres against goats, sheep, and camels, and 72,200 against avoidable damage. He divided the area into four ranges comprising 47 reserves.

The policy of the Darbar is, while approving generally of Mr. Moir's plans, to advance with the caution required in a country where forest rules are not familiar to the people, and where rights are complicated and vaguely defined. The process is naturally slow. It consists

first, of demarcation, and next, of enquiry into rights and privileges through the revenue officers, after which the tracts are handed over to the Forest Department. Thus; the Darbar has sanctioned the formation of 18 reserves near Jaipur; but, although 13,883 acres have been marked out, only 2,294 acres have actually come under control.

I attach great importance to this gradual and prudent movement, for, when it is found that forests may be formed without oppressing the people and with advantage to the Darbar, the work will grow rapidly enough, whereas hasty and ill considered steps at the outset would most certainly evoke discontent and bring operations to a stand-still. Sadhu Singh's heart is in his labours, and I consider the fact that not a single complaint of his conduct has reached this office to be sufficient evidence of the sagacity with which he is proceeding under the supervision of Colonel Jacob. Something has been done in the way of sowing jungle seeds, establishing nurseries, and planting *panni* grass in sandy wastes.

Date culture has also occupied attention with fair hopes of eventual success.

The students continue their course at the Dehra school.

EDUCATION.

17. A stimulus has been given to education in Jaipur by the appointment of Babu Haridas, formerly of the Free Church Institution, Calcutta, to succeed Babu Dinanath as Principal of the College and Head of the Department.

Improvement is manifested in several ways:—

- (1) Four additional Inspectors have been appointed at a monthly cost of ₹148. Formerly there was only one Inspector, and it was quite impossible for him to do the work satisfactorily.
- (2) The classes of the collegiate school have been re-organised and the establishment has been strengthened by the appointment of 3 English and 3 Hindu teachers and 6 Moulvis at an aggregate increased cost of ₹151 per mensem.
- (3) The Darbar has sanctioned an additional teacher for each of the ten Nizamath schools at an increased monthly expenditure of ₹178-10.
- (4) An attempt is being made to foster and encourage indigenous schools by means of a simple system of grants-in-aid. These schools are rude and elementary, but they fulfil a useful function, for almost all the present staff of patwaris, kanungos, and other village officers get their primary education in the Hindi *Chatsalas*. The policy of the Darbar is to bring the *Chatsalas* and *Maktabs* into line with the primary schools. Hence 120 schools have been chosen and ₹174 per mensem have been allotted for small grants-in-aid varying from one rupee to three rupees per mensem, and at present without any strict terms, except so far as the general character and popularity of the school are concerned. As the Principal remarks, "a steady and gradual improvement of these schools will be aimed at with as little interference with their personnel or curriculum as possible. The chief object in view at present is to get these schools firmly established by grants-in-aid, their improvement and elevation to a higher standard will be an object of subsequent endeavours."

Pains have also been taken to classify the schools upon a methodical plan, *vide* the Appendices Nos. III, IV, and V attached to this report.

Hitherto the practice has been to treat the Maharaja's College as a single institution with the Rajput School and Sanskrit College attached: whereas the College in fact contains within the same four walls the following numerous branches:—

| Department. | No. on rolls. | Cost of educating each pupil. | REMARKS. | |
|-----------------------|-------------------|-------------------------------|----------|--|
| | | R a. | | |
| I. The College proper | English | 7 | 611 0 | The pupils read for the F.A. examination. The pupils read for the Munshi and Moulvi examination at the Punjab University. |
| | Persian Arabic. | 14 | 45 8 | |
| | Sanskrit College. | 115 | 53 9 | |
| | | 136 | | |
| II. Collegiate School | English. | 480 | 16 11 | The higher classes read for the Entrance examination. In this department literature, &c., is taught in Hindi, while English forms the second language. |
| | Anglo-vern. | 234 | | |
| | Persian | 387 | | |
| | Sanskrit | 152 | | |
| | | 1,253 | | |
| III. Rajput School | 35 | | 122 | |

Owing, perhaps, to past defects the College has not hitherto achieved a success in University examinations commensurate with the cost incurred by the state. Two candidates sent up for the First Arts examination passed, and have been granted scholarships of R20 per mensem, but one candidate failed for the Munshi Fazil Examination of the Punjab University: and two out of three failed for the Munshi Alim examination. For the Munshi examination results were better, since seven passed out of eight, but the Collegiate school succeeded in passing only two out of seven candidates for the Entrance examination in Calcutta.

The Rajput School is expensive, and not altogether satisfactory. The average attendance is always poor. The problem is how to get steady work out of boys who are well off and therefore lack the ordinary incentives to exertion. This problem is not quite solved even in Europe: and the pleasure-loving Rajput may, perhaps, plead that he is not singular in preferring his horse, lance, and gun to primers and the rule-of-three.

Certainly the Darhar does what it can to encourage learning, not only by liberal scholarships, but also by apprenticing successful students to the departments of state and employing them as soon as they have shown themselves to be of use.

Provision for educating the masses is supplied by the following institutions:—

| | Number of schools. | Number of pupils on the roll. | REMARKS. |
|--|--------------------|-------------------------------|---|
| Primary schools in Jaipur and the Nizamats | 31 | 1,175 | These are maintained by Jagirdars and other rich men. These are the schools provided for in the scheme recently sanctioned. |
| Primary schools supported by private persons | 22 | 420 | |
| Indigenous aided schools | 120 | 2,907 | |
| Indigenous unaided schools | 144 | 3,849 | |
| Female schools | 9 | 681 | |
| TOTAL | 326 | 9,032 | |

The cost of educating a boy in a primary school supported by the state is given as R3-14-11, and the cost of a girl as R8-10-9.

The efficiency of the Nizamats schools depends on the thoroughness of the inspection, and this, it may be hoped, has been secured by the addition of four Inspectors.

Including 149 pupils at the School of Arts, and 175 at a private school kept by the United Presbyterian Mission, there are altogether 10,780 children getting some sort of education in Jaipur territory and of these—

10,099 are males and
681 are females.

But to appreciate properly the efforts of the state, we must exclude from the 10,099 males 3,849 pupils of 144 indigenous schools, which are unaided, and which may, therefore, be inferred to be of no account from an educational point of view. Hence we have 6,250 boys under instruction at schools which are recognised and supported by the Darhar.

Last year I reckoned the school-boy population at 15 per cent. of the whole. It seems that I should have taken the figure at 15 per cent. of the males. The population at Jaipur, *exclusive of Jagirs*, is said to be about 1,683,000, of whom 907,500 are males and 775,500 females. The school boy population is, therefore, 136,125, and, as shown above, 6,250 are actually in school or less than 5 out of every hundred. Evidently there is much room for educational expansion in this state.

Female education does not flourish. I quite agree with the Principal's remark that "the great obstacles to progress are the indifference or opposition of the people, the difficulty of obtaining suitable teachers for girls' schools, and the want of proper supervision and inspection."

The state has spent nearly R70,000 on education, or 1.3 per cent. of the whole expenditure.

HEALTH AND SANITATION.

18. Doctor Hendley submits a separate report upon hospitals, dispensaries, vaccination, &c. It will be sufficient for me to remark that—

- (1) So far as my observation extends the dispensaries, though well kept, are not numerously resorted to by the public.
- (2) Vaccination is unpopular in some parts of Shekhawati.

- (3) We narrowly escaped a bad outbreak of cholera after the Pushkar fair, but the Darbar took steps with the utmost vigour and successfully put a stop to the progress of the disease.
- (4) The Darbar has experimentally sanctioned Colonel Jacob's scheme for conveying filth from the city by means of tramway cars.

MARRIAGE EXPENSES.

19. The Maharaja, acting with the approbation of his chief nobles, has introduced regulations for the purpose of curtailing expenses on the occasions of marriages and funerals. These expenses lie at the root of much that is evil in Rajputana. The main principle of the rules is that expenses, including "tyag," or gifts to Bhats and Charans, shall be strictly proportioned to the income of the estate. It is likewise provided that Bhats and Charans shall keep to their proper beats and not swarm from all parts of the state to the scene of plunder.

In the city of Jaipur, "tyag" is forbidden by an old order in force in the time of Maharaja Ram Singh.

Sumptuary laws are more easily made than enforced, especially where public opinion encourages profusion. If, however, the Maharaja himself recognises the fact that example is better than precept and sets the fashion of prudence and frugality, he will have no lack of imitators.

MISCELLANEOUS.

20. All important boundary disputes have been settled by Lieutenant-Colonel Biddulph and Captain A. Muir, who were deputed for the purpose.

With the exception of the irritation caused by the cow-killing affair at Phalera, cordial relations have subsisted between the authorities and people of the state and the officers and servants of the British Government.

The Postal Department and the Luland Customs Department work with remarkable smoothness.

The Darbar is perhaps not very keen in increasing the area of postal development, but I think it is greatly to the credit of the state that the Post Office is able to send large remittances of coin long distances through a wild country without loss of any kind.

The Darbar arranged to have an elephant placed at the Banganga river near Mohwa to carry the mails across the river during the monsoon.

The tonk Jaipur tonga dak was abolished in November 1886 and the mails are now carried by runners.

Since the Darbar adopted revised measures for preventing the export of liquor into Ajmere, few remonstrances have been heard.

It was said that liquor was sold within the Diggi estate to subjects of Ajmere: and, as one of the orders directed Nazims to take recognizances from Javirdars near the border binding them not to sell liquor to strangers, the attention of the Darbar was called to the subject.

KISHENGARH.

SEASON.

21. At Kishengarh the rainfall was between 27 and 28 inches, but it was irregular, in so much that the autumn crops suffered from want of moisture in the early part of the monsoon, and from heavy rain in September. The *rabi* sowings were excellent, but the growing corn was damaged by frost, and the crop is now estimated at three-fourths of the average.

Cholera was imported into Kishengarh from Pushkar fair, but, excepting a few cases, the sickness was confined to pilgrims.

PROMINENT EVENTS.

22. On the 16th and 17th February 1887, the Jubilee of the Queen Empress was celebrated with much demonstration of loyalty and public rejoicing.

In the hot weather the Maharaja went upon a pilgrimage to Kota, and passed through Bundi, where he met the Maharao Raja.

In January 1887 His Highness's eldest sister, the Maji Sahiba Rathorji of Udaipur, came to Kishengarh to be present at the wedding of the Maharaja's fourth and youngest sister with the Maharaj Rana of Jhallavar.

REFORMS.

23. The appointment of Babu Syam Sunder Lal has borne fruit in many improvements. These include—

Darbar Office.—Controlling the whole administration. This is presided over by the Maharaja, who regularly conducts business in person daily with the aid of his council, and hear petitions from the people once a week.

Treasury.—A proper method of keeping accounts has been introduced; payments are made upon orders bearing His Highness's signature, and salaries are disbursed at stated periods. A budget of receipts and expenditure is prepared.

Revenue.—The Dewan, or head revenue officer, is now kept to his own business. Formerly there used to be a separate revenue official in each village but arrangements have been made to group the *khalsa* villages gradually into Tahsils of convenient size. Improvements have also been made in the forms of revenue returns and records.

Judicial.—The courts are now reduced to—

- (1) The Appellate Court.
- (2) The Criminal Court.
- (3) The Jagirdars' Civil Court.
- (4) The Courts of the Hakims of Parganas.

The staff of these courts has been strengthened and their jurisdiction defined. Special appeals from the appellate court are heard by the Darbar, which exercises supervision over all the courts.

Appeals from the Hakims' courts and from the civil and criminal courts lie to the appellate court.

The working of the courts is shown in Appendices Nos. VI and VII.

A huge mass of arrears is said to have been cleared off, and though the thorough reorganisation of the courts is, perhaps, a work of time, those which are now in operation seem to be gaining the confidence of the people.

Police.—A separate department has been created for the whole state, and the various stations and their staff are placed under one Superintendent. Crimes are few, and steps have been taken to settle in agriculture the Moghias, who are the most troublesome of professional offenders.

The foregoing is a very fair tale of reforms for one year. They have been inaugurated with as little friction as could be expected in a state where many officials had an interest in the maintenance of abuses.

FINANCE.

24. Owing to the confusion which formerly reigned in the Treasury, it appears that figures prior to July 1886, when the new system was set going, are not to be relied upon. The budget, however, for the year ending July 1887 has been drawn up intelligibly. It shows an income of ₹3,47,583, including an opening balance of ₹18,956 and an expenditure of ₹2,76,916, leaving a balance of ₹70,667. The actuals for 8 months ending March 1887 show receipts ₹2,12,004, and expenditure ₹1,99,137, so that the balance then was only ₹12,967: but this expenditure includes ₹73,306 on account of marriage charges which were not provided for in the estimates.

EDUCATION.

25. There is only one Raj school in Kishengarh. The total number on the rolls is 82 and the average attendance 71.47. The teaching staff consisted of 5 English, 1 Hindi, and 1 Urdu Master. But it is said that, in view of the elementary character of the school, instruction in English has been given up as of no practical use.

A suitable school-house is shortly to be built in commemoration of Her Majesty's Jubilee.

PUBLIC WORKS.

26. The provision in the Budget for Public Works is only ₹5,000, but it appears that extensive projects are in progress or in contemplation. Two new irrigation tanks are under construction, one at Didwana and the other at Saigaon. Work has also begun on a dam to be thrown across the Kuchil stream to divert the water into a tank close by and three other *bunds* are being repaired and enlarged. The Didwana tank is the largest and most important of these works. It is calculated to hold water sufficient for irrigating over 2,000 *bighas* and is estimated to cost about ₹15,000.

ENSILAGE.

27. An experiment on a moderate scale was made in ensilage upon the slow filling system. An old dry well, about 40 feet in circumference and 17 feet deep, was used for the purpose. The silo was filled in ten days with three kinds of grass or fodder: (1) ordinary grass, (2) fragrant *sub*, (3) joar stalks. The silo was covered in on 2nd October 1880 and re-opened on 28th March 1887, when the upper layers, *i.e.*, those of the ordinary grass, were given out to the

hullocks, buffaloes, cows and horses, all of whom seemed to eat it with relish. Milch cows and plough hullocks have been made the special subject of experiment, and the results will be carefully watched.

MISCELLANEOUS.

28. Among miscellaneous matters the following are worthy of notice :—

Vaccination.—Is being introduced through the means of four Raj servants, chosen from among Rajputs and Brahmins. These men were trained at Jaipur with the kind help of Dr. Hendley.

Abkari.—The manufacture and sale of liquor have been farmed to the Ajmere contractor chiefly for the purpose of stopping the export of contraband liquor into Ajmere territory.

Mint.—A contract for the manufacture of rough copper coins had been given out to a speculating trader, but this gave rise to complaint and was stopped.

Minerals.—A mineral has been found which forms a good black paint. It is undergoing practical test at the Rajputana-Malwa railway workshops, and if the paint is approved, the discovery will be profitable to the Darhar, as well as useful to the public.

There are mica and copper mines scattered over nearly the whole of the southern part of the state. These have been examined and may open a good field for enterprise.

LAWA.

29. This small chiefship is composed of the village of Lawa and a few adjacent villages. Its affairs have been conducted quietly by the Thakur with the help of a Munsarim deputed by this office.

On the 5th May 1886, the Thakur lost his only son, a child of tender age; and, in the following August, he went on a pilgrimage to Gaya, for which purpose he obtained sanction to an expenditure of ₹2,000.

The only other prominent event of the year was the celebration of His Majesty's Jubilee. The brotherhood assembled together and kept holiday with such simple rejoicings as the resources of the chiefship allowed.

FINANCES.

30. The income of Lawa, for the year ending 31st March 1887, was ₹9,129 and the expenditure was ₹5,810, so that the surplus income of the year amounted to ₹3,319. The income includes salt compensation paid at the rate of ₹350 half-yearly and also the interest on ₹10,000, which has been invested for the benefit of the Thakur in Government paper.

The expenditure includes ₹2,000 charges for the Thakur's pilgrimage to Gaya, and ₹125 on account of ceremonies at Uniara. The Thakur of Lawa belongs to the Naruka sub-clan of Kachwahas, and the Rao Raja of Uniara is one of the principal members of the same subclan.

Excluding the ₹10,000 invested in Government paper, Lawa has a balance as follows :—

| | |
|------------------------------------|--------|
| | R |
| At Lawa | 4,619 |
| With Residency Treasurer | 9,815 |
| | <hr/> |
| TOTAL | 14,434 |
| | <hr/> |

and the income of the estate is largely in excess of the ordinary expenditure. The Thakur's finances are, therefore, in an extremely flourishing condition, for which he has to thank the circumstances that placed him under the immediate protection of the British Government. There is no need to keep so large a balance in the Residency treasury: and accordingly arrangements are being made to invest a further sum of ₹5,000 in Government promissory notes on behalf of the Thakur.

STATEMENT II.

Annual Report on the Operations for the Suppression of Thagi and Dakaiti during the year 1886.

During the year under report there were 25 cases instituted in the Jaipur Court of Vakils, making a total of 44, inclusive of the 19 cases pending at the close of the last 12 months. Two of these were cases of Thagi and 42 of Dakaiti. Four of the instituted cases, however, were subsequently returned by request of the department in consequence of the insufficiency of the evidence against the accused.

Of the 21 persons brought to trial during the year 12 were residents of Jaipur, 3 of Bikanir, 5 of Patiala, and one of Ulwar.

Of these 7 were arrested in Jaipur, 2 in Bikanir, 2 in Patiala, 1 in Ulwar, 1 in Hissar, and 8 were voluntary surrenders.

Of the 40 persons committed for trial, 24 have been convicted, 11 acquitted, and 2 have died, 3 were undisposed of.

The sentences awarded in the case of convictions were as follows:—

| | |
|---------------------------------|-----------|
| Imprisonment for life | 1 |
| Do. for 14 years | 2 |
| Do. for 12 years | 1 |
| Do. for 10 years | 6 |
| Do. for 7 years | 2 |
| Do. for 5 years | 12 |
| TOTAL | <u>24</u> |

There were 18 cases of appeal to the Upper Court of Vakils. The sentences in 15 were confirmed, 1 was amended, and 2 were reversed.

The relations between the Thagi and Dakaiti officials and the authorities of the states under this Residency continue to be satisfactory, the Darbar affording every assistance towards the capture and detention of offenders. In one case, the circumstances of which are known to the General Superintendent, there was some local opposition to the capture of a criminal; and the Darbar marked its sense of these proceedings by inflicting signal punishment upon the persons who were in fault.

APPENDIX III.

EASTERN RAJPUTANA STATES RESIDENCY,
Jaipur, April 1887.

F. HENVVEY,
Resident.

BHURTPUR AND KEROWLI REPORT FOR 1886-87.

No. 1-P., dated Mount Abu, the 26th May 1887.

*From—MAJOR N. C. MARTELLI, Officiating Political Agent, Bhurtpur and Kerowli,
To—The First Assistant Agent to the Governor-General in Rajputana.*

I have the honour to submit the Annual Administration Report of the Bhurtpur Kerowli, and Dholepur Agency for the official year 1886-87.

2. During the year under report four officers have occupied this Agency. Colonel Euan-Smith, the permanent incumbent, remained in charge until the 29th April 1886. He then went on three months' privilege leave to England, returning to act as Resident in Meywar, which appointment he held until 6th November 1886, resuming charge of the Agency on the 8th November 1886. During the period of his absence, Captain Herbert officiated for him from 30th April to 26th July 1886, and Lieutenant-Colonel Wilson from 27th July to 7th November 1886. Colonel Euan-Smith finally proceeded on a year's furlough to England on the 8th March 1887, and I took charge of the Agency from him on that date. This report is therefore written from the copious notes kindly left by my predecessor.

BHURTPUR.**WEATHER AND CROPS.**

3. The rainfall for the year was not plentiful and was much below the average. The crops were however excellent during the year, though some damage was caused to them by excessive cold during the winter season. The entire rainfall during the year was 22.23 inches, as against 33.54 inches last year. Of this, the heaviest fall took place in the month of July 1886.

HEALTH.

4. The general health of the people has been excellent. There have been no epidemics of any sort during the year.

GENERAL RETURNS.

5. The usual returns have been received from the Darbar and are attached to this report. This office has however no means whatever of testing their correctness or otherwise, or for forming any opinion as to the results to be gathered therefrom. If taken as correct, they serve to indicate a satisfactory state of the finances, and a vigorous judicial, educational, and general administrative agency. They are forwarded as received from the Native Government, but they are by no means guaranteed as being correct.

EDUCATION.

6. The number of schools now sustained by the State is set down at 161, as compared with 167 returned in last year's report. Six schools have been abolished during the year, and seven students have been employed as teachers and two as candidates in the Darbar court. The total annual expenditure on education throughout the state is set down at R21,745-6-6. The total number of teachers is given as 222, and the total number of students 3,442, as against 4,744 shown last year, of whom 2,262 and 840 attend the Halkabundi and Tahsil schools respectively.

MEDICAL INSTITUTIONS.

7. There are thirteen dispensaries and hospitals in the state, kept up at an annual cost of R12,646-4-6 (including the cost of vaccinating operations) as against R11,732-7-3 last year. There were 15,010 cases of vaccination, all of which are reported to have proved successful.

JAIL.

8. The usual Jail return is attached. There were 10 deaths in the jail out of a total number of 665 prisoners, or at the rate of 1.50 per cent. The jail is kept in a fairly clean and good condition.

JUDICIAL COURTS.

9. The usual civil and criminal returns are attached. It will be seen that out of a total number of 8,522 cases brought before the criminal courts during the year, of which 73 were

pending from last year, no less than 8,449 cases were disposed of, leaving 73 only pending enquiry at the close of the year. While on the civil side 1,505 cases were instituted, including 108 pending from last year. Of this, no less than 1,408 cases were disposed of, leaving 97 pending settlement before the court at the close of the year. No capital punishments were inflicted during the year. No information is given as to how many decisions were appealed against successfully or otherwise.

RAILWAY JURISDICTION.

10. There were no criminal or civil suits instituted or disposed of during the year. The official intercourse between the Railway officials and the Darbar authorities is carried on amicably.

CRIME.

11. No cases of dakaiti are reported to have occurred during the year under notice. In the month of November 1886 His Highness the Maharaja was however compelled to adopt coercive measures with regard to a body of rebellious Thakurs belonging to the village of Pathena, who shut themselves up in their village, and persistently refused to obey some orders recently issued by the Darbar regarding the appointment of village Patwaris. The Darbar were entirely on their right in issuing the orders in question, and the attitude assumed by the Thakurs, who numbered from 500 to 700, was quite indefensible. The Darbar having given them a month to submit to the terms offered them and obey orders, and the Thakurs having steadily refused to submit, a force consisting of cavalry, infantry, and guns belonging to His Highness the Maharaja was eventually sent against them. The Thakurs fought with considerable gallantry and lost 25 killed and 15 wounded. After the engagement was over, the Maharaja behaved with great leniency to the survivors, and the village is now being rapidly repopulated by its former inhabitants.

INCOME AND EXPENDITURE.

12. The return submitted by the Darbar, and attached to this report, shows that the total receipts from all sources during the year amounted to R27,42,888-11-3 and 145 gold mohurs, as against R27,07,632-5-3 and 168 gold mohurs returned last year, and the expenditure to R25,73,114-14-3 and 126 gold mohurs, as against R24,87,473-8-3 and 71 gold mohurs shown last year.

AJAN KHURKA BUND.

13. In accordance with a request preferred by the Maharaja, a committee composed as follows assembled in the month of November 1886 at Bhurtpur to enquire into, and report upon, the condition of the bund:—

Members.

Colonel S. S. Jacob.

Major Hoime.

Mr. C. E. Housden.

The committee sent in an exhaustive report, finally recommending certain improvements and alterations to the bund, calculated to cost R1,60,000. The Darbar have signified their concurrence in the recommendations made by the committee and their willingness to undertake the necessary repairs should this be found really desirable and requisite. Last year the whole of the sluices were kept open and the breaches formerly made in the bund were purposely kept in disrepair, and these measures were very successful in keeping down any risk of inundation. The Darbar propose following the same course this year, and if it should prove equally successful, they will probably not incur any fresh expenditure in altering or strengthening the bund. Their future measures will much depend on the experiences gained in the approaching rainy season.

SALT OPERATIONS.

14. No complaints were received in respect of the working of the Salt agreement, the provisions of which are rigidly observed.

TRADE.

15. From the usual return received from the Darbar and attached to this report, it will be seen that the total income derived from customs during the year amounted to R2,24,517-13-1½, as against R1,63,525-15-9 returned last year.

BORDER DISPUTES.

16. The mutual exchange of villages reported last year has resulted in a great diminution of disputes between the officials of Ulwar and Bhurtpur.

INFANTICIDE.

17. No cases of infanticide are reported to have occurred during the year.

EXTRADITION RULES.

18. The Extradition Rules are working much more satisfactorily.

POST OFFICES.

19. No new post offices have been opened during the year.

MISCELLANEOUS.

20. In January 1887 the Maharaja proceeded to Agra to meet Sir Alfred Lyall.
21. There has been no permanent change in the administrative personnel of the state during the year. His Highness the Maharaja conducts the entire business of the state, and nothing whatever is done without his knowledge. There is no kamdar.
22. There were two sons born to His Highness in the months of November 1886 and January 1887.
23. The Maharaja was absent from his capital for one month during the hot weather with the sanction of the Government of India. His Highness remained at Simla during that time.
24. The Agent to the Governor-General reached Jalalpur in Bhurtpur from the Ulwar border on the 3rd February 1887, and visited Gopalgarh, Kama, Deeg, Bhurtpur, Pura, Halena and Loharu. The Maharaja and the Political Agent accompanied the Agent to the Governor-General's camp while in Bhurtpur territory.

QUEEN'S JUBILEE.

25. On the 16th February 1887 the Jubilee of the Queen-Empress was celebrated at Bhurtpur with every possible manifestations of popular rejoicing.

BHURTPUR VAKIL.

26. Pandit Bishunlal has been in attendance on the Political Agent as Vakil of the Bhurtpur state during the year, and has, as usual, always given unqualified and entire satisfaction by the way in which he has performed his duties.

KEROWLI.**WEATHER AND CROPS.**

27. The rainfall return is herewith attached. It will be seen that during the year under report there was 18.51 inches of rain, as against 36.95 inches registered last year. Of the entire fall, no less than 8 inches fell in the month of July 1886. The crops were much below the average. The kharif suffered much from want of rain, and the rabi crops were damaged excessively, owing to frost and cold.

HEALTH.

28. The general health of the people was very good. The year under report might be taken as one of comparative healthiness as far as Kerowli state is concerned. One of the epidemics which periodically break out in Indian towns and cities, *viz.*, cholera, was entirely out of the scene. No case of this disease occurred during the year. But small-pox among children broke out during the year, and although several deaths occurred in consequence of it, it did not assume any very serious aspect.

MUNICIPAL ARRANGEMENTS.

29. The municipal arrangements initiated two years ago have continued to work admirably. There have been great improvements in the city of Kerowli, which is now clean. The sanitary arrangements are well looked after. The usual return of the receipts and expenditure of the Municipality for the year is attached.

EDUCATION.

30. The usual return received from the Darhar is attached to this report. It will be observed that an average of 144.68 children daily attend the city school. A new Head Master has been procured for the school, who has already succeeded in effecting very great improvements. A proposal has lately been made by the State Council, with the concurrence of myself and the Maharaja, for the establishment of a school at the head-quarters of each of the five tahsils in the state, which is at present much needed.

DISPENSARIES.

31. There are four dispensaries in the Kerowli state. The total number of patients that have received relief during the year is as follows:—

| DISPENSARIES. | PATIENTS. | | |
|---------------------|-----------|-----------|--------|
| | In-door. | Out-door. | TOTAL. |
| Kerowli | 285 | 7,759 | 8,044 |
| Sapotra | ... | 3,486 | 3,486 |
| Mondrail | ... | 3,800 | 3,800 |
| Machilpur | ... | 2,746 | 2,746 |
| TOTAL | 285 | 17,791 | 18,076 |

Vaccination is successfully carried on in the state. Of a total number of 1,876 cases, 1,642 proved successful. The dispensaries are most popular institutions and are largely attended by the people.

ADMINISTRATION.

32. The administration of the state has, as usual, been conducted by the State Council under the general supervision of the Political Agent. The Members of the Council have one and all worked with zeal, energy, and intelligence.

His Highness the Maharaja has joined the State Council, where he sits as President.

REVENUE.

33. Deputy Collector Shaikh Amanat Hossein continues to supervise the Revenue Department with conspicuous success. The revenue has been paid regularly and without difficulty.

STATE DEBT.

34. The annual instalment of R30,000, with interest, has been paid to the State banker. The debt has been further decreased by a payment of R36,824 made by the present Maharaja from his private treasury towards the liquidation of the State debt. The state should be entirely cleared from liabilities of every description during the approaching year. The whole of the sources of revenue are in an extremely healthy condition.

COURTS.

35. The duties of the Judge of civil and criminal courts are carried on by Pandit Nand Lal, who has worked very satisfactorily. The criminal and civil judicial returns are appended herewith. At the close of the last official year there were 14 criminal cases pending, 684 cases have been instituted during the year, making a total of 698. Of these 693 cases have been decided during the year, leaving five pending settlement.

On the civil side, out of a total number of 72 cases, including four pending from last year, 64 have been decided, leaving eight remaining at the end of this year. Three decrees remained unexecuted out of a total number of 56 brought before the civil court during the year. Of the 64 civil cases decided during the year, 11 cases were appealed against to the State Council, including one appeal pending from last year, with the following results:—

| | |
|---------------------|----|
| Confirmed | 2 |
| Modified | 1 |
| Reversed | 4 |
| Pending | 4 |
| | 11 |

On the criminal side there were four appeals made to the State Council out of a gross total of 693 cases disposed of during the year, of which one case was modified, one confirmed and two remained pending. In the tahsil courts 232 civil cases were instituted during the year, of which 215 have been disposed of, leaving 17 pending.

On the criminal side, out of a total number of 302 cases, 297 have been decided during the year, leaving five remaining at the close of the official year. Two hundred and twenty-four revenue cases were heard before the tahsil courts during the year, of which 216 have been disposed of, leaving eight pending settlement.

In the Revenue Department out of a gross total of 1,488 cases, including 119 pending from last year, no less than 1,391 cases have been disposed of by the Deputy Collector during the year, leaving 97 pending. There were 10 appeals made to the State Council this year, and two were pending from last year, of which one was confirmed, five were reversed and six remained pending settlement.

PUBLIC WORKS DEPARTMENT.

36. The state has, I greatly regret to say, lost the services of Mr. C. E. Housden, Executive Engineer. It was found impossible in the present state of the finances to retain the services

of that gentleman, who accordingly returned to his duty in the public works Department, Rajputana, in November 1886. The State Council have placed on record their appreciation of Mr. Housden's very valuable services. Mr. Housden has prepared an exhaustive report on the state of Kerowli as regards its capabilities for the development of needful public works, which is now in course of being printed.

CRIME.

37. There were no cases of serious crime during the year.

INFANTICIDE.

38. There have been no cases of infanticide during the year.

EXTRADITION OF CRIMINALS.

39. The rules for the mutual extradition of criminals between Kerowli, Dholepur, and Bhurtpur have worked smoothly and satisfactorily during the year.

BOUNDARY DISPUTES.

40. There have been no boundary disputes settled during the year.

FINANCE.

41. As the accounts of the Sambat year 1943 (1886-87), which will end in June 1887, are not made up, it is not possible to give details on this head.

GUMAT DEBTS.

42. Of the ₹1,260-1-3 due on this head at the end of last year, ₹996-15-3 have been paid off, leaving a balance of ₹263-2-0 still to be collected.

MISCELLANEOUS.

43. On the 26th July 1886 the late Maharaja Urjun Pal died. He was succeeded on 14th August 1886 by his nephew the Rao of Hadoti, named Bhonwar Pal, who was seated on the Gaddi by Lieutenant-Colonel F. A. Wilson, under the authority of a telegram from the Foreign Department, dated 13th August 1886. The arrangements sanctioned during the time of the late Maharaja for the administration of the state have not, up to the present, been in any way affected by the accession of the present Maharaja, who takes his place in the council as titular President, without however having a casting vote. The Maharaja, it is satisfactory to note, attends to his official duties with great zeal, intelligence and punctuality, and has developed marked capacity for dealing with business matters.

44. Rao Bhum Pal succeeded the present Maharaja as the Rao of Hadoti.

45. On the occasion of the Queen's Jubilee, Munshi Muhammad Rashid-ud-din Khan, one of the members of the State Council, received the title of "Khan Bahadur" in acknowledgment of the many valuable services rendered by him to the state.

QUEEN'S JUBILEE.

46. The Jubilee of the Queen-Empress was celebrated with great éelat at Kerowli. In addition to the ordinary rejoicing, the Council have announced their intention of setting aside a sufficient sum of money to build a bridge over the Panehua river near the city, to be called the Kaiser-i-Hind bridge. This bridge is a very great desideratum and will be a work of great public utility.

47. His Highness the Maharaja of Kerowli went to Dig in February 1887 to meet the Agent to the Governor-General, thence His Highness accompanied the Agent to the Governor-General's Camp to Bhurtpur, where the Maharaja also exchanged complimentary visits with His Highness the Maharaja Rana of Dholepur.

DHOLEPUR.

WEATHER AND CROPS.

48. The usual rainfall return for the year is attached, and shows that the entire rainfall registered at Dholepur was 24.45 inches, as against 30.12 inches last year. The crops were below the average.

HEALTH.

49. The general health of the people was excellent.

EDUCATION.

50. There are seven schools in all kept up in the state at an annual cost of ₹2,277-0-0. The total daily attendance in all the branches during the year is represented as being 346 only, of whom 21 read English, 108 Persian, and 217 Hindi. The total number of teachers in all the schools is shown as 15.

DISPENSARIES.

51. There are four dispensaries in the state kept up at an annual cost (including salaries, medicines, and the cost of vaccinating operations) of R4,124-9-6. The usual return of dispensaries is attached. Of a total number of 7,270 cases of vaccination, 6,622 proved successful.

COURTS.

52. The usual civil, judicial, and criminal returns are enclosed. It appears that out of a total number of 1,229 criminal cases instituted during the year, of which 73 were pending from last year, no less than 1,128 cases were disposed of by the courts, leaving 101 pending at the close of the year. On the civil side 622 cases were disposed of during the year, out of a total number of 734 cases instituted and brought before the court, leaving 112 pending settlement at the end of the year.

During the year 865 cases were brought before the Revenue courts for disposal, including 202 remaining from last year. Of these 676 were disposed of, leaving 189 still requiring settlement at the close of this year.

JAIL.

53. The usual jail return received from the Darbar is attached. It will be seen that 4 prisoners were sentenced to imprisonment for life, 4 to imprisonment for 14 years, 1 to 12 years, 4 to 10 years and 3 to 8 years. No information is given as to the number of deaths among the prisoners in the jail during the year.

GOVERNMENT LOAN.

54. The balance of R53,000 due to Government last year has been paid with interest, and there is now nothing due on this account by the Dholepur state.

FINANCE.

55. The usual statement showing the actual receipts and expenditure of the state for the year 1886-87, received from the Darbar, together with a list showing the total liabilities of the state on the 31st March 1887, is herewith attached. It will be seen that the total indebtedness of every description, including the private debts of the Maharaj Rana, is set down at R11,81,423-14-6, but the private debts of His Highness are entered at R1,43,040-9-0 only, which is, I have every reason to believe, far below the mark. A special report on the state of the finances is under preparation and will be submitted at an early date.

Proposals were submitted by my predecessor to the Government of India, which provided for the State debts being cleared by a loan offered by the Patiala state, and for the introduction of a very necessary reform in the administration of the state. The question is at present under the consideration of Government.

STATE QUARRIES.

56. Mr. C. E. Housden having left, Mr. L. Dennehy, who was also, with the sanction of the Government of India, appointed Private Secretary to the Maharaj Rana, has been appointed to the charge of the quarries, which are going on excessively well.

MISCELLANEOUS.

57. During the month of November 1886 the Agent to the Governor-General visited Dholepur and remained there two days.

His Highness the Maharaj Rana went to Bhurtpur in February 1887 and exchanged visits with the Agent to the Governor-General and the Bhurtpur and Kerowli Chiefs.

58. The various Darbars under this Agency have accepted the draft supplementary agreement to the existing extradition treaty proposed by the British Government.

59. The Maharaj Rana was absent from Dholepur for about four months during the hot weather with the sanction of the Government of India. His Highness resided in Simla during that time.

QUEEN'S JUBILEE.

60. The 16th of February 1887, the day of the Queen's Jubilee, was celebrated in Dholepur with all the usual signs of rejoicing.

OFFICE ESTABLISHMENT.

61. Colonel C. B. Euan-Smith, C.S.I., on leaving this Agency for a time, desired me to place on record his appreciation of the excellent services rendered by Babu Jurana Lal, the head clerk of this Agency, who has, during all the time Colonel Euan-Smith has known him, performed his duties to my predecessor's entire satisfaction with punctuality, care, intelligence, and zeal.

STATEMENT D.

Bhurlpur Jail Return for the Sambat year 1942.

HARAOTI AND TONK AGENCY REPORT FOR 1886-87.

No. 45 P., dated Tonk, the 4th September 1887.

From—LIEUT.-COLONEL J. BIDDULPH, *Political Agent, Haraoti and Tonk,*
To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honour to submit the Annual Administration Report of the States of the Haraoti and Tonk Agency for the year 1886-87.

HEALTH.

2. The health of the district throughout the year was exceptionally good. In the beginning a few cases of small-pox and measles occurred but the disease soon disappeared.

RAINFALL AND CROPS.

3. The rainfall of the year, as will be seen from the following table, was considerably below the average:—

| MONTHS. | | DZOLL. | | TONK. | | SHARFURA. | |
|-----------|------|--------|------|-------|------|-----------|------|
| | | In. | Cts. | In. | Cts. | In. | Cts. |
| April | 1886 | ... | ... | ... | ... | ... | ... |
| May | " | 1 | 86 | 1 | 6 | 2 | 51 |
| June | " | 3 | ... | 2 | 84 | 6 | 18 |
| July | " | 9 | 94 | 6 | 63 | 3 | 44 |
| August | " | 6 | 4 | 9 | 89 | 10 | 38 |
| September | " | 2 | 52 | ... | 38 | ... | 77 |
| October | " | ... | 30 | ... | 21 | ... | 37 |
| November | " | ... | ... | ... | 13 | ... | ... |
| December | " | ... | ... | ... | ... | ... | ... |
| January | 1887 | ... | 29 | ... | 39 | ... | 14 |
| February | " | ... | ... | ... | ... | ... | ... |
| March | " | ... | ... | ... | ... | ... | ... |
| TOTAL | | 23 | 95 | 21 | 53 | 23 | 79 |

Ploughing operations commenced in June, but, the rainfall being unusually low, sowings were delayed. Subsequently matters improved, and, though more rain was needed, all went well till September, when, owing to the failure of rain in that month, the kharif harvest was a poor one, with the exception of the cotton crop, which appeared to profit by the dry season and was estimated to yield an outturn of 50 per cent. larger than in the previous year. The rabi sowings were restricted owing to the failure of the late rains. In February severe frosts nearly destroyed the gram crop, while wheat, barley, and opium all suffered. The cultivators found some compensation in increased prices, but, this being the second bad season in succession, they have suffered considerably.

4 The grass crop was also everywhere below the average. The result has been a very serious loss in cattle during May and June 1887.

PRICES.

5. The prices of food grain throughout the year are given in Appendix A.

MEENA KHERAR.

6. The Meena Kherar remained quiet during the year. In December, while on my annual tour, the Patels of 20 Mewar Kherar villages waited on me at Jehazpur and petitioned for a relaxation of certain reports of an inquisitorial nature, to which they have hitherto been subject, and to be relieved from daily roll-call, since the existence of these measures, it was alleged, affected their character and caused interruption in their agricultural work. The Hakim of the district supported the application, and since there is reason to suppose that the

practice of infanticide has greatly diminished, the reports which were found to be so distasteful will no longer be called for, and the roll-call will in future be weekly; instead of daily. The Patels have been warned that any apparent increase of infanticide will lead to renewal of the measures complained of.

In the Bundi portion of the Kherar a notice was circulated by the Durbar offering a reward of ₹10 to persons giving reliable information of cases of infanticide.

7. The following table exhibits the number of births and deaths during the year:—

| STATES. | BIRTHS. | | DEATHS. | |
|------------------|---------|--------|---------|--------|
| | Boys. | Girls. | Boys. | Girls. |
| Mewar | 72 | 70 | 38 | 39 |
| Jaipur | 8 | 7 | 5 | 3 |
| Bundi | 33 | 21 | 3 | 6 |
| TOTAL | 113 | 98 | 46 | 48 |

8. In January a dakaiti was committed on the house of one Hira Lal Mahajan of Newarria in Jaipur territory, 8 miles from Deoli. The dakaitis, numbering 40 or 50 men, were subjects of Jaipur, and were armed with guns, swords, and clubs. One of the Mahajan's men was killed and five were wounded, while property to the value of ₹11,320 was carried off. The case is under enquiry in Jaipur.

INTERNATIONAL COURT.

9. The work done by the Haraoti International Court of Vakils is shown in Tables I and II in Appendix B.

DEOLI CIVIL DISPENSARY.

10. Three thousand three hundred and two out-patients, and 112 in-patients were treated during the year against 2,501 out-patients and 93 in-patients of the previous year.

Vaccination operations were carried on both in the station and also within a radius of about 16 miles in the surrounding districts, excepting the Ajmere district. Six hundred and sixteen vaccinations were performed, of which 53 were unsuccessful. Of revaccinations 7 were successful and 5 unsuccessful.

THE DEOLI STATION.

11. Owing to the scanty rainfall there was a scarcity of water supply.

BUNDI.

GENERAL.

12. The Maharao Raja enjoyed good health during the year. As mentioned in last year's report, the Nagode Maharani died on the 5th May 1886. On 20th September His Highness' youngest son Rughobar Singh died, aged four years. It was this son, not the heir apparent, as erroneously stated in last year's report, who was betrothed to the Maharaja of Kishengarh's niece. The names of the three remaining sons are as follows:—

Rughobir Sing, heir apparent.
Rungrāj Sing.
Rughorāj Sing.

13. The following changes have taken place during the year. Pandit Gauga Sahae resigned the Kamdarship of the state and was succeeded by Bohora Hurridutt, whose appointment of Bakshi of Jagirs was conferred on his brother Bohora Premdutt. Maharaja Hanwant Sing, Thakur Dhonkal Sing, and Kabia Dabidan were transferred from the Panchayat to the Hukm-i-Niyai, the Court presided over by His Highness, their places on the Panchayat being filled by Rao Gholab Sing, Bohora Sunder Lal, and Bohora Rattan Lal.

14. The charge of backwardness is so frequently brought against the Bundi Administration that it is worth mentioning that during the year two old orders of the state, with regard to witchcraft and infant marriage, were republished. By the former the mere accusation of witchcraft is punishable with a year's imprisonment; while to show the groundlessness

of the belief in witchcraft Rs500 and a grant of 50 bighas of land are offered to any body who will demonstrate to the satisfaction of the Durbar the existence of ghosts or similar supernatural agencies.

15. The marriage of boys under 16 and of girls under 14 years of age is forbidden, but in the case of girls the law is relaxed by special permission in cases where the parents are of advanced age and not likely to live long: marriages are permitted in such cases of girls over 10 years of age, but in no case is the marriage of girls under 10 years of age permitted. The marriage of girls under 18 to men of advanced age is also forbidden. Special penalties are assigned for the infringement of these laws.

16. The Jubilee celebration of Her Majesty the Queen-Empress was observed with due honours on 16th February. As a special mark of the esteem in which His Highness the Maharaja Raja is held a kharita, to be delivered by a British officer in person, was transmitted from His Excellency the Viceroy. In consequence of my inability to reach Bundi in time for the occasion, my camp being at the time in Malwa in the outlying pargana of Pirawa of the Tonk State, Captain J. Ball of the Deoli Irregular Force was specially deputed to Bundi to deliver the kharita. A Darbar was held on the occasion and a salute of 101 guns was fired. At night the town was illuminated, and there was a display of fireworks. In commemoration of the event His Highness announced his intention of constructing a house for English visitors, a serai for Native travellers, and a new hospital.

RAINFALL AND CROPS.

17. The rainfall was deficient; consequently the rabi sowings were short. Severe frosts in February did much damage, especially to the gram. Taking the crops through the whole state, half the gram crop and one quarter of other rabi crops were calculated to have been lost. There was also a great deficiency of grass.

PUBLIC HEALTH.

18. The general health has been good during the year, there having been no epidemic disease.

DISPENSARY.

19. Six thousand six hundred and forty-three patients were treated during the year at a total cost of Rs2,472-2-9.

The vaccine operations amounted to 217, of which 71 were unsuccessful, the greater number being on boys.

JAIL.

20. The average monthly number of prisoners was 92. On the 31st March there were 90 prisoners in the jail as follows:—

| CRIME. | Male. | Female. |
|---|-------|---------|
| Murder and poisoning cases | 17 | 16 |
| Theft, &c | 42 | 1 |
| Sentenced by the Haroti Court of Vakils | 9 | ... |
| Under trial | 5 | ... |

CRIME AND POLICE.

21. Three dakaits occurred during the year, the amount of property carried off being estimated at Rs1,957-13-0. Two of these were committed on Bunjaras and one on a Mahajan traveller, but in all three cases claim to compensation was dismissed by the Haroti Court of Vakils on account of the complainants having failed to observe the precautions necessary to entitle them to claim compensation. None of the dakaits concerned were apprehended.

Some improvement was effected in the police arrangements by the entertainment of 102 additional chowkidars. The total police strength on the 31st March amounted to 363 sepoy and 99 sowars. A decrease in the number of complaints by travellers has been the result.

EDUCATION.

22. There were 627 boys on the rolls of the school at the capital and those in the districts. Of these, 27 learn English, 39 Persian, 106 Sanskrit, and 455 Hindi. Babu Bama Churn, former Head Master, having obtained employment elsewhere, arrangements are being made for filling the vacancy. Meanwhile, the school has been placed in charge of the Second Master. A Muhammadan teacher has also been appointed to the Persian class on Rs10 per mensem.

PUBLIC WORKS.

23. The Darbar having expressed a wish to entertain a trained overseer, the services of one Muhammad Hossain were engaged on the recommendation of the Principal, Thomason College, Roorkee, on Rs40 per mensem.

The Ghora Pichar causeway, the construction of which was undertaken by Mr. Miles, Executive Engineer, Kotah-Jhalawar, was completed during the year at a total cost of Rs3,062-5-6. Some damage was caused to the causeway over the Mej Nadi on account of the work not being completed before the monsoon. The causeway has now been completed.

The Khawasji-ki-Baori, which has been under construction for some years past between the villages of Hindoli and Deva-ka-Khera, was completed on 1st March 1887. His Highness the Maharao Raja, with his family, proceeded to the spot and carried out the usual opening ceremony with much rejoicing. Some 10,000 persons are said to have joined the feast given by His Highness on the occasion. There being no wells between the villages of Hindoli and Dewa Khera the Baori will be of great convenience to travellers.

MINT.

24. The old Bundi rupee, containing an alloy of $3\frac{1}{2}$ rattis, was superseded in July by a new rupee, containing $1\frac{1}{2}$ rattis alloy. On one side of the new coin are engraved a "Kattar" and the words "Queen Victoria," and on the other the name of His Highness the Maharao Raja. The old rupee weighed 10 mashas 5 rattis, the new rupee weighs 10 mashas and a little over $2\frac{3}{4}$ rattis. Specimens were sent to the Calcutta Mint.

FINANCES.

25. No account of the finances has been rendered this year, but a promise has been made that they shall be rendered in future.

THE KAPRAN CHIEF.

26. The new Kapran Chief is showing an increasing disposition to resist the authority of the Darbar.

TONK.

27. His Highness the Nawab enjoyed good health during the year and had a further increase to his family by the birth of four sons and two daughters. On the other hand, one son and one daughter died. The total number is now nine sons and twelve daughters.

28. In January His Highness made a short tour through his district of Aligarh-Rampura, enquiring into the condition of the people and interesting himself in their behalf by attending to their complaints.

29. During the year I paid four visits to the capital and held several consultations with His Highness the Nawab. Reforms were considered and introduced into the various branches of the state's administration, while measures were taken for the adjustment, on easy terms, of the State debts. An account showing what has been done under this head will be found later on.

30. In the beginning of December, while on my annual tour, I passed through the pargana of Aligarh, where I halted for a day. In January I visited Nimbahera and made a short tour in the interior of the district. Several matters, which were pending for want of enquiry, were taken up and disposed of. In February I arrived at Parawa, where I remained ten days. Complaints as to damage to crops against the Jagirdars, and touching the mismanagement of the pargana generally, were taken up and considered, while measures were suggested for the improvement of the condition of the district and of its people.

JUBILEE.

31. The Jubilee of Her Majesty the Queen-Empress was celebrated on the 16th February at the capital and in the parganas with much rejoicings.

His Highness held a public Darbar in the Fort, at which a congratulatory address was read by the Prime Minister Sahibzada Mahomed Obeidulla Khan. To commemorate the happy occasion His Highness subscribed Rs5,000 for the establishment of a Victoria School of Industry, with a permanent endowment of Rs3,000 for its support, and for building a Victoria Serai for the use of travellers. In addition to the above His Highness presented a sum of Rs1,000 towards the Imperial Institute in London. A Royal salute of 101 guns was fired from the ramparts, while the band played the National Anthem, and the town was brilliantly illuminated. A large number of indigent people were fed, and thirteen prisoners were released from jail. His Highness further forwarded a congratulatory telegram to the Foreign Office for transmission to London.

SANITATION.

32. Much has been done during the year towards improving the sanitary condition of the town of Tonk, and the system of conservancy may now be said to be in good working order. The people who formerly considered it a degradation to resort to latrines now freely avail themselves of the same. The income from the tax amounted during the year to Rs.303 and the expenditure to Rs.187.

HEALTH.

33. The general health was good throughout the year, no epidemic having occurred either at the capital or in the parganas. In Sironj and Nimbahera, however, fever and small-pox prevailed to some extent.

RAINFALL AND CROPS.

34. The rainfall of the year was considerably below the average, particularly in the district of Aligarh, where both the kharif and rabi crops suffered seriously, the estimated average outturn as reported being respectively 4 and 8 annas in the rupee.

In the Tonk pargana the kharif was below the average, while of the rabi crops gram and opium suffered greatly by frost in February, the yield being estimated at only 7 and 10 annas in the rupee respectively.

In the Nimbahera and Perawa parganas the kharif crops were excellent, while in Chabra and Sironj they were below the average, except sugarcane and cotton, which in the latter pargana yielded a full outturn. The rabi crops in all four parganas were below the average, the estimated loss in the former varying from 10 to 14 annas and in the latter from 2 to 10 annas in the rupee. The cotton harvest was, however, exceptionally good.

35. The following table exhibits the quantity of new land brought under the plough during the year :—

| PARGANAS. | Land taken up. Bighas. | Immigrated. | New ploughs. | Emigrants left the state. |
|------------------------|---------------------------|-------------|--------------|---------------------------|
| Tonk | 1,484 | 14 | 12 | 20 |
| Aligarh | 2,816 | 114 | 71 | ... |
| Nimbahera | 2,418 | 25 | 74 | 63 |
| Sironj | 2,285 | ... | 65 | 14 |
| Perawa | 200 | 27 | 35 | 25 |
| Chabra | 406 | 11 | 10 | 23 |
| TOTAL | 9,639 | 291 | 267 | 145 |

BOUNDARY DISPUTES.

36. There are no boundaries in dispute in the Tonk and Aligarh parganas. In Perawa there are three, and in Sironj four, all of which are said to be of long standing. The Perawa ones exist between :—

| Tonk. | Foreign Village. |
|------------------------------|---------------------------------------|
| 1. Kararia Sherper | Khemaboda of Gwalior. |
| 2. Azampur | Gurwara Sohela and Rajpura of Indore. |
| 3. Kallianpura | Bichekheri of Indore. |

While those in Sironj are between—

| Tonk. | Foreign Village. |
|-------------------------|--------------------------|
| 1. Ramnagar | Toria Ram Thak of Gurha. |
| 2. Benaro | Rattanpura of Gurha. |
| 3. Bansikhara | Kemulpura of Gurha. |
| 4. Nekau | Bhurna Khern of Gwalior. |

In Chabra there are no disputes of recent date but two old ones. One between Piplu of Chabra and Bari of Gwalior said to have been decided in 1818 by Munshi Shumshuddin Ahmad Naib Munshi of the Gwalior Residency, and the other between Faizpura of Chabra and Baragaon of Gwalior, settled in 1822 by Captain Allen of the Central India Horse, are stated to have been re-opened at the instance of the Gwalior Darbar. The Tonk Darbar is preparing to protest against the re-opening of these cases.

In Nimbahera there were 68 disputes pending. Of these, three were decided by Captain A. P. Thornton and 16 by Mr. L. W. King, leaving 47 for settlement at the close of the year.

EXCHANGE OF VILLAGES.

37. The negotiations regarding the exchange of the village of Chanderi in Sironj, with a village in Maxsudangarh mentioned as in progress in last year's report, have not yet been completed.

JUDICIAL.

38. The proposal referred to in last year's report relative to the establishment of Munsiff's courts in the outlying parganas, with a view to relieving the Amils of the duty of hearing civil suits, was carried out during the year by the appointment of Munsiffs on salaries varying from ₹50 to ₹100 per mensem. The appointment of these courts has given great satisfaction to the people. At the capital the scale of the ministerial establishment of the civil and criminal courts was revised, and, although in some instances the salaries of incumbents were raised, the general effect of the measure has been a saving in the expenditure originally incurred.

Mahomed Nujuff Khan, the Judicial Officer, visited Parawa, Chabra, Sironj and Nimbahera during the cold weather, and the proposals he has submitted on various matters requiring reform are receiving due attention.

39. The draft code mentioned in last year's report has not yet been adopted owing to its provisions being considered too intricate for use in a state where no written code has hitherto existed. The matter is, however, under consideration, and a simpler code is in course of preparation.

40. The following table shows the work done in the civil and criminal courts at the capital and in the parganas :—

| NAME OF COURT. | PENDING ON 31st MARCH 1886. | | | INSTITUTED BETWEEN 1st APRIL 1886 AND 31st MARCH 1887. | | | TOTAL. | | | DECIDED. | | | PENDING ON 31st MARCH 1887. | | |
|-------------------------------|-----------------------------|-----------|--------|--|-----------|--------|--------|-----------|--------|----------|-----------|--------|-----------------------------|-----------|--------|
| | Civil. | Criminal. | TOTAL. | Civil. | Criminal. | TOTAL. | Civil. | Criminal. | TOTAL. | Civil. | Criminal. | TOTAL. | Civil. | Criminal. | TOTAL. |
| Appellate Court | 13 | ... | 13 | 104 | 48 | 152 | 117 | 48 | 165 | 111 | 46 | 157 | 6 | 2 | 8 |

CRIME.

42. During the year two cases of dakaiti were reported from Parawa and an equal number from Sironj. Of the total, two were serious ones, in which three men were wounded and one dakait killed, while property to the value of R2,635-12 was carried off.

JAIL.

43. The new Central Jail, which has been under construction for some years past, was completed during the year. On the 1st March the whole of the prisoners confined in the old jail were removed to it. There being no recognised rules for the guidance of the jail authorities, a code was drawn up by a committee specially appointed for the purpose which, having received the sanction of His Highness the Nawab, is now acted upon. The prisoners are employed in various useful labours and instructors have already been entertained for training them to industrial arts.

The health of the prisoners was good throughout the year, 139 patients were treated at a cost of R157-15-1.

DISPENSARY.

44. The dispensary continues to do good work under the management of Hospital Assistant Lala Pirbu Lal. During the year 280 in-door and 14,082 out-door patients were treated at a cost of R2,669-8-1. The average daily attendance was 143-44.

One thousand nine hundred and sixty-nine vaccination operations were performed, of which 1,220, or about 62 per cent., were successful. The expenditure incurred amounted to R316-14. At present the work of vaccination is confined to the Tonk and Aligarh parganas, but its extension to the four detached parganas is under consideration.

45. In the school founded in connection with the Countess of Dufferin's Fund six women—three Hindus and three Mahomedans—were entertained for preliminary education in reading and writing to fit them for admission into the Agra Medical School. An allowance of R25 monthly was granted them by His Highness the Nawab to encourage them to study. One of the women, a Mahomedan, withdrew after a time. Of the remainder, two women, both Mahomedans, have, since the close of the year under report, been sent to Agra, where, having passed the customary test examination, they have been admitted to the Medical School. His Highness the Nawab has granted them scholarships of 15 and 14 respectively, and it is hoped they will return to Tonk in due time qualified to render useful service in the state.

EDUCATION.

46. The Department of Public Instruction in Tonk continues to make steady progress. The two boys who, as mentioned in last year's report, were sent to Ajmere to be examined, have, however, failed to pass the Anglo-Vernacular Middle Class examination held there in April 1886. In February last the names of three students were sent up to the Director, Public Instruction, North-Western Provinces and Oudh, but the application was refused owing to its having been made after the list had closed.

A vernacular middle class, containing seven students drawing a scholarship of R1 each, was started during the year, and it is intended to send them up for the Vernacular Middle Class examination to be held in Ajmere in April 1888.

In addition to the above, four students are being trained for the Punjab University examination to be held at Lahore in May 1888. Two of these are studying for the degree of "Moulvie," and two for that of "Munshi" of the University.

The four girls' schools continue to be well attended.

In January a boys' school was opened in Aligarh. At the close of the year the number of boys had increased from 50 to 200, of whom 130 were Mahomedans and 70 Hindus. The expenditure amounts to R40 per mensem.

On the last day of the year there were 768 boys and 115 girls on the rolls of the schools and 5 women. Of these, 486 are Mahomedans, 400 Hindus, and 2 Christians. One hundred and thirteen were taught English, and 775 other languages. The daily average attendance was 602.

The total amount expended in the cause of education during the year amounted to R6,165.

Under the directions of His Highness the Nawab, Syud Rashid-ud-din Ahmad, the Principal of the Tonk schools, visited the districts of Nimbahera and Perawa during the cold weather for the purpose of establishing schools. From the Principal's report it appears that there were at the time four indigenous schools, with 135 students in Nimbahera and ten schools with 245 students in Perawa.

MAYO COLLEGE.

47. Of the eleven boys in the Mayo College, two were withdrawn during the year. The heir apparent continues to study in the College.

PUBLIC WORKS.

48. Inspection of accounts has shown that the expenditure on Fasli 1292 was R32,099, instead of R53,059, as was stated in last year's report. The mistake arose from some of the works executed in the beginning of Fasli 1293 having been charged to the preceding year. The total charges under this head for Fasli 1293 amounted to R62,305. The principal items were—

| | R |
|---------------------------|--------|
| New Jail | 17,194 |
| Dāk Bungalow | 2,986 |
| Agency Bungalow | 4,677 |
| Press House | 664 |
| Roads | 4,900 |

The rest of the expenditure was on account of establishment, petty repairs, and miscellaneous charges. Recent changes in the administration of this department will, it is hoped, give the state a better return for the money spent under this head.

CUSTOMS.

49. In consequence of the malpractices in the collection of customs duties, to which allusion was made in paragraph 42 of last year's report, it was deemed expedient to re-organize the department in view to placing it on a satisfactory footing. Mirza Mahomed Akbar Ali Khan was accordingly appointed as Superintendent on a salary of R200 per mensem. Under his management a judicious reduction was effected in the establishment and, where necessary, increase of pay was sanctioned.

Since joining his appointment in December the following reforms have been introduced by the Superintendent:—

- I.—A customs tariff and a set of rules to meet local requirements have been drawn up and introduced for guidance into the Tonk and Aligarh Customs Offices.
- II.—The system under which the residence of the old town paid higher rates of duties than others has been discontinued, with other similar irregularities, and all have been made subject to the rules introduced.
- III.—There being no recognised system for levying duty on grain, which consequently was charged *ad valorem*, it has been ruled that it should be charged according to weight.
- IV.—Several small duties, which were the cause of constant complaints, have been abolished, while in others, suitable reductions have been made; but a complete revision of the tariff is required, and will be carried out during the current year.
- V.—The practice under which certain import duties were leased to a contractor for R3,500 per annum was discontinued and the duties are now collected direct by the Customs Department.

In addition to above certain Sahibzadas and Ladies of His Highness, who formerly enjoyed exemption from payment of duty when importing grain for sale under sanads granted them by the present and former Chiefs, are now charged import duty at the same rate as is levied from the public. This measure was necessary owing to the abuse that arose from an unfair use of the sanads. Some discount was naturally caused by their being cancelled, but all just claims will receive consideration as soon as the necessary data are obtained for granting exemptions in a more definite form.

The uniform duty of 2 annas per cart-load, formerly levied from all Sahibzadas on grain imported by them, has now been raised to R1-2-9 per cart-load.

During the last cold weather the Superintendent visited the districts of Nimbahera and Perawa for the purpose of acquainting himself with the system obtaining in the customs offices and posts existing in those parganas. His proposals in regard to Nimbahera have been carried into effect while those in regard to Perawa are under consideration. It being found in the course of enquiry that some of the traders paid only half the customary duty, especially on opium, orders have been issued enforcing payment by all of the full amount of duty.

Thirty-nine criminal cases were instituted against the Moghias during the year, *viz.*, thirteen of theft, three of absence without leave, four of absconding, one of assault and seventeen petty cases.

The following table gives the distribution, &c., of the Moghias in the pargana :—

| No. | VILLAGE. | Men. | Women. | Boys. | Girls | TOTAL. |
|-----|------------------------|------|--------|-------|-------|--------|
| 1 | Khera | 10 | 12 | 4 | 11 | 37 |
| 2 | Kuchrakheria | 5 | 9 | 5 | 5 | 24 |
| 3 | Pind | 14 | 11 | 10 | 9 | 44 |
| 4 | Morvan | 2 | 2 | 4 | 3 | 11 |
| 5 | Bharipura | 2 | 1 | 1 | 1 | 5 |
| 6 | Jhajulwas | 1 | 1 | ... | 2 | 4 |
| 7 | Padampura | 1 | 2 | ... | ... | 3 |
| | TOTAL . | 35 | 33 | 24 | 31 | 128 |

CASE OF HUMAN SACRIFICE.

54. In October particulars of a case of "Johar," or human sacrifice, which took place at Girawla in the Nimbahera pargana on the 27th September last, and in which two women were burned alive, were reported by the Darbar. As the circumstances necessitated an enquiry by officials not connected with the district, the Darbar appointed a special Commission headed by Sahibzada Abdul Rahim Khan, brother to His Highness the Nawab, and Nazim of the Tonk Criminal Court, with Sahibzada Mahomed Khan, Nujuff Khan and Moulvie Rashid-uddin Ahmad, Principal of the Tonk Educational Department, as members, to conduct a careful enquiry into all the circumstances of the case and into the acts in which it had originated. At the special request of His Highness an Agency official was sent to assist in the investigation.

Girawla is a small village of sixteen or seventeen houses, principally of Brahmins. A full report having already been submitted, it is unnecessary to do more than refer briefly to the facts of the case.

From the enquiry held by the Commission it was ascertained that the village had been inhabited by Brahmins for many generations. The present occupants, though alleging that they were in possession of a copper sanad from one of the old Mewar Princes granting them the village rent-free, were unable to produce the plate when called upon to do so. They further stated that village traditions bore witness to nine similar "Johars," while under Mewar rule, the localities of three of which are still marked by masonry platforms. Had they held a genuine sanad they would not have resorted frequently to such extreme expedients. On the contrary, it appears probable that, by constantly resorting to "Johar," they had succeeded in coercing the Mewar Darbar to forego its rights. Setting aside this point, it was proved, that they had paid rent to the Tonk state ever since its formation. At first the amount was a nominal one, but was gradually increased. In A.D. 1853 the village was leased to one Rangu Bai for twenty years, and afterwards to Seths Uttum Chund Moolchand of Jawad for nine years with a quit rental of ₹184 and ₹489 respectively. During the three years' occupation of the pargana by the Mewar Darbar, 1857 to 1860, the assessment was paid to the Darbar. In 1883 the village was assessed by the late Amil at a lump sum of ₹1,902, but the villagers resisting the demand the sum was not realized and the lands were left uncultivated. In 1885 the present Amil granted a patta at a quit rent of ₹535 and cultivation was resumed. The Darbar, however, refused to ratify the agreement and directed the Amil to measure and assess the land, as in other villages, and it was as a protest against this measure that the "Johar" was performed.

The Brahmins of the village are divided into four clans, as marginally noted. The heads of these four clans were among the five prisoners who had acted as ringleaders in the business and on whom the severest sentences have been pronounced. They first convened a meeting at which it was agreed that the four heads of the clans should perform the "Johar." On this being announced, the mothers of two of the clans offered to substitute themselves for their sons. In the case of the other two clans a woman from each clan nearly related to its head also offered herself. The four women having agreed to the sacrifice were given opium and prepared themselves by abstaining from food and per-

1. Tilorthan.
2. Dhamarthan.
3. Sikarthan.
4. Hirarthan.

forming religious ceremonies. The whole village also abstained from food and from business during two days. On the third day the whole village carrying wood and cotton stalks arrived at the appointed place and were there met by the residents of neighbouring villages. The five ringleaders helped to prepare the pile, and when all was ready the two women of clans Nos. 1 and 2, turning their faces towards the sun placed themselves in an enclosure made in the pile. The leaders of clans Nos. 3 and 4 then wounded themselves and sprinkled their blood on the pile, which was then lighted. When the women were dead, their hands were cut off. One of the hands, however, owing to the fierceness of the flames, could not be severed. The other two women of the remaining clans (3 and 4) seeing the sacrifice of the first two women, refused to allow themselves to be burned and were allowed to escape. It appears probable from the fact of the heads of their clans sprinkling their blood on the pile that the sacrifice of these two women was not seriously contemplated. On the completion of the sacrifice the village drum was beaten and the people dispersed.

In apportioning punishment the Darbar could not but be sensible that it was in some measure responsible for what had happened. The five ringleaders were sentenced to nine years' rigorous imprisonment, the eight persons next to them most concerned were sentenced to four years' rigorous imprisonment and five others who had taken a subordinate part to three months' imprisonment. The Thauadar and Police belonging to the Dungla thana, in the jurisdiction of which the village of Girwala lies, were dismissed the service of the state, the former being further fined ₹100.

FINANCES.

55. The finances of the state have received careful attention during the past year. As mentioned in the report for 1885-86 a kharita was addressed by His Highness the Nawab on 28th March 1886 to the Agent to the Governor-General asking for assistance from the Government of India. His Highness having been informed in reply that more definite guarantees for the improvement of the administration and the supervision of the finances than those previously given must be given by him before any assistance in his financial embarrassments could be afforded, addressed a second kharita on 30th August 1886 to the Agent to the Governor-General, in which he engaged himself to be guided by the advice of the Political Agent in the conduct of the administration. In pursuance of this intention the current accounts of the state, which had been irregularly kept were submitted to me. The accounts for Fasli 1292, being receipts from 9th June 1884 to 28th June 1885, and expenditure from 7th August 1884 to August 1885, which have been given in a previous report, were recast in consequence of some errors that were detected in them. The accounts for Fasli 1293 were made out, bringing both receipts and expenditure down to 31st August 1886, and in order to simplify accounts it was ordered in future that the financial year of the state shall commence on 1st September and close on 31st August. The accounts for Fasli 1293 therefore show receipts for twelve months against expenditure for fifteen. The estimates for Fasli 1294—1st September 1886 to 31st August 1887—were based on the accounts of the two previous years. The figures are given in Appendix C. The total estimate of receipts has been fairly maintained, and had the spring harvest of 1887 been more favourable would have been exceeded. The extensive failure of the opium crop has disastrously affected the land revenue and customs receipts. The expenditure has also been kept within the estimate, leaving a sufficient balance to liquidate a portion of the debts and leave a good cash balance after paying the current charges for interest. As the details of the year's accounts belong properly to next year's report, it is unnecessary to treat them more fully at present.

It is due to His Highness the Nawab to say that he has actively co-operated in checking extrayagant expenditure both in his own establishment and in the administration. The labours of Babu Vinayek Rao, whose services have been lent to the state by the Government of India, have been successful in establishing a sound system of accounts, and in placing a check on many unauthorised out-goings. My attention was next devoted to the debts. The chief creditors were the three firms of bankers who for some years past have formed a syndicate to finance the state. Their joint claims on 31st August 1886 were as follows:—

| Amount. | Rate of interest per cent. | Total yearly interest. |
|-------------|----------------------------|------------------------|
| ₹ 43,468 | 15 | ₹ 2,178 |
| 1,25,740 | 12 | 15,089 |
| 10,63,115 | 9 | 95,679 |
| 12,32,323 | ... | 1,12,936 |

The arrangements entered into with them have been fully related in my letter No. 36 P, dated 21st May 1887. The result has been the conversion of their claims into the following:—

| Amount. | Rate of Interest per cent. | Total yearly interest. |
|----------|----------------------------|------------------------|
| ₹ | | ₹ |
| 4,30,000 | 5½ | 23,650 |
| 4,95,954 | 7 | 34,720 |
| 9,25,954 | ... | 58,370 |

The claims of two out of the three firms have been discharged, partly out of cash balances and partly out of a loan taken from Messrs. Somir Mal Omeid Mal of Ajmere at 7 per cent. A further sum will be taken at the end of the year at the same rate to replace so much of the treasury cash balance as may be found necessary, but this is not likely to exceed one lakh and a half.

The remaining debts on 31st August 1886 were as follows:—

Pargana treasury debts, ₹54,011, bearing interest at 9 per cent. The accounts of these claims extend over several years and are very intricate. There is reason to suppose that they will be capable of liquidation for a smaller amount.

Debts to small traders and bankers, ₹14,981, bearing interest at 9 per cent. These will be paid out of cash balances before the end of the present financial year (Fasli 1294).

Miscellaneous debts to traders, ₹22,127, not bearing interest. Of this, one claim for ₹3,000 has been paid off.

Miscellaneous debts due previous to present Nawab's accession, ₹1,76,605, not bearing interest.

REVENUE SURVEY AND SETTLEMENT

56. His Highness the Nawab having long entertained a wish for a complete survey and settlement of the Tonk lands, the services of Captain T. C. Pears were placed at the disposal of the state in November last. Some time was occupied in getting together a competent staff, and work was fairly commenced by the middle of January. The pargana of Nimbahera was the first to be taken in hand, and good progress is being made. The work cannot fail to be of great ultimate benefit both to the Darbar and the cultivators.

STATE COUNCIL.

57. The establishment of a Council, after much consideration during the year under report, was not completed till after its close. The details of its composition and the powers entrusted to it belong therefore to the report for the current year. It is sufficient for the present to say that it is working well.

SHAH PURA.

GENERAL REMARKS.

58. The affairs of the chiefship have been prosperous during the year. In April 1886 the Raja Dhiraj visited his brother-in-law, the Chief of Maxudangarh in the Bhopal Agency. On the way he was entertained for three days by the Raja of Rutlam. In March he visited Abu to bid farewell to Sir Edward Bradford on his departure for England.

59. The elder Maharaj Kunwar is now of an age to join the Mayo College, but his going there is postponed till his younger brother is of an age to accompany him. Meanwhile he reads English at home. His progress, however, is slow, and his intellect appears to be somewhat dull; his younger brother shows indications of a more active mind.

60. The Kamdar Ram Jiwan continues to work well, and the general administration is well conducted. The Raja Dhiraj interests himself in the work of administration, tries important civil and criminal cases, and gives full access to all petitioners. There exists however a party in the state who make it their business to cause trouble and to discredit the Raj. The leaders in this movement are the adherents of the former Kamdar, who, being of the Mahajan class, are able to bring pressure on the cultivators to follow their advice. These people ferret out every grievance, however old or imaginary, and incite the aggrieved persons to petition against the Raj, and the Kamdar. In this way numerous petitions have been sent during the past year to the Secretary of State in London, to the Viceroy, to the Agent to the Governor-General, and to this office. In no case has any act of gross injustice on the part of

the Raj come to light. In about one per cent. only of the petitions has there been any foundation of fact on which the complaint was built. Scores of petitioners have come to me unable to state their grievance or to say to what the written petitions in their hands referred. In the winter two men were discovered procuring signatures on blank paper, on which afterwards imaginary complaints were written for transmission to this office. Later, on my visit to Shabpura in January, some Mahajans headed by one Sobhag Mal, a nephew of the old Kamdar, presented a petition containing thirty-six specific demands purporting to be in the name of the people of the state. Many of these were subversive of the authority of the Raj and aimed against the Chief and the present Kamdar. Acting on my advice the Chief ordered Sobhag Mal to leave the state, since which, in spite of his efforts to make the cultivators abandon their land, matters have considerably improved.

61. In August Thakur Nathu Sing of Khamore, who lately gave so much trouble to the Raj, died. His brother Zorawar Sing who succeeded to the Thakurat is showing a better spirit, and the general relations between the Raj and the Thakurs have greatly improved since Nathu Sing's death. The Thakurs, however, with a few exceptions, still refuse to perform the "chakri" prescribed in the sanads under which they hold lands.

62. The celebration of Her Majesty's Jubilee on 16th February was duly observed in Shabpura. A Darbar was held at which all the State Jagirdars, principal officials and persons of importance in the state were present; an address was read in which the Chief expressed his pleasure on the occasion and his loyalty toward the British Government; an imperial salute was fired; twelve per cent. of the prisoners then in the jail were released; and food was distributed to the poor. In the evening the city was illuminated, and a display of fireworks took place. In the following month the Raja Dhiraj entertained a select party of English gentlemen for three days with some excellent pig-sticking in the Raj preserves. The guests were much impressed with the Chief's bearing in this manly sport, in which he is an adept. A panther that happened to be in one of the beats, fell to the spear of the Chief, who showed in his management of horse and weapon that he is in no way deficient in the traditional qualities of a Rajput gentleman.

RAINFALL AND CROPS.

63. The rainfall was below the average. The kharif crops suffered much damage and the rabi sowings were short. The rabi crops were also injured by frosts in February, so that the gram crop was almost entirely lost. Opium, wheat, and barley also suffered severely.

HEALTH.

64. The general health was good during the year, there having been no cholera and very little smallpox in the chiefship.

DISPENSARY.

65. Twenty-six thousand one hundred and forty-five patients were treated at the dispensary during the year; the average daily attendance having been—

| | |
|-----------------------------|-------|
| In-door patients | 5.50 |
| Out-door patients | 62.55 |
| Jail patients | 3.58 |

The vaccination operations amounted to 938 during the year, of which 79 were unsuccessful. More than half of the operations were on girls.

JAIL.

66. The following table exhibits the number of prisoners during the year:—

| TERMS OF IMPRISONMENT. | In prison on 1st April 1886. | Imprisoned during year. | Released during year. | In prison on 31st March 1887. |
|------------------------------|------------------------------|-------------------------|-----------------------|-------------------------------|
| Life | 1 | ... | ... | 1 |
| From 5 to 14 years | 3 | ... | 2 | 1 |
| From 1 to 5 years | 7 | 22 | 11 | 18 |
| One year | 6 | 10 | 7 | 9 |
| Less than one year | 11 | 76 | 70 | 17 |
| TOTAL | 28 | 108 | 90 | 46 |

The average daily number was 50 against 41 of last year. There were no deaths from epidemic diseases, only one prisoner having died from fever.

CRIME AND POLICE.

67. One case of dakaiti occurred near Saugria, in which property amounting to ₹50 was carried off. The dakaitis were of the Sansia caste, and one of their number was wounded.

CIVIL.

68. The following tables show the work done by the civil courts during the year—

| ORIGINAL SUITS. | Pending on 1st April 1886. | Instituted during the year. | Pending on 31st March 1887. |
|--------------------------------|----------------------------|-----------------------------|-----------------------------|
| Over ₹1,000 in value | 4 | 1 | 5 |
| From ₹500 to ₹1,000 | 4 | 2 | 4 |
| From ₹100 to ₹500 | 43 | 52 | 63 |
| Below ₹100 | 322 | 571 | 393 |
| TOTAL | 373 | 626 | 465 |

Civil Appellate Court.

| DESCRIPTION. | Pending on 1st April 1886. | Instituted during the year. | DISPOSAL. | | | Pending on 31st March 1887. |
|------------------------------|----------------------------|-----------------------------|-----------|-----------|-----------|-----------------------------|
| | | | Upheld. | Modified. | Reversed. | |
| Appeals | 6 | 6 | 3 | — | — | 9 |

| TOTAL | 19 | 20 | 5 | — | 5 | 29 |

JUDICIAL.

Lower Criminal Court.

69. The cases tried during the year were as follow :—

| CRIME. | Pending on 1st April 1886. | Instituted during the year. | Disposed of. | Pending on 31st March 1887. |
|------------------------------|----------------------------|-----------------------------|--------------|-----------------------------|
| Dakaiti | — | 1 | 1 | — |
| Theft | 15 | 215 | 210 | 20 |
| Robbery | — | 2 | 2 | — |
| Grievous hurt | — | 2 | 2 | — |
| Causing abortion | — | 2 | 2 | — |
| Snicide | 1 | — | 1 | — |
| Attempting snicide | 1 | 7 | 8 | — |
| Miscellaneous | 47 | 638 | 622 | 63 |
| TOTAL | 64 | 867 | 848 | 83 |

70. The following statement shows the work done by the Mahakma Khas Court:—

| DESCRIPTION. | Pending on 1st April 1886. | Instituted during the year. | Decided during the year. | Pending on 31st March 1887. |
|--------------------------------|----------------------------|-----------------------------|--------------------------|-----------------------------|
| Rovenc | 98 | 288 | 250 | 136 |
| Criminal (Original) | 15 | 46 | 48 | 13 |
| Criminal (Appeals) | 1 | 73 | 73 | 1 |
| Civil (Original) | 2 | 2 | 3 | 1 |
| Civil (Appeals) | 1 | 5 | 3 | 3 |
| Objection cases | .. | 1 | 1 | .. |
| Review of judgment | 2 | .. | 2 | .. |
| Execution of decrees | 6 | 7 | 10 | 3 |
| TOTAL | 15 | 422 | 390 | 157 |

The case of unclaimed property shown as pending last year has been transferred to the criminal court under head "Miscellaneous."

EDUCATION.

71. The new school opened last year in Saugria was closed in September on account of insufficient attendance. The rest of the institutions, including the girls' school, are reported to be doing well. The Chief's elder daughter is also said to be able to read and write Hindi fluently.

BOUNDARY DISPUTES.

72. The panchayat appointed for the settlement of internal boundary disputes has worked well, having disposed of seven cases during the year to the satisfaction of the parties concerned. As none of the members are able to draw a map of the lines as now laid down, the work has been postponed pending the entertainment of a special surveyor for the purpose. Of the six disputes with Mewar, two were amicably settled in the previous, and one during the present year by Mr. Wingate, leaving three for settlement.

JAGIRDARS' DEBTS.

73. Of the debts remaining unsettled last year, those of the Thakurs of Sarrans, Nathuryas and Suntokpura were adjusted during the year, leaving the Amli and Ranikhera ones only to be arranged for. It is, however, to be regretted that, with the exception of Kajaria and Nibhera, the other Jagirdars have intentionally evaded payment of the instalments appointed, while Sarsonda Kannihan (Khaud) and Hanotia are trying to induce the Raj to modify the awards given against them.

THE FINANCES.

74. Appendix D gives the actuals for Sambat 1942, ending with 16th July 1886, and the budget estimate for the subsequent year. Summarized they are as follow:—

Actuals.

| | R | a. | p. | R | a. | p. |
|---|----------|----|----|----------|----|----|
| Opening balance on Asar Sudh 15th, Sambat 1941 A.D., 26th July 1885, excluding arrears | ... | | | 61,408 | 0 | 0 |
| Receipts during the year | ... | | | 2,27,575 | 0 | 0 |
| TOTAL | ... | | | 2,88,983 | 0 | 0 |
| Expenditure during the year | 2,18,351 | 0 | 0 | | | |
| Transferred to Khas Treasury | 27,212 | 0 | 0 | 2,45,563 | 0 | 0 |
| Balance in hand on Asar Sudh 15th, Sambat 1943 A.D., 16th July 1886, excluding arrears | ... | | | 43,420 | 0 | 0 |

Budget Estimate.

| | | | | | | |
|--|----------|---|---|----------|---|---|
| Receipts including opening balance | ... | | | 2,68,790 | 0 | 0 |
| Expenditure including allotment for tanks | 2,00,000 | 0 | 0 | | | |
| Expected balance on Asar Sudh 15th, Sambat 1943 A.D., 4th July 1887, including arrears for current year | 68,790 | 0 | 0 | 2,68,790 | 0 | 0 |

DEBTS.

75. A sum of ₹10,100 was held in deposit in the State treasury for the past twenty years for payment to certain plaintiffs of Ajmere, Nimach, Shahpura, &c. Owing to the several claimants persistently failing to appear simultaneously, the share to which each was entitled could not be determined. It was not till November last that the principal creditors were got together, and satisfactorily settled with. A small sum of ₹875 still remains to be paid, the parties to whom it has been awarded refusing to accept it.

PUBLIC WORKS.

76. The wise provision by which a fixed sum is assigned yearly for repairing old tanks and constructing new ones promises to make the chiefship one of the best irrigated districts in Rajputana. During the year eight new tanks were constructed, and seventeen old ones repaired at an aggregate cost of ₹21,635. Rupees 11,625 were further spent on public buildings principally on the new "kothi" and the zenana garden attached to it. In addition, a sum of ₹1,000 has been sanctioned by the Raja Dhiraj this year for repairs to the tahsil building.

CUSTOMS.

77. The income realized during the year under this head amounted to ₹18,171 against ₹17,125 in the previous year, thus showing an increase of ₹1,046, which is ascribed to the exportation in large quantities of til seed and cotton. The Mewar Darbar having remitted transit duties on all articles except opium, it is expected that for the future there will be some improvement in the trade with Bombay and other places in British territories. There being great scarcity of fodder and fuel, the duties usually levied on these articles have been remitted by the Raja Dhiraj.

BAORIS.

78. The Baoris located in the chiefship have given no trouble and are gradually settling down to agricultural pursuits. They do not now commit dakaitis at long distances from their villages, but their old habit of stealing has not been wholly eradicated, as they still continue to rob their neighbours of the produce of their fields. The terms on which they hold land, and which have been agreed upon in consultation with Captain Meade, the Superintendent of Moghia Operations, are as follow:—For culturable land not previously cultivated no rent is charged for three years. For the fourth and fifth years half, and for the sixth and seventh years three quarters of the rent are taken, while in the eighth year and thereafter, the full rent taken from other cultivators is charged. Such of the Baoris, however, as have already commenced cultivation are charged three quarters of the rent paid by the former holder.

NEW VILLAGES.

79. A new village was founded during the year within the limits of Kunnichan Kalan, and is reported to contain thirty families already.

POST OFFICE.

80. The Post Office opened at Lamia in June 1885, as mentioned in last year's report, was closed during the year, and a new one opened at Mandel. The change has made no difference in the time of delivery of letters.

STATEMENT A.

Return of Prices of Food-grains current in the undermentioned places during the year 1886-87.

| | April 1886. | May 1886. | June 1886. | July 1886. | August 1886. | September 1886. | October 1886. | November 1886. | December 1886. | January 1887. | February 1887. | March 1887. |

ULWAR AGENCY REPORT FOR 1886-87.

No. 259-P., dated Ulwar, the 30th April 1887.

From—COLONEL H. P. PEACOCK, *Political Agent, Ulwar,*

To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honour to submit the annual report of the Ulwar Political Agency for the year 1886-87.

Lieutenant-Colonel A. W. Roberts held charge of the Agency for eight months during the year under notice, and was relieved by me in December last.

2. The notable events of the year were—

- i. the delivery to His Highness the Maharao Raja of Ulwar of the insignia of a Knight Grand Commander of the Most Exalted Order of the Star of India. The ceremony was performed at Mount Abu at a special Darbar convened by the Agent to the Governor-General (Sir Edward Bradford).
- ii. the Jubilee of Her Majesty the Queen-Empress. The following programme, which was fully carried out, will show how this memorable event was celebrated in Ulwar.

PROGRAMME.

16th February 1887.—An imperial salute of 101 guns will be fired at sunrise from the fort and from all forts throughout the state.

His Highness the Maharao Raja will hold a Darbar in his city palace.

During the day the site for the hospital for women will be inspected.

There will be a money distribution to the poor and some 20 prisoners will be released from the jail.

In the evening the city and all buildings will be illuminated, and also all the railway stations in His Highness's territory; and there will be a display of fireworks and an entertainment at the city palace.

At the tahsil towns in the state there will be illuminations and fireworks, and the principal men of all villages will be presented with pagris.

17th February 1887.—A parade of His Highness's troops.

18th February 1887.—Military and athletic sports.

In commemoration of Her Majesty's Jubilee His Highness has—

- i. made a Jubilee offering of ₹50,000 to the National Association for supplying female medical aid to the women of India.
- ii. founded a hospital for women in the capital of Ulwar.
- iii. given orders for the construction of three dispensaries in the Ulwar territory outside the capital.
- iv. dedicated the beautiful marble tank now under construction in Ulwar.

A full report has already been submitted of the great enthusiasm and earnestness manifested by His Highness and people to mark this joyful occasion in a befitting manner.

3. The death in December last of Lala Sri Ram, M.A., Diwan of Ulwar, is deeply mourned by all well-wishers of the state, and is a loss which only those who knew his worth can fully realise. His great administrative abilities and devotion to the true interests of his Chief have marked the period of his connection with the state as one of steady improvement in administration and prosperity. It is not too much to say that it will be most difficult to find another man so eminently qualified in every way to fill the position he held. The late Diwan was not quite forty years of age, and one cannot but regret that a career so full of promise and usefulness should have been thus early cut short.

COUNCIL.

4. The vacancy in Council caused by the death of the Diwan has not been filled up, although eventually it will, I think, be found necessary to appoint another member. So far the business of the Council has not been allowed to stand still, for the present members, stimulated by the example set them by His Highness, have worked well. It has been gratifying to see the ready way in which His Highness has given that increased attention to the affairs of the state which the death of his trusted adviser has necessitated.

JUDICIAL.

Civil.

(Vide Statement A.)

5. The number of cases disposed of during the year was 4,657 involving R2,47,030 against 4,893 involving R1,92,262 in the preceding year. Of these, 2,555 were decided by the Civil Judge and 2,102 by Tahsildars.

There were 99 appeals from decisions of the Civil Judge, and 162 from those of Tahsildars.

Criminal.

(Vide Statement B.)

The number of cases investigated was 4,419 involving 5,215 persons against 4,456 involving 5,259 persons of last year. Of the 5,215 persons brought to trial, 2,449 were acquitted and discharged, 6 were transferred, 65 remained under trial at the end of the year, and 2,695 were convicted and punished as follows :—

| | |
|-----------------------------------|--------------|
| Imprisoned | 278 |
| Fined | 1,733 |
| Whipped | 71 |
| Expelled from the state | 6 |
| Security | 607 |
| TOTAL | <u>2,655</u> |

Two cases of murder involving four persons were tried during the year. Three of the accused were convicted and sentenced to life imprisonment, and the fourth was discharged. The following table gives the number of thefts and the amount of property stolen and recovered during the last three years :—

| YEAR. | THEFT OF PROPERTY. | | | THEFT OF CATTLE. | | |
|----------------|--------------------|---------------|------------------|------------------|---------------|------------------|
| | Number of cases. | Value stolen. | Value recovered. | Number of cases. | Value stolen. | Value recovered. |
| | | R | | | R | |
| 1884 | 1,333 | 17,740 | 1,732 | 1,020 | 13,331 | 8,742 |
| 1885 | 1,030 | 14,065 | 4,057 | 990 | 15,169 | 10,712 |
| 1886 | 1,096 | 16,469 | 5,670 | 1,016 | 17,117 | 14,785 |

CRIMINAL TRIBES.

Strict watch continues to be exercised by the Darbar over the criminal tribes. There are no cases of infanticide nor are there any cases of mail robberies to report.

6. The Eastern Rajputana Agency of the Thagi and Dakaiti Department was transferred from Ulwar to Ajmere in March 1887. There were no cases of dakaiti in the Ulwar State during the year.

A full report of the work of this Agency to the date of transfer, as above mentioned, has been submitted to the General Superintendent.

RAILWAY JURISDICTION.

7. The following is the list of cases (four in all) tried—

| | |
|---|----------|
| Theft | 2 |
| Travelling in carriage reserved for females | 1 |
| Obstructing a railway servant | 1 |
| | <u>4</u> |

Of the five persons concerned, two were fined, one was imprisoned and two were acquitted.

EDUCATION.

(Vide Statement C.)

8. There are now 115 schools in the state, viz., 100 for boys and 15 for girls, as compared with 100 for boys and 14 for girls of last report. There has been an increase of 295 (boys 188

and girls 107) students, and the total number of students is 5,505 (boys 5,079 and girls 426). The percentage of scholars to population of a school-going age is 10.36, and that of institutions to towns and villages 6.59.

Three students from the High School appeared for the Calcutta University Entrance Examination in April 1886, but were unsuccessful. Five students appeared for the Munshi Examination of the Panjab University and all passed. Two students appeared for this year's Calcutta University Entrance Examination, but the result of the examination is not yet known.

Three girls from Ulwar were sent in June last to Agra to study medicine, and good reports are received of their progress. They each receive a scholarship of Rs 4 a month, and medical books, &c., from the state.

All schools were visited by the Inspector, who reports general progress. During my annual tour I visit all schools that I come across and am, as a rule, well satisfied with the result of examinations.

The tabular statements attached give useful information and have been prepared with care.

There are 52 indigenous schools in the state instructing some 500 boys. The education given in these schools is very elementary. The branch in Ulwar of the Rajputana Mission has 10 schools in the state (4 in Ulwar and 6 in the districts), giving education to some 511 pupils. The Mission Anglo-Vernacular School in Ulwar is a very popular institution and numbers 337 pupils.

Sir Edward Bradford during his tour in Ulwar this last cold weather expressed himself much pleased with his visit to the Pertabgarh and Thana Ghazi schools. At the request of His Highness, the Agent to the Governor-General distributed the prizes to the Ulwar High School and Thakur's School. Lady Bradford distributed prizes to the girls' schools, the pupils having been collected in the Maharao Raja's Moti Dungri palace for this purpose. Thanks to the encouragement given them by His Highness the Maharao Raja. The Ulwar boys show much enthusiasm in cricket, and during the season four matches were played.

MAYO COLLEGE.

There were five Ulwar boys at the College during the year, including the Raja of Nimrana, a boy of eleven years of age.

His Highness sent the Principal of the College a donation to enable the Ulwar house being illuminated on the occasion of the Jubilee of Her Majesty the Queen-Empress.

PUBLIC WORKS.

9. The total expenditure upon Public Works was Rs 1,42,881 and was divided upon Buildings, Roads, Bunds, Workshops and Establishments. Full particulars will be found in the report to the Secretary to the Agent to the Governor-General, in the Public Works Department.

SANITATION.

10. The sanitary condition of villages is improving, although progress in this direction is very slow, and there is still much room for improvement. Interest and constant attention on the part of officials will do much for this cause, but beyond this, so long as the health of the people is good, it would be impolitic to force the measure too rapidly.

ARMY.

11. The expenditure on the army was Rs 15,31,658, being a small increase on that of last year. His Highness has of late been taking some interest in the drill and equipment of his cavalry and infantry, as borne out by the appearance of the Ulwar troops at the parade in honour of Her Majesty's Jubilee.

His Highness has employed a pensioned Resaldar named Jamaluddin Beg of the 1st Bombay Lancers, a man of great energy for his age. He is a Sardar Bahadur and a native of a village of the Khetri State on the south-west border of the Ulwar territory. His Highness, being a Lieutenant-Colonel, is anxious to obtain some knowledge of drill.

HARVESTS, CULTIVATION, &c.

12. The rabi of 1885-86, (the prospects of which were so excellent) was owing to frost and high winds much below the average.

Kharif of 1886.—The rains broke about the third week in June, and extensive sowings were made, but owing to a long break in the rains and the high winds that prevailed during the whole

of August, the crops suffered much, and would have altogether failed, but for the rain which fell in September and October. This rain benefited the cotton crop much, and the state demand was in a great measure met by this crop. Cotton cultivation has greatly increased since the establishment in Ulwar of the cotton press.

Rabi of 1886-87.—Frost and high winds injured the prospects of this crop, which will, it is feared, be much below the average.

NEW SETTLERS.

Cultivators still continue to settle in Ulwar, and for the year under report the number of new settlers is reported to be 2,478. Of this number some 584 are people who left Ulwar during the famine of 1877-78.

TAKAVI ADVANCES.

Rupees 72,437 were advanced by the state to cultivators, and by the aid of this some 132 new wells and seven bunds were constructed.

PRICES CURRENT.

(*Vide Statement D.*)

13. The prices of food-grains ruled somewhat higher than in the preceding year, as will be seen from the comparative statement.

SALT.

14. The average retail price of salt was $13\frac{2}{11}$ seers per rupee.

TOURS.

15. I spent 52 days on tour and visited every district in the state. His Highness the Maharao Raja was with me for some part of my tour. Sir Edward Bradford, Agent to the Governor-General, entered the Ulwar territory from Jaipur in January last, and marched through Pertabgarh, Thana Ghazi, Khushalgarh, Ulwar and Baroda.

FINANCE.

(*Vide Statement E.*)

16. This statement gives the Actuals of 1884-85, the Estimates and Actuals for 1885-86, and the Estimates for 1886-87, which will close on the 31st August 1887.

The subjoined abstract shows the financial position of the state to be very satisfactory—

| | 1884-85. | 1885-86. | 1886-87. |
|--------------------------------------|-----------|-----------|------------|
| | Actuals. | Actuals. | Estimates. |
| | R | R | R |
| Income | 25,61,100 | 25,07,727 | 25,77,550 |
| Expenditure, ordinary | 19,47,023 | 18,86,970 | 19,68,349 |
| Surplus | 6,14,077 | 6,20,757 | 6,09,201 |
| Expenditure, extraordinary | 7,524 | 5,690 | 8,500 |
| Net Surplus | 6,06,553 | 6,15,067 | 6,00,701 |
| Cash Balance | 26,45,290 | 32,68,816 | 38,69,517 |

17. The success of the steam hydraulic cotton press continues to be maintained. During the year 22,430 bales were pressed.

RAILWAY FENCE.

18. The Darbar are anxious that the line through their territory should be fenced, and consider this the only effectual remedy against cattle trespass. A separate communication has already been made on this subject.

HEALTH.

19. There was no epidemic during the year; and the general health was good, with the exception of fever and a few fatal cases of cholera.

Surgeon-Major T. Ffrench-Mullen proceeded on furlough in January, Surgeon Pank from Bikanir has been appointed in his place, but has not yet joined.

Miss Smith, the Lady Doctor, has done much good work, and her services are greatly appreciated.

JAIL.

20. The daily average number of prisoners was 276, and the daily average number of sick 6.28. There were 9 deaths, or 32.60 per 1,000 of daily average strength. The jail is kept in excellent order and does great credit to the Superintendent, Mr. George Heatherly.

NIMRANA.

21. The rainfall was 16 inches 6 cents, or 4 inches 13 cents below that of the previous year.

HARVESTS.

The rabi of 1885 was very good. The kharif of 1886—the Juar, Bajra, and pulse crops—felt the want of rain in August, and the yield was bad; the cotton outturn was however very good.

TAKAVI.

Rupees 786 were given in Takavi advances.

PUBLIC WORKS.

Under this head R987 were expended upon the new tahsil under construction, and upon repairs to houses, wells, and tank. The tahsil building is estimated to cost R2,589.

FINANCE.

The following is an abstract of the Financial Statement (Appendix F) showing the receipts and disbursements for 1885-86 and estimates for 1886-87.

| | 1885-86. | | | | | | 1886-87. | | |
|----------------------------|------------|----|----|----------|----|----|------------|----|----|
| | Estimates. | | | Actuals. | | | Estimates. | | |
| | R | a. | p. | R | a. | p. | R | a. | p. |
| Income | 30,550 | 0 | 0 | 31,993 | 6 | 0 | 31,931 | 0 | 0 |
| Expenditure, ordinary | 19,892 | 0 | 0 | 19,949 | 5 | 6 | 22,499 | 0 | 0 |
| Surplus | 10,658 | 0 | 0 | 12,044 | 0 | 6 | 9,432 | 0 | 0 |
| Expenditure, extraordinary | .. | | | 26,000 | 0 | 0 | .. | | |
| Deficit | .. | | | 13,955 | 15 | 6 | .. | | |
| CASH BALANCE | 31,063 | 5 | 8 | 17,107 | 6 | 2 | 26,539 | 6 | 2 |

The estimated expenditure is higher than usual on account chiefly of Public Works; a new tahsil building being under construction.

The extraordinary expenditure of R26,000 is on account of Nazarana to Ulwar on succession to the gadi of Nimrana.

R20,000 have been lately invested in 4 per cent. Government promissory notes from the cash balance, which amounted to R17,107 on the first of September last, the commencement of the financial year.

JUDICIAL.

Criminal.—Fifty-seven cases and 72 persons were disposed of as follows:—

| | |
|----------------------------|----|
| Imprisoned | 4 |
| Fined | 37 |
| Dismissed from the service | 1 |
| Acquitted | 30 |

Four petty civil cases were disposed of out of five instituted.

HEALTH.

Fever and pneumonia were prevalent.

Cattle disease caused some loss during the year.

SCHOOL.

The number attending the school is 44. Of this number 11 are the sons of cultivators.

MISCELLANEOUS.

During the year the Rani of the late Raja Pirthe Singh died. The present Raja Janak Singh is being educated at the Mayo College, and is giving hopes of turning out well.

Jugal Singh of Runsi, North-Western Provinces, has given some trouble in pressing his claims to Nimrana, and in consequence Colonel Roberts had to remain some weeks at Nimrana. Should Jugal Singh again visit Nimrana he will not be allowed to remain there, as the Government of India have duly sanctioned the succession of Janak Singh, and as his presence there only unsettles the state of affairs.

**LIST OF STATEMENTS ATTACHED TO THE ANNUAL REPORT
FOR 1886-87.**

- A. Civil Statement.
- B. Criminal Statement.
- C. Educational Statements, 7.
- D. Comparative Statement of Prices Current.
- E. *Financial Statement, Ulwar.*
- F. Ditto, Nimrana.

| 2. (a) * PERCENTAGES of Provincial expenditure included in columns 2-17 to total Provincial Expenditure on Public Instruction | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| (b) PERCENTAGES of Local Fund Expenditure included in columns 2-17 to total Local Fund Expenditure on Public Instruction | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| (c) PERCENTAGES of Municipal Expenditure included in columns 2-17 to total Municipal Expenditure on Public Instruction | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| (d) PERCENTAGES of Total Expenditure in columns 2-17 to Total Expenditure on Public Instruction | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| 3. † AVERAGE ANNUAL COST OF EDUCATING EACH PUPIL IN DEPARTMENTAL INSTITUTION | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| { Cost to Provincial Revenues | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| { Cost to Local and Municipal Funds | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |
| TOTAL COST | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... |

* The Percentages required for 2(c), 2(b), 2(c) are to be calculated from the figures given in columns 7(a), 7(b), 7(c) respectively of General Table IV.
 † The Annual cost is calculated on the direct expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

† The average cost of each pupil in Local Fund and Municipal schools is to be obtained from the figures given in General Table VII.

Fractions of a rupee should be omitted except in the columns showing the average annual cost of educating each pupil.

The R3-0-8 has been borne by the State and R2-3-8 calculated on local or village cess, which is realized from the villages at 1 per cent. on the jumma.

H. P. PEACOCK, Colonel,
Political Agent

KOTAH AGENCY REPORT FOR 1886-87.

No. 4-P., dated Kotah, 25th April 1887.

From—*LIEUT.-COLONEL C. A. BAYLAY, Political Agent, Kotah,*
 To—*The First Assistant Agent to the Governor-General in Rajputana.*

I have the honour to submit the Annual Administration Report of the Kotah State for the year 1886-87.

During the year under notice Major W. H. C. Wyllie held charge of the Agency from 1st April till 24th November 1886, on which latter date I resumed charge on my return from furlough.

2. There has been no change during the year in the constitution of the Council, the members of which have carried on their work satisfactorily, and have, as hitherto, afforded me valuable aid in the administration of the state.

FINANCE.

3. The following figures show the ordinary Revenue and Expenditure for 1885-86 :—

| | Estimate, | Actuals. |
|-----------------------|-----------|-----------|
| | R | R |
| Revenue | 22,88,375 | 20,55,728 |
| Expenditure | 19,88,623 | 19,72,825 |

The actuals therefore of income and expenditure fell short of the estimates by R2,32,647 and R15,798 respectively.

The heavy deficit in revenue receipts is almost entirely due to the continued depression in the opium trade and the low selling price of cereals in the district which left the cultivators only a small margin of profit.

The estimate for the current year which ends on 31st July, is—

| | R |
|-----------------------------|-----------|
| Ordinary Revenue | 21,74,475 |
| Ditto Expenditure | 20,25,415 |

This shows that the estimated receipts for the current year have been reduced by R1,13,900 and the estimated expenditure increased by R36,792.

The estimate of revenue has been fixed at a low figure, having been framed on the average of the actual receipts for the past three years, and owing to the brisk export and rising price of grain there is every reason to expect that the amount will be fully realized.

The estimated increase in the expenditure is mainly owing to a fresh item in the shape of an allowance to village Patels styled "Huq Pateli," which was sanctioned in August last.

The total amount under this head is calculated at R32,000, being 2 per cent. on the year's estimated land revenue collection of R16,00,000.

The object aimed at in making this allowance is to give the Patels a direct interest in the extension of cultivation and the collection of Land Revenue, as explained by Major W. H. C. Wyllie in the Administration Report for last year under the head of Land Settlement.

LAND SETTLEMENT.

4. The re-assessment of the Nizamats of Digod and Barod, referred to in last year's report, has now been completed and the settlement has been practically brought to a conclusion.

The district revenue officials and the patwaris are being gradually and steadily trained in revenue and survey work; and if under careful supervision the revenue records are kept up to date, the settlement will continue to prove of great benefit to the cultivators in shielding them from the unjust demands to which they were formerly liable. In a financial point of view the settlement has not as yet proved very satisfactory, for, owing to the great fall in price of agricultural produce of all kinds, it has been impossible to realize the full amount of land revenue, but with a return to better times, I doubt not that the state will reap the anticipated benefits of the settlement, and it is already doing so partly in the shape of improved revenue administration.

I have much pleasure in endorsing the favourable remarks in last year's report on Munshi Durga Pershad, the Superintendent of the Settlement, who is now head of the Revenue Department. The Assistant Superintendent of Revenue, Chobe Raghunath Das, is also a very able official and has held the post with credit for many years.

COURTS.

5. The working of civil, criminal, and appellate courts, which were presided over by the same officials as last year, do not call for any special remarks. I inspected a number of files in the Nazim's courts when on tour in the district, and found the work fairly well done, but there is a tendency to shelve cases when any difficulty occurs in obtaining the attendance of the parties and witnesses.

POLICE.

| | |
|--|--------------|
| Attempt to commit culpable homicide | 1 |
| Culpable homicide | 3 |
| Attempt of murder | 4 |
| Robbery { Dakaiti | 1 |
| { Other | 15 |
| Theft { Cattle | 86 |
| { Other | 333 |
| Attempt to commit suicide | 16 |
| Poisoning { Thagi | 3 |
| { Other | 3 |
| Greivous hurt | 9 |
| Abduction | 34 |
| Causing miscarriage | 1 |
| Rape | 4 |
| Escape from custody | 3 |
| Buying or disposing of stolen property | 10 |
| Arson | 10 |
| Counterfeiting coin | 7 |
| Other crimes | 787 |
| TOTAL | 1,327 |

6. The statement in the margin of offences committed during the year 1886-87, shows a small increase in crime, but not such as to call for any remark, and there is an improvement in regard to the recovery of stolen property, it being 50 per cent., as compared with 37 per cent. in the previous year.

I am also glad to bring to notice that only one dakaiti occurred during the year under report; this was committed in a village of the Indergarh Kotri, in an outlying part of the district, by five or six Bhils and Minas and the value of the property carried off was estimated at under R20.

INFANTICIDE.

7. No cases of infanticide were brought to notice during the year.

CRIMINAL CASES.

8. From the statement annexed it will be seen that only three cases were left undecided at the end of the last year, and that 1,327 new cases have since come before the courts. Of these 1,330 cases 1,324 were disposed of, leaving a balance of 6. Of 1,006 persons arrested, only 579 were convicted, and out of R25,627-10-0 worth of property stolen, only R12,755-14-6 worth was recovered.

CIVIL CASES.

9. The returns from the civil courts show 94 cases pending at the beginning of the year and 688 instituted during the year, 671 have been disposed of, leaving 111 still to be dealt with. Ninety-five executions of decree cases were pending on 31st March 1886, and 542 applications for execution have since been filed, 521 have been disposed of, and 116 are still on the roll.

JAIL.

10. The Kotah Jail continues to be well and carefully managed by the Daroga Madho Pershad under the superintendence of Syud Jaafar Husen and is a very creditable institution. The health of the prisoners was good. The total number was 494 in 1886-87, as compared with 483 in the previous year, the death-rate being 13.01, against 13.89 in 1885-86. There were no escapes and no epidemic outbreak occurred.

STUD STABLES.

11. The stud stables are carefully looked after. The young stock, on the whole, look very promising and the experiment promises to be a success.

The stud consists of the three stallions mentioned in last year's report; and 14 country-bred mares have been added to the stables, making a total of 42 brood mares, of which 22 are walers and 20 country-breds; during the year 11 colts and 8 fillies were dropped, and there were no deaths among the young stock, the total number of foals in the stud stables is now 36, the maintenance charges for the year amounted to R4,151.

EDUCATION.

12. In addition to the six district schools already established two new ones have been opened during the year, and the number will be gradually added to.

The daily average attendance at the schools, including that at the Kotah City School, was 662.

MEDICAL INSTITUTION.

13. Surgeon J. Crofts held medical charge of the Kotah and Jhallawar Agencies until 21st June 1886, when he was appointed Civil Surgeon at Ajmere. He was replaced by Surgeon A. W. D. Leahy, who assumed charge of his duty on 31st August 1886. Three thousand seven hundred and thirty-six children were vaccinated during the cold season with a percentage of successful cases of 95.90 at the cost of 1 anna and 1 pie per head. The services of an additional Hospital Assistant have been procured for the new dispensary at Etawah in the northern part of the district, which will now be opened.

HEALTH.

14. The general health of the people in the city of Kotah and the district has been good, and there was no outbreak of epidemic disease during the year. The sanitary arrangements of the Kotah City have been much improved under the supervision of Chobe Raghunath Das, the vice-President of the Municipal Committee, who has given much care and attention to the matter.

THE KOTRIS.

INDARGARH.

15. The young Maharaja Sher Singh has continued at the Mayo College during the year and is well reported on. Arrangements are being made for his betrothal to the daughter of the Rao of Bhainsrorgarh in Meywar, on the understanding that the marriage is not to take place for some years. The financial affairs of this Kotri have not, I regret to say, been well managed during the last two years, and little or no progress has been made towards the liquidation of the debt, but the matter is receiving careful attention now, and I hope better arrangements may shortly be made.

KHATOLI.

The affairs of this Kotri are in an unsatisfactory condition, and the reconciliation alluded to in last year's report, which was apparently effected between the Maharaja and his eldest son, came to nothing. The Maharaja, from his great age and failing strength, is incapable of managing his affairs properly; the heavy debts of the Kotri are said to be steadily increasing, and as His Highness the Maharao was unwilling that the eldest son should be placed in power during the lifetime of the old chief, it has been decided, with the approval and consent of the Agent to the Governor-General to take all power out of the hands of the chief, make him a suitable allowance, and place the management of the Kotri in the hands of an efficient Kamdar. I have endeavoured for many years to stave off this severe measure by trying to induce the Maharaja to place the real power in the hands of his eldest son, Bhopal Singh, who is himself getting an old man, but the bitter feeling between the two has prevented any permanent reconciliation.

The debts of this Kotri are said to exceed a lakh of rupees, and the yearly revenue is placed at only Rs38,000, but until the estate has been brought under management and the accounts examined, it is impossible to report definitely on these points.

BULWUN.

Since the unfavourable account of this Kotri recorded in last year's report, the Maharaja has been employing a good Kamdar, who has done much towards putting affairs on a better footing, but I regret to hear he has lately quarrelled with his Kamdar and dismissed him, and the affairs of the Kotri will therefore probably soon relapse into the same unsatisfactory condition as before.

GAINTA.

Maharaja Madho Singh, the Chief of this Kotri, was married in February last to a daughter of the Mejwar Thakur in Meywar. The expenses of the marriage have thrown the estate into debt to a small amount, but the sum will, I doubt not, be liquidated within a moderate period, as the Kotri is well managed.

I have nothing special to report in regard to the remaining Kotris.

MAYO COLLEGE.

16. There were seven boys from the Kotah state at the Mayo College during the year. Rupees 5,314 were sanctioned for further additions and improvements to the Kotah house during the year.

RAINFALL AND CROPS.

17. The fall of rain was fairly good, being 31 inches, as compared with 30½ inches in previous year, but it was not timely, so that the kharif crops were not good, and it did not come in sufficient flushes to fill the tanks, which dried very early in the season; the later falls were also insufficient, and there was no cold weather rain, consequently the rabi crop has proved light and below the average. Much damage was also caused to the opium and gram crops by the frosts early in February and the linseed suffered from disease, which nearly destroyed it in places. The area under cotton is increasing; the crop was fairly good, and there has been a much larger export than usual.

There has also been a brisk export of cereals during the last six months owing to the high prices prevailing all round, and the price of grain is already more than double what it was last year.

IRRIGATION.

18. There are no new works of importance to record under this head, but the extension of the Parbatti canal northward, to a part of the district where the soil is lighter, seems likely to be a success. The Eklera tank promises well, and all cultivable land below the tank, which can be irrigated, will probably be taken up in a short time.

In the Shergarh Nizamat certain old irrigation ducts from the Andheri river were repaired last year, and rice land is now being brought under cultivation; the scheme is also about to be extended, as it seems likely to prove profitable to the state.

FOREST CONSERVANCY.

19. The work of preserving the forests from destruction has now been carried on since 1880, much good work has been done, and several tracts almost denuded of wood have now become reclothed with jungle trees, but there is undoubtedly a want of good timber in the forests, almost all trees of value having been cut and removed under the old contract system, and this want can only be supplied by planting young trees of good kinds in favourable spots and protecting them till grown up. A beginning will, I hope, now be made and the number of plantations gradually increased.

Babu Sahib Roy, the trained Forest Superintendent who was appointed last year, seems likely to do good work, as he becomes thoroughly acquainted with the large forest tracts of the state, but forest conservancy in Kotah is up-hill work, for so many of the officials participated in the profits under the old contract system that there is a great amount of negative opposition to any reforms, and my endeavours to protect the forests have caused me more trouble than any other portion of the Kotah Administration work.

POLITICAL AGENT'S TOUR.

20. My tour in the Kotah state was somewhat curtailed this year, as I did not resume charge of the administration till the 24th November 1886, and was detained at Kotah by the serious illness of the Maharao till the 14th December, when I proceeded on tour and marched through the Ladpura, Kunwas, and Khanpur Nizamats to Jhalrapatan, where I halted for Christmas and visited the adjacent Kotah forests. Proceeding thence to the Ghatali Nizamat, I visited the Amlī Choki on the Kotah-Bhainsrorgarh border which is under dispute. I then returned to Kotah for a short time *via* Girdharpura and Boraba, and set out again on 17th January visiting the Anta, Sangode, and Kunjer Nizamats, and while at Atru I made a flying trip to a disputed island in the Dobraj river on the Kotah-Gwalior border. From Atru I marched northward *via* the Baran, Mangrol, Barod, and Digod Nizamats, whence I had to return to Kotah on the 8th February 1887 to make preparations for the celebration of the Queen's Jubilee. My tour, therefore, since I resumed charge of the Agency, extended over 50 days in the district, and I visited 11 out of the 15 Nizamats.

GENERAL REMARKS.

21. The principal event of the year was the celebration of the Queen's Jubilee, the rejoicings in connection with which were entered into most heartily by the Maharao, his Sirdars and officials, and by the people generally at Kotah.

His Highness the Maharao suffered much from fever and cough during last cold season, and I regret to say he has not yet fully recovered his health and strength.

In conclusion, I regret to record the death of Her Highness the Maji Mansingothji, one of the widows of the late Maharao of Kotah, who died of fever on 16th June 1886.

Statement showing the actual Income and Expenditure of the Kotah State during the Sambat 1942 (from 1st August 1885 to 31st July 1886) with the columns of the Estimate of 1885-86 and Budget Estimate for 1886-87.

KOTAH,
The 25th April 1887.

C. BAYLAY, *Lieut.-Colonel,*
Political Agent.

JHALLAWAR AGENCY REPORT FOR 1886-87.

No. 202-G., dated Jhalrapatan, the 13th June 1887.

*From—LIEUT.-COLONEL H. B. ABBOTT, Political Agent of Jhallawar,
To—The First Assistant Agent to the Governor-General for Rajputana.*

I have the honour to submit the report on the administration of the Jhallawar state for the year 1886-87.

2. Major H. Wylie, C.S.I., held the post of Political Agent up to the 19th December 1886, except for the three months of July, August, and September, when he was on privilege leave, and Captain W. H. C. Wylie, C.I.E., acted for him.

From the 19th of December to the end of the official year the post has been held by me.

HIS HIGHNESS THE MAHARAJ RANA.

3. His Highness was married in January last to the fourth daughter of His Highness Pirth Singh of Kishengarh. Accompanied by a large retinue, His Highness left Jhalrapatan on the 15th January and reached Kishengarh on the 29th January 1887. During four days the Maharaja of Kishengarh entertained his numerous guests, which included several European gentlemen, at the end of which time the wedding party started for Jhalrapatan, which was reached on the 16th of February, where His Highness the Maharaj Rana and his bride were welcomed by gaily dressed crowds and with salutes, triumphal arches, displays of fireworks, and general illuminations in the Chaoni and town of Jhalrapatan.

During the year His Highness has visited Puna, Lucknow, Anjar near Ahmedabad, and Bombay.

HER IMPERIAL MAJESTY THE QUEEN EMPRESS'S JUBILEE.

4. The rejoicings connected with Her Imperial Majesty the Queen-Empress's Jubilee were held on the day His Highness the Maharaj Rana returned from Kishengarh. An imperial salute of 101 guns was fired at noon, and in the evening there were the displays of fireworks and the illuminations at the Chaoni and town of Jhalrapatan, while the triumphal arches erected had inscriptions and decorations referring to Her Imperial Majesty's Jubilee. Owing to stress of business connected with his matrimonial ceremonies His Highness excused himself from holding a Darbar but signified his intention of founding a school of arts and an orphanage in commemoration of the occasion.

THE COUNCIL.

5. The Council has been unfortunate in losing the services of Konwar Sheodan Singh who was summoned to Jeysalmere by his relative the Maharawal. The members now are Thakur Bejai Singh, Ajji Narpet Singh, Maharaja Bal Bhadra Singh, Dhabai Sheo Bux, Chobey Ganga Pershad and Munshi Mithi Lal, the appointments of the two last have formed the subject of correspondence with the Darbar and are still under discussion.

WEATHER CROPS AND HEALTH.

6. The rainfall at the different recording stations was as given in the margin and is about the average. The kharif harvest was good, but among the rabi crops opium and wheat suffered from the cold. Small-pox made its appearance but to no great extent, otherwise health has been fair.

| " Chaoni | . | . | . | 32.30 |
| Pachpahar | . | . | . | 42.03 |
| Aklera | . | . | . | 49.22 |

MEDICAL AND VACCINATION.

7. Surgeon J. Crofts was in medical charge until 21st June 1886, and was succeeded by Surgeon A. Leahy, who joined on 6th September 1886 and has submitted his report, as usual, departmentally. There has been no change in the Medical Institution. Surgeon Leahy greatly interested himself in eye operations, and when on tour with him I had the satisfaction of seeing that his fame as a skilful operator had spread to all parts of the country we visited.

The number of vaccinations has been less than for the two years before, and the operation does not appear to increase in popularity.

PUBLIC WORKS.

8. The Executive Engineer's report has been submitted departmentally.

The completion of a masonry causeway over the Kalisind river at a short distance from the Chaoni of Jhalrapatan and of a ghat road over the hills to the north of Sarthal has been the means of largely increasing the wheeled traffic from the north and east.

I regret to see that the appreciation of the value of useful public works by the Darbar lessens each year, as shown by the greatly diminished grants.

The present year's grant was barely sufficient to keep the existing roads in repair, and that proposed for the coming year will certainly not suffice for this most necessary purpose. The first convenient opportunity of drawing the Darbar's attention to this important point will be taken, when I trust the Maharaj Rana may see how much he loses by not utilizing Mr. Miles's valuable services to the full.

EDUCATION.

9. Another school has been opened in the districts at the tahsil village of Asnawar.

Last year the High School at the Chaoni sent up three boys for the Entrance Examination of the Calcutta University, of whom one passed; for the examination this year two boys went up and both passed in the first division.

Mr. Surjia still continues in charge of this Department as Inspector of Schools, but he is also English clerk to His Highness. The Maharaj Rana, to make the most of the influence he acquires in the latter post, appears to engross most of his attention, so the credit of the improved standard of the Chaoni School must be entirely granted to the Head Master, Mr. John, who, with little or no encouragement, conscientiously carries on his duties.

FINANCES.

10. A statement comparing the estimated with the actual receipts and expenditure for Sambat 1942 or 1885-86 is attached (Statement A).

11. The noteworthy feature in this statement is the large falling off in the land revenue receipts. In the first place the estimate had been reduced by Rs. 1,25,844 (as compared with the full demand fixed at the settlement), and of this reduced estimate the collection fell short by Rs. 1,70,345. The reduced estimate is said to be consequent on land having been thrown up by cultivators and the large outstanding balance in the collections is accounted for by damage to the crops from hail and by low prices. I do not look upon these explanations as sufficient and have no doubt that much of the lessened receipts is due to mismanagement by incompetent officials who the Chief has been ill-advised enough to admit into his Revenue Department, while at the same time allowing himself to be deprived of the services of other really capable men, whose presence was especially desirable at this time of difficulty in revenue matters, consequent on low prices of produce and the accompanying loss of credit among the agricultural population.

THE COURTS.

12. The Darbar has, as was the case last year, only supplied information regarding the criminal courts.

Statement B.—The criminal business in the appellate court has been above the average and appears to have been properly attended to.

Statement C.—The presiding officer of the criminal court has been transferred to the Revenue Department and his place taken by his former Assistant, Bhaya Ram Chandar.

The cases of appeal from this court have been more than usual, but the greater number of its decisions has been upheld.

Statement D.—The tahsil criminal courts have had more cases than usual to dispose of, and have kept up with their work; the appeals against their judgments have for the most part been rejected.

JAIL.

13. The daily average of prisoners has been 183.80, as compared with 189.77 for the year previous.

There has been more sickness among the prisoners than in the year 1885-86, and there have been 3 deaths.

CRIME AND POLICE.

14. There have been 2 cases of murder and 5 of culpable homicide not amounting to murder.

Eighteen cases of robbery are shown and one of daktaiti; house-breaking appears to be on the increase.

There has not been a case of capital punishment, but 3 persons have been sentenced to imprisonment for life.

No cases of infanticide appear.

15. The Police have, it is considered, done their duties fairly, but unless the amount of property stolen has been exaggerated their success in recoveries has not been great, as out of a total of 36,848 only 13,347, or about 36 per cent., has been recovered.

STUD STABLES.

16. The Government stallion Wild Buck is still in these stables and was sire to 9 new foals, of whom 4 died; 8 mules have been dropped during the year.

Judging from the starved appearance of most of the animals, I am afraid false economy has been introduced into the management.

TRADE.

(*Vide* Statement E.)

17. The volume of trade has been above average, that in opium and cloth has been less, while the trade in grain has expanded somewhat.

The transactions in salt have been much as usual. No cases of smuggling have been reported.

BOUNDARIES.

18. No boundary cases have been settled during the year.

MAYO COLLEGE.

19. The four young gentlemen mentioned in last year's report continue as pupils at the Mayo College. Their studies were interfered with by their attendance being required at the prolonged ceremonies connected with His Highness the Maharaj Rana's marriage.

POLITICAL AGENT'S TOUR.

20. Having only rejoined my appointment in the middle of the cold weather and for other causes, I was able to make but a three weeks' tour, when the eastern parganas and the district of Shahabad were visited.

STATEMENT A.

जुहालरापटान,
The 13th June 1887.

H. B. ABBOTT, Lieut. Colonel,
Political Agent, Jhallawar.

BIKANIR AGENCY REPORT FOR 1886-87.

No. 11-P., dated Bikanir, the 14th May 1887.

From—CAPTAIN A. P. THORNTON, *Officiating Political Agent, Bikanir,*
To—*The First Assistant Agent to the Governor-General, Rajputana.*

I have the honour to submit the Annual Administration Report of the Bikanir Agency for the year 1886-87. I assumed charge of this appointment on the 5th March 1887, and my report has therefore been compiled almost entirely from the correspondence in my office. The appointment was held for the remainder of the year under review by Major Talbot.

SARDARS.

2. There is nothing calling for special mention. Rawat Ranjit Singh, the Pattadar of Rawatsar, died during the year, and was succeeded by his son Hukm Singht. The question of payment of Hukmuama, or succession fee, has not yet been settled. The one case of Rekh, *viz.* that of Nokha mentioned in last year's report, was decided by the Special Committee and has been submitted to the Agent to the Governor-General along with the other cases decided by the Committee.

ADMINISTRATION.

3. No change has taken place in the personnel of the Council.

4. The Customs Department has been under the supervision of Seth Nemi Chand. A tax known as the Dhunwa and Rakhwali-baeh which brought in about R18,000 annually was abolished during the year. It was levied in some of the district towns and villages with no regularity of incidence on Sahukars and artizans and the poorer classes, in some places every year and in others every third year. It was formerly levied in the city of Bikanir, but was afterwards remitted and included in many of the new settlements with Zemindars in the revenue they pay to the state. In towns, however, it still existed, and as in view of its remission elsewhere and of the increased customs payments now made by their inhabitants, its retention was thought unnecessary.

5. There have been 123 applications for compensation for loss of privileges, including 79 of last year; 32 have been settled for an annual payment of R6,700-4-0, 10 have been rejected, and 81 have still to be decided. The following are the sums awarded:—

| | R | a. | p. |
|------------------------------------|-------|----|----|
| Rajput Sirdars | 2,903 | 0 | 0 |
| Zenana | 625 | 0 | 0 |
| Charans | 540 | 0 | 0 |
| Prohibits of 14 villages | 1,698 | 4 | 0 |
| Temples, Swamis, &c. | 934 | 0 | 0 |

6. The measurement by chain of Khalsa land has been completed. In all 56,33,340 bighas of land were measured at a cost of R13,500-0 or about half a pie per bigha; 113 new "Chaks," or plots of land, have been formed in the waste land of the Khalsa villages and allotted to applicants from other territory on agreement to cultivate. It was hoped that 1,200 new "Gawaris," or households, would be induced to settle in them, but the new comers have not been successful in this respect owing to scanty rainfall and the consequent diminution of cultivation; however, about one-third of the expected number of "Gawaris" have settled. In seven villages new pucca wells have been dug in the state and three have been repaired; a "Kund" has been constructed at Dungan Singhpura; some Sahukars have also applied for land to make "Kunds" for the benefit of the public; 8 old tanks of considerable size have been cleaned and deepened; the new settlers in the "Chaks" have also dug 33 tanks and 17 katcha wells during the year, and next year, if good rain falls, they will dig more under the terms of their agreements. The settlement of these "Chaks," as well as the current revenue work of the state, were carried out by Munshi Sohan Lal with his usual industry and success.

7. No orders have as yet been published by the Punjab Government on the scheme for the better utilization of the water in the Ghaggar river; this delay is the more to be regretted, as owing to scanty rainfall during the past two years the cultivators of the Bikanir parganas interested in the matter have suffered and are suffering great loss and hardships from want of water, whilst immediately across the border in British territory the flood water of the Ghaggar has collected in large quantities in natural depressions of the country to the actual detriment of the crops of adjoining villages.

WEATHER AND CROPS.

8. The following table shows the rainfall in the several Tahsils of Bikanir :—

| | Inches. | Cents. |
|-----------------------|---------|--------|
| Bikanir | 8 | 30 |
| Lunkaransar | 12 | 57 |
| Sujangarh | 17 | 16 |
| Dungargarh | 1 | 5 |
| Ratangarh | 9 | 58 |
| Rajgarh | 5 | 26 |
| Churu | 6 | 59 |
| Bahadra | 11 | 45 |
| Sardarshehr | 0 | 80 |
| Nohar | 6 | 18 |
| Hanumangarh | 5 | 90 |
| Suratgarh | 6 | 60 |

The rainfall was below the average throughout the state, the parganas of Hanumangarh, Nohar, Suratgarh, and Anupgarh have suffered most. The first burst of the monsoon in the months of June and July induced people to plough and sow their fields, but owing to the deficiency of rainfall in the months of August and September, when it was most necessary for the development of the grain, the crops all withered, except in a few places, where rain fell. In the parganas of Sardarshehr, Sujangarh, Ratangarh, and a portion of Dungargarh, where the rainfall was of average amount, there is sufficient grain and fodder, but in Bahadra, Rajgarh, Bikanir, Lunkaransar, and the rest of Dungargarh, where the fall has been below the average there will be some scarcity, the people of Hanumangarh, Suratgarh, Nohar, and Anupgarh, where the harvest was insufficient, will have to purchase grain from other places. There is, it is believed, sufficient fodder in stock except in Hanumangarh, the people of which place have taken their cattle to other places according to custom.

CONDITION OF THE RYOTS.

9. The condition of the cultivating class is fairly good, except in the tehsils of Hanumangarh, Suratgarh, Anupgarh, and a portion of Nohar, where, owing to the scanty rainfall of the last two years, the supply of grain and grass is insufficient. Recoveries on account of grain advanced to distressed cultivators by the Darbar have been deferred until next year, and a remission of revenue demand to the amount of R25,000 has also been granted in the villages abovenamed. The collection of Rakan from Pattadars whose villages have suffered has likewise been postponed till next year. In the Tibi pargana takavi advances have been made to the ryots for the purchase of seed grain and, where necessary, work has been provided for the labouring classes.

ENSILAGE EXPERIMENT.

10. In some places, in the Hanumangarh and Suratgarh parganas, silos have been dug and stocked with green grass; they will be opened in the beginning of this year, and it is hoped with good results.

FINANCE.

11. I append a statement of receipts and expenditure for Sambat 1942; it shows a total income of R19,14,261-14-9, with an expenditure of R16,10,986-8-3, and a balance of R3,03,275-6-6 at the close of the year.

The enquiry into the liabilities of the state was completed and the debt extinguished by a total disbursement of R5,46,488. With the consent of His Highness the Maharaja a committee has been appointed to investigate and report on the indebtedness of the Thakurs.

WORKING OF THE COURTS—CIVIL CASES.

12. In the Nizamats there were 90 cases pending and 1,045 instituted during the year; decrees were given in 640 and 177 were dismissed; in 180 instances the dispute was either settled by Razinama, or arbitration, and only 74 cases were pending at the close of the year. In the Tahsils 296 cases were pending and 2,050 were instituted; decree was given in 1,371 and 452 were dismissed, 243 cases were settled by arbitration and razinama, leaving 225 cases pending at the close of the year:

CRIMINAL CASES.

13. In the Nizamats 215 cases were pending at the beginning of the year: 1,782 were instituted; 1,826 were disposed of, leaving 171 pending at the close of the year. The Tahsils had to deal with 3,061 cases, of which 2,827 were disposed of, and 234 remained, pending: Punishment was awarded in 931 cases, this proportion to the number of complaints (*viz.* 5,058).

instituted in the Nizamats and Tahsils is very small, but that of persons punished to those arrested, *viz.*, 1,348 out of 2,602, is a fair one; the amount of property plundered is smaller this year than last.

REVENUE CASES.

14. The Nizamats and Tahsils had to deal with 7,062 cases and 971 were pending on the 1st April 1887.

15. The Council confirmed the decision in 7 civil cases, but, out of 20 criminal cases, confirmed the sentences in 11 and modified it in 7, 1 case was transferred and 1 is still pending. In appeal they had 102 civil cases before them, the decisions were upheld in 58, modified in 13 and reversed in 16, and 15 civil appeals are still pending; they had to deal with 103 criminal appeals, of which they confirmed sentences in 67, reversed it in 22, and modified it in 10, 12 cases were transferred and 2 appeals are still pending. On the revenue side the number of appeals was 79; 45 of the decisions were upheld, 9 reversed, 9 modified, 2 were transferred, and 14 are still pending. There were 94 appeals from the Thakurs' Court, of which decisions were upheld in 66, reversed in 10, and modified in 6 instances, and 12 cases are still pending.

IJLAS KHAS.

16. The Ijlas Khas had no cases for confirmation, but there were 20 civil appeals, of which decision was upheld in 14 cases and 6 are still pending. On the criminal side decision was upheld in 14 and modified in 1, and 1 case is still pending.

The revenue appeals were 34, of which decision was confirmed in 28 and modified in 1 case, 5 appeals are still pending. From the Thakurs' Court 41 appeals were received, and decision was upheld in 33 and modified in 1 case, 7 cases; are still pending.

THAKURS' COURT.

17. This court had to deal with 278 cases, of which 210 were disposed of and 68 transferred to the Sadar Nizamat Court. This court was abolished from the 1st January 1887, and its President, Pandit Kalka Pershad, appointed Nazim of the Sadar Nizamat at Bikanir.

SPECIAL COMMITTEE.

18. The files of the Special Committee cases were returned to this office by the Maharaja with His Highness's opinion on each, and the cases in which His Highness differed with the Political Agent were submitted for the orders of the Agent to the Governor-General.

DISPENSARIES.

19. Branch dispensaries were opened at Ratangarh, Sardarshehr, and Churu: there are now six district dispensaries and one head-quarter dispensary. Dispensary buildings are ready for occupation at Nohar, Bahadra, Hanmangarh, and Rajgarh, and a second city dispensary will be opened shortly; the delay in opening the above dispensaries is caused by the great difficulty in procuring the services of properly qualified Hospital Assistants. The head-quarter dispensary buildings have been greatly added to and improved, and will now accommodate 22 patients in the male wards, 7 patients in the female wards, 4 patients in the ward for infectious diseases: in all 33 beds. During the year ending 31st December 1886, 574 in-patients and 19,274 out-patients were treated in the whole state, which gives an increase of 471 in-patients over the year 1885 and an increase of 507 over the average of the five preceding years, and for out-patients an increase of 12,361 over 1885 and an increase of 14,810 over the five previous years: 137 major operations were performed during 1886 with a total of 4 deaths—2.9 per cent. deaths from operation.

The following table shows the amount of progress made in the medical administration of the state during the years 1882 to 1886:—

| YEARS. | Number of Dispensaries. | NUMBER OF PATIENTS. | | Major Operations. | Vaccination. | Annual Number of vaccinations. | Ratio per 1,000 of population vaccinated. |
|----------------|-------------------------|---------------------|----------|-------------------|--------------|--------------------------------|---|
| | | Indoor. | Outdoor. | | | | |
| 1882 | 1 | 56 | 3,266 | 10 | 320 | ... | } 1:1 |
| 1883 | 1 | 46 | 4,014 | 16 | 223 | ... | |
| 1884 | 1 | 43 | 6,081 | 13 | 380 | ... | |
| 1885 | 4 | 123 | 6,013 | 28 | 2,270 | ... | |
| 1886 | 7 | 574 | 19,274 | 137 | 10,308 | ... | 17:2 |

VACCINATION.

20. The Vaccination Establishment was increased to 1 Native Superintendent and 8 vaccinators. Ten thousand three hundred and eight individuals were vaccinated during the year at a cost of 1 anna 8 pies each.

SANITATION.

21. The city conservancy is undoubtedly progressing, the city is cleaner, the sweepers are more active in their work, and the city inhabitants now complain if the filth, &c., is not removed and are gradually beginning to understand the benefit to be derived from efficient conservancy and to help the men in keeping the city clean: a great deal yet remains to be done, and it is hoped that the conservancy staff will by degrees do better work year by year.

There was very little tank water available during the past year, steps are being taken to provide a larger supply of well water by steam-power from a large well outside the city.

HEALTH.

22. Cholera broke out in the middle of November but only slight; it was brought from the Pokhur fair; there were 5 cases in Bikanir city, with 1 death: 23 cases at Ratangarh, with 4 deaths. At the latter end of December cholera appeared in the Sujangarh tahsil, but no genuine cases were seen by the Hospital Assistant, who was sent to attend on them: numerous cases undoubtedly occurred in the Sujangarh district, and a good many people died from cholera, but no authentic cases were seen by the Civil Surgeon or his Hospital Assistant except those noted above.

23. Surgeon P. D. Pank, I.M.S., continued in medical charge of the Agency: he went on 3 months' privilege leave from 16th September to 13th December 1886, and was unable to go out into camp or to visit the district dispensaries or to inspect the vaccination work on account of the indisposition of His Highness the Maharaja on whom he attended from the end of December 1886 to end of February 1887. The excellent work done by this most zealous and able officer is evidenced by the great progress effected in the development of medical institutions during the year, whilst the large increase of applicants for relief and in the number of important surgical cases brought for operation testify to the confidence of the people in his skill.

JAIL.

24. There are in the jail 303 prisoners, of whom 18 are females and 1 juvenile, in the proportions of 230 Hindus and 73 Muhammadans. During the year 1886 there were 284 admissions to hospital and only 2 deaths, a death-rate of 23 per cent. The jail accommodation has been increased and is now sufficient for 192 male, 18 female and 3 under-trial prisoners = 213.

The improvement in Jail discipline and management has greatly improved under Head Jailer Heera Singh. The jail populations are very healthy and comfortable and are engaged in regular and profitable labour both inside and outside the jail.

INFANTICIDE.

25. There were no cases of infanticide during the year under review.

BOUNDARY DISPUTE.

26. There were no fresh cases instituted during the year, the sinking of the well at Bhojawas mentioned in paragraph 36 of last year's report could not be completed within the period allowed by the settlement owing to the presence of rock, the Bikanir Darbar, therefore, asked for an extension of the period to a further term of one year, and through the good offices of the Resident, Western Rajputana States, the Marwar Darbar have agreed to extend it for six months.

POST OFFICES.

27. Eight new Post Offices have been opened at Rajgarh, Nohar, Bahadra, Suratgarh, Hanumangarh, Rajildesar, Deshnook and Chapar, and permission has been given to open a village post office at Ratanagar situated between Ramgarh of Jaipur and Churu of Bikanir. In October 1886 the Deputy Post Master General, Rajputana, wrote that the lines opened in Bikanir were working at a heavy loss, and that unless the Bikanir Darbar agreed to exchange mails every alternate day instead of daily, it will be necessary to close the offices at Bahadra, Hanumangarh, and Suratgarh. The Darbar, being anxious for the permanent maintenance of the offices, agreed to the proposal.

SCHOOLS.

28. The school at Bikanir is largely attended, the average daily attendance during the year was 201.4. The English class contains 81. The Urdu 64 and the Hindi 272 boys. Two

new schools have been opened at Hanumangarh and Churu, and His Highness the Maharaja has also signified his intention to build a girls' school at Bikanir in honour of the Queen's Jubilee.

MAYO COLLEGE.

29. There are at present 6 boys in the College, *viz.*, Kanwars Dip Singh of Garhsisar and Abhey Singh of Rajpura, Thakurs Satak Singh of Jasana, Hari Singh of Sidmukh and Hari Singh of Mahajan, and Rawat Hukm Singh of Rawatsar. During the year under report R1,170 have been spent on repairs, &c., to the Bikanir residence and out-houses, R100 towards deepening a well which supplied water to the Bikanir residence and R100 for illuminating the Bikanir boarding-house and supplying fireworks on the occasion of the Queen's Jubilee. His Highness has also subscribed R600 towards institution of a prize for proficiency in Hindi.

MAHARAJA'S HEALTH.

30. His Highness the Maharaja's health has been good, except for a slight indisposition from a carbuncle in August 1886.

In December 1886 His Highness believed himself to be suffering from a complication of disorders, and Doctor Pank, the Agency Surgeon, who had then just returned from leave and arrived at Sujangarh with the intention of starting on his annual tour of inspection, altered his plans and came to Bikanir to see His Highness: he examined the Maharaja medically and found that His Highness was not suffering from any disease of a serious nature, but that all he required was an ordinary amount of regular exercise and proper diet to bring himself into a state of good health. His father Maharaj Lal Singh is in a very precarious state: he suffers from partial paralysis and rheumatism.

Kaki Chandjerji, an aunt of the Maharaja, died during the year.

QUEEN'S JUBILEE.

31. The Jubilee of Her Majesty Queen Victoria, Empress of India, was celebrated with great éclat. Early on the morning of the 16th February an Imperial salute of 101 guns was fired, at noon the Maharaja held a Darbar at the palace at which the Sardars present at the capital, the officials and principal inhabitants of the city were assembled, the Political Agent, the Agency Surgeon and the Members of the Political Agent's Office being also present; when the Darbar broke up the Sardars and officials paid a visit to the Political Agent at the Residency whence the Council proceeded to the Jail, where 30 prisoners representing 10 per cent. of those in confinement were released and a remission of one month in every year of unexpired sentences of well-conducted prisoners was announced. In the afternoon cooked food, rice, and sweetmeats were distributed to the boys in the school and the prisoners in the jail, and to a large number of the poor; 400 yards of cloth were also given to blind, crippled, and destitute persons. In the evening the Palace, the Residency, and Darbar buildings and the city were illuminated, and an entertainment, followed by a display of fireworks, was given by His Highness at the Palace. Orders were also issued that the 16th and 17th of February should be everywhere observed as public holidays; that Imperial salutes should be fired at all head-quarters of districts; food distributed in charity, prisoners released in the same proportion as at Bikanir, and the Darbar buildings illuminated, so that the day might be observed with equal ceremony throughout the state. To commemorate this conspicuous day His Highness announced his intention of devoting one lakh of rupees in providing wells and schools in the state: he has also forwarded a donation of 30,000 rupees to the Imperial Institute and a second donation of 5,000 rupees to the Countess of Dufferin's Fund, the inhabitants of Bikanir contributing a large sum on their own account. His Highness has further signified his intention of building a girls' school at Bikanir and of defraying the cost of a pupil at the Agra Female Medical School.

RAILWAYS.

32. A preliminary survey by a party under Colonel Nuthall was made during the year for a line of railway from Ajmere *via* Pokhar, Nagaur, and Bikanir to Bhawalpur.

POLITICAL AGENT'S TOUR.

33. The Political Agent was on tour from the 15th November 1886 to the 30th January 1887, during which time he visited Jamalsar, Bithnook, Pungal, Lunkaransar, Nagaur, from which place he joined the Agent to the Governor-General's Camp and marched with it *via* Didwana to Sikar, where he left the Agent to the Governor-General's Camp and marched through the Sujangarh Nizamat to Bikanir, arriving there on the 30th January 1887.

COUNCIL.

34. The Members of the Council have again done excellent work in continuing and consolidating the reforms detailed in previous Administration Report. In recognition of the meritorious services of Dewan Amin Mahomed he was invested by His Excellency the Viceroy and Governor-General on the 19th February last with the title of Khan Bahadur as a personal distinction.

OFFICE ESTABLISHMENT.

35. There has been no change in the establishment during the year under review. I have received excellent recommendations from my predecessor regarding all the members of the staff without distinction.

Financial Statement of the Bikanir State for Sambat 1912 (A.D. 1895-96).
